Government of India Notifications, Appointments, Promotions, &c.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Simla, the 2nd October, 1884.

No 17.—The following Statute is published for general information:—

47 & 48 Vict., Chapter 38.

An Act to provide for the regulation of Her Majesty's Indian Marine Service. [28th July, 1884.]

Whereas a marine establishment, called Her Majesty's Indian Marine Service, is employed under the direction of the Governor General of India in Council for the transport of troops, the guarding of convict settlements, the suppression of piracy, the survey of coasts and harbours, the visiting of lighthouses, the relief of distressed or wrecked vessels, and other local objects, and is maintained out of the revenues of India:

And whereas the members of Her Majesty's Indian Marine Service are not subject either to the Naval Discipline Act, 1866, or to the Merchant Shipping Act, 1854, and Acts amending it, or to any corresponding law made, enacted, or in force under the authority of the Government of India, and it is expedient that the Governor General of India in Council should have power to make laws for the purpose of maintaining discipline in that service:

Be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

Short title.

1. This Act may be cited as the Indian Marine Service Act, 1884.

Power for Governor General in Council to make laws for Indian Marine Service.

2. The Governor General of India in Council shall have power, subject to the provisions contained in the Indian Councils Act, 1861, as amended by subsequent Acts, at meetings for the purpose of making laws and regulations, to make laws for all persons employed or serving in or belonging to Her Majesty's Indian Marine Service: Provided as follows,

(*a*) a law made under this section shall not apply to any offence, unless the vessel to which the offender belongs is at the time of the commission of the offence within the limits of Indian waters as defined by this Act:

(*b*) the punishments imposed by any such law for offences shall be similar in character to, and shall not be in excess of the punishments which may at the time of making

the law be imposed for similar offences under the Acts relating to Her Majesty's Navy, except that in the case of persons other than Europeans or Americans imprisonment for any term not exceeding fourteen years, or transportation for life or any less term, may be substituted for penal servitude.

Definition of Indian waters.

3. For the purposes of this Act the expression "Indian waters" includes the high seas between the Cape of Good Hope on the west and the Straits of Magellan on the east, and all territorial waters between those limits.

Effect and judicial notice of laws made under Act.

4. A law made under this Act shall, until the Governor General makes known that he has received a notification of the disallowance thereof by Her Majesty, or until the repeal thereof, be, subject to the provisions of this Act, of the same force and effect as an Act of Parliament, and shall be taken notice of by all courts of justice in the same manner as if it were a Public Act of Parliament.

Restriction on or power to make law imposing sentence of death.

5. Nothing in this Act shall authorise the Governor General in Council, without the previous approval of the Secretary of State for India in Council, to make any law whereby power is given to any court other than the High Courts established under the Act of the session held in the twenty-fourth and twenty-fifth years of Her Majesty, chapter one hundred and four, "for establishing High Courts of Judicature in India," to sentence to the punishment of death any of Her Majesty's natural-born subjects born in Europe, or any child of any such subject.

Placing of vessels, officers, and men of Indian Marine Service under Naval Discipline Acts in time of war.

6. In case a state of war exists between Her Majesty and any foreign power, it shall be lawful for Her Majesty by Proclamation or Order in Council to direct that any vessel belonging to Her Majesty's Indian Marine Service and the men and officers from time to time serving thereon shall be under the command of the senior naval officer of the station where for the time being such ship may be. And while any such vessel is under such command such vessel shall be deemed to all intents a vessel of war of the Royal Navy, and the men and officers from time to time serving in such vessel shall be under such Naval Discipline Act or Acts as may be in force for the time being and subject to such regulations as may be issued by the Lords Commissioners of the Admiralty, with the concurrence of the Secretary of State for India in Council.

D. FITZPATRICK,
Secretary to the Government of India.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 26th September, 1884, and is hereby promulgated for general information :—

ACT No. XV OF 1884.

An Act for the validation of certain licenses to solemnize Marriages granted to Ministers of Religion under Act XXV of 1864.

WHEREAS by section 4 of Act XXV of 1864 (*to provide further for the solemnization of Marriages in India of persons professing the Christian Religion*) it was enacted that, from and after the first day of July, 1864, certain Governments therein named should have authority to grant licenses to ministers of religion to solemnize marriages within the territories subject to such Governments respectively;

And whereas, in exercise of the authority so conferred, the Governments therein named granted licenses to certain ministers of religion to solemnize marriages;

And whereas Act XXV of 1864 was repealed by Act V of 1865 (*to provide for the solemnization of Marriages in India of persons professing the Christian Religion*);

And whereas by section 9 of the latter Act it was enacted that, from and after the commencement of that Act, all marriages which should be solemnized in India otherwise than in accordance with the provisions of the fifth and sixth sections of that Act should be null and void;

And whereas by section 6 of the same Act it was enacted that marriages might be solemnized in India by (among other persons) any minister of religion who, under the provisions of that Act, had obtained a license to solemnize marriages;

And whereas Act V of 1865 was repealed by the Indian Christian Marriage Act, 1872; [XV of 1872.]

And whereas by section 4 of the latter Act it is enacted that every marriage between persons, one or both of whom is a Christian or Christians, shall be solemnized in accordance with the provisions of the next following section; and that any such marriage solemnized otherwise than in accordance with such provisions shall be null and void;

And whereas by the next following section of the same Act it is enacted that marriages may be solemnized in India by (among other persons) any minister of religion licensed under the same Act to solemnize marriages;

And whereas neither in Act V of 1865 nor in the Indian Christian Marriage Act, 1872, was there or is there any provision either saving licenses granted under Act XXV of 1864 or permitting a marriage to be solemnized by a minister of religion who had obtained a license to solemnize marriages under Act XXV of 1864 only; [XV of 1872.]

And whereas certain marriages have been solemnized both while Act V of 1865 was in force and since the passing of the Indian Christian Marriage Act, 1872, by ministers of religion who had obtained licenses to solemnize marriages under Act XXV of 1864, but had never obtained licenses to solemnize marriages under Act V of 1865 or the Indian Christian Marriage Act, 1872, as the case may be, and doubts have therefore arisen as to the validity of such marriages; [XV of 1872.] [XV of 1872.]

And whereas it is expedient to remove such doubts and to declare the continued validity of licenses to solemnize marriages granted to ministers of religion under Act XXV of 1864;

It is hereby enacted as follows:—

Validation of licenses to solemnize marriages granted to ministers of religion under Act XXV of 1864.

1. A license to solemnize marriages granted to a minister of religion under Act XXV of 1864 shall be deemed, if in force on the date on which Act V of 1865 came into force, to have been, while that Act was in force, a license granted under that Act, and, if in force on the date on which the Indian Christian Marriage Act, 1872, came into force, to have been since that Act came into force, and to be, a license granted under that Act. [XV of 1872.]

D. FITZPATRICK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 3rd October, 1884, and is hereby promulgated for general information:—

ACT No. XVI OF 1884.

An Act to provide more effectually for the suppression of certain forms of Gaming in British Burma.

WHEREAS it is expedient to provide more effectually for the suppression of certain forms of gaming in British Burma; It is hereby enacted as follows:—

Short title, extent and commencement.

1. *(1)* This Act may be called the Burma Gaming Act, 1884.

(2) It extends to all the territories for the time being under the administration of the Chief Commissioner of British Burma; and

(3) It shall come into force at once.

Application of Act III of 1867 to game of *ti* and like games.

2. *(1)* Taking part in the game of "*ti*," or in any other game or pretended game of a like nature, shall be deemed gaming and playing within the meaning of Act III of 1867.

(2) Every house, walled enclosure, room or place, whether public or private, where any such game or pretended game is carried on, shall, for the purposes of that Act, be deemed a common gaming-house, and all expressions referring to the use of any such house, enclosure, room or place as a common gaming-house shall include the use thereof for any such game or pretended game on a single occasion.

(3) All boxes, receptacles, lists, papers, tickets and forms used for the purpose of any such game or pretended game shall be deemed instruments of gaming within the meaning of the said Act.

Penalty on conducting game of *ti* and like games.

3. Whoever conducts or assists in conducting the game of "*ti*," or any other game or pretended game of a like nature, as manager, stakeholder or *daing*, or who is according to the rules of the game or pretended game entitled to receive the surplus proceeds, or any part of the surplus proceeds, of the stakes, after deducting the amount payable to the successful player or players, or who promotes the game or pretended game by soliciting or collecting stakes or otherwise, shall be punished with imprisonment for a term which may for a first offence extend to six months, and for a subsequent offence to two years, or with fine, or with both.

Power to extend local application of Act III of 1867 within British Burma.

4. *(1)* The Chief Commissioner may, from time to time, by notification published in the official Gazette, extend to the whole or any part of the territories for the time being under his administration any such of the provisions of Act III of 1867 as do not for the time being extend thereto.

(2) From the date of any such extension so much of any rule having the force of law in operation in the territories to which the extension is made as is inconsistent with or repugnant to any provision so extended shall cease to have effect in those territories.

Power to invest 2nd class Magistrate with powers under Act III of 1867, section 5.

5. The Local Government may authorize any Magistrate of the second class to exercise the powers conferred by section 5 of Act III of 1867 on the Magistrate of the District.

Amendment of Act III of 1867, section 13.

6. In section 13 of Act III of 1867—

(*a*) for the words "public street, place or thoroughfare," where they first occur, the words "street or thoroughfare or place to which the public have access" shall be substituted; and

(*b*) in the last clause, for the words "such public place" the words "such place" shall be substituted.

Power to arrest without warrant.

7. A police-officer may arrest without warrant any person soliciting or collecting stakes for the game of *ti*, or any other game or pretended game of a like nature, in any street or thoroughfare or place to which the public have access.

Power to demand security.

8. Whenever a District Magistrate, Sub-divisional Magistrate or, when he is specially empowered in this behalf by the Local Government, a Magistrate of the first class receives information that any person within the local limits of his jurisdiction earns his livelihood, wholly or in part, by carrying on, or assisting in carrying on, the game of *ti*, or any other game or pretended game of a like nature, he may deal with such person as nearly as may be as if the information received about him were of the description mentioned in section 110 of the Code of Criminal Procedure; and for the purposes of any proceeding under this section the fact that a person earns his livelihood as aforesaid may be proved by evidence of general repute or otherwise.

X of 1882.

Burial and Burning Places.

80. Powers in respect of burial and burning places.
81. Removal of corpses.

Inflammable Materials.

82. Inflammable materials.

Powers of Entry and Inspection.

83. Inspection of drains, privies and cesspools.
84. Power to enter and inspect buildings, &c.
85. Other powers of entry on buildings or land.
86. Power to enter for discovery of vehicles or animals liable to taxation.
87. Power to inspect places for sale of food or drink, &c., and to seize unwholesome articles exposed for sale.
88. Power of entry for purpose of scavenging.
89. Precautions to be observed in entering dwelling.

Water-pipes, Privies and Drains.

90. Troughs and pipes for rain-water.
91. Provision of privies, &c.
92. Repair, alteration and closing of drains, privies and cesspools.
93. Unauthorized buildings over drains, &c.
94. Removal of latrines, &c., near any source of water-supply.
95. Power to require drainage, &c., of unwholesome tanks, &c.

Dangerous Buildings and Places.

96. Power to require buildings, wells, tanks, &c., to be secured.
97. Buildings, &c., in ruinous or dangerous state.

Buildings and Grounds in unsanitary Condition.

98. Power to require owner to clear away noxious vegetation.
99. Power to trim hedges and trees bordering on streets, wells, &c.
100. Cleansing of filthy buildings or land.
101. Power to prohibit use for human habitation of buildings unfit for such use.
102. Power to require untenanted buildings becoming a nuisance to be secured or enclosed.
103. Cultivation, use of manure or irrigation injurious to health, after prohibition.

Offensive and Dangerous Trades.

104. Regulation of offensive and dangerous trades.
105. Power to prohibit such trades.

Power to make Rules.

106. Power to make rules.
107. Penalty for infringement of rules.
108. Confirmation of rules.

Supplemental.

109. Execution of acts required to be done by any notice.
110. Recovery of costs of execution.
111. Compensation out of municipal fund.
112. Appeals against certain orders of committee.

CHAPTER VII.

OFFENCES AFFECTING THE PUBLIC HEALTH, SAFETY OR CONVENIENCE.

SECTIONS.

113. Depositing or throwing earth or materials or refuse, rubbish or offensive matter on roads or into drains.
114. Throwing corpse or carcass into river, &c.
115. Discharging sewage.
116. Non-removal of filth, &c.
117. Making or altering drains without authority.
118. Penalty for making or keeping latrines, &c., near any source of water-supply.
119. Keeping animals in disregard of orders.
120. Feeding animals on deleterious substances.
121. Driving vehicles without proper lights.
122. Discharging fire-arms, &c.
123. Suffering dogs to be at large.
124. Altering, obstructing or encroaching upon streets, &c.
125. Quarrying, blasting, cutting timber or building.
126. Penalty on exposure of infected persons and things.
127. Penalty on failing to provide for disinfection of public conveyance.
128. Picketing animals and collecting carts.
129. Keeping corpses or carrying corpses by prohibited routes or so as to cause annoyance.
130. Destroying direction-posts, lamp-posts, &c.
131. Penalty for disobedience to orders of committee under last chapter.
132. Prosecution to be suspended in certain cases.

CHAPTER VIII.

CONTROL.

133. Control by Commissioner and Deputy Commissioner.
134. Power to suspend action under Act.
135. Extraordinary powers of Deputy Commissioner in case of emergency.
136. Powers of Local Government in case of default of committee.
137. Power of Local Government to supersede committee in case of incompetency, persistent default or excess or abuse of powers.
138. Disputes.
139. Annual reports and statements.
140. Estimates of receipts and expenditure.
141. Sanction to works.
142. Powers of Commissioner.
143. Additional power of Local Government to frame forms and make rules.

CHAPTER IX.

SUPPLEMENTAL.

Criminal Procedure.

144. Powers and duties of police in respect of offences against Act and rules, and assistance to municipal authorities.
145. Prosecutions.
146. Member not to be deemed interested in prosecution.
147. Saving of prosecutions under other laws.

Rules.

148. Procedure for making rules under section 7, 48, 106 or 143.
149. Continuance of existing rules.

SECTIONS.

Recovery of Money.

150. Recovery of money.

Notices.

151. Authentication, service and validity of notices.
152. Mode of giving notice to owner or occupier of property.
153. Publication of public notices.

Alteration of Municipal Limits.

154. Notification of intention to alter limits of municipality.
155. Alteration of limits of municipality.
156. Effect of exclusion of local area from municipality.
157. Effect of including local area in municipality.

Powers to except Municipalities from Provisions of Act.

158. Power to except municipality from provisions of Act unsuited thereto.

Miscellaneous.

159. Saving of Act XI of 1879.
160. Powers of Governor General in Council and of Local Government exerciseable from time to time.
161. Decision of questions as to whether persons are "inhabitants."

An Act to amend the law relating to Municipalities in British Burma.

WHEREAS it is expedient to amend the law relating to Municipalities in British Burma; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title, local extent and commencement.

1. *(1)* This Act may be called the Burma Municipal Act, 1884.

(2) It extends to the territories for the time being under the administration of the Chief Commissioner of British Burma; and

(3) It shall come into force on such date as the Local Government may, by notification in the official Gazette, appoint in this behalf.

Definitions.

2. In this Act, unless there is something repugnant in the subject or context,—

"municipality" means a local area declared under Chapter II to be a municipality;

"inhabitant" includes any person ordinarily residing or carrying on business, or owning or occupying immoveable property, in any local area which is declared to be a municipality under this Act or which the Local Government has by notification proposed to declare a municipality under this Act; and

"street" means any street, road, thoroughfare, passage or place over which the public have a right of way; and includes the surface-soil and sub-soil of any such street, and the footway and drains of any such street, and any bridge, culvert or causeway forming part of any such street.

Burma Municipal Act, 1884.
(Chapter II.—Constitution of Municipalities.—Sections 3-5.)
(Chapter III.—Organization of Municipal Committees.—Sections 6-9.)

CHAPTER II.

CONSTITUTION OF MUNICIPALITIES.

Proposal to create municipality.

3. *(1)* The Local Government may, by notification published in the official Gazette and in such other manner as the Local Government may determine, propose to declare any town, or any group of towns in the immediate neighbourhood of one another, a municipality under this Act.

(2) Every notification under this section shall define the limits of the town or group of towns to which it refers, and may include within those limits any railway-station, village, building or land in the vicinity of any such town:

Provided that it shall not, without the previous consent of the Governor General in Council, so include any part of a military cantonment.

Creation of municipality.

4. *(1)* Any inhabitant of a local area in respect of which a notification has been published under section 3 may, if he objects to anything therein contained, submit his objection in writing to the Local Government within six weeks from the publication of the notification in the Gazette, and the Local Government shall take his objection into consideration.

(2) When six weeks from the publication of the notification in the Gazette have expired and the Local Government has considered the objections (if any) which have been submittted under sub-section (*1*), the Local Government may, by a notification in the official Gazette, declare the local area to be a municipality under this Act.

Application of Act to existing municipalities.

5. *(1)* The Local Government may, by notification in the official Gazette, declare any local area which is a municipality established under the British Burma Municipal Act, 1874, to be a municipality under this Act, and shall, within three months from the date on which this Act comes into force, so declare every such local area, unless, before the expiration of that period,—

VII of 1874.

(*a*) that local area is comprised in some local area declared to be a municipality under section 4; or

(*b*) the Local Government has declared, by a notification in the official Gazette, that the provisions of this Act are unsuited to that local area.

(2) The Local Government may, by the notification issued under this section in respect of any local area, direct that the members and the president and vice-president of the committee for that local area appointed *ex officio*, by nomination and by election under the said British Burma Municipal Act, 1874, and then in office, shall, on and from a day fixed by the notification, be deemed respectively to have been appointed by virtue of an office and by name and elected under this Act as members, president and vice-president of a municipal committee for the local area, and shall hold office as such members, president and vice-president for such term as may be fixed by the notification.

VII of 1874

CHAPTER III.

ORGANIZATION OF MUNICIPAL COMMITTEES.

Constitution of Committees.

Committee to consist of elected and appointed members.

6. There shall be established for each municipality a municipal committee having authority over that municipality, and consisting of—

(*a*) so many inhabitants of the municipality as may be determined by the Local Government elected in manner next hereinafter prescribed to represent wards of the municipality or particular classes of the inhabitants; and

(*b*) such person or persons (if any), not exceeding in number one-fourth of the committee, as the Local Government may appoint by name or by virtue of an office in this behalf:

Provided that—

(1) when the circumstances of the municipality are, in the opinion of the Local Government, such as to require it, the Local Government may appoint a larger proportion of, or all, the members of the committee; and

(2) when any places on a committee are required to be filled by election, and a sufficient number of members is not elected, the Local Government may fill those places by appointment.

Power to Local Government to make rules regarding election.

7. *(1)* The Local Government shall, for every municipality in which a system of election is introduced, make rules regulating the following matters, namely:—

(*a*) the division of the municipality into wards, or of the inhabitants into classes, or both;

(*b*) the number of representatives proper for each ward or class;

(*c*) the qualifications of electors and of candidates for election;

(*d*) the registration of electors;

(*e*) the nomination of candidates, the time of election and the mode of recording votes; and

(*f*) any other matters relating to the system of representation and of election for which it may seem expedient to provide.

(2) The Local Government may, after the municipal committee has come into existence as herein, after provided, amend, after consulting the committee, the rules made under this section; but any amendment made under this sub-section shall not take effect until six months after it has been published in the official Gazette.

(3) Elective members of the committee shall be elected in accordance with the rules made under this section and for the time being in force.

Term of office of members.

8. *(1)* A member of a municipal committee, when appointed by virtue of an office, shall, unless and until the Local Government otherwise directs, continue to be a member of the committee while he continues to hold that office.

(2) The term of office of all other elected and appointed members of a committee shall be fixed by the Local Government by rules made under this Act, and may be so fixed as to provide for the retirement of members by rotation, but shall not exceed three years.

(3) An outgoing member may, if otherwise qualified, be again elected or appointed.

Resignation of member of committee.

9. A member of a municipal committee may resign by notifying in writing to the Local Government his intention to do so, and, on his resignation being accepted by the Local Government, he shall be deemed to have vacated his office.

Burma Municipal Act, 1884.
(Chapter III.—Organization of Municipal Committees.—Sections 10-18.)

Removal of member.

10. *(1)* The Local Government may remove any member of a municipal committee who ceases to be an inhabitant of the municipality, or refuses to act, or becomes in the opinion of the Local Government incapable of acting, or is declared insolvent, or is convicted of any such offence, or subjected by a Criminal Court to any such order, as implies, in the opinion of the Local Government, a defect of character which unfits him to be a member, or who without sufficient excuse neglects for more than three consecutive months to be present at the meetings of the committee.

(2) A person removed under this section on any ground except that first mentioned shall be disqualified for election until the Local Government otherwise directs.

Filling of casual vacancies.

11. *(1)* When the place of an elected member of a municipal committee becomes vacant by the resignation or removal of the member, or by his death, a new member shall be elected in manner prescribed under section 7 to fill the place.

(2) When the place of a member of a municipal committee appointed by name becomes vacant as aforesaid, the Local Government may, if it thinks fit, appoint a new member to fill the place.

(3) A person elected or appointed under this section to fill a casual vacancy shall hold office until the person whose place he fills would regularly have gone out of office, and shall then go out of office, but may be again elected or appointed.

Incorporation of municipal committee.

12. Every municipal committee shall be a body corporate by the name of the municipal committee of its municipality, shall have perpetual succession and a common seal, with power, subject to the provisions of this Act, to acquire and hold property, both moveable and immoveable, and to transfer any property held by it, and to contract and to do all other things necessary for the purposes of its constitution, and may sue and be sued in its corporate name:

Provided that a committee shall not transfer any immoveable property except in pursuance of a resolution passed at a special meeting and approved by the Local Government.

Time for committees coming into existence.

13. A municipal committee shall come into existence at such time as the Local Government may, by notification in the official Gazette, appoint in this behalf:

Provided that a committee constituted under section 5, sub-section (2), shall come into existence on the day fixed under that sub-section.

Consequences of establishment of municipal committee where municipal committee under Act VII of 1874 exists.

14. When a municipal committee comes into existence under section 13 for a municipality constituted under this Act, and that municipality is or comprises within its limits a local area which is a municipality under the British Burma Municipal Act, 1874, the following consequences shall ensue, namely:—

(a) the said Act shall cease to apply to the local area;

(b) the municipal committee (if any) constituted under that Act for the local area (hereinafter called the old committee) shall cease to exist;

(c) all property vested in the old committee shall for the purposes of this Act vest in the committee constituted under this Act (hereinafter called the new committee), subject to all rights (if any) existing over, and all debts, liabilities and obligations (if any) affecting, that property;

(d) every right and liability belonging to or incurred by the old committee may be enforced by and against the new committee in like manner as it might have been enforced by and against the old committee if this Act had not been passed;

(e) a Government officer employed by the old committee at the time when the new committee comes into existence shall be deemed to be similarly employed by the new committee and shall not be dismissed from that employment without the sanction of the Local Government; and

(f) the new committee shall be substituted for the old committee in all legal proceedings by or against the old committee pending at the time when the new committee comes into existence.

Member of municipal committee to be municipal commissioner.

15. Every member of a municipal committee constituted under this Act shall be deemed to be a municipal commissioner within the meaning of every enactment for the time being in force.

President and Vice-president.

Election of president and vice-president

16. A municipal committee shall, from time to time, at a special meeting, elect one of its members to be president, and may, from time to time, at a like meeting, elect another of its members to be vice-president:

Provided that in such municipalities, if any, as the Local Government may, by notification in the official Gazette, exempt from the operation of this section, the president shall, until the notification is rescinded by a like notification, be appointed by the Local Government from among the members of the committee.

Term of office of president and vice-president.

17. *(1)* The term of office of a president or vice-president shall be one year, and on the expiration of that period he may be again elected or appointed.

(2) Nothing in this section shall affect section 5, sub-section (2).

Casual vacancies in office of president or vice-president.

18. *(1)* If a president elected by a municipal committee or a vice-president dies, ceases to be a member of the committee or resigns his office, the committee shall, at a special meeting, elect another of its members to be president or vice-president.

(2) If a president appointed by the Local Government dies, ceases to be a member of the committee or resigns his office, the Local Government shall appoint another president.

(3) A person elected or appointed under this section to fill a casual vacancy shall hold office

Burma Municipal Act, 1884.
(Chapter III.—Organization of Municipal Committees.—Sections 19-28.)

until the person whose place he fills would regularly have gone out of office, and shall then go out of office, but may, if otherwise qualified, be again elected or appointed.

Notification of Elections, Appointments and Removals.

Notification of appointments, &c.

19. All elections and appointments of presidents and vice-presidents, and all elections, appointments and removals of members, of municipal committees, shall be notified in the local official Gazette, and no such election or appointment shall take effect until it is so notified.

Conduct of Business.

Time for holding meetings.

20. *(1)* A municipal committee shall meet for the transaction of business at least once in every month, at such time as may, from time to time, be fixed by the rules made under section 27.

(2) The president, or, in his absence, the vice-president, may, whenever he thinks fit, and shall, on a requisition made in writing by not less than one-fifth or two of the members of the committee, convene an ordinary or a special meeting at any other time.

Ordinary and special meetings.

21. *(1)* A meeting of a municipal committee shall be either ordinary or special.

(2) Any business may be transacted at an ordinary meeting unless it is required by this Act or the rules made under this Act to be transacted at a special meeting.

Quorum.

22. *(1)* The quorum necessary for the transaction of business at a special meeting of a municipal committee shall be one-half of the whole committee:

Provided that, when the committee consists of less than six members, the quorum shall be three.

(2) The quorum necessary for the transaction of business at an ordinary meeting of a municipal committee shall be such number, not less than three, as may, from time to time, be fixed by the rules made under section 27:

Provided that, if at any ordinary or special meeting of the committee a quorum is not present, the chairman shall adjourn the meeting to such other day as he thinks fit, and the business which would have been brought before the original meeting if there had been a quorum present shall be brought before and transacted by the adjourned meeting whether there is a quorum present thereat or not.

Chairman of meeting.

23. *(1)* At every meeting of a municipal committee the president, if present, shall preside as chairman.

(2) If, when any meeting is held, the office of president is vacant, or the president is absent from the meeting and the vice-president is present, he shall preside as chairman.

(3) In any case not provided for in the foregoing portion of this section, the members present shall elect one of their number to be chairman of the meeting.

Vote of majority decisive.

24. *(1)* Except as otherwise provided by this Act or by any rule made under this Act, all questions coming before any meeting of a municipal committee shall be decided by a majority of the votes of the members present.

(2) In case of an equality of votes, the chairman at the meeting shall have a second or casting vote.

Resolutions to be recorded and published.

25. Every resolution passed by a municipal committee at a meeting shall be recorded in a book kept for the purpose, shall be signed by the chairman of the meeting or of the next ensuing meeting, shall be open to inspection by the public at the municipal office at all reasonable times without charge, and shall be published in some local English or Vernacular newspaper, or in such other manner as the Local Government may direct.

Language of committee.

26. The discussions and proceedings of a municipal committee shall be conducted and recorded either in English or in Burmese, as the committee at a special meeting may, from time to time, decide:

Provided that, if the discussions and proceedings are conducted and recorded in English, the committee shall provide for interpreting and translating them into Burmese for the benefit of members who do not understand English.

Power to make rules as to conduct of business.

27. *(1)* A municipal committee may, from time to time, at a special meeting, make rules consistent with this Act as to—

(a) the time and place of its meetings;

(b) the manner in which notice thereof is to be given;

(c) the quorum necessary for the transaction of business at ordinary meetings;

(d) the conduct of proceedings at meetings, and the adjournment of meetings;

(e) the person or persons to be primarily responsible for the current executive administration and their powers; that is to say, what portion of the executive authority shall be exercised by the president, by the vice-president, by sub-committees, by individual members and by officers or servants of the committee;

(f) the persons by whom receipts may be granted on behalf of the committee for money paid under this Act; and

(g) any other similar matters.

(2) A rule made under clause *(e)* shall not take effect until it has been confirmed by the Local Government, and no rule made under this section shall take effect until it has been published in such manner as the Local Government may direct.

Extraordinary powers of president and vice-president in case of emergency.

28. In cases of emergency the president, or in his absence the vice-president, may direct the execution of any work or the doing of any act, which the committee is empowered to execute or do, and the immediate execution or doing of which is, in his opinion, necessary for the service or safety of the public, and may direct that the expense of executing the work or doing the act shall be paid from the municipal fund:

Provided that—

(a) he shall not act under this section in contravention of any order of the committee passed at a meeting; and

(b) where he acts under this section, he shall report his proceedings to the next following meeting of the committee.

Burma Municipal Act, 1884.
(Chapter III.—Organization of Municipal Committees.—Sections 29-38.)

Joint Committees.

29. A municipal committee may, from time to time, concur with any other municipal committee or cantonment authority, or with more than one such committee or authority, in appointing, out of their respective bodies, a joint committee for any purpose in which they are jointly interested, and in appointing a chairman of the joint committee, and in delegating to any such joint committee any power which might be exercised by either or any of the committees or authorities, and in framing and modifying regulations as to the proceedings of any such joint committee, and as to the conduct of correspondence relating to the purpose for which it is appointed.

Joint committee of two or more committees or cantonment authorities.

Defects in Constitution and Irregularities.

30. Anything done or any proceeding taken under this Act shall not be questioned on account of any vacancy in a municipal committee or joint committee, or on account of any defect or irregularity not affecting the merits of the case.

Vacancies and irregularities not to invalidate proceedings.

Officers and Servants.

31. *(1)* A municipal committee shall, from time to time, at a special meeting, appoint one of its members or some other person to be its secretary, and may at a like meeting remove any person so appointed.

Appointment of secretary.

(2) If a secretary is a member of the committee, he shall receive no remuneration in respect of his services. If he is not a member of the committee, the committee may, with the previous sanction of the Commissioner, assign to him any such pay as it thinks fit.

32. Subject to the other provisions of this Act, and to such rules as the Local Government may make prescribing the qualifications requisite in the case of persons appointed to offices requiring professional skill, a municipal committee may appoint and remove, in addition to its secretary, such other officers and servants as may be necessary or proper for the efficient execution of its duties, and may assign to those officers and servants such pay as it thinks fit.

Employment of other officers and servants.

33. If, in the opinion of the Commissioner, the number of persons employed by a municipal committee as officers or servants, or whom the committee propose to employ as such, or the remuneration assigned by the committee to those persons or any of them, is excessive, the committee shall, on the requirement of the Commissioner, reduce the number of those persons or the remuneration, as the case may be:

Power to prevent extravagance in establishments.

Provided that the committee may appeal against any such requirement to the Local Government, and the decision of the Local Government on any such appeal shall be final.

34. In the case of a Government official, a municipal committee may—

Pensions of Government officials serving the committee.

(1) if his services are wholly lent to it, subscribe for his pension or gratuity and leave-allowances in accordance with the rules of the Government Civil Pension and Leave Codes for the time being in force; and

(2) if he devotes only a part of his time to the performance of duties in behalf of the committee, contribute to his pension or gratuity and leave-allowances in such proportion as may be determined by the Government.

35. In the case of an officer or servant not being a Government official referred to in section 34, a municipal committee may—

Pensions of other officers and servants.

(1) grant him leave-allowances and, if he is employed under the committee appointed under the British Burma Municipal Act, 1874, when this Act comes into force, and is not entitled to pension, or if his monthly pay is less than ten rupees, a gratuity; and

VII of 1874.

(2) if empowered in this behalf by the Local Government—

(a) subscribe in his behalf for pension or gratuity under the rules of the Government Civil Pension and Leave Codes for the time being in force; or

(b) purchase for him from the Government or otherwise an annuity on his retirement:

Provided that no pension, gratuity, leave-allowance or annuity shall exceed the sum to which, under the Government Civil Pension and Leave Codes for the time being in force, the servant would be entitled if the service had been service under Government.

Contracts and Transfers of Property.

36. *(1)* When a contract made by or on behalf of a municipal committee exceeds in value or amount one hundred rupees, it must be in writing, and must be signed by the president or vice-president and at least one other member of the committee.

Mode of executing contracts and transfers.

(2) A transfer of immoveable property belonging to the committee must be made by an instrument in writing, executed by the president or vice-president and by at least two other members of the committee.

(3) If any such contract or transfer is executed or made otherwise than in conformity with the provisions of this section, it shall not be binding on the committee.

37. *(1)* If any member, officer or servant of a municipal committee is, otherwise than with the permission in writing of the Commissioner, directly or indirectly interested in any contract made with the committee, he shall be deemed to have committed an offence under section 168 of the Indian Penal Code.

Penalty on member, officer or servant of committee being interested in contract made with committee.

XLV of 1860.

(2) A person shall not, by reason of being a shareholder in, or member of, any incorporated or registered company, be held to be interested in any contract entered into between the company and the committee, but he shall not take part in any proceedings of the committee relating to any such contract.

Acquisition of land.

38. Where any land, whether within or without the limits of a municipality, is required by a municipal committee for the purposes of this Act or for any other object which it is em-

Acquisition of land under Act X of 1870.

Burma Municipal Act, 1884.
(Chapter III.—Organization of Municipal Committees.—Sections 39-40.)
(Chapter IV.—Taxation.—Sections 41-43.)

powered to carry out under any other enactment for the time being in force, the Local Government may, at the request of the municipal committee, proceed to acquire it under the provisions of the Land Acquisition Act, 1870; and, on payment by the committee of the compensation awarded under that Act and of the charges incurred by the Government in connection with the proceedings, the land shall vest in the committee.

X of 1870.

Privileges and Liabilities.

Suits against committee and its officers.

39. No suit shall be instituted against a municipal committee or against an officer of any such committee in respect of an act purporting to be done by him in his official capacity until the expiration of one month next after notice in writing has been, in the case of a committee, delivered to or left at its office, and in the case of an officer, delivered to him or left at his office or place of abode, stating the cause of action and the name and place of abode of the intending plaintiff; and the plaint must contain a statement that such notice has been so delivered or left:

Provided that this section shall not apply to any suit instituted under section 54 of the Specific Relief Act, 1877.

I of 1877.

Liability for loss, waste or misapplication.

40. Every person shall be liable for the loss, waste or misapplication of any money or other property belonging to a municipal committee, if the loss, waste or misapplication is a direct consequence of his neglect or misconduct while a member of the committee, and a suit for compensation may be instituted against him by the committee or by the Secretary of State for India in Council.

CHAPTER IV.

TAXATION.

General Provisions.

Taxes which may be imposed for general purposes of Act.

41. *(1)* Subject to any general rules or special orders which the Governor General in Council may make in this behalf, a municipal committee may, for the purposes of this Act, impose, with the sanction hereinafter specified in each case, and in manner prescribed by section 45, any of the following taxes, namely:—

(A) with the previous sanction of the Local Government—

(a) a tax on buildings and lands situate within the municipality or any part thereof, not exceeding five per centum of the annual value of the buildings and lands;

(b) a tax on lands covered by buildings and situate as aforesaid, at a rate not exceeding one pie per square foot per annum;

(c) a tax on houses situate as aforesaid, according to the number of posts in each, at rates not exceeding the following, namely:—

	Rs. A.	
For a house having not more than 2 posts	... 0 8	per annum.
For a house having 3 posts	... 1 8	"
For a house having 4 posts	... 2 8	"
For a house having 5 posts	... 4 0	"
For a house having 6 posts	... 7 0	"
For a house having 7 posts	... 10 0	"

and when a house has more than seven posts, four rupees eight annas additional per annum for each post above seven;

(d) a tax on vehicles, boats and animals used for driving, riding, draught or burden, and dogs, kept within the municipality or any part thereof;

(B) with the previous sanction of the Local Government and of the Governor General in Council, any other tax:

Provided as follows:—

(e) only one of the taxes mentioned in clauses (a), (b) and (c) shall be imposed in respect of the same property; and

(f) in assessing a house to the tax mentioned in clause (c), only posts facing a road or street shall be counted, except in the case of bázárs or large buildings extending through from street to street, in which case the posts contained in one row from street to street, instead of those facing streets, may, in the discretion of the assessing authority, be counted.

(2) In this section "annual value" means the gross annual rent for which buildings and lands liable to taxation may reasonably be expected to let, and in the case of houses, may be expected to let unfurnished;

Provided that, in the case of land assessed to land-revenue or of which the land-revenue has been wholly or in part released, compounded for, redeemed or assigned, if the Local Government so directs, the annual value shall be deemed to be double the amount of the land-revenue for the time being assessed on the land, whether such assessment is leviable or not; or, when the land-revenue has been wholly or in part compounded for or redeemed, double the amount which, but for such composition or redemption, would have been leviable.

Water-tax.

42. *(1)* Besides the taxes imposed under section 41, a municipal committee, with the previous sanction of the Local Government, may, for the purpose of constructing or maintaining works for the supply of water to the municipality or any part thereof, or paying the principal or interest of any loan raised for the construction of such works, impose in manner prescribed by section 45, a tax, to be called the water-tax, upon buildings or lands which are so situated that their occupiers can benefit by the works.

(2) The rate or amount of the tax so imposed on different buildings or lands may be determined with reference, among other considerations, to their distance from the nearest point at which the water is deliverable by the works and to their level; but in fixing it regard shall be had to the principle that the total net proceeds of the tax, together with the estimated income from payments for water supplied from the works under special contracts or otherwise, should not exceed the amount required for the said purpose.

Lighting-tax.

43. Besides the taxes imposed under the foregoing sections, a municipal committee, with the previous sanction of the Local Government, may, for the purpose of lighting the public streets throughout the municipality or any part thereof, or paying the principal or interest of any loan raised for the construction of works required for lighting those streets, impose, in manner prescribed by section 45, a tax, to be called the lighting-tax, upon buildings and lands situate

Burma Municipal Act, 1884.
(Chapter IV.—Taxation.—Sections 44-51.)

within the municipality or that part thereof, as the case may be:

Provided that in fixing the rate or amount of the tax regard shall be had to the principle that the total net proceeds thereof should not exceed the amount required for the said purpose.

Scavenging-tax.

44. When a committee has, in exercise of the powers conferred by this Act, provided for the performance, with regard to any buildings or lands, by its agents of the duties usually performed by sweepers, it may, with the previous sanction of the Local Government, impose, in manner prescribed by section 45, upon those buildings and lands, in addition to any other tax imposed upon them under this Act, a tax to be called the scavenging-tax, at such rate or of such amount as it thinks fit:

Provided that in fixing the rate or amount regard shall be had to the principle that the total net proceeds of the tax should not exceed the cost of the performance of the said duties.

Procedure in imposing such taxes.

45. *(1)* A municipal committee may resolve, at a special meeting, to propose the imposition of any tax under section 41, 42, 43 or 44.

(2) When a resolution has been passed under sub-section (1), the committee shall publish a notice defining the persons or property proposed to be taxed, the amount or rate of the tax to be imposed and the system of assessment to be adopted.

(3) Any person likely to be directly affected by the proposed tax and objecting to the same may, within thirty days from the publication of the notice, submit his objection in writing to the committee; and the committee shall, at a special meeting, take his objection into consideration.

(4) If no objection is received within the said period of thirty days, or if the objections received, having been considered as aforesaid, are deemed insufficient, the committee may submit its proposals to the Local Government, with the objections (if any) which have been submitted as aforesaid and its decision thereon.

(5) The Local Government, on receiving such proposals may sanction the same, or refuse to sanction them, or return them to the committee for further consideration.

(6) When the Local Government sanctions any such proposals which require the further sanction of the Governor General in Council, it shall submit those proposals to the Governor General in Council with the objections (if any) received through the committee; and the Governor General in Council may sanction the proposals, or refuse to sanction the same, or return them to the Local Government for further consideration.

(7) When the proposals of a municipal committee in respect of a tax have been sanctioned by the Local Government, or by the Local Government and the Governor General in Council, as the case may be, the committee may, at a special meeting, direct the imposition of the tax in accordance with those proposals.

(8) In giving such direction the committee shall fix a date from which the tax shall come into force:

Provided that—

(a) no tax shall come into force until it has been notified;

(b) no tax leviable by the year shall come into force except at the commencement of the year by which it is leviable; and

(c) no other tax shall come into force less than six months from the date of the meeting at which its imposition is directed.

(9) A notification of the imposition of a tax under this Act shall be conclusive evidence that the tax has been imposed in accordance with the provisions of this Act.

Power to abolish or reduce tax.

46. A municipal committee may, at a special meeting, with the sanction of the Local Government, abolish or reduce in amount any tax imposed under the foregoing sections.

Power to Local Government to suspend levy of tax.

47. *(1)* If it at any time appears to the Local Government, on complaint made or otherwise, that any tax imposed under the foregoing sections is unfair in its incidence, or that the levy thereof or of any part thereof is injurious to the interests of the general public, it may require the municipal committee to take, within a specified period, measures to remove the objection; and, if within that period the requirement is not complied with to the satisfaction of the Local Government, the Local Government may, by notification, suspend the levy of the tax or of any part thereof until the objection has been removed.

(2) The Local Government may at any time by a like notification, rescind any such suspension.

Power to make rules for assessment, collection and remission of taxes.

48. *(1)* The Local Government may make rules for the assessment, collection and remission of taxes leviable under this Act and preventing evasion of the same:

Provided that every such rule shall be consistent with the provisions of this Act and with the proposals sanctioned in respect of the tax under section 45.

(2) In making any rule under this section the Local Government may direct that a breach of any provision thereof shall be punishable with fine which may extend to fifty rupees.

Taxes not invalid for defect of form.

49. No tax imposed under this Act shall be invalid merely for defect of form; and it shall be enough in any such tax on property, or any assessment of value for the purpose of the tax, if the property taxed or assessed is so described as to be generally known; and it shall not be necessary to name the owner or occupier thereof.

Taxes leviable under Act VII of 1874 to be deemed to be taxes under this Act.

50. All taxes leviable in any local area under the British Burma Municipal Act, 1874, at the time when a municipal committee having authority over that local area comes into existence under this Act, shall, so far as their imposition and assessment are consistent with this Act and within the powers conferred thereby, be deemed to have been imposed and assessed under this Act.

VII of 1874.

Taxes on Immoveable Property.

Preparation of assessment-list.

51. *(1)* The committee shall cause an assessment-list of all buildings and lands on which any tax is imposed to be prepared, containing—

Burma Municipal Act, 1884.
(Chapter IV.—Taxation.—Sections 52-59.)
(Chapter V.—Funds and Property.—Section 60.)

(a) the name of the street or division in which the property is situate;
(b) the designation of the property, either by name or by number, sufficient for identification;
(c) the names of the owner and occupier, if known;
(d) the annual value, area or number of posts on which the property is assessed; and
(e) the amount of the tax assessed thereon by the committee.

(2) For the purpose of preparing the list, the committee may require the owners or occupiers of the buildings or lands to furnish it with returns of the measurements or number of posts or of the rent or annual value.

Publication of notice of assessments.

52. When the assessment-list has been completed, the committee shall give public notice thereof, and of the place where the list or a copy thereof may be inspected; and every person claiming to be either owner or occupier of property included in the list, or the agent of any such person, shall be at liberty to inspect the list and to make extracts therefrom without charge.

Public notice of time fixed for revising assessment-list.

53. (1) The committee shall at the same time give public notice of a time, not less than one month from the publication of the notice, when it will proceed to revise the assessment; and in all cases in which any property is for the first time assessed, or the assessment thereof is increased, it shall also give notice thereof to the owner or occupier of the property.

(2) All objections to the assessment shall be made in writing before the time fixed in the notice or orally or in writing at that time.

Settlement of list.

54. (1) After the objections have been enquired into and the persons making them have been allowed an opportunity of being heard either in person or by authorized agent as they think fit and the revision of the assessment has been completed, the amendments made in the list shall be authenticated by the signatures of not less than two members of the committee, who shall at the same time certify that no valid objection has been made to the assessment contained in the list, except in the cases in which amendments have been entered therein; and, subject to such amendments as may thereafter be duly made, the tax so assessed shall be deemed to be the tax for the whole year by which it is leviable next following that in which the assessment is made.

(2) The list when amended under this section shall be deposited in the committee's office, and shall there be open during office-hours to all owners and occupiers of property comprised therein, and a public notice that it is so open shall forthwith be published.

Further amendments of assessment-list.

55. (1) The committee may at any time amend the list by inserting the name of any person whose name ought to be inserted, or by inserting any property which ought to have been inserted, or by altering the assessment on any property which has been insufficiently assessed through mistake, oversight or fraud, after giving notice to any person interested in the amendment of a time, not less than one month from the date of service of such notice, at which the amendment is to be made.

(2) Any person interested in any such amendment may tender his objection to the committee in writing before the time fixed in the notice, or orally or in writing at that time, and shall be allowed an opportunity of being heard in support of the same in person or by authorized agent as he thinks fit.

New list need not be prepared every year.

56. It shall be in the discretion of the committee to prepare a new assessment-list every year; or to adopt the assessment contained in the list for any year, with such alterations as may in particular cases be deemed necessary, as the assessment for the year following, giving the same notice of the assessment as if a new assessment-list had been prepared.

Remission of tax on unoccupied immoveable property.

57. When a tax payable under section 41, clause (a), (b) or (c), or under section 42, 43 or 44, is payable in one sum in respect of an entire year, and the property in respect of which it is payable is unoccupied throughout the year, or when such a tax is payable in instalments and the property is unoccupied throughout the period in respect of which an instalment is payable, the amount payable in respect of the property for the year, or the instalment, as the case may be, shall be remitted:

Provided that it shall be in the discretion of the committee to direct that no remission shall be granted unless notice in writing of the vacancy has been given to it within such time from the beginning of the year or of the period as it may, from time to time, fix in this behalf.

Taxes under section 41, clauses (a), (b) and (c), from whom due.

58. Every tax payable under section 41, clause (a), (b) or (c), shall be due jointly and severally from all persons who have been in occupation of the building or land assessed at any time during the year of assessment, or, when the tax is payable by instalments, at any time during the period in respect of which the instalment is payable, and from all persons who have held under them as tenants, mortgagees or conditional vendees.

Tax under sections 42, 43 and 44 payable by occupier.

59. Every tax leviable under section 42, 43 or 44 shall be payable by the occupier of the building or land in respect of which it is payable.

CHAPTER V.

FUNDS AND PROPERTY.

Municipal fund constituted.

60. There shall be formed for each municipality a municipal fund, and there shall, except as by this Act provided, be credited thereto—

(a) all sums received by or on behalf of the committee under this Act or otherwise;
(b) all fines realized in cases in which prosecutions are instituted under this Act or the rules made hereunder or under section 34 of Act V of 1861 for offences committed within the municipality;
(c) any sums which the Local Government may annually assign, as it is hereby empowered to do, to the municipal fund from the port fund of any port abutting on or within the municipality as being in its

Burma Municipal Act, 1884.
(Chapter V.—Funds and Property.—Sections 61-64.)

opinion a just and reasonable contribution towards the expenditure rendered necessary by the resort to the municipality of seamen from ships lying in the port; and

(*d*) when there has been included within the municipality a municipality constituted under the British Burma Municipal Act, 1874, the balance (if any) standing at the credit of the funds of that municipality at the time when the municipal committee came into existence.

61. *(1)* The committee shall set apart and apply annually out of the municipal fund—

Application of fund.

(*a*) *first*, such sum as may be required for the payment of any amounts falling due on any loan legally contracted by it;

(*b*) *secondly*, such sum as may be required to meet the charges of its own establishment, including such subscriptions and contributions as are referred to in sections 34 and 35,

(*c*) *thirdly*, such sum as may be required to pay the expenses of pauper lunatics sent to public asylums from the municipality, the expenses incurred in auditing the accounts of the committee, and such portion of the cost of the Provincial Departments for Education, Sanitation, Vaccination, Medical Relief and Public Works as may be held by the Local Government to be equitably debitable to the committee in return for services rendered to it by these Departments.

(2) Subject to the charges specified in sub-section (1) and to such rules as the Local Government may make with respect to the priority to be given to the several duties of the committee, the municipal fund shall be applicable to the payment, in whole or in part, of the charges and expenses incidental to the following matters within the municipality, and with the sanction of the Commissioner outside the municipality, when such application of the fund is for the benefit of the inhabitants, namely:—

(*a*) the construction, maintenance, improvement, cleansing and repair of streets, and of public bridges, embankments, drains, latrines, tanks and water-courses;

(*b*) the watering and lighting of the streets or any of them;

(*c*) the construction, establishment and maintenance of schools, hospitals and dispensaries, and other institutions for the promotion of education or for the benefit of the public health, and of rest-houses, zayáts, wharves, poor-houses, markets, encamping-grounds, pounds and other works of public utility, and the control and administration of public institutions of any of these descriptions;

(*d*) grants-in-aid to schools, hospitals, dispensaries, poor-houses, leper asylums and other educational or charitable institutions;

(*e*) the training of teachers and the establishment of scholarships;

(*f*) the giving of relief and the establishment and maintenance of relief-works in time of famine or scarcity:

(*g*) the supply, storage and preservation from pollution of water for the use of men or animals;

(*h*) the planting and preservation of trees;

(*i*) the taking of a census, the registration of births, marriages and deaths, public vaccination and any other sanitary measure;

(*j*) the holding of fairs and industrial exhibitions; and

(*k*) all acts and things likely to promote the safety, health, welfare or convenience of the inhabitants.

62. *(1)* There shall be formed for each municipality a school fund. To this fund shall be credited—

School fund.

(*a*) the fees levied in schools maintained at the cost of the school fund;

(*b*) any assignment that may be made to the school fund from provincial funds or from any district or local fund;

(*c*) any other funds or income that may be entrusted to the municipality for the promotion of education; and

(*d*) any sums assigned for educational purposes from the municipal fund.

(2) The Local Government may fix for any municipality the minimum proportion of the municipal fund that shall be yearly assigned to the school fund under clause (*d*): Provided that the minimum so fixed shall not exceed 5 per cent. on the gross annual income of the municipality.

(3) No expenditure, except expenditure for the promotion of education, shall be charged against the school fund. In case of doubt the Commissioner shall decide whether any expenditure is or is not for the promotion of education.

63. *(1)* The balances standing to the credit of the municipal fund and school fund shall, if there is a Government treasury or sub-treasury or a bank to which the Government treasury business has been made over situate within the municipality, be kept in that treasury, sub-treasury or bank. In any other case, the bulk of the funds shall be kept in the nearest Government treasury or sub-treasury or bank as aforesaid, and such money as may be required for current expenditure shall be kept by the committee in a strong box in such place and under such precautions as the committee may, from time to time, direct.

Custody of, and disbursements from, funds.

(2) No disbursement of such funds or any part thereof shall be made except under the signature of the president or vice-president and one other member of the committee.

64. *(1)* A municipal committee may, from time to time, with the previous sanction of the Local Government, invest any portion of its municipal fund or school fund in securities of the Government of India or such other securities as the Governor General in Council may approve in this behalf, and vary such investments for others of the like nature.

Investment of same.

(2) The income resulting from the securities and the proceeds of the sale of the same shall be credited to the municipal fund or school fund, as the case may be.

Burma Municipal Act, 1884.
(Chapter V.—Funds and Property.—Sections 65-67.)
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 68-74.)

Property vested in municipality.

65. Subject to any special reservation made by the Local Government, all property in a municipality of the nature hereinafter specified shall be vested in and belong to the municipal committee, and shall, with all other property which may become vested in the committee, be under its direction, management and control, and shall be held and applied by it for the purposes of this Act, that is to say:—

(a) all public townhalls, gates, markets, slaughter-houses, manure and night-soil depôts and public buildings of every description which have been constructed or are maintained out of municipal funds;

(b) all public streams, tanks, reservoirs, cisterns, wells, springs, aqueducts, conduits, tunnels, pipes and other waterworks, and all bridges, buildings, engines, works, materials and things connected therewith or appertaining thereto, and also any adjacent land (not being private property) appertaining to any public tank or well;

(c) all public sewers and drains, and all sewers, drains, tunnels, culverts, gutters and watercourses in, alongside or under any street, and all works, materials and things appertaining thereto;

(d) all dust, dirt, dung, ashes, refuse, animal-matter or filth, or rubbish of any kind, collected by the committee from the streets, houses, privies, sewers, cesspools or elsewhere;

(e) all public lamps, lamp-posts and apparatus connected therewith or appertaining thereto;

(f) all land or other property transferred to the committee by the Government or by gift or otherwise for local public purposes; and

(g) all streets, and the pavements, stones and other materials thereof, and also all trees, erections, materials, implements and things provided for such streets.

Management of public institutions.

66. (1) The management, control and administration of every public institution maintained out of municipal funds shall vest in the committee:

Provided that the extent of the independent authority of the committee in respect of any such institution may be prescribed by the Local Government.

(2) When any public institution is placed under the direction, management and control of the committee, all property, endowments and funds belonging thereto shall be held by the committee in trust for the purposes to which such property, endowments and funds were lawfully applicable at the time when the institution was so placed.

Transfer to Crown of property vesting in committee.

67. The committee may, with the sanction of Local Government, transfer to Her Majesty any property vesting in the committee under section 65 or section 66, but not so as to affect any trusts or public rights subject to which the property is held.

CHAPTER VI.

POWERS FOR SANITARY AND OTHER PURPOSES.

Streets and Buildings.

Power to acquire land for building-sites adjoining new streets.

68. When any land is required for a new street or for the improvement of an existing street, the committee may proceed to acquire, in addition to the land to be occupied by the street, the land necessary for the sites of the buildings to be erected on the sides of the street.

Power to close streets.

69. The committee may close temporarily any street vested in it or any part thereof for the purpose of repairs, or for the purpose of constructing or repairing any sewer, drain, culvert or bridge, or for any other public purpose; and may divert, discontinue or permanently close any such street, and sell the land or such part thereof as is not required for the purposes of this Act.

Power to permit temporary occupation of streets, &c.

70. The committee may grant permission in writing for the temporary occupation of any street or land vested in it for the purpose of depositing any building materials or making any temporary excavation therein or erection thereon, subject to such conditions as it may prescribe for the safety or convenience of persons passing by or dwelling or working in the neighbourhood, and may charge fees for such permission, and may at its discretion withdraw the permission.

Power to attach brackets for lamps.

71. The committee may attach to the outside of any building brackets for lamps in such manner as not to occasion any injury thereto or inconvenience.

Names of streets and numbers of buildings.

72. (1) The committee at a meeting may cause a name to be given to any street, and to be affixed on any building in such place as it thinks fit, and may also cause a number to be affixed to any building; and in like manner may, from time to time, cause such names and numbers to be altered.

(2) Whoever destroys, pulls down or defaces any such name or number, or puts up any different name or number from that put up by order of the committee, shall be punishable with fine which may extend to twenty rupees.

Roofs and external walls not to be made of inflammable materials.

73. The committee at a meeting may direct that, within certain limits, to be fixed by it, the external roofs and walls of huts or other buildings shall not be made or renewed of bamboos, grass, mats, leaves or other highly inflammable materials unless with the permission of the committee in writing; and the committee may, by written notice, require any person who has disobeyed any such direction to remove or alter the roofs or walls so made or renewed as it may think fit.

Power to regulate line of buildings.

74. (1) If any building or part of a building projects beyond the regular line of a public street, either existing or determined on for the future, or beyond the front of the building on either side thereof, the committee may, whenever the building or part has been either entirely or in greater part taken down or burnt down, or has fallen down, by notice require the building or part, when being rebuilt, to be set back to or towards the said regular line or the front of the adjoining buildings; and the portion of the land added to the street by such setting back or removal shall become part of the public street and shall vest in the committee:

Provided that the committee shall make full compensation to the owner for any damage he may sustain in consequence of his building or any part thereof being set back.

Burma Municipal Act, 1884.
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 75-80.)

(2) The committee may, on such terms as it thinks fit, allow any building to be set forward for the improvement of the line of the street.

Notice of new buildings.

75. *(1)* Every person intending to erect or re-erect any building shall, if required to do so by rule made by the committee in this behalf, give notice in writing of his intention to the committee, and shall, if required to do so, submit a plan showing the levels at which the foundation and lowest floor are proposed to be laid, and specifications of the works intended to be constructed, and the materials to be used, and shall obey all written directions consistent with this Act given by the committee within one month after receiving such notice, either prohibiting the erection or re-erection, if deemed likely to be injurious to the inhabitants of the neighbourhood, or in respect of all or any of the matters following, namely:—

(*a*) free passage or way in front of the building;

(*b*) space to be left about the building to secure free circulation of air and facilitate scavenging;

(*c*) ventilation and drainage;

(*d*) level and width of foundation, level of lowest floor and stability of structure; and

(*e*) the line of frontage with neighbouring buildings, if the building abuts on a street or public thoroughfare:

Provided that the committee shall make full compensation to the owner for any damage he may sustain in consequence of the prohibition of the erection or re-erection of any building, or of its requiring any land belonging to him to be added to the street.

(2) If any such building is begun or erected without giving notice, or without submitting particulars as aforesaid when required, or in contravention of the legal orders of the committee issued within one month, the committee may by notice require the building to be altered or demolished, as it may deem necessary.

Explanation.—The expression "erect any building" includes all additions or alterations which involve new foundations or increased superstructure on existing foundations, or the conversion into a dwelling-house of any building not originally constructed for human habitation, or the conversion into more than one dwelling-house of a building originally constructed as one dwelling-house only.

Removal of projections and obstructions.

76. *(1)* It shall not be lawful, unless with the written permission of the committee, for the owner or occupier of any building in a public street to add to, or place against or in front of, the building any projection or structure overhanging, projecting into or encroaching on the street or into or on any drain, sewer or aqueduct therein.

(2) The committee may, by notice, require the owner or occupier of any building to remove or alter any projection, encroachment or obstruction built or placed against or in front thereof if the same overhangs or projects into or encroaches on any public street, or projects into or encroaches on any drain, aqueduct or sewer in the street:

Provided that, in the case of a projection, encroachment or obstruction being lawfully in existence at the time of the passing of this Act, the committee shall make reasonable compensation to any person who suffers damage by the removal or alteration.

(3) The committee may give written permission to the owners or occupiers of buildings in public streets to put up open verandahs, balconies or rooms projecting from any upper storey thereof to an extent beyond the line of the plinth or basement-wall, and at a height from the level of the ground or street, to be specified in the written permission.

Bathing and Washing Places.

Bathing and washing places.

77. The committee may set apart suitable places for the purpose of bathing, and may specify the times at which, and the sex of the persons by whom, such places may be used, and may also set apart suitable places for washing animals or clothes, or for any other purpose connected with the health, cleanliness or comfort of the inhabitants; and may, by public notice, prohibit bathing, or washing animals or clothes, in any public place not so set apart, or at times or by persons other than those so specified, and all other acts not so permitted by which water in public places may be rendered foul or unfit for use.

Deposit of Offensive Matter and Slaughter-places.

Removal and deposit of offensive matter.

78. The committee may fix places within or, with the approval of the Deputy Commissioner, beyond the limits of the municipality for the deposit of refuse, rubbish or offensive matter of any kind or for the disposal of the dead bodies of animals, and may by public notice give directions as to the time, manner and conditions at, in and under which such refuse, rubbish or offensive matter or dead bodies of animals may be removed along any street and deposited at such places.

Places for slaughter of animals.

79. *(1)* The committee may, with the approval of the Deputy Commissioner, fix and abolish places either within or without the limits of the municipality for the slaughter of animals for sale, or of any specified description of such animals, and may with the like approval grant and withdraw licenses for the use of such places, or, if they belong to the committee, charge rent or fees for the use of the same.

(2) When such places are fixed by the committee beyond municipal limits, it shall have the same power to make rules for the inspection and proper regulation of the same as if they were within those limits.

(3) When any such place has been fixed, no person shall slaughter any such animal for sale within the municipality at any other place.

(4) Whoever slaughters any such animal for sale at any other place within the municipality shall be punishable with fine which may extend to twenty rupees.

Burial and Burning Places.

Powers in respect of burial and burning places.

80. *(1)* The committee may, by public notice, order any burial or burning ground which is, in its opinion, dangerous to the health of persons living in the neighbourhood, to be closed, from a date to be specified in the notice, and shall, in such case, if no suitable place for burial or burning exists within a reasonable distance, provide a fitting place for the purpose.

Burma Municipal Act, 1884.
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 81-89.)

(2) Private burial-places in such burial-grounds may be excepted from the notice, subject to such conditions as the committee may impose in this behalf:

Provided that the limits of such burial-places are sufficiently defined, and that they shall only be used for the burial of members of the family of the owner thereof.

(3) No burial or burning ground, whether public or private, shall be made or formed, after the passing of this Act, without the permission in writing of the committee.

(4) If any person buries or burns, or causes or permits to be buried or burnt, any corpse in any burial or burning ground made or formed contrary to the provisions of this section, or after the date fixed thereunder for closing the same, he shall be punishable with fine which may extend to fifty rupees.

Removal of corpses.

81. The committee may, by public notice, prescribe routes for the removal of corpses to burial or burning places.

Inflammable Materials.

Inflammable materials.

82. The committee may, where it appears to it to be necessary for the prevention of danger to life or property, by public notice, prohibit all persons from stacking or collecting bamboos, dry grass, straw or other inflammable materials, or placing mats or thatched huts or lighting fires in any place or within any limits specified in the notice.

Powers of Entry and Inspection.

Inspection of drains, privies and cesspools.

83. (1) The committee, by any person authorized by it in this behalf, may, after giving six hours' notice in writing to the occupier of any land or building in which any drains, privies or cesspools are situated, inspect any such drains, privies and cesspools at any time between sunrise and sunset, and may, if necessary, cause the ground to be opened where the committee or person may think fit for the purpose of preventing or removing any nuisance arising from the privies, drains or cesspools.

(2) If, on such inspection, it appears that the opening of the ground was necessary for the prevention or removal of a nuisance, the expenses thereby incurred shall be paid by the owner or occupier of the land or building; but if it is found that no nuisance exists, or but for such opening would have arisen, the ground shall be closed and made good as soon as may be, and the expense of opening, closing and making it good shall be borne by the committee.

Power to enter and inspect buildings, &c.

84. The committee, by any person authorized by it in this behalf, may, after giving twenty-four hours' notice to the occupier, or, if there is no occupier, to the owner, of any building, at any time between sunrise and sunset enter and inspect the building, and may by notice direct all or any part thereof to be forthwith internally or externally lime-washed, disinfected or otherwise cleansed for sanitary reasons.

Other powers of entry on buildings or land.

85. The committee, by any person authorized by it in this behalf, may, after giving twenty-four hours' notice to the occupier, or, if there is no occupier, to the owner, of any building or land, at any time between sunrise and sunset—

(a) enter on and survey and take levels of any land;

(b) enter, inspect and measure any building for the purpose of valuation;

(c) enter into any building or on any land for the purpose of examining works under construction, of ascertaining the course of sewers or drains, or of executing or repairing any work which it is by this Act empowered to execute or maintain.

Power to enter for discovery of vehicles or animals liable to taxation.

86. The committee, by any person authorized by it in this behalf, may, at any time between sunrise and sunset, enter and inspect any stable, coach-house or other place wherein there is reason to believe that there is any vehicle or animal liable to taxation under this Act and which has not been so taxed.

Power to inspect places for sale of food or drink, &c., and to seize unwholesome articles exposed for sale.

87. The committee, by any person authorized by it in this behalf, may at all reasonable times enter into and inspect any market, building, shop, stall or place used for the sale of food or drink for man, or as a slaughter-house, or for the sale of drugs, and inspect and examine any food or drink, drug or animal which may be therein; and, if any article of food or drink or any animal therein appears to be intended for the consumption of man and to be unfit therefor, may seize and remove the same, or may cause it to be destroyed or to be so disposed of as to prevent its being exposed for sale or used for such consumption;

and, in case any drug is reasonably suspected to be adulterated in such manner as to lessen its efficacy or to change its operation or to render it noxious, may remove the same, giving a receipt therefor, and may cause it to be brought before a Magistrate for enquiry whether any offence has been committed in respect thereof, and for his orders as to its disposal.

Power of entry for purpose of scavenging.

88. (1) The committee may provide for the performance by its agents of the duties usually performed by sweepers in respect of any buildings or lands, or of any privies, drains, cesspools or other receptacles for offensive matter pertaining to buildings or land, with the consent of the occupier of the building or land, or without such consent if the occupier fails to make arrangements to the satisfaction of the committee for the performance of such duties.

(2) When the committee has undertaken to provide for the performance by its agents of such duties as aforesaid, the persons employed by it to perform the same may enter on the property at all reasonable times so far as may be necessary for the proper discharge of those duties; and the committee, by any person authorized by it in this behalf, may enter on the property at all reasonable times for the purpose of ascertaining that such duties have been duly performed.

Precautions to be observed in entering dwelling.

89. When any building, used as a human dwelling, is entered under this Act, due regard shall be paid to the social and religious sentiments of the occupiers; and before any apartment in the actual occupancy of any woman, who, according to custom, does not appear in public, is entered under this Act, notice shall be given to

Burma Municipal Act, 1884.
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 90-101.)

her that she is at liberty to withdraw, and every reasonable facility shall be afforded to her for withdrawing.

Water-pipes, Privies and Drains.

Troughs and pipes for rain-water.

90. The committee may, by notice, require the owner of any building in any street to put up and keep in good condition proper troughs and pipes for receiving and carrying the water from the roof and other parts thereof and for discharging the same so as not to inconvenience persons passing along the street.

Provision of privies, &c.

91. *(1)* The committee may, by notice, require the owner of any building to provide any privy or cesspool, or additional privies or cesspools, which should in its opinion be provided for the building, in such manner as the committee directs.

(2) The committee may, by notice, require any persons employing more than twenty workmen or labourers to provide such latrines and urinals as it may think fit, and to cause the same to be kept in proper order and to be daily cleaned.

(3) The committee may, by notice, require the owner or occupier of any building or land to have any privy provided for the same shut out by a sufficient roof and wall or fence from the view of persons passing by or dwelling in the neighbourhood, or to remove or alter, as the committee directs, any door or trapdoor of a privy opening on to any street or drain.

Repair, alteration and closing of drains, privies and cesspools.

92. *(1)* The committee may, by notice, require the owner or occupier of any building or land to repair or alter and put in good order any drain, privy or cesspool, or to close any cesspool, belonging thereto.

(2) The committee may, by notice, require any person who constructs any new drain, privy or cesspool without its permission in writing, or contrary to its directions or regulations or to the provisions of this Act, or who constructs, rebuilds or opens any drain, privy or cesspool which it has ordered to be demolished or stopped up or not to be made, to demolish the drain, privy or cesspool, or to make such alteration therein as it thinks fit.

Unauthorised buildings over drains, &c.

93. The committee may, by notice, require any person who without its permission in writing newly erects or rebuilds any building over any sewer, drain, culvert, watercourse or water-pipe vested in the committee to pull down or otherwise deal with the same as it thinks fit.

Removal of latrines, &c., near any source of water-supply.

94. The committee may, by notice, require any owner or occupier on whose land any drain, latrine, urinal, cesspool or other receptacle for filth or refuse for the time being exists within fifty feet of any spring, well, tank, reservoir or other source from which water is or may be derived for public use, to remove or close the same within one week.

Power to require drainage, &c., of unwholesome tanks, &c.

95. The committee may, by notice, require the owner or occupier of any land or building to cleanse, repair, cover, fill up or drain off any private tank, well, reservoir, pool or excavation therein, which appears to the committee to be injurious to health or offensive to the neighbourhood:

Provided that, if for the purpose of effecting any drainage under this section it is necessary to acquire any land not belonging to the person who is required to drain his land or to pay compensation to any other person, the committee shall provide the land or pay the compensation.

Dangerous Buildings and Places.

Power to require buildings, wells, tanks, &c., to be secured.

96. If any building, or any well, tank or other excavation, is for want of sufficient repair, protection or enclosure, dangerous to persons passing by or dwelling or working in the neighbourhood, the committee may, by notice, require the owner or occupier thereof to repair, protect or enclose the same; and, if it appears to it to be necessary in order to prevent imminent danger, it shall forthwith take such steps as are necessary to avert the danger.

Buildings, &c., in ruinous or dangerous state.

97. If any building, wall, structure or anything affixed thereto is deemed by the committee to be in a ruinous state or in any way dangerous, it may, by notice, require the owner or occupier thereof forthwith either to remove the same or to cause such repairs to be made to the building, wall or structure as the committee consider necessary for the public safety; and, if it appears to it to be necessary in order to prevent imminent danger, the committee shall forthwith take such steps as are necessary to avert the danger.

Buildings and Grounds in unsanitary Condition.

Power to require owner to clear away noxious vegetation.

98. The committee may, by notice, require the owner or occupier of any land to clear away and remove any thick or noxious vegetation, jungle or undergrowth which appears to the committee to be injurious to health or offensive to the neighbourhood.

Power to trim hedges and trees bordering on streets, wells, &c.

99. The committee may, by notice, require the owner or occupier of any land, within three days, to cut or trim the hedges thereof bordering on any street, or branches of trees growing thereon which overhang any street and obstruct the same or cause danger thereto, or which so overhang any well, tank or other source from which water is derived for public use as to be likely to pollute the water thereof.

Cleansing of filthy buildings or land.

100. If the owner or occupier of any building or land suffers the same to be in a filthy or unwholesome state, the committee may, by notice, require him within twenty-four hours to cleanse the same or otherwise put it in a proper state.

Power to prohibit use for human habitation of buildings unfit for such use.

101. If any building appears to the committee to be unfit for human habitation in consequence of the want of proper means of drainage or ventilation or other sufficient reason, the committee may, by notice, prohibit the owner or occupier thereof from using the same for human habitation or suffering it to be so used, until the committee is satisfied that it has been rendered fit for such use.

Burma Municipal Act, 1884.
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 102-106.)

102. The committee may, by notice, require the owner or person claiming to be the owner of any building or land which, by reason of abandonment or disputed ownership or other cause, remains untenanted and thereby becomes a resort of idle and disorderly persons or otherwise a nuisance, to secure or enclose the same within a reasonable time fixed in the notice.

Power to require untenanted buildings becoming a nuisance to be secured or enclosed.

103. *(1)* The committee, on the report of the Sanitary Commissioner that the cultivation of any description of crop or the use of any kind of manure or the irrigation of land in any specified manner in any place within the limits of the municipality is injurious to the health of persons dwelling in the neighbourhood, may, with the previous sanction of the Local Government, by notification prohibit the cultivation of the crop, the use of the manure or the irrigation so reported to be injurious, or regulate it by imposing such conditions thereon as may prevent the injury:

Cultivation, use of manure or irrigation injurious to health, after prohibition.

Provided that when on any land to which the notification applies that description of crop has been cultivated, that kind of manure has been used or irrigation has been practised in that manner during the five years preceding the notification with such continuity as the ordinary course of husbandry admits of, compensation shall be paid from the municipal fund to all persons interested in that land for any damage caused to them by the prohibition or regulation.

(2) If any person cultivates, uses manure or irrigates in disregard of the prohibition or conditions notified under sub-section *(1)*, he shall be punishable with fine which may extend to fifty rupees, and with a further fine which may extend to five rupees for every day after the first during which the offence is continued.

Offensive and Dangerous Trades.

104. *(1)* The owner or occupier of every place within the municipality used for any of the following purposes, namely :—

Regulation of offensive and dangerous trades.

melting tallow;

boiling bones, offal or blood; or

as a soap-house, oil-boiling house, dyeing-house or tannery; or,

as a brickkiln, pottery or limekiln; or

as any other manufactory or place of business from which offensive or unwholesome smells arise; or

as a yard or depôt for trade in hay, straw, thatching-grass, wood or coal, or other dangerously inflammable material; or

as a store-house for kerosine, petroleum, naphtha or any inflammable oil, spirit or explosive substance;

shall register the same in a book to be kept by the committee for the purpose.

(2) No place shall be newly used for any of the said purposes except under a license from the committee, which shall be renewable annually.

(3) The license shall not be withheld unless the committee considers that the business which it is intended to establish or maintain would be offensive or dangerous to persons residing in, or frequenting, the immediate neighbourhood.

(4) The committee may impose such conditions in respect of such license as it may think necessary.

(5) Whoever, without such registration or without a license, uses any place for any such purpose shall be punishable with fine which may extend to fifty rupees, and with further fine not exceeding ten rupees for every day during which the offence is continued after he has been convicted of such offence.

105. (1) If it is shown to the satisfaction of the committee, at a meeting, that any place registered or licensed under the last preceding section is a nuisance to the neighbourhood or likely to be dangerous to life, health or property, it may, by notice, require the occupier thereof to discontinue the use of the place, or to use it in such manner as will, in the opinion of the committee, render it no longer a nuisance or dangerous.

Power to prohibit such trades.

(2) Whoever, after such notice has been given, uses the place or permits it to be used in such a manner as to be a nuisance to the neighbourhood or dangerous, shall be punishable with fine which may extend to two hundred rupees, and with further fine not exceeding forty rupees for every day during which the offence is continued after he has been convicted of such offence.

Power to make Rules.

106. A committee may, from time to time, at a special meeting, make rules—

Power to make rules.

(a) for rendering licenses necessary for the proprietors or drivers of vehicles, boats or animals plying for hire within the limits of the municipality, and fixing the fees payable for such licenses and the conditions on which they are to be granted and may be revoked;

(b) for limiting the rates which may be demanded for the hire of any carriage, cart, boat or other conveyance, or of animals hired to carry loads, or for the services of persons hired to carry loads, and the loads to be carried by such conveyances, animals or persons, where they are hired within the municipality for a period not exceeding twenty-four hours, or for a service which would ordinarily be performed within twenty-four hours;

(c) for securing a proper registration of births, marriages and deaths, and for the taking of a census;

(d) for fixing, and from time to time varying, the number of persons who may occupy a building or part of a building which is let in lodgings or occupied by members of more than one family;

for the registration and inspection of such buildings;

for promoting cleanliness and ventilation in such buildings;

for the notices to be given and the precautions to be taken in the case of any infectious disease breaking out in such buildings;

and generally for the proper regulation of such buildings;

Burma Municipal Act, 1884.
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 107-112.)

(e) for the inspection and proper regulation of encamping-grounds, pounds, zayáts, wharves not within the limits of any port, markets and slaughter-houses;

(f) for the holding of fairs and industrial exhibitions within the municipality and under its control;

(g) for controlling and regulating the use and management of burial and burning grounds;

(h) for the supervision and regulation of public wells, tanks, springs or other sources from which water is or may be made available for public use; and

(i) for carrying out the purposes of this Act:

Provided that the committee of a municipality in which the Hackney Carriage Act, 1879, is in force shall not make rules under clauses (a) and (b) in respect of any vehicles to which that Act applies.

Penalty for infringement of rules.

107. In making any rule under section 106 the committee may direct that a breach of it shall be punishable with fine which may extend to fifty rupees, and, when the breach is a continuing breach, with a further fine which may extend to five rupees for every day after the first during which the breach continues. In lieu of, or in addition to, such fine the Magistrate may require the offender to remedy the mischief so far as within his power.

Confirmation of rules.

108. No rule made under section 106 shall come into force until it has been confirmed by the Local Government and published for such time and in such manner as the Local Government may prescribe in this behalf.

Supplemental.

Execution of acts required to be done by any notice.

109. *(1)* When any notice under this chapter requires any act to be done for which no time is fixed by this Act, it shall fix a reasonable time for doing the same.

(2) When the owner or occupier of any land or building fails to comply with the terms of any notice under this chapter requiring him to do any act upon that land or building, the committee may, after six hours' notice, by its officers, cause the act to be done.

Recovery of costs of execution.

110. *(1)* Where, under this Act, the owner or occupier of property is required by the committee to execute any work and makes default in complying with the requirement, and the committee executes the work, the committee may recover the cost of the work from the person in default.

(2) If the person in default is the owner, the committee may, by way of additional remedy, recover the whole or any part of the cost from the occupier, and in such case the occupier may deduct any sum paid by him under this sub-section from the rent from time to time becoming due from him to the owner of the property in respect of which the payment is made, or otherwise recover it from the owner.

(3) Provided that an occupier shall not be required to pay, under the last sub-section, any greater sum than the amount of rent which is for the time being due from him to the owner, or which, after demand for payment of the money payable by him to the committee and notice not to pay rent without first deducting the amount so demanded, becomes payable by him to the owner, unless he refuses on application to him by the committee truly to disclose the amount of his rent and the name and address of the person to whom it is payable; but the burden of proof that the sum so demanded by the committee from the occupier exceeds the rent due at the time of the demand, or which has since accrued due, shall lie on the occupier.

(4) All money recoverable by a committee under this section may be recovered either by suit, or on application to a Magistrate having jurisdiction within the municipality by distress and sale of the moveable property of the person from whom the money is recoverable, and if payable by the owner of property shall, until it is paid, be a charge on the property.

(5) Nothing in this section shall affect any contract between an owner and an occupier.

Compensation out of municipal fund.

111. *(1)* The committee may make compensation out of the municipal fund to any person sustaining any damage by reason of the exercise of any of the powers vested in the committee, its officers and servants, under this Act, and shall make such compensation where the person sustaining the damage was not himself in default in the matter in respect of which the power was exercised.

(2) If any dispute arises touching the amount of any compensation which the committee is required by this Act to pay for injury to any building or land, it shall be settled in such manner as the parties may agree, or in default of agreement in the manner provided by the Land Acquisition Act, 1870, sections 3, 8 to 42, 51 to 53, and 56 to 59, so far as they can be made applicable.

Appeals against certain orders of committee.

112. *(1)* Any person aggrieved by any order made by a committee under the powers vested in it by sections 80, 101 or 105 may appeal within thirty days from the date thereof to the Commissioner or to the Deputy Commissioner as the Local Government may prescribe in this behalf; and no such order shall be liable to be called in question otherwise than by such appeal:

Provided that, if the Deputy Commissioner is himself a member of the committee, the appeal shall lie to the Commissioner or other officer empowered by the Local Government in this behalf.

(2) The appellate authority may, for sufficient cause, extend the period hereby allowed for appeal.

(3) The order of the appellate authority confirming, setting aside or modifying the order appealed against shall be final:

Provided that the order appealed against shall not be modified or set aside until the appellant and the committee have had reasonable opportunity of being heard.

Burma Municipal Act, 1884.
(Chapter VII.—Offences affecting the Public Health, Safety or Convenience.—Sections 113-126.)

CHAPTER VII.

OFFENCES AFFECTING THE PUBLIC HEALTH, SAFETY OR CONVENIENCE.

Depositing or throwing earth or materials or refuse, rubbish or offensive matter on roads or into drains.

113. Whoever, without the permission of the committee or in disregard of its orders, throws or deposits, or permits his servants or members of his household under his control to throw or deposit, earth or materials of any description, or refuse, rubbish or offensive matter of any kind, upon any public street or place, or into any public sewer or drain or any drain communicating therewith, shall be punishable with fine which may extend to twenty rupees.

Throwing corpse or carcass into river, &c.

114. Whoever throws or causes to be thrown any corpse or carcass or any part thereof into any river, stream, well, lake, canal, tank or any other such place shall be punishable with fine which may extend to twenty rupees.

Discharging sewage.

115. Whoever, without the permission of the committee, causes or allows the water of any sink, sewer or cesspool, or any other offensive matter, to flow, drain or be put upon any public street or place, or into any sewer or drain not set apart for the purpose, shall be punishable with fine which may extend to twenty rupees.

Non-removal of filth, &c.

116. Whoever, being the owner or occupier of any building or land, keeps or allows to be kept for more than twenty-four hours, or otherwise than in some proper receptacle, any carcass, dirt, dung, bones, ashes, night-soil or filth or any noxious or offensive matter in or upon such building or land, or suffers any such receptacle to be in a filthy or noxious state, or neglects to employ proper means to cleanse and purify the same, shall be punishable with fine which may extend to fifty rupees.

Making or altering drains without authority.

117. Whoever, without the permission of the committee, makes or causes to be made, or alters or causes to be altered, any drain leading into any of the sewers or drains vested in the committee shall be punishable with fine which may extend to fifty rupees.

Penalty for making or keeping latrines, &c., near any source of water-supply.

118. Whoever makes, without the permission of the committee, or keeps for a longer time than one week after notice to remove issued under section 94, any drain, latrine, urinal, cesspool or other receptacle for filth or refuse within fifty feet of any spring, well, tank, reservoir or other source from which water is or may be derived for public use, shall be punishable with fine which may extend to twenty rupees, and, when a notice has issued, with a further fine not exceeding five rupees for each day during which the offence is continued after the lapse of the period allowed for removal.

Keeping animals in disregard of orders.

119. Whoever keeps any swine, buffaloes, cows, oxen, sheep or goats in disregard of any orders which the committee may give to prevent them from becoming a nuisance, shall be punishable with fine which may extend to twenty rupees, and with a further fine which may extend to five rupees for every day after the first during which the offence is continued.

Feeding animals on deleterious substances.

120. Whoever feeds or allows to be fed any animal which is kept for dairy purposes or may be used for food on deleterious substances, filth or refuse of any kind, shall be punishable with fine which may extend to fifty rupees.

Driving vehicles without proper lights.

121. Whoever drives any vehicle after dark in any public street or thoroughfare unless the vehicle is properly supplied with lights or there is sufficient moonlight to render lights unnecessary, shall be punishable with fine which may extend to twenty rupees.

Discharging fire-arms, &c.

122. Whoever discharges fire-arms or lets off fireworks or fire-balloons, or engages in any game, in such a manner as to cause or be likely to cause danger to persons passing by or dwelling or working in the neighbourhood, or risk of injury to property, shall be punishable with fine which may extend to twenty rupees.

Suffering dogs to be at large.

123. Whoever, being the owner or person in charge of any dog which is likely to annoy or intimidate passengers, neglects to restrain it so that it shall not be at large without a muzzle in any public street or place, shall be punishable with fine which may extend to twenty rupees.

Altering, obstructing or encroaching upon streets, &c.

124. Whoever, without the permission of the committee, alters, obstructs or encroaches upon any public street, thoroughfare, sewer, drain or water-course, or displaces, takes up or alters the pavement or other materials or the fences or posts of any public street, place or thoroughfare, or deposits building-materials or makes any hole or excavation on or in any public street or thoroughfare, shall be punishable with fine which may extend to fifty rupees.

Quarrying, blasting, cutting timber or building

125. Whoever quarries, blasts, cuts timber or carries on building-operations in such a manner as to cause, or be likely to cause, danger to persons passing by or dwelling or working in the neighbourhood, shall be punishable with fine which may extend to fifty rupees.

Penalty on exposure of infected persons and things.

126. Any person who—

(1) while suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against spreading the said disorder in any street, public place, shop or public conveyance, or enters any public conveyance without previously notifying to the owner, conductor or driver thereof that he is so suffering; or,

(2) being in charge of any person so suffering, so exposes the sufferer; or

(3) gives, lends, sells, transmits or exposes, without previous disinfection, any bedding, clothing, rags or other things which have been exposed to infection from any such disorder,

shall be liable to a penalty not exceeding fifty rupees; and a person who, while suffering from any such disorder, enters any public conveyance without previously notifying to the owner or driver that he is so suffering, shall in addition be ordered by the Court to pay the owner and driver

Burma Municipal Act, 1884.
(Chapter VII.—Offences affecting the Public Health, Safety or Convenience.—Sections 127-132.)
(Chapter VIII.—Control.—Sections 133-134.)

the amount of any loss and expense they may incur in carrying into effect any measures requisite for disinfection of the conveyance:

Provided that no proceedings under this section shall be taken against persons transmitting with proper precautions any bedding, clothing, rags or other things for the purpose of having the same disinfected.

Penalty on failing to provide for disinfection of public conveyance.

127. Every owner or driver of a public conveyance shall immediately provide for the disinfection of the conveyance after it has to his knowledge conveyed any person suffering from a dangerous infectious disorder, and if he fails to do so he shall be liable to a penalty not exceeding fifty rupees; but no such owner or driver shall be required to convey any person so suffering until he has been paid a sum sufficient to cover any loss or expense incurred by him in carrying into effect the provisions of this section.

Picketing animals and collecting carts.

128. Whoever, contrary to the orders of the committee, pickets animals or collects carts on any public ground, or uses any such ground as a halting-place for vehicles or animals of any description or as a place of encampment, or causes or permits animals to stray, shall be punishable with fine which may extend to twenty rupees.

Keeping corpses or carrying corpses by prohibited routes or so as to cause annoyance.

129. Whoever, without the permission of the committee, keeps a corpse or causes it to be kept in or on any building or land when seventy-two hours after death have elapsed, or carries a corpse along a route prohibited by the committee or in a manner likely to cause annoyance to the public, shall be punishable with fine which may extend to ten rupees.

Destroying direction-posts, lamp posts, &c.

130. Whoever, in any public place, without being authorised by the committee, defaces or disturbs any direction-post or lamp-post or fence, or injures any tree, or extinguishes any light shall be punishable with fine which may extend to ten rupees.

Penalty for disobedience to orders of committee under last chapter.

131. Whoever disobeys any lawful directions given by the committee by public notice under the powers conferred upon it by the last preceding chapter, or any written notice lawfully issued by it under the powers so conferred, or fails to comply with the conditions subject to which any permission was given by the committee to him under those powers, shall, if the disobedience or omission is not an offence punishable under any other section, be punishable with fine which may extend to fifty rupees, and, in the case of a continuing breach, with a further fine which may extend to five rupees for every day after the first during which the breach continues:

Provided that, when the notice fixes a time within which a certain act is to be done and no time is specified in this Act, it shall rest with the Magistrate to determine whether the time so fixed was a reasonable time within the meaning of this Act.

Prosecution to be suspended in certain cases.

132. Any prosecution for an offence under section 80, or section 105, or under section 131, when the order which has been disobeyed is appealable, shall be suspended, when the Magistrate learns that an appeal has been instituted, pending the decision of the appeal; and if the order is set aside on appeal, disobedience thereto shall not be deemed an offence against those sections.

CHAPTER VIII.

CONTROL.

Control by Commissioner and Deputy Commissioner.

133. The Commissioner or the Deputy Commissioner may—

(a) enter on and inspect, or cause to be entered on and inspected, any immoveable property situate within the limits of his division or district respectively and occupied by any municipal committee or joint committee, or any work which is in progress within those limits under the direction of any such committee or joint committee;

(b) call for and inspect any book or document in the possession or under the control of any such committee or joint committee having authority within those limits;

(c) require any such committee or joint committee to furnish such statements, accounts, reports and copies of documents relating to the proceedings or duties of the committee or joint committee, as he may think fit to call for; and

(d) record in writing, for the consideration of any such committee or joint committee, any observations he may think proper in regard to the proceedings or duties of the committee or joint committee:

Provided that—

(1) when the Deputy Commissioner is a member of a committee or joint committee, he shall not exercise, in respect of that committee or joint committee, the powers conferred upon him by this section; and

(2) in any of the municipalities of Rangoon, Maulmain, Akyab and Bassein, and any other municipalities to which the Local Government may extend this clause, the said powers shall be exercised by the Local Government and not by any authority mentioned in the foregoing part of this section.

Power to suspend action under Act.

134. *(1)* The Commissioner or the Deputy Commissioner may, by order in writing, suspend within the limits of the division or district (as the case may be) the execution of any resolution or order of a municipal committee or joint committee, or prohibit the doing within those limits of any act which is about to be done, or is being done, in pursuance of or under cover of this Act, if, in his opinion, the resolution, order or act is in excess of the powers conferred by law, or the execution of the resolution or order, or the doing of the act, is likely to lead to a serious breach of the peace, or to cause serious injury or annoyance to the public or to any class or body of persons.

(2) When a Commissioner or Deputy Commissioner makes any order under this section, he shall forthwith forward a copy thereof, with a statement of his reasons for making it, and of any representations regarding it submitted to him by the municipal committee, to the Local Government, which may thereupon rescind the order

Burma Municipal Act, 1884.
(Chapter VIII.—Control.—Sections 135-140.)

or direct that it continue in force with or without modification, permanently or for such period as it thinks fit.

Extraordinary powers of Deputy Commissioner in case of emergency.

135. *(1)* In cases of emergency, the Deputy Commissioner may provide for the execution of any work, or the doing of any act, which a municipal committee is empowered to execute or do, and the immediate execution or doing of which is in his opinion necessary for the service or safety of the public, and may direct that the expense of executing the work or doing the act shall be forthwith paid by the committee.

(2) If the expense is not so paid, the Deputy Commissioner may make an order directing the person having the custody of the balance of the municipal fund to pay the expense, or as much thereof as is, from time to time, possible, from the balance in priority to any or all other charges against the same.

(3) The Deputy Commissioner shall forthwith report to the Commissioner every case in which he uses the powers conferred upon him by this section.

Powers of Local Government in case of default of committee.

136. *(1)* If at any time it appears to the Local Government that a municipal committee has made default in performing any duty imposed on it by or under this or any other Act for the time being in force, the Local Government may, by order in writing, fix a period for the performance of that duty.

(2) If that duty is not performed within the period so fixed, the Local Government may appoint the Deputy Commissioner to perform it, and may direct that the expense of performing it shall be paid, within such time as it may fix, to the Deputy Commissioner by the committee.

(3) If the expense is not so paid, the Deputy Commissioner with the previous sanction of the Local Government, may make an order directing the person having the custody of the balance of the municipal fund to pay the expense, or so much thereof as is from time to time possible, from the balance in priority to any or all other charges against the same.

Power of Local Government to supersede committee in case of incompetency, persistent default or excess or abuse of powers.

137. *(1)* If a municipal committee is not competent to perform, or persistently makes default in the performance of, the duties imposed on it by or under this or any other Act for the time being in force, or exceeds or abuses its powers, the Local Government may, with the previous approval of the Governor General in Council, by an order published, with the reasons for making it, in the local official Gazette, declare the committee to be incompetent or in default or to have exceeded or abused its powers, as the case may be, and supersede it for a period to be specified in the order.

(2) When a committee is so superseded, the following consequences shall ensue:—

(a) All members of the committee shall, as from the date of the order, vacate their offices as such members.

(b) All powers and duties of the committee may, during the period of supersession, be exercised and performed by such person or persons as the Local Government appoints in that behalf.

(c) All property vested in the committee shall, during the period of supersession, vest in the Local Government.

(3) On the expiration of the period of supersession specified in the order, the committee shall be reconstituted, and the persons who vacated their offices under clause (a) shall not be deemed disqualified from being members.

Disputes.

138. *(1)* If any dispute, for the decision of which this Act does not otherwise provide, arises between two or more committees constituted under this Act, or between any such committee and a cantonment authority, the matter shall be referred—

(a) to the Deputy Commissioner, if the local authorities concerned are in the same district;

(b) to the Commissioner or Commissioners of the division or divisions, if the local authorities concerned are in different districts; and

(c) to the Local Government, if the local authorities concerned are in different divisions and the Commissioners of those divisions cannot agree.

(2) The decision of the authority to which any dispute is referred under this section shall be final.

(3) If in the case mentioned in clause (a) the Deputy Commissioner is a member of one of the committees concerned, his functions under this section shall be discharged by the Commissioner.

(4) "Local authority" in this section means a municipal committee or cantonment authority.

Annual reports and statements.

139. *(1)* A municipal committee shall, at the close of each year or of such other period as may, from time to time, be fixed by the Local Government in this behalf, submit to the Local Government a statement of its receipts and disbursements, in such form as the Local Government may prescribe, and a general report of its proceedings during that period:

Provided that separate accounts shall be submitted of—

(a) all receipts of the water-tax, lighting-tax and scavenging-tax, and of all expenditure on the purposes for which those taxes are levied, respectively; and

(b) all income under the heads mentioned in section 62, and all expenditure on educational purposes.

(2) Accounts submitted under this section shall be examined or audited in such manner as the Local Government prescribes.

Estimates of receipts and expenditure.

140. *(1)* A municipal committee shall submit, before such date in each year as may be directed by the Local Government, for the sanction of such authority as the Local Government may appoint in this behalf, an estimate of its probable receipts for the financial year next following, with proposals for its expenditure, and may, from time to time, submit in like manner further estimates or proposals amending the same.

(2) No expenditure shall be incurred by the committee unless it is provided for in a proposal sanctioned under this section.

Burma Municipal Act, 1884.
(Chapter VIII.—Control.—Sections 141-143.)
(Chapter IX.—Supplemental.—Sections 144-149.)

(3) An abstract of the annual estimate and proposals submitted and sanctioned as required by this section shall be published in such manner as the Local Government directs.

Sanction to works.

141. (1) No new work, the estimated cost of which exceeds five hundred rupees, shall be begun by a municipal committee, nor shall any contract be entered into by it in respect of any such work, until a plan and estimate thereof have been approved by the committee at a meeting.

(2) If the estimated cost of any such new work has not been specifically provided for in proposals submitted and sanctioned in manner mentioned in section 140, or exceeds—

twenty thousand rupees in the case of the municipalities of Rangoon, Maulmain, Bassein and Akyab, or

one-tenth of the estimated annual income of the municipal fund in the case of any other municipality,

it shall not be begun, nor shall any contract be entered into in respect of it, until the plan and estimate have been submitted to and approved by the Local Government, or by an officer empowered by the Local Government in this behalf.

Powers of Commissioner

142. In all matters connected with the administration of this Act a Commissioner shall have and exercise the same authority and control over a Deputy Commissioner subordinate to him as he has and exercises over the Deputy Commissioner in the general and revenue administration.

Additional power of Local Government to frame forms and make rules

143. The Local Government may frame forms for any proceeding of a municipal committee for which it considers that a form should be provided, and may, in addition to any other powers to make rules conferred by this Act, make rules consistent with this Act—

(a) as to the intermediate office or offices, if any, through which correspondence between municipal committees and the Local Government or officers of that Government and representations addressed to the Local Government under this Act shall pass;

(b) as to the preparation of estimates of receipts and expenditure of committees, and as to the conditions subject to which such estimates may be sanctioned;

(c) as to the returns, statements and reports to be submitted by committees; and

(d) generally for the guidance of committees and public officers in all matters connected with the carrying out of this Act.

CHAPTER IX.

SUPPLEMENTAL.

Criminal Procedure.

Powers and duties of police in respect of offences against Act and rules, and assistance to municipal authorities.

144. (1) Every police-officer employed in a municipality shall give immediate information to the committee of any offence committed against this Act or the rules made thereunder, and shall be bound to assist all members, officers and servants of the committee in the exercise of their lawful authority.

(2) Any such police-officer may arrest any person committing in his view any offence against this Act or the rules made thereunder—

(a) if the name and address of the person are unknown to him, or

(b) if the person declines to give his name and address, or if there is reason to doubt the accuracy of the name and address if given.

(3) A person arrested under this section may be detained until his name and address are correctly ascertained:

Provided that no person so arrested shall be detained longer than is necessary for bringing him before a Magistrate unless the order of a Magistrate for his detention is obtained.

Prosecutions.

145. Prosecutions for offences against this Act or the rules made under it shall not be instituted except by order of or with the approval of the municipal committee.

Member not to be deemed interested in prosecution.

146. A Judge or Magistrate shall not be deemed to be a party to or personally interested in any such prosecution within the meaning of section 555 of the Code of Criminal Procedure merely because he is a member of the committee by the order or with the approval of which it has been instituted.

X of 18[82].

Saving of prosecutions under other laws

147. Nothing in this Act shall prevent any person from being prosecuted under any other law for any act or omission which constitutes an offence against this Act or the rules made under it, or from being liable under that other law to any other or higher punishment or penalty than that provided by this Act or the rules made under it:

Provided that a person shall not be punished twice for the same offence.

Rules.

Procedure for making rules under section 7, 48, 108 or 143.

148. (1) The authority empowered to make rules under section 7, 48, 108 or 143 shall, before making them, publish, in such manner as may in its opinion be sufficient for giving information to persons interested, a draft of the proposed rules, together with a notice specifying a date at or after which the draft will be taken into consideration; and shall, before making the rules, receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(2) Every rule made under any of those sections shall be published in the local official Gazette in English and in such other language or languages as the Local Government may direct; and such publication shall be conclusive evidence that the rule has been made as required by this section.

Continuance of existing rules.

149. (1) The Local Government may by notification in the official Gazette, direct that any rules made under the British Burma Municipal Act, 1874, and in force in any local area being, or comprised in, a municipality

VII of [1874].

Burma Municipal Act, 1884.
(Chapter IX.—Supplemental.—Sections 150-157.)

constituted under this Act at the time the municipal committee for that municipality comes into existence under section 13, shall, so far as they are consistent with this Act and within the powers conferred thereby, be deemed to have been made under this Act, and shall continue in force until repealed by new rules so made.

(2) The authority empowered to make such new rules shall, as soon as may be, make them and take such action as may be requisite for bringing them into force.

Recovery of Money.

Recovery of money.

150. All fees and all rents and other sums due on account of property for the time being vested in or managed by the municipal committee, and all arrears of taxes and other money due for water supplied or otherwise under this Act, may be recovered as if they were arrears of land-revenue.

Notices.

Authentication, service and validity of notices.

151. *(1)* Every notice issued by a committee under this Act or under any rule made thereunder shall be in writing, and shall be sufficiently authenticated by the signature of the president or secretary, and may be served on the person to whom it is addressed, or left at his usual place of abode or business with some adult male member or servant of his family, or, if it cannot be so served, may be posted on some conspicuous part of his place of abode or business.

(2) If the place of abode or business of the person to whom the notice is addressed is not within the limits of the municipality, the notice may be served by posting it in a registered cover addressed to his usual place of abode.

(3) If the place of abode or business of the owner of any property is not known, every such notice addressed to him as such owner may be served on the occupier.

(4) If the place of abode or business of the occupier of any property is not known, every such notice addressed to him as such occupier may be served by posting it on some conspicuous part of the property.

(5) No notice issued by the committee under this Act or under any rule made thereunder shall be invalid for defect of form.

Mode of giving notice to owner or occupier of property.

152. When any notice is, under the provisions of this Act, to be given to, or served on, the owner or occupier of any property and he is unknown, it may be given or served—

(a) by delivering a written notice to some person on the property, or, if there is no person on the property to whom it can be delivered, by fixing it on some conspicuous part of the property; or

(b) by putting into the post a prepaid letter containing a written notice, and addressed by the description of the "owner" or "occupier" of the property (naming it) in respect of which the notice is given, without further name or description.

Publication of public notices.

153. Every public notice given by a committee under this Act or under any rule made thereunder shall be published by proclamation or in such other manner as the Local Government may, by rule, direct.

Alteration of Municipal Limits.

Notification of intention to alter limits of municipality.

154. The Local Government may, by notification published in the official Gazette, and in such other manner as the Local Government may determine, declare its intention—

(a) to exclude from a municipality any local area comprised therein and defined in the notification, or

(b) to include within a municipality any local area in the vicinity of the same and defined in the notification:

Provided that, where the local area is a military cantonment or part of a military cantonment, a notification shall not be published under this section in respect of it without the previous consent of the Governor General in Council.

Alteration of limits of municipality.

155. *(1)* Any inhabitant of a municipality or local area in respect of which a notification has been published in the official Gazette under section 154 may, if he objects to the alteration proposed, submit his objection in writing to the Local Government within six weeks from the publication of the notification in the official Gazette, and the Local Government shall take his objection into consideration.

(2) When six weeks from the publication of the notification in the official Gazette have expired, and the Local Government has considered the objections (if any) which have been submitted under sub-section (1), the Local Government may, by a notification in the official Gazette, exclude the local area from the municipality or include it therein, as the case may be.

Effect of exclusion of local area from municipality.

156. *(1)* When a local area is excluded from a municipality under section 155—

(a) this Act, and all rules, orders, directions and powers made, issued or conferred under this Act, shall cease to apply thereto; and

(b) the Local Government shall, after consulting the municipal committee, frame a scheme determining what portion of the balance of the municipal and school funds and other property vested in the municipal committee shall vest in Her Majesty for the benefit of the local area, and in what manner the liabilities of the committee shall be apportioned between the committee and the Secretary of State for India in Council; and, on the publication of the scheme in the local official Gazette, the property and liabilities shall vest and be apportioned accordingly.

(2) All property vested in Her Majesty under sub-section (1) shall be applied under the orders of the Local Government to discharging the liabilities imposed on the Secretary of State for India in Council under that sub-section, or for the promotion of the safety, health, welfare or convenience of the inhabitants of the local area.

Effect of including local area in municipality.

157. When a local area is included in a municipality under section 155, this Act, and, except as the Local Government may otherwise, by notification in the official Gazette, direct, all rules, orders, directions and powers made, issued or conferred under this Act and in force

Burma Municipal Act, 1884.
(Chapter IX.—Supplemental.—Sections 158-161.)

throughout the whole municipality at the time the local area is so included, shall apply to the local area.

Powers to except Municipalities from Provisions of Act.

Power to except municipality from provisions of Act unsuited thereto.

158. *(1)* If the circumstances of any municipality are such that, in the opinion of the Local Government, any of the provisions of this Act are unsuited thereto, the Local Government may, by notification in the official Gazette, except the municipality from the operation of those provisions; and thereupon those provisions shall not apply to the municipality until again applied thereto by like notification.

(2) While the exception remains in force, the Local Government may make rules for the guidance of the committee and public officers in respect of the matters excepted from the operation of the said provisions.

Miscellaneous.

Saving of Act XI of 1879.

159. Nothing in this Act shall affect the Local Authorities Loans Act, 1879. XI of 1879.

Powers of Governor General in Council and of Local Government exercisable from time to time.

160. All powers conferred by this Act on the Governor General in Council or on the Local Government may be exercised from time to time as occasion requires.

Decision of questions as to whether persons are "inhabitants."

161. If any question arises whether a person or persons of a specified class is or are an inhabitant or inhabitants of a local area within the meaning of this Act, the decision thereon of the Local Government shall be conclusive.

D. FITZPATRICK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 3rd October 1884, and is hereby promulgated for general information :—

ACT NO. XVIII OF 1884.

THE PANJÁB COURTS ACT, 1884.

CHAPTER I.

PRELIMINARY.

SECTIONS.

1. Short title, local extent and commencement.

68. Pending proceedings.
69. Appeals after Act comes into force against decrees, &c., passed before.
70. Modification of section 622 of Civil Procedure Code.
71. Amendment of the first schedule annexed to the Court-fees Act, 1870.
72. Refund of fee paid on application for revision.
73. Saving of certain appointments, rules and forms, notifications, powers and orders.
74. Amendment of Act X of 1870, section 3.
75. Amendment of Act XXVIII of 1868, section 42.

THE SCHEDULE.—ACTS REPEALED.

An Act to mend the Law relating to Courts in the Panjáb.

WHEREAS it is expedient to amend the law relating to Courts in the Panjáb; and whereas the Secretary of State for India in Council has given his previous sanction to the passing of this Act; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title, local extent and commencement.

1. *(1)* This Act may be called the Panjáb Courts Act, 1884.

(2) It extends to the territories for the time being under the administration of the Lieutenant-Governor of the Panjáb; and

(3) it shall come into force on the first day of November, 1884.

(4) Any power conferred by this Act to make rules or to issue orders creating territorial divisions, establishing Courts, appointing and posting officers, or fixing the pecuniary or local limits of their jurisdiction or conferring powers may be exercised at any time after the passing of this Act; but a rule or order so made or issued shall not take effect until the Act comes into force.

Repeal of Acts.

2. On and from that day the Acts mentioned in the schedule hereto annexed shall be repealed to the extent specified in the third column thereof.

Definitions.

3. In this Act, unless there is something repugnant in the subject or context,—

(1) "Assistant Commissioner" includes Extra Assistant Commissioner:

(2) "Revenue Court" means the Court of a Financial Commissioner, of a Commissioner, of a Deputy Commissioner, of an Assistant Commissioner, of a Tahsíldár or of a Náib Táhsíldár exercising jurisdiction in suits of any of the classes mentioned in section 45:

(3) "small cause" means a suit of the nature cognizable in a Court of Small Causes constituted under Act XI of 1865, and any other suit not being a suit of any description specified in section 19 of the Presidency Small Cause Courts Act, 1882, which the Chief Court, with the sanction of the Local Government, may direct to be treated as a small cause for the purposes of appeal: XV

(4) "land" means land assessed or liable to be assessed to the land-revenue or whereof the land-revenue has been wholly or in part released, compounded for, redeemed or assigned, and all land the property of Government not within the site of any town or village:

(5) "rent" means whatever is payable by an occupant of land on account of the use or occupation thereof:

(6) "tenant" means any occupant of land liable to pay rent therefor, but does not include an under-proprietor:

(7) "landlord" means any person entitled to receive rent paid by a tenant; and

(8) "value", used with reference to a suit, means the amount or value of the subject-matter of the suit.

CHAPTER II.

THE CHIEF COURT.

Constitution of Chief Court and appointment and tenure of Judges.

4. There shall continue to be a Chief Court consisting of three or more Judges, who shall be appointed by the Governor General in Council and shall hold their offices during his pleasure, and of whom one at least shall always be a barrister of not less than five years' standing.

Rank and precedence of Judges of Chief Court.

5. The Judges of the Chief Court shall have rank and precedence according to the seniority of their appointments as such Judges:

Provided that a Judge permanently appointed shall be deemed senior to an officiating Judge.

The Panjáb Courts Act, 1884.
(Chapter II.—The Chief Court.—Sections 6-14.)

Civil appellate jurisdiction.

6. The Chief Court shall be deemed, for the purposes of all enactments for the time being in force, to be the highest Civil Court of appeal in the territories to which this Act extends.

Criminal jurisdiction.

7. The Chief Court shall be the highest Court of criminal appeal or revision in the said territories, and shall have power, as a Court of original jurisdiction, to try European British subjects committed to it for trial.

Delegation of powers to members of Court.

8. *(1)* Except as by this Act or by any other enactment for the time being in force otherwise provided, the Chief Court may make rules to provide in such manner as it thinks fit for the exercise by one or more of its Judges of any of its powers:

Provided that no decree, sentence, decision or order of any Court, not being an order within the meaning of the Code of Civil Procedure, shall be reversed or modified by any Judge of the Chief Court sitting alone.

(2) When the Chief Court consists of more than three Judges, it may make rules declaring what number of Judges, not being less than three, shall constitute a full bench of the Court, and may by these rules prescribe the mode of determining which Judges shall sit as a full bench, when a full bench sitting becomes necessary.

(3) Subject to the provisions of sub-section (2), the Senior Judge may determine which Judge in each case shall sit alone, and which Judges of the Court shall constitute any bench.

Appeals from original jurisdiction of Chief Court.

9. Except as otherwise provided by any enactment for the time being in force, an appeal from any decree or order made by the Chief Court—

(*a*) in exercise of its original jurisdiction in cases withdrawn from other Courts under section 25 of the Code of Civil Procedure, or

(*b*) in exercise of any other original jurisdiction of a civil nature to which the Chief Court may by rule extend this section,—

shall lie in the cases and in manner following (that is to say):—

(*1*) if the decree or order is made by a single Judge, the appeal shall lie either to a bench consisting of two other Judges, or to a full bench, as the Court may, by general rule or special order, direct;

(*2*) if the decree or order is made by a bench of Judges not being a full bench, and the Judges differ in opinion, the appeal shall lie to a full bench.

Rule of decision when Judges differ.

10. Except as otherwise provided by any enactment for the time being in force,

(1) when there is a difference of opinion among the Judges composing any bench of the Chief Court, the decision shall be in accordance with the opinion of the majority of those Judges;

(2) If there is no such majority, then—

(*a*) if the bench is a full bench, or is exercising original civil jurisdiction, the decision shall be in accordance with the opinion of the Senior Judge;

(*b*) in other cases, the bench before which the question has arisen shall refer the question to a full bench, and shall dispose of the case in accordance with the decision of the full bench.

Power to refer question to full bench.

11. Any single Judge of the Chief Court and any bench of Judges of that Court, not being a full bench, may in any case refer for the decision of a full bench any question of law or custom having the force of law, or the construction of any document, or the admissibility of any evidence arising before the Judge or bench, and shall dispose of the case in accordance with the decision of the full bench on the question.

Ministerial officers.

12. *(1)* The Chief Court may appoint a Registrar and Deputy Registrar, and such other ministerial officers as may be necessary for the administration of justice by the Court, and for the exercise and performance of the powers and duties conferred and imposed on it by this Act.

(2) The appointment of the Registrar shall be subject to the sanction of the Local Government.

(3) The officers appointed under this section shall exercise such powers and discharge such duties of a non-judicial or quasi-judicial nature as the Chief Court may direct.

(4) Any such officer may be suspended or dismissed from his office by order of the Chief Court:

Provided that neither the Registrar nor the Deputy Registrar shall be dismissed without the previous sanction of the Local Government.

Superintendence and control of Subordinate Courts.

13. The general superintendence and control over all other Civil Courts shall be vested in, and all such Courts shall be subordinate to, the Chief Court.

Power to make rules.

14. *(1)* The Chief Court may make rules consistent with this Act and any other enactment for the time being in force—

(*a*) providing for the translation of any papers filed in the Chief Court and copying or printing any such papers or translations, and requiring from the persons at whose instance or on whose behalf they are filed payment of the expenses thereby incurred;

(*b*) declaring what persons shall be permitted to practise as petition-writers in the Courts of the Panjáb, and regulating the conduct of persons so practising;

(*c*) determining in what cases persons practising in those Courts shall be permitted to address the Court in English;

(*d*) prescribing forms for seals to be used by those Courts;

(*e*) regulating the procedure in cases where any person is entitled to inspect a record of any such Court or obtain a copy of the same, and prescribing the fees payable by such persons for searches and copies;

(*f*) conferring and imposing on the ministerial officers of the Courts subject to its superintendence such powers and duties of a non-judicial or quasi-judicial nature as it thinks fit, and regulating the mode in which powers and duties so conferred and imposed shall be exercised and performed;

The Panjáb Courts Act, 1884.
(Chapter II.—The Chief Court.—Sections 15-16.)
(Chapter III.—The Subordinate Civil Courts.—Sections 17-24.)

(g) prescribing forms for such books, entries, statistics and accounts as it thinks necessary to be kept, made or compiled in those Courts or submitted to any authority;

(h) providing for the inspection of those Courts and the supervision of the working thereof; and

(i) regulating all such matters as it may think fit, with a view to promoting the efficiency of the judicial and ministerial officers of those Courts and maintaining proper discipline among those officers.

(2) A rule made under clause (a), (b), (c), (f) (g), (h) or (i) shall not take effect until it has been sanctioned by the Local Government and has been published in the official Gazette.

(3) Whoever breaks any rule made under clause (b) shall be punished with a fine which may extend to fifty rupees.

Registers, books, accounts and statements to be kept and furnished by Chief Court.

15. *(1)* The Chief Court shall keep such registers, books and accounts as may be necessary for the transaction of the business of the Court, and shall submit to the Local Government such of those registers, books and accounts, and such statements of the work done in the Court, as may be required by the said Government.

(2) The Chief Court shall also comply with such requisitions as may be made by the Governor General in Council, or by the Local Government, for certified copies of, or extracts from, the records of the Chief Court and the Courts subordinate thereto.

Procedure of Chief Court in exercise of civil jurisdiction.

16. *(1)* The Chief Court, when sitting as a Court of civil judicature, shall take evidence and record judgments and orders in such manner as it, by rule, directs, and may frame forms for any proceeding in the Court in the exercise of its civil jurisdiction.

XIV of 1882.

(2) The following provisions of the Code of Civil Procedure shall not apply to the Chief Court in the exercise of its original civil jurisdiction, namely, sections 119, 182 to 185 (both inclusive), 187, 189 to 191 (both inclusive), 192 (so far as it relates to the manner of taking evidence), 198, 200 to 204 (both inclusive), and so much of section 409 as relates to the making of a memorandum.

XIV of 1882.

(3) Section 579 of the said Code shall not apply to the Chief Court in the exercise of its appellate jurisdiction.

CHAPTER III.

THE SUBORDINATE CIVIL COURTS.

Classes of Courts.

Classes of Courts.

17. Besides the Chief Court, the Courts of Small Causes established under Act XI of 1865 and the Courts established under any other enactment for the time being in force, there shall be the following classes of Civil Courts (namely):—

(a) the Divisional Court;

(b) the Court of the District Judge;

(c) the Court of the Subordinate Judge;

(d) the Court of the Munsif.

Territorial Divisions.

Civil divisions and districts.

18. *(1)* For the purposes of this Act the Local Government shall divide the territories under its administration into civil divisions, and each civil division into civil districts.

(2) The Local Government may alter the limits or the number of these divisions and districts.

Divisional and District Courts.

Establishment of Divisional Courts.

19. *(1)* The Local Government shall appoint as many persons as it thinks necessary to be Divisional Judges, and shall for each civil division establish a Divisional Court consisting of one or more such Judges.

(2) The Local Government may, where a Divisional Court consists of more than one Judge, by general rule or special order determine which of them shall be deemed to be the senior.

Establishment of District Courts.

20. The Local Government shall appoint as many persons as it thinks necessary to be District Judges, and shall post one such person to each district as District Judge of that district:

Provided that the same person may, if the Local Government thinks fit, be appointed to be District Judge of two or more districts.

Distribution of business in Divisional Court.

21. The Chief Court may, subject to the provisions of this Act and any other enactment for the time being in force, make rules to provide for the exercise of any of the powers of a Divisional Court consisting of more than one Judge by one or more Judges of the Court:

Provided that no decree, decision or order of any Court, not being an order within the meaning of the Code of Civil Procedure, shall be reversed or modified by a single Judge of a Divisional Court consisting of more than one Judge.

XIV of 1882.

Original jurisdiction of Divisional and District Courts in suits.

22. Except as otherwise provided by any enactment for the time being in force, the Divisional Court and the Court of the District Judge shall have jurisdiction in original civil suits without limit as regards the value.

District Court to be principal Civil Court of original jurisdiction.

23. Except as otherwise provided by any enactment for the time being in force, the Court of the District Judge shall be deemed to be the District Court or principal Civil Court of original jurisdiction in the district:

Provided that—

(a) for the purposes of the Indian Divorce Act, the Divisional Court shall be deemed to be the District Court for all districts comprised in the division; and

IV of 1869.

(b) the Local Government may direct that the Divisional Court shall for any other purpose be deemed to be the District Court or principal Civil Court of original jurisdiction for any district comprised in the division.

Subordinate Judges and Munsifs.

Appointment of Subordinate Judges.

24. The Local Government may appoint as many persons as it thinks necessary to be Subordinate Judges.

The Panjáb Courts Act, 1884.
(Chapter III.—The Subordinate Civil Courts.—Sections 25-34.)

25. *(1)* The Local Government may fix the number of Munsifs to be appointed, and, when there is any vacancy in that number, the Chief Court may, subject to the rules (if any) made under sub-section (2), appoint such person to the same as it thinks fit.

Appointment of Munsifs.

(2) The Chief Court may, with the previous sanction of the Local Government, make rules as to the qualifications of persons to be appointed Munsifs.

26. *(1)* The jurisdiction to be exercised in original civil suits as regards the value by any person appointed to be a Subordinate Judge or Munsif shall in the case of a Subordinate Judge be determined by the Local Government, and in the case of a Munsif by the Chief Court, either by including him in a class or grade, or otherwise as it thinks fit.

Pecuniary limits of jurisdiction of Subordinate Judges and Munsifs.

(2) The jurisdiction in the case of a Subordinate Judge may be without limit, but in the case of a Munsif shall not extend to suits the value of which exceeds one thousand rupees.

27. *(1)* The local limits of the jurisdiction of a Subordinate Judge shall be such as the Local Government may define.

Local limits of their jurisdiction.

(2) The local limits of the jurisdiction of a Munsif shall be such as the Chief Court may define.

(3) When the Local Government posts a Subordinate Judge or the Chief Court posts a Munsif to a district, the local limits of the district shall, in the absence of any direction to the contrary, be deemed to be the local limits of his jurisdiction.

28. *(1)* The Local Government may confer on any person all or any of the powers conferable under this Act on a Subordinate Judge or Munsif with respect to particular classes of cases, or with respect to cases generally in any local area, and may withdraw, or suspend the exercise of, any powers so conferred.

Special Judges and Benches.

(2) The Local Government may direct any uneven number of persons invested with powers of the same description and exercisable within the same local area under this section to sit together as a bench; and those powers shall, while the direction remains in force, be exercised by the bench so constituted, and not otherwise.

(3) The decision of the majority of the members of a bench constituted under this section shall be deemed to be the decision of the bench.

(4) Persons on whom powers are conferred under this section shall be called Special Judges, and such persons and the benches constituted under this section shall be deemed for the purposes of this Act to be Subordinate Judges or Munsifs, as the Local Government may direct.

29. *(1)* The Chief Court may, by order, authorize any District Court to transfer to a Subordinate Judge or Munsif under its control any of the following proceedings or any class of such proceedings specified in the order, and then pending or thereafter instituted before the District Court (that is to say) :—

Power to transfer to Subordinate Judge or Munsif certain proceedings pending before District Court.

(a) applications for certificates under Act XXVII of 1860 *(for facilitating the collection of debts on successions, and for the security of parties paying debts to the representatives of deceased persons)*;

(b) proceedings under Act XL of 1858 *(for making better provision for the care of the persons and property of Minors in the Presidency of Fort William in Bengal)* or Act IX of 1861 *(to amend the law relating to Minors)*.

(2) The District Court may withdraw any proceedings so transferred, and may either itself dispose of them, or, with the previous sanction of the Chief Court, transfer them to any other Subordinate Judge or Munsif under its control.

(3) All proceedings so transferred shall be disposed of by the Subordinate Judge or Munsif (as the case may be) subject to the rules applicable to like cases when disposed of by the District Court.

Small Cause Jurisdiction.

30. The Local Government may confer, within such local limits as it thinks fit, upon any District Judge, Subordinate Judge or Munsif the jurisdiction of a Judge of a Court of Small Causes under Act XI of 1865 for the trial of suits cognizable by such Courts up to such value, not exceeding five hundred rupees, as it thinks fit, and may withdraw any jurisdiction so conferred.

Power to confer Small Cause Court jurisdiction.

Suspension and Removal.

31. *(1)* Any Divisional Judge, District Judge or Subordinate Judge may be suspended or removed from office by the Local Government.

Suspension and removal.

(2) Any Munsif may, subject to the control of the Local Government, be suspended or removed from office by the Chief Court.

Valuation of Suits.

32. When the subject-matter of suits of any class is such that in the opinion of the Chief Court it does not admit of being satisfactorily valued, the Chief Court may, with the previous sanction of the Local Government, direct that suits of that class shall, for all or any of the purposes of this Act, be treated as if their subject-matter were of such value as the Chief Court thinks fit to specify in this behalf.

Valuation of suits.

Administrative Control.

33. *(1)* Subject to the general superintendence and control of the Chief Court, every Divisional Court shall control all other Civil Courts in the division.

Controlling powers of Divisional and District Courts.

(2) Subject as aforesaid and to the control of the Divisional Court, every District Court shall control all other Civil Courts in the district.

34. *(1)* Every Divisional Court may exercise, as regards the Courts under its control, the same powers of withdrawal, trial and transfer as are conferred by section 25 of the Code of Civil Procedure on a District Court.

Power of Divisional Court to transfer business.

XIV of 1882.

(2) The Court trying any suit withdrawn under this section from a Court of Small Causes shall, for the purposes of the suit, be deemed to be a Court of Small Causes.

The Panjáb Courts Act, 1884.
(Chapter III.—The Subordinate Civil Courts.—Sections 35-38.)
(Chapter IV.—Appellate Jurisdiction in Civil Cases.—Sections 39-43.)

35. Notwithstanding anything contained in the Code of Civil Procedure, every Divisional Court and District Court may, by written order, direct that any civil business cognizable by it and the Courts under its control shall be distributed among those Courts in such manner as it thinks fit:

Power to distribute business.

Provided that no direction issued under this section shall empower any Court to exercise any powers or deal with any business beyond the limits of its proper jurisdiction.

36. *(1)* The ministerial officers of the Divisional and District Courts and Courts of Small Causes shall be appointed, and may be suspended and dismissed, by the Judges of those Courts respectively.

Ministerial officers of Subordinate Courts.

(2) The ministerial officers of all Courts controlled by a District Court, other than Courts of Small Causes, shall be appointed, and may be suspended and dismissed, by the District Court.

(3) Every appointment under this section shall be subject to such rules as the Local Government prescribes in this behalf, and, in dealing with any matter under this section, a District Court or a Judge of a Court of Small Causes shall act subject to the control of the Divisional Court.

37. *(1)* A Divisional or District Court or any Court under the control of a District Court may fine, in an amount not exceeding one month's salary, any ministerial officer of the Court for misconduct or neglect in the performance of his duties.

Power to fine ministerial officers.

(2) The District Court, subject to the general control of the Divisional Court, may, on appeal or otherwise, reverse or modify an order made under sub-section (1) by any Court under its control other than a Court of Small Causes, and may of its own motion fine up to the amount of one month's salary any ministerial officer of any Court under its control other than a Court of Small Causes.

38. A District Court may, with the previous sanction of the Local Government, delegate to any Subordinate Judge in the district the powers conferred on a District Court by sections 33, 35 and 36 of this Act, and section 25 of the Code of Civil Procedure, to be exercised by the Subordinate Judge in any specified portion of the district subject to the control of the District Court.

Delegation of District Judge's powers.

CHAPTER IV.

APPELLATE JURISDICTION IN CIVIL CASES.

39. *(1)* Appeals from the decrees of a Munsif in small causes shall, when such appeals are allowed by law, and the value of the suit does not exceed five hundred rupees, lie to the District Judge.

First appeals to whom to lie.

(2) Appeals from the decrees of a District or Subordinate Judge in original suits, when the value of the suit exceeds five thousand rupees, and appeals from the decrees of the Divisional Court in original suits, shall, when such appeals are allowed by law, lie to the Chief Court.

(3) Appeals from decrees in original suits, not hereinbefore or by any other enactment for the time being in force provided for, shall, when such appeals are allowed by law, lie to the Divisional Court.

40. A further appeal shall lie to the Chief Court in the following cases from an appellate decree of a Divisional Court on any ground which would be a good ground of appeal if the decree had been passed in an original suit, namely:—

Further appeal from Divisional Court.

(*a*) if the value of the suit exceeds five hundred rupees; or

the decree involves directly some claim to, or question respecting, property of like value;

(*b*) if the Divisional Court consists of a single Judge and the decree varies or reverses the decree of the Court below;

(*c*) if in a Divisional Court consisting of more than one Judge the appeal is heard by two or more Judges, and there is not a majority of those Judges concurring in the decree passed by the Divisional Court;

(*d*) if on the application of any party a Judge of the Divisional Court certifies that there is a question of law or custom or of general interest involved, and that the case is in his opinion of sufficient importance to justify a further appeal:

Provided that—

(1) an application under clause (*d*) shall not be received after the expiration of thirty days from the date on which the decree of the Divisional Court is passed, unless the applicant satisfies the Judge that he had sufficient cause for not presenting it within that period; and

(2) no further appeal shall lie in any small cause when the value of the suit does not exceed five hundred rupees.

41. Subject to the provisions of section 40 of this Act and sections 595 and 622 of the Code of Civil Procedure, a decree of the District or Divisional Court passed in appeal shall be final.

Appellate decision of District or Divisional Court otherwise final.

42. *(1)* The Local Government may confer on a Subordinate Judge the powers of a District Judge for the purpose of hearing appeals from the Courts of Munsifs in any local area, and withdraw those powers.

Power to confer appellate jurisdiction on Subordinate Judge.

(2) A Subordinate Judge shall for purposes connected with the exercise of powers so conferred be deemed to be a District Judge.

43. *(1)* The period of limitation for an appeal under section 39 or section 40 shall run from the date of the decree appealed against, and shall be as follows, that is to say:—

Period of limitation.

(*a*) when the appeal lies to the District or Divisional Court—sixty days;

(*b*) when the appeal lies to the Chief Court —ninety days.

(2) In computing these periods of sixty and ninety days, and in all respects not herein specified, the limitation of the appeals shall be governed by the provisions of the Indian Limitation Act, 1877:

XIV 1882. XV

The Panjáb Courts Act, 1884.
(Chapter IV.—Appellate Jurisdiction in Civil Cases.—Section 44.)
(Chapter V.—Revenue Courts.—Sections 45-47.)

Provided that, in computing the period of ninety days for an appeal under section 40, clause (*d*), the time during which the application under that clause has been pending shall be excluded.

44. For the purposes of section 617 of the Code of Civil Procedure, every appeal to a Divisional Court under this chapter shall, except when the value of the suit exceeds five hundred rupees, be deemed to be an appeal in which the decree is final.

References to Chief Court under section 617 of Code of Civil Procedure.

CHAPTER V.

REVENUE COURTS.

45. Suits of any of the classes comprised in the following groups instituted on and after the date on which this Act comes into force, shall be instituted, heard and determined in Revenue Courts and not otherwise:—

Certain classes of suits cognizable by Revenue Courts only.

First Group.

(*a*) Suits by tenants to establish a claim to a right of occupancy.

(*b*) Suits by landlords under section 6 of the Panjáb Tenancy Act, 1868, to prove that a tenant presumed to have a right of occupancy under that section has no such right.

(*c*) Suits for enhancement or abatement of rent under Chapter III of the same Act.

(*d*) Suits for ejectment of a tenant.

(*e*) Suits under section 25 of the said Act to contest liability to be ejected when notice of ejectment has been served.

Second Group.

(*f*) Suits for arrears of rent on account of land, or of any payments due on account of rights of pasturage, forest-rights, fisheries or the like.

(*g*) Suits for the recovery of any over-payment of rent.

(*h*) Suits by lambardárs for arrears of land-revenue, payable through them by the co-sharers, or for village-expenses or other dues for which the co-sharers may be responsible to the lambardár.

(*i*) Suits by co-sharers for their share of the profits of an estate or part thereof after payment of the land-revenue and village-expenses, or for a settlement of accounts.

(*j*) Suits by assignees of land-revenue for arrears of revenue due to them as such.

(*k*) Suits by superior proprietors for arrears of revenue due to them as such.

(*l*) Suits under section 9 of the Specific Relief Act to recover possession of land.

(*m*) Suits to determine disputes regarding boundaries of land which have been fixed by a Court or Revenue-officer:

Provided that the Local Government may, after consulting the Chief Court, direct that suits of any of these classes arising in any local area shall be heard and determined by the Civil Courts and not by the Revenue Courts, and cancel any such direction.

46. (*1*) A Deputy Commissioner shall have power to try suits of any of the classes mentioned in section 45.

Original jurisdiction of Deputy Commissioner and his subordinates in suits.

(*2*) An Assistant Commissioner or Tahsíldár shall have power to try suits of such classes mentioned in the second group of the same section, and within such limits as regards value, as may be determined by the Local Government either by including him in a class or grade, or otherwise as it thinks fit.

(*3*) The Local Government may invest a Náib Tahsíldár with power to try suits of the classes mentioned in section 45, clauses (*f*), (*g*), (*h*), (*i*) and (*k*), when the value does not exceed one hundred rupees.

(*4*) The powers conferred by this section shall be exercised within such local limits as the Local Government may direct, and in the absence of any such direction throughout the district or tahsíl to which the officer is posted.

47. An appeal shall lie from a decree passed in an original suit of any of the classes mentioned in section 46 as follows, namely:—

Appeals from original decrees.

(*a*) when the decree is passed by a Deputy Commissioner and the value of the suit exceeds five thousand rupees—to the Financial Commissioner;

(*b*) when the decree is passed by a Deputy Commissioner in a suit of the first group and the value of the suit does not exceed five thousand rupees, or

in a suit of the second group and the value of the suit exceeds one hundred rupees but does not exceed five thousand rupees—to the Commissioner;

(*c*) when the decree is passed by an Assistant Commissioner, Tahsíldár or Náib Tahsíldár—to the Deputy Commissioner:

Provided that—

(*1*) no appeal shall lie from a decree passed in a suit of the class mentioned in section 45, clause (*l*);

(*2*) the Local Government may direct that no appeal shall lie from the decree of any Assistant Commissioner or class or grade of Assistant Commissioners designated by it in this behalf in any suit of the classes specified in clauses (*f*) to (*k*), both inclusive, of section 45, unless—

(*a*) the value of the suit exceeds such sum, not being more than one hundred rupees, as the Local Government may fix in this behalf, or

(*b*) the decree has decided a question of title to land or to some interest in land as between parties having conflicting claims thereto or as to the amount of some rent or revenue or other payment to which there is a recurring claim or as to the principle on which revenue, profits or village-expenses or other dues should be apportioned.

(*3*) The Local Government may direct that appeals shall lie from the decrees of an Assistant Commissioner or any class of Assistant Commissioners as if those decrees were passed by a Deputy Commissioner.

The Panjáb Courts Act, 1884.
(Chapter V.—Revenue Courts.—Sections 48-56.)

Further appeals from appellate decrees.

48. A further appeal shall lie from a decree passed on appeal in a suit of any of the classes mentioned in section 45 on any ground which would be a good ground of appeal if the decree had been passed in an original suit as follows, namely:—

(*a*) when the decree is passed by a Commissioner in a suit of the first group and reverses or modifies the original decree—to the Financial Commissioner;

(*b*) when the decree is passed by a Deputy Commissioner and the value of the suit exceeds five thousand rupees—to the Financial Commissioner;

(*c*) when the decree is passed by a Deputy Commissioner and the value of the suit exceeds one hundred rupees but does not exceed five thousand rupees—to the Commissioner.

No appeals except under the foregoing sections.

49. Except as provided by the foregoing sections, no appeal shall lie from a decree passed under this chapter.

Limitation of appeals under this chapter.

50. *(1)* The period of limitation for an appeal under section 47 or 48 shall run from the date of the decree appealed against, and shall be as follows, that is to say:—

(*a*) when the appeal lies to the Court of the Deputy Commissioner or of the Commissioner—sixty days;

(*b*) when the appeal lies to the Financial Commissioner—ninety days.

(2) In computing those periods of sixty and ninety days, and in all respects not herein specified, the limitation of the appeals shall be governed by the provisions of the Indian Limitation Act, 1877.

[XV of 1877.]

Power to confer powers of Financial Commissioner, Commissioner and Deputy Commissioner.

51. *(1)* The Local Government may confer on any person all or any of the powers, original or appellate, of a Financial Commissioner, Commissioner or Deputy Commissioner under this chapter, and may withdraw the powers so conferred.

(2) Any person on whom powers are conferred under this section shall exercise those powers within such local limits and in such classes of cases as the Local Government may direct, and, except as otherwise directed by the Local Government, shall for all purposes connected with the exercise of the same be deemed a Financial Commissioner, Commissioner or Deputy Commissioner, as the case may be.

Appointment of second Financial Commissioner.

52. *(1)* The Local Government may, if it thinks fit, appoint a second Financial Commissioner, who shall hold his office during the pleasure of the Local Government.

(2) When a second Financial Commissioner is appointed, the Local Government may make rules as to the distribution of business between the two Financial Commissioners, and, until such rules are made and subject to such rules, the Financial Commissioner who is senior in respect of his appointment as such may transfer such business as he thinks fit to the other Financial Commissioner for disposal, and may withdraw and himself dispose of any business so transferred and not disposed of.

Procedure of Revenue Courts how to be regulated.

53. *(1)* The Local Government may, with the previous sanction of the Governor General in Council, make rules consistent with this Act for regulating the procedure of Revenue Courts in matters under this chapter for which a procedure is not prescribed thereby; and may, by any such rule, direct that any provisions of the Code of Civil Procedure shall apply, with or without modification, to all or any classes of cases before Revenue Courts.

(2) Until such rules are made, and subject to such rules when made and to the provisions of this Act,—

(*a*) the provisions of the Code of Civil Procedure shall, so far as applicable, apply to all proceedings whether before or after decree in cases under this chapter; and

(b) the Court of the Financial Commissioner shall, in respect of such cases, be deemed to be the High Court within the meaning of the said Code, and shall exercise, as regards the Courts under its control, all the powers of a High Court under the said Code.

Power to refer party to Civil Court.

54. (*1*) If, in any suit pending before a Revenue Court exercising original appellate or revisional jurisdiction under this chapter, it appears to the Court that any question in issue is more proper for decision by a Civil Court, the Revenue Court may, with the previous sanction of the Revenue Court (if any) to the control of which it is immediately subject, by order in writing, require any party to the suit to institute, within such time as it may fix in this behalf, a suit in the Civil Court with a view to obtaining a decision on the question, and, if he fails to comply with the requisition, may, if it thinks fit, decide the question against him.

(*2*) If he institutes such a suit, the Revenue Court shall dispose of the suit pending before it in accordance with the final decision of the Civil Court of first instance or appeal (as the case may be).

Power for Financial Commissioner to refer question to Chief Court.

55. (*1*) When a question of the description mentioned in section 617 of the Code of Civil Procedure arises before the Financial Commissioner in the exercise of any of his powers under this chapter, he may refer the question for the decision of the Chief Court in manner prescribed by that section:

Provided that he shall not be bound to express any opinion thereon.

(*2*) On a reference being made under sub-section (1), the subsequent proceedings in the case shall be, as nearly as may be, in conformity with the provisions of sections 618, 619 and 620 of the said Code, and the Chief Court may return for amendment the statement received from the Financial Commissioner if it is not sufficient to enable the Court to determine the question referred.

Administrative Control.

Controlling powers of Financial Commissioner, Commissioner and Deputy Commissioner.

56. (*1*) The general superintendence and control over all other Revenue Courts shall be vested in, and all such Courts shall be subordinate to, the Court of the Financial Commissioner.

The Panjáb Courts Act, 1884.
(Chapter VI.—Settlement Courts.—Sections 62-63.)
(Chapter VII.—Supplemental Provisions.—Sections 64-66.)

(2) Subject to the general superintendence and control of the Financial Commissioner, every Commissioner shall control all other Revenue Courts in his division.

(3) Subject as aforesaid and to the control of the Commissioner, every Deputy Commissioner shall control all other Revenue Courts in his district.

57. Every Commissioner and Deputy Commissioner may exercise, as regards the Courts under his control, the same powers of withdrawal, trial and transfer as are conferred by section 25 of the Code of Civil Procedure on a District Court.

Power to transfer business.

58. Every Commissioner and Deputy Commissioner may, by written order, direct that any business cognizable under this chapter by his Court and the Courts under his control shall be distributed among those Courts in such manner as he thinks fit:

Power to distribute business.

Provided that no direction issued under this section shall empower any Court to exercise any powers or deal with any business beyond the limits of its proper jurisdiction.

59. *(1)* The ministerial officers of the Courts of the Financial Commissioner, Commissioner and Deputy Commissioner shall be appointed, and may be suspended and dismissed, by the Judges of those Courts, respectively.

Ministerial officers of Courts.

(2) The ministerial officers of all Courts controlled by a Deputy Commissioner shall be appointed, and may be suspended and dismissed, by the Deputy Commissioner.

(3) Every appointment under this section shall be subject to such rules as the Local Government prescribes in this behalf; and in dealing with any matter under this section a Commissioner shall act subject to the control of the Financial Commissoner, and a Deputy Commissioner subject to the control of the Commissioner.

60. *(1)* A Commissioner or Deputy Commissioner and the presiding officer of every Court under the control of a Deputy Commissioner may fine, in an amount not exceeding one month's salary, any ministerial officer of his Court for misconduct or neglect in the performance of his duties.

Power to fine ministerial officers.

(2) The Deputy Commissioner, subject to the general control of the Commissioner, may, on appeal or otherwise, reverse or modify any order made under sub-section (1) by the presiding officer of any Court under his control, and may of his own motion fine up to the amount of one month's salary any ministerial officer of any such Court.

61. A Deputy Commissioner may, with the previous sanction of the Local Government, delegate to any Assistant Commissioner in the district the powers conferred on Deputy Commissioners by sections 56, 57, 58 and 59 to be exercised by the Assistant Commissioner in any specified portion of the district subject to the control of the Deputy Commissioner.

Delegation of Deputy Commissioner's powers.

CHAPTER VI.

SETTLEMENT COURTS.

62. *(1)* The Local Government may, by notification in the official Gazette, declare that a settlement of land-revenue is in progress in any local area, and invest any officer making or controlling the settlement with all or any of the powers of any Court constituted under this Act for the purpose of trying all or any specified class of suits and appeals relating to land, or the rent, revenue or produce of land, arising in the local area.

Power to invest Settlement-officers with powers of Civil or Revenue Courts in certain cases.

(2) The publication of a notification under this section shall be conclusive evidence that a settlement of land-revenue is in progress in the local area to which the notification refers.

(3) The Local Government may cancel any such notification.

(4) While the notification continues in force, the powers specified in it shall be exercised by the officers so invested, and not otherwise:

Provided as follows:—

(a) the Local Government may, by order published in the official Gazette, direct that any jurisdiction with which any officer has been invested by the notification shall be exercised solely by the Courts by which the jurisdiction would have been exercised if the notification had not been published; and

(b) any cases pending before any officer under the notification when it is cancelled may, notwithstanding the cancellation, be disposed of by him as if it continued in force, unless the Local Government directs (as it is hereby empowered to do) that those cases shall be transferred for disposal to the Courts by which they would have been disposed of if the notification had not been published.

63. For the purposes of section 62 the Local Government may, notwithstanding anything in this Act, from time to time direct that any of the Courts mentioned in this Act (except the Chief Court and the Court of the Financial Commissioner) shall, in respect of any specified class of cases, be subordinate to, or subject to the control or superintendence of, any authority other than those specified in this Act.

Power to alter subordination of Courts for purposes of section 62.

CHAPTER VII.

SUPPLEMENTAL PROVISIONS.

64. Except as otherwise provided by this Act, the Local Government may, when it is empowered by this Act to make any appointment or confer any powers, appoint, or confer the powers on any person specially by name or by virtue of his office.

Mode of appointment and conferring powers.

65. All powers conferred by this Act may be exercised, from time to time, as occasion requires.

Powers exercisable from time to time.

66. *(1)* The Local Government may fix the place or places at which any Court under this Act is to be held.

Place of sitting of Courts.

The Panjáb Courts Act, 1884.
(Chapter VII.—Supplemental Provisions.—Sections 67-75. The Schedule.)

(2) The place or places so fixed may be beyond the local limits of the jurisdiction of the Court.

(3) Except as may be otherwise provided by any order under this section, a Court under this Act may be held at any place within the local limits of its jurisdiction.

Vacations.

67. *(1)* Subject to the approval of the Local Government, the Chief Court shall prepare a list of days to be observed in each year as holidays in the Chief Court and the Civil Courts subordinate thereto, and the Financial Commissioner shall prepare a like list for his Court and the Courts subordinate thereto.

(2) Every such list shall be published in the official Gazette.

Pending proceedings.

68. *(1)* All cases or proceedings pending in the Chief Court on the day when this Act comes into force shall be disposed of as if this Act had not been passed.

(2) All cases or proceedings pending in any Civil Court subordinate to the Chief Court on that day shall be disposed of as if this Act had not been passed:

Provided that the Chief Court may direct that any such cases or proceedings shall be transferred for disposal to any Civil Court established under this Act which would have had jurisdiction if it had been in existence when the cases or proceedings were instituted.

(3) In the case of an appeal pending on the said day, the following shall, for the purposes of sub-section (2), be deemed to be the Court which would have had jurisdiction as aforesaid, namely:—

(*a*) when the value of the suit exceeds five thousand rupees,—the Chief Court;

(*b*) when the appeal is one in a small cause, and is pending before the Deputy Commissioner or an officer invested with the appellate powers of a Deputy Commissioner and the value of the suit does not exceed five hundred rupees,—the District Court;

(*c*) in other cases,—the Divisional Court.

Appeals after Act comes into force against decrees, &c., passed before.

69. Appeals from decrees, orders and decisions passed by Civil Courts and not appealed against before the date on which this Act comes into force shall lie and be disposed of as if this Act had not been passed and not otherwise:

Provided that the Courts to which such appeals shall lie shall be as follows:—

(*a*) when the appeal would before the said date have lain to the Chief Court, or the value of the suit exceeds five thousand rupees,—the Chief Court;

(*b*) in small causes when the value of the suit does not exceed five hundred rupees, and the appeal would before the said date have lain to the Deputy Commissioner, or an officer exercising the appellate powers of a Deputy Commissioner,—the District Court;

(*c*) in other cases,—the Divisional Court.

Modification of section 622 of Civil Procedure Code.

70. Section 622 of the Code of Civil Procedure, in its application to the territories to which this Act extends, shall be read as if the words "illegally or" were omitted, and for the purposes of that section no appeal shall be deemed to lie from the appellate decree of a Divisional Court to the Chief Court when the case does not fall under clause (*a*), clause (*b*) or clause (*c*) of section 40, and an application under clause (*d*) of that section has been refused.

Amendment of the first schedule annexed to the Court-fees Act, 1870.

71. In the first schedule annexed to the Court-fees Act, 1870, after No. 12, the following shall be inserted:—

NUMBER.		PROPER FEE.
13. Application to the Chief Court or the Court of the Financial Commissioner of the Panjáb for the exercise of its revisional jurisdiction under section 622 of the Code of Civil Procedure.	When the amount or value of the subject-matter in dispute does not exceed twenty-five rupees.	Two rupees.
	When such amount or value exceeds twenty-five rupees.	The fee leviable on a memorandum of appeal.

Refund of fee paid on application for revision.

72. If the Court, on an application under section 622 of the Civil Procedure Code, on which a fee has been paid under the last preceding section, sets aside or modifies the decree or order of a Subordinate Court, or remands the case for a fresh decision, it may grant to the applicant a certificate authorizing him to receive back from the Collector the full amount of fee paid on the application, or any smaller amount which, with regard to the circumstances of the case, it may think proper to order to be refunded.

Saving of certain appointments, rules and forms, notifications, powers and orders.

73. All appointments made under sections 5 and 22 of Act XVII of 1877, directions given under section 23, rules and forms made and prescribed under sections 19, 26 and 27, and notifications published, powers conferred and orders issued under section 49, of the same Act, shall, so far as may be, be deemed to have been respectively made, given, prescribed, published, conferred and issued under this Act.

Amendment of Act X of 1870, section 3.

74. In the Land Acquisition Act, 1870, section 3, before the words "British Burma," in both places where they occur, the words "the Panjáb" shall be inserted.

Amendment of Act XXVIII of 1868, section 42.

75. In the Panjáb Tenancy Act, 1868, section 42, for the words "and thirty-one" the words "thirty-one and forty" shall be substituted.

THE SCHEDULE.

ACTS REPEALED.

(*See section 2.*)

Number and year.	Title of Act.	Extent of repeal.
Act IV of 1869	The Indian Divorce Act.	So much of section 3 as defines "District Judge" in the Panjáb to mean the "Commissioner of a Division."
Act XIV of 1875.	The Panjáb Judicial Administration Act, 1875.	So far as it relates to civil or criminal judicial powers.
Act XVII of 1877.	The Panjáb Courts' Act, 1877.	The whole, except section eighteen.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 2nd October, 1884:—

No. 14 OF 1884.

A Bill to repeal the Straits Settlements Emigration Act, 1877, and to amend the Indian Emigration Act, 1883.

WHEREAS it is expedient to repeal the Straits Settlements Emigration Act, 1877, and to amend the Indian Emigration Act, 1883, in manner hereinafter appearing; It is hereby enacted as follows:—

V of 1877.
XXI of 1883.

1. The Straits Settlements Emigration Act, 1877, is repealed.

Act V of 1877.

2. For section 102 of the Indian Emigration Act, 1883, the following section shall be substituted:—

New section substituted for section 102 of Act XXI of 1883.

XXI of 1883.

"102. On and from such a date as the Governor General in Council may, by notification in the *Gazette of India*, fix in this behalf, a Native of India who departs by sea out of British India under an agreement to labour for hire in any protected Native State adjoining the Straits Settlements to which the notification refers shall not be deemed to emigrate within the meaning of this Act."

Power for Governor General in Council to exempt emigration to Native States adjoining the Straits Settlements from Act.

STATEMENT OF OBJECTS AND REASONS.

THE main object of this Bill is to repeal Act V of 1877 (the Straits Settlements Emigration Act, 1877), which extends only to the Madras Presidency. It is dictated by the policy which recently led to the enactment of Act VII of 1883, (to repeal the British Burma Labour Law, 1876.) As in the case of Burma, it is found that there is a system of "free emigration" to the Straits which not only competes with, but altogether distances, the Government system for which Act V of 1877 provides. From the information before it, the Government of India is of opinion that that Act has impeded instead of promoting emigration, that labour flows as naturally to and from the Straits as it does between Burma and India, and that attempts to control its movement in British territory merely induce it to seek an outlet from the French ports of Pondicherry and Karikal. Such provisions as in the opinion of the Government are necessary, for the protection and control of the Indian immigrant after his arrival in the Straits have been embodied in a revised Labour Regulation, which is now before the Straits legislature, and will, it is expected, shortly become law. Under these circumstances, the Government of India considers that emigration from India to the Straits should be uncontrolled by law in this country save as regards the requirements of the Native Passengers Ships Act.

2. The repeal of Act V of 1877 necessitates, however, an amendment of section 102 of Act XXI of 1883 (the Indian Emigration Act, 1883). The first sub-section of that section provides for the extension of Act V of 1877 to other parts of British India. As the Act is itself now being repealed, it is clear that this sub-section should be repealed also. The second and third sub-sections of that section give the Governor General in Council power by notification to include any of the protected Native States adjoining the Straits Settlements within

the scope of any law relating to emigration to those Settlements, and exempt, on and from the date of any such notification, emigration to the protected State specified therein from the operation of Act XXI of 1883. Though there will no longer be any special law relating to emigration to the Straits, it is deemed desirable to retain the power, which these sub-sections confer, of exempting emigration to the protected States from Act XXI of 1883. A new section has therefore been substituted by section 2 of the Bill for section 102 of Act XXI of 1883 empowering the Governor General in Council to exempt emigration to the protected States from that Act whenever he considers such exemption to be desirable.

The following Report of the Select Committee on the Bill to provide more effectually for the suppression of certain forms of Gaming in British Burma was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 25th September, 1884:—

WE, the undersigned members of the Select Committee to which the Bill to provide more effectually for the suppression of certain forms of Gaming in British Burma was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report.

From Officiating Secretary to Chief Commissioner, British Burma, No. 289-1L., dated 9th September, 1884 [Paper No. 1].
Telegram from Chief Commissioner, British Burma, dated 15th September, 1884 [Paper No. 2].

2. The following is an extract from the Chief Commissioner's telegram of the 15th instant:—

"Opinions received on Burma Gaming Bill induce me to urge following points:—

"*First*, we must make touts for *ti* punishable; so please, after word 'players' in section 4, insert words 'or who promotes the game by soliciting or collecting stakes or otherwise.'

"*Second*, I fear Courts may unduly restrict meaning of word 'place'; therefore, for first eight words in clause (2), section 3, please substitute words 'every place, whether enclosed or unenclosed.'

Thirdly, our 1st class Magistrates are few; therefore please add clause as follows:—

'The Local Government may specially authorize any Magistrate of the 2nd class to exercise the powers conferred by section 5 of Act III of 1867 on the Magistrate of the district.'

Fourthly, we want power to arrest touts in public places; therefore please add clause as follows:—

'A police-officer may apprehend without warrant any person soliciting or collecting stakes for *ti* or any other game of like nature in any public street, place or thoroughfare.'

"*Fifthly*, on advice of officers consulted, I agree that section 2 of Bill may be omitted."

3. We have adopted all these suggestions except the second; and, though the Chief Commissioner adds that he lays much stress on that suggestion, we do not think it would be possible to adopt it, at least in the shape in which he proposes it. It must be remembered that the Bill is not an independent measure, but is to be read with Act III of 1867; and, if the provisions of that Act relating to common gaming-houses be referred to, it will, we think, be found that some at least of them are such that if every "place," without any distinction or limitation whatever, was to be made a "common gaming-house," they could not fairly or reasonably be applied. It may indeed be doubted whether, apart from all consideration of the harshness which the proposed amendment would involve, some of those provisions could be applied to every "place" indiscriminately without giving rise to something approaching an absurdity.

4. We have, we need hardly say, considered whether it might not be desirable to give some extension to the definition of "common gaming-house" short of that proposed by the Chief Commissioner; but we think, having regard to English decisions on the provisions of Statutes worded in a manner somewhat similar to Act III of 1867 and the

present Bill, that the definition is as wide as it is desirable to make it. We think we may reasonably count on its being held, with reference to those decisions, to include all places which are sufficiently analogous to a house, walled enclosure or room to admit of being reasonably and fairly treated as gambling-houses for the purposes of the Act.

5. It must be remembered that the question here involved has little or no importance in practice except in its bearing on the position of persons who are induced to take tickets in the *ti;* for the managers and their assistants will in all cases be subject to severe penalties under separate provisions, which are completely independent of the definition of common gaming-house; and, as regards mere ticket-holders, it appears to us that it is sufficient if they are punishable under the common gaming-house provisions of the Bill and the Act as they now stand, and under the 13th section of the Act for gambling in public. We have, however, amended the last-mentioned section so as to give it a somewhat wider range in British Burma than it has elsewhere.

6. The publication ordered by the Council has been made as follows:—

LEGISLATIVE DEPARTMENT.

[First publication.]

The following Report of the Select Committee on the Bill to amend the Law relating to Local Self-government in British Burma was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 25th September, 1884:—

We, the undersigned Members of the Select Committee to which the Bill to amend the law relating to Local Self-government in British Burma was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report.

From Officiating Secretary to Chief Commissioner, British Burma, No. 678 8R.M., dated 27th September, 1883, and enclosures [Papers No. 1].
From Officiating Junior Secretary to Chief Commissioner, British Burma, No. 88-8R.M., dated 4th October, 1883, and enclosures [Papers No. 2].
From Officiating Junior Secretary to Chief Commissioner, British Burma, No. 348 8R.M., dated 17th October, 1883, and enclosures [Papers No. 3].
From Officiating Junior Secretary to Chief Commissioner, British Burma, No. 537 8R.M., dated 27th December, 1883, and enclosure [Papers No. 4].
Office Memorandum from Home Department, No. 762, dated 9th May, 1884, and enclosures [Papers No. 5].
From Officiating Secretary to Chief Commissioner, British Burma, No. 481-1G.M., dated 17th June, 1884, and enclosure [Papers No. 6].

2. The Bill as now amended by us will be seen at a glance to differ considerably from the Bill as introduced. The difference is due chiefly to three causes.

3. In the first place, there has been a change in the main plan and scope of the measure. As explained in the Statement of Objects and Reasons, the original Bill was framed with a view to the inclusion within municipalities of adjoining rural areas. This course was taken, on the advice of the Local Government, in order to meet the requirements of certain rural tracts, until such time as it might be found possible to establish a system of local boards for rural districts.

From the papers since submitted, however, it appears that, upon fuller consideration, the weight of opinion is against the attempt to include in one municipality urban and rural tracts; and the Chief Commissioner now recommends that the Bill be confined, as we believe all the Municipal Acts on our Statute-book are, to urban tracts, the matter of local self-government in rural tracts being left to be dealt with separately hereafter.

In this recommendation we concur. The difficulty of framing the provisions of the Bill so as to fit in with conditions so essentially different as those of the towns and the adjoining tracts of country has turned out to be greater than was anticipated, and the call for the establishment of a system of local self-government in the rural tracts of British Burma is not so pressing as to justify our running the risk of passing an unsatisfactory measure for the sake of at once meeting it. We have accordingly reduced the Bill to the form of a Municipal Bill pure and simple.

4. Another difference between the original Bill and the present Bill is due to our having, at the request of the Chief Commissioner, adopted the course taken by the Select Committee on the Panjáb Municipal Bill of substituting for wide general powers to make rules detailed provisions regarding nuisances and other matters affecting the public health, safety and convenience. It is in this way that most of the new sections contained in Chapters VI and VII of the amended Bill are to be accounted for.

5. Lastly, the greater light thrown upon the needs of municipal government and on the difficulties likely to present themselves in the application of a Municipal Act by the prolonged discussions which took place in the Select Committee on the Panjáb Bill has led to numerous amendments in, or additions to, the Bill of minor importance. As examples we may refer to—

Section 27 (e) (distribution of executive powers and duties);

K 4

Section 28 (extraordinary powers of president and vice-president in case of emergency);

Sections 44 and 88 (powers to impose a scavenging-tax and to undertake the scavenging of private premises);

Sections 51-57 (special rules applicable to taxation of immoveable property);

Sections 60 and 61 (constitution and application of the municipal fund);

Sections 65-67 (provisions relating to municipal property);

Section 138 (settlement of disputes);

Sections 151-153 (relating to notices); and

Section 158 (which confers a power to exempt a municipality from any provisions of the Act which appear unsuitable to it).

This last section, we may observe, is specially necessary in view of the numerous and somewhat elaborate provisions now contained in Chapters VI and VII, some of which would probably be unsuitable in small municipalities.

6. We have now to notice such of the more important alterations of the Bill as are not accounted for by the foregoing remarks, or as otherwise seem to call for explanation.

7. Section 12 of the original Bill, which required a member of the municipal body to vacate his seat when appointed to a salaried municipal office, and section 29, which provided for the payment of fees to members for attendance at meetings, have been omitted; the former because it is not thought advisable that any person while a member of a committee should be appointed to a salaried office under the committee, and the latter because a municipal area can now comprise only a town and its immediate suburbs, and the members of the committee, being residents of that area and not having to travel any distance to the meetings, may reasonably be expected to give their services gratuitously.

8. We have, following the course taken in the Panjáb Bill, limited the rates to be imposed for water, lighting and scavenging only by providing (in effect) that they shall not exceed what is requisite to defray the cost of the services for which they are levied; and we have, as in the Panjáb Bill, provided that the proceeds of these rates shall be carried to the one municipal fund, separate accounts only being kept, instead of constituting separate funds.

9. We have substituted for section 47 of the original Bill, which required a municipal committee to make grants-in-aid to schools in accordance with such rules as the Government might make, a section (62) specifically appropriating to educational purposes the income for schools and all sums acquired by the committee in trust for educational purposes, and further requiring the assignment for educational purposes from the general municipal revenues of such sum annually, not being more than 5 per cent. of the gross annual income of the municipality, as the Local Government may fix.

This section has been suggested by the Chief Commissioner with the view of meeting practical difficulties which have occurred in British Burma, and is, in his opinion, indispensable for the purpose of carrying out the educational policy which has recently been established in that province, and under which the municipalities, whilst relieved of police-charges, have been required to provide for the maintenance of local schools. It will be observed that the section, while it compels the committee to devote a certain minimum of its funds to educational purposes, imposes no such restriction as might have been imposed under the original section as regards the particular objects on which the money shall be spent.

10. The Chief Commissioner has in an unofficial communication proposed certain modifications in and additions to the new provisions introduced from the Panjáb Bill in Chapters VI and VII. Most of these are of minor importance, and we have in general adopted them, omitting only such as appeared to us superfluous or unnecessarily stringent. In one instance we, however, have found it necessary to omit a section of considerable importance proposed by the Chief Commissioner, namely, a section similar to section 14 of Act XLVIII of 1860 giving a certain power of control over brothels and other disorderly houses; but that section we have omitted merely because we think the matter is one to be dealt with by the Magistrates and police rather than by a municipal committee.

11. The only other point which appears to call for notice in connection with this portion of the Bill is that we have substituted two sections (126 and 127) based on similar sections in the Public Health Act, 1875, for a section proposed by the Chief Commissioner, to guard against the spread of infectious diseases through the medium of public conveyances.

12. Sections 49 to 51 of the original Bill provided for the exercise by a municipal committee or its members of certain magisterial powers in nuisance cases. We have omitted these sections for the same reasons that have led to the omission of the corresponding sections of other Municipal Bills recently before the Council, namely, that a section like section 49 could have little practical effect, and that it is not desirable that the powers given by the other two sections should be conferred.

13. We have not thought it advisable to adopt a proposal made by the Chief Commissioner that the Local Government should be empowered to invest municipal officers with the powers of police-officers for the purposes of section 34 of the Police Act (V of 1861).

14. We have added a clause to section 133 providing that the powers of control over municipalities, conferred by that section on the Commissioner and Deputy Commissioner, shall, in the case of the municipalities of Rangoon, Moulmein, Akyab and Bassein, be exercised not by those officers but by the Local Government.

15. Lastly, we have to state that we have considered a proposal of the Chief Commissioner to the effect that the appropriation provisions of the Bill should be modified in such a manner as to admit of a municipal committee subscribing to a public band or contributing to fireworks or the like on great occasions. We have not adopted this proposal, because the objects in question appear to us to lie beyond the sphere of the purposes for which municipal taxation is raised in this country.

Extract from the *Tribune* of 9th August, 1884 [Paper No. 7].
Extract from the *Tribune* of 16th August, 1884 [Paper No. 8].
From Officiating Secretary to Government, Panjáb, No. 4078., dated 26th August, 1884, and enclosures [Papers No. 9].
Extract from the *Civil and Military Gazette* of 21st August, 1884 [Paper No. 10].
From President, Indian Association, Lahore, dated 30th August, 1884, and enclosure [Papers No. 11].
Extract from the *Tribune* of 23rd August, 1884 [Paper No. 12].
Extract from the *Civil and Military Gazette* of 25th August, 1884 [Paper No. 13].
From Officiating Secretary to Government, Panjáb, No. 4478., dated 4th September, 1884, and enclosure [Papers No. 14].
From Officiating Secretary to Government, Panjáb, No. 4458., dated 6th September, 1884, and enclosure [Papers No. 15].
Endorsement by Officiating Under-Secretary to Government of India, Home Department, No. 1215, dated 15th September, 1884, and enclosures [Papers No. 16].

2. We have rearranged the provisions of the Bill in a manner which we trust will make them more readily intelligible; and in the following remarks we shall as far as possible take the sections in their new order.

CHAPTER II.

THE CHIEF COURT.

3. It will be observed that under the proviso to section 8, sub-section (1), a single Judge of the Chief Court is prohibited from revising or modifying any proceeding of a lower Court except an "order" within the meaning of the Code of Civil Procedure. The restriction thus imposed does not, we believe, differ to any important extent from that contained in the corresponding provision (section 21, proviso) of the original Bill, and it relieves us of the necessity of using the phrase "interlocutory order," to which some difficulty attached.

4. We have also modified the last sub-section of section 8 by placing in the hands of the Senior Judge the power of determining which Judges of the Chief Court shall sit alone and which shall constitute benches, instead of leaving the power to be delegated by the Court to such Judge as it might think fit.

5. We have in section 14 added to the matters in respect of which the Chief Court is empowered to make rules—

(1) the translation of papers filed in the Chief Court and copying or printing any such papers or translations, and the payment by parties of the expenses thereby incurred; and

(2) the procedure in cases where a person is entitled to inspect a record of any Court or obtain a copy of it, and the fees payable for searches and copies.

We believe that these matters have long been dealt with by the Chief Court at its discretion, and we think it well that the power to deal with them should be placed on a legal basis.

CHAPTER III.

THE SUBORDINATE CIVIL COURTS.

6. The enumeration of the subordinate Civil Courts in section 17* differs from that in section 4 of the original Bill, but the substantive changes involved are smaller than might at first sight be supposed.

* (a) The Divisional Court.
(b) The Court of the District Judge.
(c) The Court of the Subordinate Judge.
(d) The Court of the Munsif.

The Divisional Court corresponds, with certain modifications, which we shall presently have to notice, to the Divisional Court of the original Bill.

7. The District Judge corresponds to the Assistant Judge of the original Bill, but his position as controlling the administration of civil justice in the district in somewhat the same manner as the District Magistrate under the Criminal Procedure Code controls the administration of criminal justice is more clearly brought out; and (section 23) his Court is, subject to certain exceptions, made the District Court for the purposes of those Acts which confer special powers on a District Court.

8. The Subordinate Judge corresponds to the Subordinate Judge of the first class of the original Bill, but we have, instead of fixing a pecuniary limit to his jurisdiction as in section 36 of the original Bill, empowered the Local Government to do so (section 26). It will thus be in the power of the Local Government to limit the jurisdiction of a Subordinate Judge to any sum it thinks fit, or to confer upon him the unlimited jurisdiction exercised by a District Judge in original suits.

9. The Munsif of the amended Bill is intended to comprise the second, third and fourth classes of Subordinate Judges of the original Bill, and his powers in original suits have been dealt with in a manner similar to that just described; that is to say, it is left (section 26) to the Chief Court to invest each Munsif with such powers as it thinks fit, provided that the limit of value does not exceed Rs. 1,000, which was the limit for Subordinate Judges of the second class under section 36 of the original Bill.

10. It will be observed that section 19 introduces an important change as regards the constitution of the Divisional Court; but as that change will be more conveniently explained when we come to speak of the appellate jurisdictions, it only remains to notice here that we have in the proviso to section 21 put the restriction on the powers of one of several Judges of a Divisional Court sitting alone on the same footing as the similar restriction in the case of the Chief Court (*supra*, paragraph 3).

11. We have inserted a new section (29), similar to section 27 of the Bengal Courts Act, providing for the transfer to a Subordinate Judge or Munsif of business under Act XXVII of 1860, Act XL of 1858 and Act IX of 1861.

12. In the section (now 30) which empowers the Local Government to confer the powers of a Small Cause Court Judge on certain judicial officers, we have, as in other cases, omitted all minute specification of pecuniary limits, and simply provided that the Local Government may confer such powers as it thinks fit within the limit of Rs. 500.

13. In dealing with a Bill of this description it is impossible to overlook the difficulties which present themselves in connection with the valuation of certain classes of suits for the purpose of determining the original jurisdiction and the course of appeal. The question of the simplest mode of valuing suits for the recovery of land is at present under the consideration of the Government of India, and we have not accordingly felt ourselves called upon to take it up; but there are certain other classes of suits which in the absence of any special provision for their valuation would be left in a very unsatisfactory position, namely, suits the subject of which does not admit of valuation on any intelligible basis. Such suits are usually valued at some low figure, and consequently may be heard without any reference to their importance or difficulty by Courts of the inferior grades. The necessity for making some special provision for them on the present occasion is the greater, inasmuch as, under the present Bill, the course of appeal will depend to a greater extent than before on the valuation.

We have accordingly introduced a new section (32) providing that, where the subject-matter of suits of any class is such that in the opinion of the Chief Court it does not admit of being satisfactorily valued, the Chief Court may, with the previous sanction of the Local Government, direct that such suits shall be treated as if the subject-matter were of such value as the Chief Court thinks fit to specify in this behalf.

14. The only other provision of this chapter which appears to call for notice is section 38. As we have explained, it is intended that the District Judge should have the general control of the administration of civil justice throughout his district; but there may be cases, as *e.g.*, that of Kulu, in which it would be convenient to delegate this control to a Subordinate Judge in some outlying portion of the district in somewhat the same way as certain powers of a District Magistrate are delegated to a Sub-divisional Officer under the Code of Criminal Procedure; and accordingly a power to effect such a delegation has been taken.

CHAPTER IV.

APPELLATE JURISDICTION IN CIVIL CASES.

15. We have omitted the words in the opening section of this chapter which conferred a power to place other classes of suits on the same footing as mufassal small causes for the

purposes of appeal, the object in view being now sufficiently met by the new definition of "small cause" (in section 3), which gives power to place small causes within the meaning of the Presidency-towns Small Cause Courts Act on the same footing as mufassal small causes.

16. We have, moreover, restricted this section, as we have the entire chapter, to appeals from decrees as distinguished from orders, the latter being sufficiently provided for by the Code of Civil Procedure.

17. The subject of further appeals, which is dealt with in the following section, is one which has given rise to much discussion, and which is surrounded on all sides with difficulties of a serious nature. We have given to it the most careful and prolonged consideration, and have come to the conclusion that the right of further appeal allowed by the Bill as introduced must be extended in some important particulars.

The Bill as introduced allowed a further appeal from the appellate decree of a Divisional Bench only in two cases, namely, if the Judges differed *or* if some question of law or custom or of general interest was involved; and in these cases it did not allow the appeal as a matter of right, but only if both Judges, or when one had left the Court, the remaining one, certified that the case was of sufficient importance to justify a further appeal. Under the Bill as now amended a further appeal will lie as a matter of right and without any certificate from a Divisional Bench in all cases where the Judges differ. There will, moreover, be a further appeal in all cases in which any one Judge certifies that there is a question of law or custom or general interest involved, and that the case is in his opinion of sufficient importance to justify a further appeal. And, lastly, there will be a further appeal in cases of a class altogether new and not contemplated in the original Bill, namely, where the value of the suit exceeds Rs. 500.

The proviso barring a further appeal in small causes when the value does not exceed Rs. 500 is retained.

18. We have, as already indicated, made another alteration which is of considerable importance, and which it is convenient to notice here.

The Bill as introduced required that the Divisional Courts should consist in all instances of at least two Judges, that except as expressly provided no decision should be reversed except by a bench of two Judges, and that the restrictions on further appeal which we have described should apply to all Divisional Courts. To that objection was taken on the ground that there may be a difficulty in finding in the Panjáb a sufficient number of competent officers to furnish two Judges for each of the Divisional Courts proposed. We need hardly say that if the objection were well-founded it would be a serious one, inasmuch as the strict limitations on the right of further appeal to the Chief Court imposed by the original Bill were framed in reliance on the strength of the Divisional Benches; and though those limitations have now been relaxed in the important particulars already described, the Bill still proceeds on the assumption that a Divisional Bench will be a stronger, more reliable and more satisfactory tribunal than the Court of a Commissioner ordinarily now is.

19. It is of course impossible for us to say whether the precise number of competent officers required to constitute Benches in all the proposed Divisions is to be found in the Panjáb at this moment, but we understand that the Lieutenant-Governor has no misgivings on the point, and we think it may be safely affirmed that the difficulty of procuring a sufficient number of competent officers for the Benches has been much exaggerated.

In order, however, to guard against every possibility of miscarriage, we have now modified the Bill in such a way that, if the Lieutenant-Governor finds, at any time, that the materials required for establishing a Bench in any particular Division are not immediately available, he can make the Divisional Court there consist of a single Judge (section 19), and in the event of his doing so a further appeal will, subject only to the proviso as to small causes contained in section 40, lie from that Judge's appellate decrees precisely as they lie at present from the appellate decrees of a Commissioner [section 40, clause (*b*)].

CHAPTER V.

REVENUE COURTS.

20. We have recast this chapter, assimilating it in form and arrangement to the portion of the Bill relating to Civil Courts, and supplying certain omissions in details, as, *e. g.*, provisions relating to ministerial officers, which it seems unnecessary to notice more particularly.

21. We have omitted from the list of suits cognizable by Revenue Courts given in the first section the so-called suits under section 40 of the Panjáb Tenancy Act, inasmuch as we find on reference to that Act that the proceedings in question are not suits but applications, and we think that the proper mode of dealing with them is to include them among the applications to be heard on the revenue side which are specified in section 42 of that Act, and from which they were apparently omitted by an oversight. We have accordingly added a section (75) to the Bill amending section 42 of the Tenancy Act so as to include them.

22. We have added to the list of suits cognizable by Revenue Courts "suits to determine disputes regarding boundaries of land" (*i.e.*, of agricultural land) "which have been fixed by

a Court or Revenue-officer." This addition has been advocated by several of the authorities consulted, and it appears to us to be a proper one, seeing that all that is ordinarily required for the decision of such disputes is the laying down on the ground of a boundary which is to be found in a map.

23. On the other hand, we have appended to the section a proviso which empowers the Local Government, after consulting the Chief Court, to retransfer to the Civil Courts the jurisdiction in any class of revenue cases cognizable in any part of the country where it appears desirable to do so.

24. We have for convenience sake divided the classes of suits into two groups, and at the instance of the Local Government included class (d), suits for ejectment of a tenant, in the group containing suits deemed to be of greater importance or difficulty.

25. We have in defining the powers of Assistant Commissioners and Tahsíldárs [section 46 (2)], following the same course as in the provisions relating to original civil jurisdiction, omitted all minute specification of pecuniary limits, and left it to the Local Government to fix those limits as it thinks fit.

26. We have for the same reason as in the preceding chapter omitted all reference to appeals from orders.

27. We have introduced a clause in the proviso to section 47, based on similar provisions in the Rent Laws of Bengal and the North-Western Provinces, giving power to bar appeals from decrees of certain classes of officers in money-suits when the amount involved does not exceed Rs. 100 and no question of importance, such as a question of title, is involved.

28. We have added a section (51) empowering the Local Government to confer on any person the judicial powers, original or appellate, of a Financial Commissioner, Commissioner or Deputy Commissioner under this chapter.

29. We have, in order further to provide a means of relieving the Revenue Courts of the necessity of disposing of particular matters which may be found to be more proper for consideration by the Civil Courts, introduced two new sections (54 and 55).

The first of these is copied with certain modifications from section 208A of the North-Western Provinces Rent Act, 1881, and is intended to take the place of section 49 of the original Bill, which has been the subject of adverse criticism. It empowers a Revenue Court, when it considers that any question in issue before it is more proper for decision by a Civil Court, to require any party to institute a suit in the Civil Court with a view to obtaining a decision on the question. If he fails to comply with the requisition, the Revenue Court is empowered to decide the question against him, but is not bound to do so, as under the corresponding provision of the North-Western Provinces Act. If the party institutes the suit in the Civil Court, the Revenue Court will follow the decision of that Court.

30. It has been suggested that any provision of this sort is superfluous, inasmuch as a Revenue Court being a Court of limited jurisdiction, and its decision in one case being accordingly, under section 13 of the Code of Civil Procedure, binding in other cases only to a limited extent, it may safely be compelled to decide all questions arising incidentally in any suit before it, even though they may be questions which would be obviously more proper for the consideration of a Civil Court.

To this view of the matter we are unable to assent.

31. It is undoubtedly true that in many cases, probably in the great majority of cases, it is best for all parties that the Revenue Court should take upon itself to decide all questions incidentally arising in the suit, even though some of them might be of a nature more proper for the consideration of a Civil Court. This would clearly be the right course for the Revenue Court to take when the question is a simple one and can be quickly disposed of, or when it is one not likely to arise subsequently between the parties in any other connection; but it seems equally clear that when, as must occasionally happen, some complicated and difficult question arises in a revenue-suit, and is certain to arise again between the parties unless it is finally settled, a Revenue Court ought to be allowed some discretion of the sort proposed. For, if some such discretion is not allowed, what must be the result? The question must be tried out at a great expenditure of time and money to all concerned by the Revenue Court, which *ex hypothesi* is not the best Court to try it. It may then go in appeal to the higher Revenue Courts, probably in the last resort to the Financial Commissioner, and, after all, as the decision obtained will not be binding except for certain limited purposes, the whole litigation may commence *de novo* and run a similar course through the Civil Courts.

It is in order to provide a means of avoiding scandals of this sort that we have introduced the section in question.

32. We are quite aware that the power it confers might be abused by an indolent Revenue-officer if he were free to resort to it at pleasure, but we have guarded against this by making the sanction of the immediately superior Court a condition precedent to its exercise.

33. Section 55, to which there is nothing corresponding in the original Bill, empowers the Financial Commissioner to refer to the Chief Court a point of law which he considers that Court is more competent to decide.

34. We trust that these two sections and the proviso which we have appended to section 45 (see *supra*, paragraph 23) will suffice to remove the apprehensions which have been expressed in some quarters that the Bill may force upon the Revenue Courts duties which they will be incompetent to discharge.

CHAPTER VII.

SUPPLEMENTAL PROVISIONS.

35. We have omitted section 63 of the original Bill, which provided for consultations between the two Financial Commissioners, as it is unnecessary to provide for such a matter by legislative enactment and the proposal to do so gave rise to some misapprehension.

36. We have likewise omitted section 66 of the original Bill, which expressly prohibited a judicial officer from disposing of a case in which he might appear to be interested. We are aware that such provisions have long found a place in our Courts Acts, but we think the matter is one on which legislation may well be dispensed with, the general principles applicable to it being perfectly well understood.

37. Section 68 of the original Bill, which reproduced section 48 of the present Panjáb Courts Act, gave power to the Government to appoint a single Judge to exercise the Chief Court's superintending functions. This power has never been exercised, and we are informed that the Government have no desire to retain it. We have accordingly omitted the section.

38. Sections 73 and 74 of the original Bill, which provide for the enhancement of the court-fees upon applications to the Chief Court for revision under section 622 of the Code of Civil Procedure, were introduced with a view to discouraging such applications. We fully approve of their provisions and have retained them in the revised Bill. From statistics put before us by our hon'ble colleague Mr. Barkley it appears that such applications have of late been increasing to a formidable extent in the Panjáb; and, as observed by him when he asked for leave to introduce the Bill, they are certain to increase with greater rapidity if the provisions of the Bill, which give greater finality to the decisions of the Lower Appellate Courts, become law. Moreover, from the circumstance that only about one-sixth of the applications now made to the Chief Court are successful, it may be gathered that Panjáb litigants when debarred from appealing are tempted to incur the serious trouble and expense involved in making such applications, even where there may not be the slightest prospect of success. This appears to us to be a serious evil, and the only question has been whether the increase of the court-fee proposed in the original Bill would be enough to check it. The better opinion appears to us to be that it would have but a slight effect in that direction, and that nothing short of an alteration of section 622 of the Code as applied to the Panjáb will suffice.

39. We find that a considerable divergence of opinion has arisen between some of the highest Courts in the country as to the nature of the grounds required to support an application under that section. A full bench of the Allahabad High Court has held (I. L. R. 3 All. 203) that any grounds on which a second appeal would lie are sufficient. The practical result of this, as admitted by two of the learned Judges, is that section 622 of the Code gives a second appeal in all those cases in which the earlier sections of the Code expressly deny it. It may, no doubt, be said that the Court has a discretion under section 622 to interfere or not as it thinks fit, but we apprehend that as a rule a High Court holding the opinion just referred to, and finding what would be a good ground for special appeal made out, would be in practically the same position as if it were considering a special appeal under section 551.

40. A view which is probably more in accordance with that of those who framed the section was taken by a full bench of the Bombay High Court in a case reported in I. L. R. 7 Bom. 341. The conclusion to which the Court came in that case may be stated to be that the jurisdiction conferred by section 622 of the Code is an extraordinary jurisdiction to be exercised only in extraordinary cases, and that the precise circumstances under which it is to be exercised is left to the discretion of the Court and cannot be defined.

The question has not yet come before a full bench of the Panjáb Chief Court. It is impossible to predict what the result of its being fully considered by that Court would be; and, having regard to its intimate connection with the working of the present Bill, we do not think the matter should be left in uncertainty.

41. The root of the difficulty which has sprung up in connection with the section appears to lie in that portion of the wording introduced into the Code by Act XII of 1879, which empowers the High Court to interfere on the ground that the Lower Court has acted "illegally." The Allahabad High Court has construed this as justifying the High Court's interference whenever the Court below has erred on a question of law, and it is on this point mainly that the Bombay Court has dissented from the Allahabad decision. The divergence of opinion will no doubt have eventually to be met by an amendment of the Code, but the matter is not very pressing, where, as in most parts of the country at present, the proportion of cases in which appeals to the High Court are barred is comparatively small and a tendency to resort recklessly to the section has not developed itself among litigants.

42. In the Panjáb, on the contrary, the question is already pressing, and will become more so if this Bill is passed. We are therefore compelled to deal with it separately for that province; and the conclusion to which we have come after the most careful consideration, and having regard to the special circumstances of the Province and the peculiar features of the appellate system now proposed, is that the extraordinary jurisdiction conferred by section 622 of the Code should be exerciseable only on the ground that the lower Court has exercised a jurisdiction not vested in it by law, or has failed to exercise a jurisdiction so vested, or has acted in the exercise of its jurisdiction with material irregularity. We propose, therefore (section 70 of the Bill), to limit the scope of section 622 of the Code in this way, and we believe that when so limited it will still be sufficiently wide to cover all cases which call for the exercise of revisional as distinguished from appellate jurisdiction.

43. The publication ordered by the Council has been made as follows :—

In English.

Gazette.	*Date.*
Gazette of India ...	... 5th, 12th and 19th July, 1884.
Panjáb Government Gazette ...	... 10th, 17th and 24th July, 1884.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Thursday, the 25th September, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.

His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.

His Excellency the Commander-in-Chief, G.C.B., C.I.E.

The Hon'ble J. Gibbs, C.S.I., C.I.E.

Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.

The Hon'ble C. P. Ilbert, C.I.E.

The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.

The Hon'ble T. C. Hope, C.S.I., C.I.E.

The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.

The Hon'ble J. W. Quinton.

The Hon'ble D. G. Barkley.

MARRIAGE LICENSES VALIDATION BILL.

The Hon'ble MR. ILBERT moved that the Bill for the validation of certain licenses to solemnize marriages granted to Ministers of Religion under Act XXV of 1864 be taken into consideration. He said:—

"The object of this Bill is, as clearly appears from the preamble, to remove from the existing Christian Marriage Acts a flaw which, if it were allowed to remain and if its existence became generally known, might cause cruel hardship to innocent persons. The Bill has been circulated for opinion, and its provisions have met with general approval. The only suggestions for its amendment which I need notice here are contained in papers from Mr. Justice Mahmúd of the Allahabad High Court and from Mr. Justice West, the latter of which did not reach me until yesterday.

"Mr Justice West remarks that, while the Bill makes a necessary provision for the case of Ministers licensed under Act XXV of 1864, a similar provision seems equally requisite, or may be so, for the case of Ministers licensed under Act V of 1865 and celebrating marriages without a fresh license under Act XV of 1872. But it will, I think, be found that this latter case is already covered by the second paragraph of section 2 of Act XV of 1872, which saves licenses granted under the Act of 1865 though not licenses granted under the Act of 1864. Mr. Justice West also suggests that Ministers should be commanded to do all things required by the Act in force when they celebrate any marriage. If the meaning of this suggestion is that a marriage under the licenses with which the Bill deals should not be valid unless the conditions are observed which under the Act in force are essential to the validity of the marriage, then I think it is clear that this would be the effect of the Bill as drawn.

"And, lastly, both Mr. Justice West and Mr. Justice Mahmúd suggest that, if the Bill is to be made retrospective, as we propose to make it, there should be savings in favour of civil rights acquired under the law as it stands, and of persons who through the retrospective operation of the Bill, may become bigamists subject to punishment, though, when actually married the second time, their first marriages were substantially void.

A

"Mr. Justice Mahmúd refers, as a precedent for such a saving clause, to the legislation proposed for altering the law as to marriage with a deceased wife's sister. But I should point out that there is a material difference between the objects of such legislation and the objects of the present Bill. It is one thing to make legal marriages which were intentionally made illegal, and are notoriously illegal, and quite another thing to declare the effect of the existing law to be what it was undoubtedly intended to be, and what it is generally believed to be. A much closer parallel to the present Bill is to be found in numerous other English Statutes which have been passed for similar purposes. The Statute which is most closely analogous is perhaps one which was passed in 1868 (31 & 32 Vic., c. 61) for validating marriages solemnized before persons acting as Consuls. This Act does not contain a saving clause. Then a large number of Statutes have been recently passed for curing such formal defects as the insufficient publication of banns or the celebration of marriages in a wrong building. I find that the great majority of these Statutes contain no saving clause, and that the very few exceptions may be accounted for by special circumstances, such as the fact that litigation had taken place or was still pending with reference to the questions which the Act was intended to set at rest, or that the validity of the marriages to be legalized was notoriously a matter of general doubt, on grounds quite different from the technicalities of Statutes. For instance, there had, I believe, before the passing of an Act of 1879, been great and general doubt about the binding efficacy of marriages solemnised before officers of Her Majesty's Navy, and this doubt was not confined to lawyers. In such exceptional cases there has been occasionally a proviso that the enactment shall not render valid any marriage which before the passing of the Act had been declared invalid in a Court of competent jurisdiction, or any right dependent on the validity or invalidity thereof, or render valid any marriage where either of the parties has before the passing of the Act and during the lifetime of the other party lawfully intermarried with any person.

"But in the present case there is not the slightest ground for believing that the validity of any marriage contracted under the licenses with which we propose to deal has ever been questioned in a Court of law, and it is extremely improbable that any person has married again on the faith of his first marriage being held invalid in consequence of the flaw which we are now seeking to remove. In fact, the knowledge or suspicion that there is such a flaw has been probably confined to an extremely small number of legal experts. If there be any person so astute as to have discovered the flaw, and so unscrupulous as to have taken advantage of it, I think we should do no substantial injustice by leaving him to the mercy of the Criminal Courts. The nominal sentence which would probably be passed on him would be far from commensurate with his moral deserts, and he might count himself, as bigamists go, a remarkably fortunate man. But on the whole I think that the extreme improbability of any case having occurred for which a saving clause is required fully justifies us in following the precedent which is supplied by the vast majority of English Statutes *in pari materiâ*, and in not inserting any such clause. I have therefore not proposed to make any amendment in the Bill as introduced."

The Motion was put and agreed to.

The Hon'ble Mr. Ilbert also moved that the Bill be passed.

The Motion was put and agreed to.

STRAITS SETTLEMENTS EMIGRATION ACT, 1877, REPEAL, AND EMIGRATION ACT, 1883, AMENDMENT, BILL.

The Hon'ble Sir Steuart Bayley moved for leave to introduce a Bill to repeal the Straits Settlements Emigration Act, 1877, and to amend the Indian Emigration Act, 1883. He said:—

"The Bill which I am now asking for leave to introduce is not very complicated in its machinery; but it brings to a close a controversy which has been going on in a sort of triangular way between three Governments for the past twelve years—the Straits Settlements Government, the Madras Government and

the Government of India. Under the Emigration Law of 1872, emigration to the Straits Settlements was free for the most part of India, and, under the more recent Act of 1883, the Straits are expressly excluded by the definition of 'emigration,' but from Madras it has always to a certain extent been controlled; however, from the greater part of India there is no emigration to the Straits; the only emigration of importance is from Madras, and, when the Emigration Act of 1872 was under consideration, the Straits Settlements Government were moving the Government of India to allow emigration to go free and unrestricted, and the Madras Government were anxious to maintain the same system towards the Straits as was in force with respect to other Colonies. The Government of India rather inclined, I think, at that time to the Straits Government, but acted as judicious bottle-holder, and finally the controversy for the time being was settled by the compromise which Sir Arthur Hobhouse proposed, and which took effect, after a very long incubation, in the shape of Act V of 1877, which I am now asking leave to repeal. The difference between the system which was brought in under Act V of 1877 and that in force in the different Colonies is this: as a rule in the case of Colonial emigration the emigrant enters into a contract in this country with the Agent of the Colonial Government, and the Government takes upon itself the responsibility of feeding him and conveying him to the colony, and does not attempt to recover those expenses from him. Under the system of Act V of 1877 the Straits Government was entirely unwilling to take upon itself that responsibility, and for very good reasons I think. The consequence was that the emigrant had to depend for the necessary advances to cover those expenses upon the individual employer of labour with whom he contracted. Then the question arose, how was that money to be recovered? The Government of Madras objected to the emigrant starting life in a new colony with the burden of the debt of those advances upon him, and the Colonial Government did not in the least see why their general tax-payers should be taxed in order to pay the expenses of the labourers of a small class; the result was that a curious conflict of law came about. The Straits Ordinance which was supposed to enforce our law made those advances recoverable, and provided for their recovery. Section 16 of our Act provided that all contracts made for the recovery of such advances from subsequent wages were illegal and void. Each Government legislated according to its own view, and, notwithstanding the provision in the Straits Ordinance of 1876, Act V of 1877 was passed. None the less from that day to this these illegal contracts have been enforced, and the money advanced has been recovered.

"The other provisions of Act V of 1877 referring to the incidence of control are not very important. They provide for a three years' indenture, maximum hours of labour, minimum wages and the protection of the Protector, the latter being an officer appointed by the Madras Government, but drawing his salary and receiving his orders from the Straits Government. When the Act was introduced, Sir Arthur Hobhouse was apparently not very strongly impressed in its favour, and what he said about it was this:—

'He confessed that he was in hopes that, when a sufficient law had been passed on the other side of the water, nothing would have been found necessary on our side beyond the mere removal of the shackles placed on emigration by the Act of 1871.'

"But he accepted the opinion of the Madras Government, and consequently Act V of 1877 became law. At the same time, Sir Andrew Clarke, who as Governor of the Straits had made himself personally acquainted with the conditions of the problem, said:—

'There was no doubt that the Tamil population of the Straits were in a better condition than their countrymen whom they had left in India; great numbers of them were well-to-do, with large properties; and anything which would check that emigration from the coast of India was undesirable, at the same time that it would cripple and reduce the large industries in sugar and other tropical staples which were valuable to that part of the country and to interests both English and Indian.'

"These were the circumstances under which Act V of 1877 was passed. But the controversy did not end here; it has been going on at intervals ever since; and especially the necessity for reconciling the Indian Act with the Straits law has been continually urged upon the Government. An inquiry was

held in the Straits, and very complete information was obtained regarding the coolies who emigrated there, and on the whole the inquiry was very satisfactory, and it was in these circumstances that the matter came again before the Government of India a little more than two years ago. The question had then to be entirely reconsidered, for it appeared that side by side with this system of protected emigration under our law there had grown up another system of free and unrestricted emigration of coolies who found their own way across from Madras to the Straits and paid their own passage as passengers. Most of them were helped by advances received from the chetties and contractors, who took their chance as to the possibility of recovering those advances from the wages of the labourers on the other side; and, to show how strong that system was, I find that the figures given during the enquiry of 1882 showed 20,000 free emigrants in recent years as against 5,000 emigrants who had gone under our law; and in that particular year the protected emigrants were 850 as against 5,000 who had gone free. In other words, while we had taken great pains to discourage and repress free emigration, that system had the logic of facts on its side, and showed remarkably successful results as against our restrictions, and the main tendency of our law had been to drive away the business from the port of Negapatam, where it was supervised by the Madras Government, to the French port of Karikal, where it was under no supervision. When, therefore, the papers came before the Government of India, they saw that Act V of 1877 was a failure, and they cast about them to see if some *modus vivendi* could not be effected between the two systems which would secure for the Madras Government that their emigrants would be protected in the Straits, and for the Straits Government that there should be no restriction in regard to the coolies leaving Madras. The Straits Government undertook to meet the Madras Government half way, and to provide an adequate system of protection when the emigrants got to the Straits. It seemed that there was no apparent impossibility in reconciling those two objects, but it would have been obviously hopeless within a reasonable time to bring a three-cornered controversy of this kind to a result in writing, and so the Government decided to depute Mr. Buck to see what he could do towards effecting a speedy settlement of the matter in person. This mission he successfully accomplished. He first visited Madras, to ascertain the points on which they mainly insisted; and with their views in his possession he proceeded to the Straits, laid the matter before the Government there, and got them to agree to pass an Ordinance incorporating the points which the Madras Government insisted upon; and we have now before us the terms of the Ordinance which they have framed. This Ordinance the Madras Government have accepted as sufficient, and they are now willing that we should withdraw the restrictions imposed upon emigration by Act V of 1877. The effect of these arrangements will be that there will be no interference whatever with the embarkation of emigrants; the emigrant will be registered, and a complete nominal roll of all the emigrants going in one ship will be made by the Agent, handed over to the master of the vessel, upon whom there is the responsibility of delivering that nominal roll to the authorities at the Straits, and of admitting no further emigrants on board. All this requires no fresh legislation; it can be done by executive authority under the Passenger Ships Act. No contract will be entered into on this side of the water, but when the emigrant arrives at the Straits he will enter into his contract under the supervision of the officer appointed by the Straits Government. I may mention that one alteration to be effected is this, that the Protector hitherto appointed by the Madras Government, but paid by and receiving his orders from the Straits Government, will in future be appointed by the Straits Government, while the Madras Government will have the power to send an officer from time to time to the Straits to inspect and report, who will have full legal powers of entry and examination.

"The protection after arrival is dealt with by the Straits Ordinance. It is confined primarily to those who contract for employment on agricultural labour, but the Straits Government has power to make the Ordinance applicable to other classes of labourers.

"Recovery of advances made to assist emigrants is provided for, but only to the maximum extent of 12 dollars and at the rate of one dollar a month.

"The Ordinance also provides for a minimum scale of wages, which vary according to sex and age and to the length of service in the Straits; the term of indenture is three years, which is the old term. The other provisions of the Ordinance as to protection on the spot, that is to say, the provisions as to house-accommodation, hospital-accommodation, rations, medical inspection, inspection by the Agent, penalties for desertion and neglect, penalties for offences against the emigrant—all these follow very much the lines of our own legislation and are considered adequate.

"The Madras Government are satisfied with the action of the Straits Government, and having secured, as Sir A. Hobhouse said, efficient protection on the other side of the water, we may, I think, safely abstain from further ineffectual interference with the freedom of emigration on this side."

The Motion was put and agreed to.

BURMA GAMING BILL.

The Hon'ble Mr. Ilbert presented the Report of the Select Committee on the Bill to provide more effectually for the suppression of certain forms of Gaming in British Burma.

BURMA LOCAL SELF-GOVERNMENT BILL.

The Hon'ble Mr. Ilbert also presented the Report of the Select Committee on the Bill to amend the law relating to Local Self-government in British Burma.

RANGOON WATER-WORKS BILL.

The Hon'ble Mr. Ilbert asked for leave to postpone the presentation of the Report of the Select Committee on the Bill to confer powers and impose duties on the Municipal Committee for the Town of Rangoon in respect to the construction and maintenance of Water-works and the supply of Water in that Town.

Leave was granted.

PANJÁB COURTS BILL.

The Hon'ble Mr. Barkley presented the Report of the Select Committee on the Bill to amend the law relating to Courts in the Panjáb.

BENGAL TENANCY BILL.

The Hon'ble Sir Steuart Bayley moved that the Hon'ble Peári Mohan Mukerji be added to the Select Committee on the Bill to amend and consolidate certain enactments relating to the law of Landlord and Tenant within the territories under the administration of the Lieutenant-Governor of Bengal.

The Motion was put and agreed to.

The Council adjourned to Thursday, the 2nd October, 1884.

Simla;
The 1st October, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 1st OCTOBER 1884.

GENERAL REMARKS.—There was rain in all districts in the Madras Presidency during the week, and prospects are improving, except in Bellary, Anantapur, and parts of Madura and Coimbatore. In Mysore prospects have improved in Bangalore, but elsewhere in the province they are still unfavourable. More rain is greatly needed, and the crops, except in the Mulnad, are generally reported to be withering. In Coorg heavy rain continues to fall and has been injurious to cardamoms and coffee on the Ghats. Good rain has fallen throughout the Deccan and Southern Mahratta Country, excepting Dharwar, and the *kharif* crops have been much benefited. More rain is wanted in Dharwar and Belgaum, in the Malsiras taluka of Sholapur, and in the eastern talukas of Poona and Satara. In the Berars and the Nizam's territories, and in the Central India and Rajputana States, there was good rain and prospects are good. Heavy rain fell during the week in most districts of the North-Western Provinces and Oudh, and some damage has occurred to crops in many places. In the Punjab there was rain in many districts, and *kharif* prospects are very favourable. In the Central Provinces the heavy and continuous rain has caused damage to all crops, except rice, and a break is much needed. In Bengal the rainfall of the week has somewhat improved the prospects of *amun* paddy, but they are still unfavourable in many places, and the crops on high lands in some districts have been seriously injured by the drought. Harvesting of *aus* and jute continues. In Assam there was generally good rain in all districts, and the prospects of the crops are good. More rain is still needed in Gauhati for the *sali* crop and for tea. In British Burma crop prospects are excellent.

The latest report of the Meteorological Department, dated 2nd instant, states that rain has been general in the North-Western Provinces, in Lower Bengal, Orissa, the Central Provinces, Central India, along the west coast, and in Burma. In Behar, Eastern Bengal, the Carnatic, the Deccan, Khandesh, the Berars, Guzerat, and Sind there is either no rain reported or the falls are unimportant.

In Madras harvesting of wet and dry crops continues in a few districts. Ploughing and sowing for the *rabi* have commenced in Bombay, Bengal, North-Western Provinces and Oudh, Punjab, the Central Provinces, and in the Central India States. The prospects of the *kharif* crops are generally good throughout the country.

The public health is generally good. Prices are fluctuating in Madras, Bengal, and the Central Provinces; elsewhere they are generally stationary.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Oct. 1st)		
Bellary ...	·03 (average)	Pasture scanty. Prices slightly rising.
Kurnool ...	·36 (average)	Prospects improving. Prices generally falling. Small-pox in 3 and cattle-disease in 2 taluks.
Ganjam ...	2·71 (average)	Prospects improved. Small-pox, cattle-disease, and cholera in parts.
Kistna ...	1·26 (average)	Standing crops generally good; harvest dry crops, outturn below average. River 4·50 feet over anicut. Small-pox, fever, and cattle-disease in places; 33 deaths from cholera.
Chingleput (Madras) ...	·31 (average)	Standing crops generally fair; harvest wet and dry crops, yield half the average. Small-pox in 4 taluks; 89 deaths from cholera.
Coimbatore ...	·09 (average)	Standing crops wet, good in 5 taluks, elsewhere fading; dry crops withering; harvest dry crops, outturn below average; fodder scarce.
Tanjore ...	·45 (average)	Standing crops generally good. Rivers 1 to 5 feet. Harvest wet and dry crops, outturn average. 89 deaths from cholera.
Madura ...	·28 (average)	Prospects fair in 3 taluks, elsewhere crops fading from want of rain. 18 deaths from cholera.
Malabar ...	1·88 (average)	First crop paddy being harvested, outturn fair; operations for second crop cultivation progressing. Slight small-pox in 7 and fever in 2 taluks; 5 deaths from cholera.
Travancore ...	2·89	Operations for second crop cultivation progressing. Fever, small-pox, and cholera in parts. *General Remarks.*— General prospects fair and improving, except in Bellary, Anantapur, parts of Madura and Coimbatore, where prospects continue unfavourable.
Bombay—(Oct. 1st)		
Karachi ...	No rain during last week; average of 3 stations ·23.	River at Kotri on 29th, 12 feet 10 inches against 10 feet 3 inches on same date last year. Fever generally prevalent; cattle-disease in 6 talukas, some slight loss in Tatta and Ghorabari; small-pox in 10 villages in the districts; 18 fresh cases, 1 death, 15 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 25, 30 and 36, in Manjhand 28, 24 and 40, in Mirpur Batoro, 22, 36 and 36, and in Sakro 16, 32 and 40 pounds per rupee, respectively.
Hyderabad ...	*Nil*	River at Kotri on 29th, 12 feet 10 inches against 10 feet 3 inches last year. Slight damage to crops by rain, and fierce winds is apprehended in Hyderabad, Badin, Mirpur, Tando, Alahgar, Shahdadpur, and Naushahro. *Juari* and *bajri* in Sakrand, and *til* in Moro attacked by blight; fever in 10, small-pox in 3, and cattle-disease in 4 talukas. Prices steady.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Ahmedabad ...	1·30	Total rainfall 35·48. *Bajri*, *juari*, and cotton crops more or less damaged by excessive rain; other crops healthy. Cholera in the city, 1 case fatal, and in Viramgaum 2 cases, 1 fatal; fever and cattle-disease in Dholka. Wheat 31 and *bajri* 33 pounds per rupee.
Baroda ...	4·62	Total rainfall 47·67. Crops injured in Naosari and Kadi divisions by excessive rain. Public health fair. Cholera continues in Dehgaon. Prices—*bajri* 28 and rice 24 pounds per rupee.
Surat ...	3·51	Total rainfall 38·90. Young crops healthy. *Bajri* ready for cutting; *juari* 31 and *nagli* 41 pounds per rupee.
Nasik ...	Maximum at Igatpuri, 13·82; minimum at Yeola, ·86; good rain throughout the district.	*Kharif* crops flourishing; *rabi* sowing commenced. Public health good: 4 attacks and 1 death from cholera in Nasik town. Wheat 37, *bajri* 33½, and rice 17½ pounds per rupee.
Colaba (Bombay) ...	Rain daily, except on 29th; heavy on 25th and 26th; total of week 8·06.	Total to date 71·48, being 3·46 above average. Abnormal temperature 1° warm to 5° cool; vapour in air somewhat excessive; abnormal wind strong from south-west on 24th and 25th.
Poona ...	Maximum 5·70 at Khadkala; minimum at Purandhar ·19.	Rain in 6 talukas. Light showers in Indapur and Bhimthadi. Partial failure of *kharif* crops in Eastern division where rain is now urgently wanted. *Bajri* 31 and *juari* 33, in Poona *bajri* 28 and *juari* 30 pounds per rupee.
Ahmednagar ...	Nevasa, 2·50; Akola, 1·96; Sangamner, 1·95; Rahuri, 1·40; Kopargaon, 1·34, Sheogaon, 1·10; Parner, 1·5; Jamkhed, ·55; slight in Nagar, Shrigonda, and Karjat.	The rainfall has been beneficial to the *kharif* crops and to the *rabi* sowing which has been completed in the Nagar taluka. Slight fever and ague in Akola. *Juari*—maximum 54 pounds in Akola, minimum 44 in Karjat. *Bajri*—maximum 48 pounds in Akola, minimum 36 in Shrigonda.
Sholapur ...	Sholapur, 1·21; Barsi, 2·38; Madha, ·72; Karmala, ·89, Pandharpur, ·43; Sangola, 1·55; Malsiras, ·11.	*Juari* 34 pounds 14 tolas and *bajri* 34 pounds 27 tolas. Sowing in progress and generally prospects improved, except in Malsiras, where rain is much needed.
Dharwar ...	Dharwar, ·76; Kalghatgi and Mugud, ·55; Bankapur, Hubli, and Hangal, nearly ·33; Kod, ·26; Ranibennur and Karajgi, ·8; Navalgund, Nargund, and Gadag, Mundo, and Ron none.	Want of rain general. Early crops are suffering from draught in parts of the districts; fodder becoming scarce in eastern talukas. The sky is cloudy. Cholera abating. Prices of food-grains—rice 30 and *juari* 54 pounds per rupee.
Kanara ...	Karwar, 4·22; Kumpta, 5·14; Sirsi, 2·19; Haliyal, ·71.	Total rainfall 91·66. Common rice in Karwar 15 seers; district average 15½ seers per rupee. Rice crops ripening on coast. Small-pox—9 deaths in Kumpta, 2 in Sirsi, and 1 in Siddapur; cholera 2 deaths in Sirsi last week.
Rajkot ..	1·43	Total rainfall 39·8. General health good; fever prevalent in some places; cholera at Dhoraji. Crops washed away by excessive rain in some villages of Junagad. *Bajri* 37 and *juari* 52 pounds per rupee.
		General Remarks.—Good rain throughout the Deccan and Southern Mahratta country, excepting Dharwar. *Kharif* crops much benefited. More rain wanted in Dharwar and Belgaum, in the Malsiras taluka of Sholapur, and in the eastern talukas of Poona and Satara. Scarcity of fodder in parts of Dharwar and Belgaum; crops slightly damaged by excessive rain in parts of Gujarat and the Konkan. Cholera in parts of 11 districts; fever, small-pox, and cattle-disease continue in several districts.
Bengal—(Octr. 1st)		
Chittagong ..	2·02	Weather hot with occasional showers of rain. Prospects of crops good. Prices steady. Sporadic cases of cattle-disease reported; public health good.
Dacca ...	1·03	Jute still being cut, *mung* and *kalai* being sown. Damage to crops apprehended owing to decrease of water. More rain wanted. Public health good.
24-Pergunnahs (Calcutta)	3·44	Prospects of *amun* crops, sugarcane, and jute generally good. Outturn of *aus* will be below the average. Jute being steeped. Prices of common rice varies from 13 to 15½ seers per rupee. Public health generally good, but some cases of fever and cattle-disease still continue in certain places.
Moorshedabad ...	3·55	Weather cool and cloudy; the rain has saved for the time all *amun* that was not past harrowing; ploughing for *rabi* crops in full swing. Prices slightly easier. Public health good.
Rajshahye ...	2·06	Weather cloudy, more rain still wanted. Prospects of *amun* paddy uncertain. Prices rising in Nowgong. Health fair.
Burdwan ...	1·42	Continued useful showers. Prospects slightly improved, and rice somewhat cheaper; crops, however, are backwards and scanty.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Rungpore ...	2·0	Prospects of crops unfavourable. Prices of grains gradually rising, coarse rice selling at 4 rupees per maund. Malarious fever prevails.
Bhagalpur ...	3·58	A great quantity of land was not planted, and some of the paddy on high lands withered; *kulthi* extensively sown; prospects hopeful. Rice 12 seers 10 chittacks per rupee.
Purneah ...	3·16	Prospects of crops much improved. Common rice 13 seers per rupee. Fever prevalent in some places.
Patna ...	3·16	Harvesting of *bhadoi* crops going on generally with fair outturn. In the *muffusal* the rain was very beneficial, but more is yet wanted. Health good.
Durbhunga ...	3·91	Late rain improved paddy; lands being prepared for coming *rabi*. Prices stationary. Health good.
Hazaribagh ..	·05	Weather warm and seasonable. *Bhadoi* harvesting continues; paddy doing well, but requires rain in places. Health generally good.
Cuttack ...	·8	Weather cloudy and rain saved crops which are promising well. Prices of rice stationary. Sporadic cases of cholera reported.
		General Remarks.—The rainfall of the week has generally improved prospects of *amun* paddy; they are still, however, unfavourable in many places, and the crops on high lands in some districts have been seriously injured. The quantity of lands transplanted with *amun* is much below the average this year, owing to insufficient rain in time; harvesting of *aus* and jute continues; cultivation for *rabi* crops commenced in some districts. Prices of rice rising in places. Fever prevails in several districts, otherwise health generally good.
N. W. Provinces and Oudh—		
Benares (Sept. 29th)	Average rainfall 3·5	No sickness of men or cattle. Rain has improved late rice. Prices stationary. *Kharif* crops good average.
Allahabad („ „)	Heavy rain averaging 3·9	Slight damage to *bajri*, otherwise most beneficial. Health excellent. Prices falling.
Gorakhpur („ 27th)	Heavy rain at end of week.	Prospects excellent. Cholera decreasing. Prices falling.
Jhansi („ 30th)	......	Prospects on the whole fair, but damage to crops apprehended from excessive rain; *til* and *bajri* flourishing. Prices stationary. Cholera abating.
Aligarh („ 29th)	Rain throughout the district during the week.	Cholera reported from Aligarh, Atrauli, and Sikandra tahsils; fever of an ordinary type throughout the district. The rains during the week have caused injury to the crops to a certain extent. Prices show rise in *juari* and fall in *makka*.
Agra („ 27th)	Rain in all parganas from 2·0 to 3·8.	*Kharif* being cut. Heavy rain and weather cloudy and unpropitious. *Rabi* ploughings continue. No cholera reported since 23rd; fever prevailing in all parganas. Prices steady.
Bareilly („ 29th)	......	Cholera decreasing. Crops, &c., good.
Moradabad („ „)	Average rainfall 1·7; heavy rain still falling.	*Bajri*, *moth*, and cotton reported to be injured by rain. Fever very prevalent; few cases of cholera.
Meerut („ „)	·8 to 2·0; still raining	Inopportune and calculated to injure *bajri* and cotton. Fever and ague very prevalent; sporadic cholera in Hapur, Meerut, and Garhmukhtesar. Prices steady.
Kumaon („ „)	More or less rain during latter part of week; heavy rain since yesterday.	Rice and the crops, where reaped, will be damaged. A good deal of fever. Prices stationary.
Saharunpur („ „)	1·0 to 1·6	Rain is now doing more harm than good. Several deaths from fever in Deoband. Prices almost stationary; markets well stocked. Some cattle-disease in Saharanpur, Deoband, and Nakur.
Lucknow („ „)	6·0 to 7·9	Strong wind and rains on the 26th, 27th, and 28th. *Kharif*, especially *bajri* and *juar* crops injured by the last heavy fall; *mash* in Tarai too slightly suffered. Condition both of men and cattle good. Supplies sufficient. Prices slightly rising owing to incessant rain.
Partabgarh („ 26th)	Average rainfall for the district slightly over 1·0.	General health good; slight cattle-disease reported. *Bajri* and *juari* have been slightly damaged by the late rain. Prices stationary.
Sitapur („ 29th)	6·0 to 8·0 rain has fallen throughout the district from the 26th.	Considerable damage said to have been done to *mash*, millet, and *bajri* crops, otherwise the fall for the *rabi* sowings will be most beneficial.
Fyzabad („ „)	5·7 to 12·5 during the week.	Weather cloudy. Rice being reaped; prospects excellent. Prices almost stationary. General health good.
Rae Bareli („ 27th)	Rainfall during the week 3·4 at the Sadr.	General rain throughout the district, more rain not needed. Health of men and condition of cattle good. Supplies abundant; prices stationary.
Cawnpore („ 29th)	1·1 to 4·7 of rain during the week.	Crops on low lands injured by excessive rainfall. Fever and ague prevalent; few cases of cholera reported from two parganas.
Farukhabad(„ „)	12·1 have fallen; in the other tahsils the fall varies from 3·0 to 7·0.	Much damage done to crops by the heavy rain of the past 6 days in Kanauj. Fever continues.
		General Remarks.—Heavy rain fell during the week and some damage has occurred to crops in most districts. Prices generally continue stationary. Condition both of men and cattle is good.

[illegible]	[illegible]	[illegible]
Punjab—(Oct. 1st)		
Delhi ...	4·10	Fever continues. Crops injured by rain; west wind and sunshine wanted; *rabi* sowing retarded. Slight fall in prices.
Hissar ...	Rain continual in Hissar.	*Kharif* harvesting commenced in Hissar; weather favourable for *rabi* ploughings; harvest prospects excellent. Cattle-disease prevalent in Rohtak.
Umballa ...	1·90	Fever very prevalent throughout the district. *Makki* harvested, other *kharif* crops flourishing; yield expected to be above average; grain sowing commenced. Prices gradually falling.
Jullundur ...	·60	Health and crops good. *Rabi* ploughings commenced; prospects of coming harvest favourable. Prices stationary.
Amritsar ...	......	Health good. *Rabi* crops sown. Prices fluctuating.
Sialkot ...	1·0	Health good. Harvest above the average expected. Prices stationary.
Ferozepore ...	......	Health and probable yield of crops good. Prices falling.
Lahore ...	......	Health good. Expected outturn of *kharif* good. Prices stationary.
Rawalpindi ...	2·30	A few cases of fever, otherwise health is good. Expected *kharif* outturn above average in two, average in four tahsils, and below average in one tahsil. Prices falling.
Mooltan ...	......	Fever prevailing. Expected yield of *kharif* good; *rabi* ploughings commenced. Prices stationary.
Dera Ismail Khan ...	......	Health good. Expected yield of coming harvest above average.
Peshawar ...	·70	Slight fever prevalent. *Kharif* prospects good. Prices falling.
		General Remarks.—Rain in many districts. Fever prevalent in Delhi, Mooltan, and Umballa districts; few cases also in Rawalpindi and Peshawar; elsewhere health is generally good. *Kharif* prospects very favourable, but the recent rain has injured the crops in the Delhi district.
Central Provinces—(October 1st)		
Nagpur ...	1·92	Weather cloudy with occasional showers. Cotton and *juari* somewhat damaged. Health generally good; cattle-disease in Ramtek tahsil. Prices stationary.
Jubbulpore ...	4·2	Weather cloudy and showery; break since yesterday. State of crops unchanged. Wheat 25 and rice 14 seers per rupee.
Saugor (Sept. 30th)	2·74	Crops much damaged by wet; *rabi* ploughings at standstill. Health fair. Prices rising.
Seoni ...	3·48	Rain almost continuous during week; fine weather urgently required for all crops. Cattle-disease increasing. Prices steady.
Hoshangabad ...	7·17	Weather cloudy and rainy, break earnestly looked for. Rice fair, other crops suffering. Fever prevalent and few cases of small-pox. Wheat 21 and rice 10 seers per rupee.
Khandwa ...	1·24	Fine weather much wanted. Cotton, *til*, and *juari* damaged. Health good. Rice 13, wheat 23, and *juari* 27 seers per rupee.
Raipur ...	3·25	Weather clear; bright sunshine. Rice doing well; cotton, *kodo*, and *til* damaged. Fever prevalent. Prices steady.
Sambalpur (Sept. 27th)	3·82	Rain and sunshine alternately. Rice excellent, cotton and other crops bad. Fever and bowel-complaints common; cattle-disease in north common. Rice 29½ seers per rupee.
		General Remarks.—Rain still continuous and has caused damage to all crops, except rice. Health generally good. Prices stationary or falling.
British Burma—(Oct. 1st)		
Akyab (Sept. 27th)	12·17	Total rainfall 174·99. Some cholera still in town and district; cattle-disease in 3 townships. Crops thriving well.
Rangoon („ „)	6·53	Total rainfall 82·77. Slight cholera and small-pox.
Bassein („ „)	3·01	Total rainfall 89·67. Slight cholera in town; cattle-disease increasing in 2 townships.
Amherst (Moulmein) („ „)	10·39	Total rainfall 170·27. General appearance of crops good.
Toungoo („ „)	1·89	Total rainfall 68·44.
Kyoukphyoo ...	......	No report received.
Sandoway ...	......	No report received.
Hanthawaddy ...	......	No report received.
Pegu ...	......	No report received.
Tharrawaddy ...	......	No report received.
Prome (Sept. 27th)	2·96	Total rainfall 87·95. Slight cholera in town and district. Crops promising.
Thongwa ...	......	No report received.
Henzada (Sept. 27th)	3·18	Total rainfall 83·22. Slight cholera and cattle-disease in one township. Crop prospects good.
Thayetmyo („ „)	1·81	Total rainfall 30·51.
Shwaygyin ...	......	No report received.
Tavoy (Sept. 27th)	6·58	Total rainfall 156·18. General appearance of crops good.
Mergui ...	......	No report received.
		General Remarks.—Slight cholera here and there and decreasing in Akyab, otherwise public health good; health of cattle good. Crop prospects excellent.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Assam—(Oct. 1st)		
Gauhati ...	1·13, rain during the week ending 30th ultimo.	Weather seasonable. Rain needed for *sali* and tea cultivation; sugar-cane doing well. Public health fair.
Sylhet ...	2·84	State and prospects of crops fair. Cholera on the increase in the Chhatak thana.
Cachar ...	3·13	Weather warm. Prospects of *sali* crops and tea good. Common rice 15¾ seers per rupee. Health good.
Dibrugarh ...	4·35	Weather hot. *Sali* crops growing well in low lands. More rain is wanted. Public health good.
Mysore and Coorg—(Oct. 1st)		
Bangalore ... / Mysore ...	3·66 in Bangalore; in all other districts average rainfall during past week ·20.	Condition of crops and prospects of season improved. More rain greatly needed. Crops, except in the Mulnad, generally reported to be withering; pasturage scarce in parts; prospects unfavourable. Public health fair. Prices show an upward tendency.
Mercara ...	4·43	Cardamoms and coffee on the Ghats have suffered from continuous rain. Change expected.
Berar & Hyderabad—(Oct. 1st)		
Amraoti ...	2·15	Weather cloudy and rainy. Crops in good condition. Wheat 20 and *juari* 30 seers per rupee.
Akola ...	4·58	Weather rainy, break needed. Crops in good condition.
Hyderabad ...	1·34 (average)	Total rainfall from 1st January 28·72. *Kharif* crops slightly damaged; *abi* crops prospering. General health good. Prices—wheat 14, coarse rice 12½, yellow *juari* 20, white *juari* 16¼, and *tur* 18¾ seers per current sicca rupee.
Central India States—(Oct. 1st)		
Indore ...	2·2	Total rainfall 36·21. The rainy weather at this season of the year quite abnormal. Crops around Indore slightly damaged by excessive moisture; prospects of *rabi* excellent. Health good.
Morar (Gwalior) ...	1·65	Total rainfall 29·89. Prospects good. Fever still in Morar.
Sutna ...	2·18	
Neemuch ...	2·54	Weather cloudy. Health good.

No. 2938 *G.*—Lieutenant-Colonel G. L. K. Hewett, Commandant of the Erinpura Irregular Force, returned to duty on the 19th of September 1884 from the ninety days' privilege leave granted him in this Office Notification No. 1427 G., dated the 22nd of May 1884.

No. 2943 *G.*—Captain F. G. Alexander, Officiating 2nd-in-Command of the Erinpura Irregular Force, availed himself on the 22nd of September 1884 of the fifty days' privilege leave granted him in this Office Notification No. 2691 G., dated the 2nd of September 1884.

By Order,

W. H. C. WYLLIE,
1st Asst. Agent to the Govr. Genl.

CHIEF COMMISSIONER OF AJMERE-MERWARA, IN THE P. W. D.

NOTIFICATION.

Mount Abu, the 24th September 1884.

No. 2342 *S.*—In exercise of the powers conferred by Section 29 of Act XV of 1873 (The North-Western Provinces and Oudh Municipalities Act) the Chief Commissioner of Ajmere-Merwara is pleased to abolish the Octroi duty on opium levied within the limits of the Ajmere Municipality, with effect from 1st April 1884.

By Order,

H. Y. MURRAY, *Lieut.-Colonel,*
Offg. Secy. to the Chief Commr., Ajmere-Merwara, in the P. W. D.

CHIEF COMMISSIONER OF COORG.

NOTIFICATIONS.

Mysore, the 24th September 1884.

No. 12.—The Chief Commissioner is pleased to confirm the following Vaccination Rules for the Municipality of Somvarpett, framed by the Municipal Committee under Sections 19 and 21 of the Indian Vaccination Act, XIII of 1880:—

1. The vaccine station for Somvarpett shall be the school-house built by Sidda Shetty in the Pettah, at which a notice board shall be hung up, stating on what day and hours vaccination will be performed.
2. The vaccinators shall be able to read and write in the vernacular and satisfy the Superintendent, that they have a proper knowledge of, and skill in, the performance of the operation of vaccination.
3. The Civil Surgeon of Coorg shall be the Superintendent of Vaccination. The vaccinators shall be appointed by the Superintendent, who shall have power to suspend them, and, with the concurrence of the Municipal Committee, to dismiss them.
4. The vaccinator or vaccinators shall, during his or their stay at Somvarpett, attend daily between 8 and 11 A.M. at the appointed station. The remainder of the day he or they shall work at the houses of persons who cannot bring their children to the vaccine station, at schools, &c.
5. Persons desirous of having their children vaccinated at their own houses shall pay a fee of annas 8 per case; when parents have more than one child unvaccinated, they shall be charged 4 annas per child.
6. A form of certificate of successful vaccination, of unfitness for vaccination, or of insusceptibility of vaccination, shall be printed and supplied to the vaccinators, who are empowered to fill them up.
7. The lymph used shall be human lymph, and arm to arm vaccination practised as far as possible.
8. Registers of operations performed by the vaccinators shall be kept, showing name, age, sex, father's name, residence, date, and result.
9. Register of all children born after the date of the introduction of the Vaccination Act shall be supplied monthly to the vaccinators by the Vice-President of the Board, who will see that every child on such register is vaccinated within one year of its birth, or that the parents are prosecuted under the Act. Should the child be not in a proper state of health for the operation, a certificate to this effect shall be given by the vaccinator postponing the operation for three or six months.
10. A register of all children unprotected, under the age of 14 years, if boys, and of 8 years, if girls, being within the municipal limits, and of such children as may be brought within those limits, and have resided there over a month, shall also be prepared under the directions of the Vice-President and delivered to the vaccinators for the same purpose as in Rule 9.
11. Monthly and annual reports on the work done shall be presented to the Municipal Committee by the Superintendent of Vaccination.

No. 13.—The Chief Commissioner is pleased to confirm the following Vaccination Rules for the Municipality of Fraserpet, framed by the Municipal Committee under Sections 19 and 21 of the Indian Vaccination Act, XIII of 1880:—

1. The vaccine station for Fraserpet shall be one of the rooms of the Taluk Cutcherry in the Pettah, at which a notice board shall be hung up, stating on what day and hours vaccination will be performed.
2. The vaccinators shall be able to read and write in the vernacular and satisfy the Superintendent, that they have a proper knowledge of, and skill in, the performance of the operation of vaccination.
3. The Civil Surgeon of Coorg shall be the Superintendent of Vaccination. The vaccinators shall be appointed by the Superintendent, who shall have power to suspend them, and, with the concurrence of the Municipal Committee, to dismiss them.
4. The vaccinator or vaccinators shall, during his or their stay at Fraserpet, attend daily between 8 and 11 A.M. at the appointed station. The remainder of the day he or they shall work at the houses of persons who cannot bring their children to the vaccine station, at schools, &c.
5. Persons desirous of having their children vaccinated at their own houses shall pay a fee of annas 8 per case; when parents have more than one child unvaccinated, they shall be charged 4 annas per child.
6. A form of certificate of successful vaccination, of unfitness for vaccination, or of insusceptibility of vaccination shall be printed and supplied to the vaccinators, who are empowered to fill them up.
7. The lymph used shall be human lymph, and arm to arm vaccination practised as far as possible.
8. Registers of operations performed by the vaccinators shall be kept, showing name, age, sex, father's name, residence, date, and result.
9. Registers of all children born after the date of the introduction of the Vaccination Act shall be supplied monthly to the vaccinators by the Subedar of the Nanjarajpatna Taluk, who will see that every child on such register is vaccinated within one year of its birth, or that the parents are prosecuted under the Act. Should the child be not in a proper state of health for the operation, a certificate to this effect shall be given by the vaccinator postponing the operation for three or six months.
10. A register of all children unprotected, under the age of 14 years, if boys, and of 8 years, if girls, being within the municipal limits, and of such children as may be brought within those limits, and have resided there over a month, shall also be prepared under the directions of the Subedar of the Nanjarajpatna Taluk and delivered to the vaccinators for the same purpose as in Rule 9.

HENRY F. BLANFORD,
Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

On and from the 1st January, 1884, the terms of subscription and sale will be reduced as follow:—

Terms of subscription, payable annually in advance.

	Without postage.	With postage.
For the Calcutta Series	R10 0	R12 8
" Madras "	" 5 0	" 6 0
" Bombay "	" 7 8	" 8 8
" Allahabad "	" 5 0	" 6 0
Complete set	" 20 0	" 22 8

A part of any series purchased separately, R1.

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.
" Thacker & Co., Bombay.
" Higginbotham & Co., Madras.
The Government Central Book Depôt, Bombay.
" " Book Depôt, Allahabad.

Orders and subscriptions for 1884 should be at once remitted.

NOTICE.

Indian Law Reports.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5—1, Council House Street, at the following rates, payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue	R 15	R10	R 6
" three issues	" 40	" 25	" 14
" six "	" 70	" 40	" 25
" twelve "	" 110	" 70	" 45

At these rates the advertisers will have the option of changing their advertisements in each issue.

THE BENGAL LAW REPORTS.

A few sets of the Bengal Law Reports (Volumes 1 to 15) are available at Messrs. Thacker, Spink & Co., Calcutta, at R375 a set.

DEPARTMENT OF FINANCE AND COMMERCE.

NOTIFICATIONS.

Simla, the 6th October 1884.

No. 3819.

ORDER—By the Government of India, Department of Finance and Commerce.

Read the following:—

Stat. & Com. No. 117. — India Office; London, 4th September 1884.

To His Excellency the Most Honourable the Governor General of India in Council.

My Lord Marquis,—

In continuation of my despatch of the 26th April 1883, I forward herewith, for the information of your Government, a copy of notes which have been exchanged between Earl Granville and the Siamese Minister whereby the 1st January 1885 is fixed as the date upon which, subject to certain reserves, the Agreement between Great Britain and Siam for regulating the traffic in spirituous liquors is to come into operation.

I have, &c.,

(Sd.) Kimberley.

Dated 1st August 1884.

From—Earl Granville,

To—Prince Narès Varariddhi.

By Article VI of the Agreement between the Governments of Great Britain and Siam for regulating the traffic in spirituous liquors of the 6th April 1883, it is stipulated that, "Subject to the provisions of Article V, the present Agreement shall come into operation on a date to be fixed by mutual consent between the two Governments."

I have now the honour to propose, on behalf of Her Majesty's Government, that the 1st January 1885 be fixed as the date in question; and I should be glad to receive a note from you to the effect that this proposal is accepted by the Siamese Government.

I beg leave, at the same time, to state that the fact of a date being thus fixed will in no wise prejudice the right of British subjects, under Article V of the aforesaid Convention, to claim, now or hereafter, the treatment accorded to subjects of the most favoured nation in regard to the spirit trade in Siam.

Dated 2nd August 1884.

From—Prince Narès Varariddhi,

To—Earl Granville.

I have the honour to acknowledge the letter of Your Lordship dated yesterday, in which the 1st January 1885 is proposed by Your Lordship as the date on which the Agreement between the Governments of Siam and Great Britain for regulating the traffic in spirituous liquors shall come into operation. On behalf of the Siamese Government, I beg to accept this date, and to assure Your Lordship that the Siamese Government is fully alive to the fact to which Your Lordship makes reference, that the fixing of the date cannot in any

way prejudice the right of British subjects secured to them under the Vth Article of the aforesaid Agreement.

ORDER.—Ordered, that the foregoing be published in the *Gazette of India* for general information, in continuation of the Notification No. 1243, dated 1st June 1883.

The 10th October 1884.

No. 3922.—Mr. W. Donald, having returned from privilege leave, resumed charge of his duties as Deputy Accountant General, Madras, from Mr. H. S. Groves before noon on the 27th September 1884.

D. M. BARBOUR,
Secy. to the Govt. of India.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 26th September, 1884, and is hereby promulgated for general information :—

ACT No. XV OF 1884.

An Act for the validation of certain licenses to solemnize Marriages granted to Ministers of Religion under Act XXV of 1864.

WHEREAS by section 4 of Act XXV of 1864 (*to provide further for the solemnization of Marriages in India of persons professing the Christian Religion*) it was enacted that, from and after the first day of July, 1864, certain Governments therein named should have authority to grant licenses to ministers of religion to solemnize marriages within the territories subject to such Governments respectively;

And whereas, in exercise of the authority so conferred, the Governments therein named granted licenses to certain ministers of religion to solemnize marriages;

And whereas Act XXV of 1864 was repealed by Act V of 1865 (*to provide for the solemnization of Marriages in India of persons professing the Christian Religion*);

And whereas by section 9 of the latter Act it was enacted that, from and after the commencement of that Act, all marriages which should be solemnized in India otherwise than in accordance with the provisions of the fifth and sixth sections of that Act should be null and void;

And whereas by section 6 of the same Act it was enacted that marriages might be solemnized in India by (among other persons) any minister of religion who, under the provisions of that Act, had obtained a license to solemnize marriages;

And whereas Act V of 1865 was repealed by the Indian Christian Marriage Act, 1872;

And whereas by section 4 of the latter Act it is enacted that every marriage between persons, one or both of whom is a Christian or Christians, shall be solemnized in accordance with the provisions of the next following section; and that any such marriage solemnized otherwise than in accordance with such provisions shall be null and void;

And whereas by the next following section of the same Act it is enacted that marriages may be solemnized in India by (among other persons) any minister of religion licensed under the same Act to solemnize marriages;

And whereas neither in Act V of 1865 nor in the Indian Christian Marriage Act, 1872, was there or is there any provision either saving licenses granted under Act XXV of 1864 or permitting a marriage to be solemnized by a minister of religion who had obtained a license to solemnize marriages under Act XXV of 1864 only; (XV of 1872.)

And whereas certain marriages have been solemnized both while Act V of 1865 was in force and since the passing of the Indian Christian Marriage Act, 1872, by ministers of religion who had obtained licenses to solemnize marriages under Act XXV of 1864, but had never obtained licenses to solemnize marriages under Act V of 1865 or the Indian Christian Marriage Act, 1872, as the case may be, and doubts have therefore arisen as to the validity of such marriages; (XV of 1872.) (XV of 1872.)

And whereas it is expedient to remove such doubts and to declare the continued validity of licenses to solemnize marriages granted to ministers of religion under Act XXV of 1864;

It is hereby enacted as follows:—

Validation of licenses to solemnize marriages granted to ministers of religion under Act XXV of 1864.

1. A license to solemnize marriages granted to a minister of religion under Act XXV of 1864 shall be deemed, if in force on the date on which Act V of 1865 came into force, to have been, while that Act was in force, a license granted under that Act, and, if in force on the date on which the Indian Christian Marriage Act, 1872, came into force, to have been since that Act came into force, and to be, a license granted under that Act. (XV of 1872.)

[Second publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 3rd October, 1884, and is hereby promulgated for general information:—

ACT NO. XVI OF 1884.

An Act to provide more effectually for the suppression of certain forms of Gaming in British Burma.

WHEREAS it is expedient to provide more effectually for the suppression of certain forms of gaming in British Burma; It is hereby enacted as follows:—

Short title, extent and commencement.

1. *(1)* This Act may be called the Burma Gaming Act, 1884.

(2) It extends to all the territories for the time being under the administration of the Chief Commissioner of British Burma; and

(3) It shall come into force at once.

Application of Act III of 1867 to game of *ti* and like games.

2. *(1)* Taking part in the game of "*ti*," or in any other game or pretended game of a like nature, shall be deemed gaming and playing within the meaning of Act III of 1867.

(2) Every house, walled enclosure, room or place, whether public or private, where any such game or pretended game is carried on, shall, for the purposes of that Act, be deemed a common gaming-house, and all expressions referring to the use of any such house, enclosure, room or place as a common gaming-house shall include the use thereof for any such game or pretended game on a single occasion.

(3) All boxes, receptacles, lists, papers, tickets and forms used for the purpose of any such game or pretended game shall be deemed instruments of gaming within the meaning of the said Act.

Penalty on conducting game of *ti* and like games.

3. Whoever conducts or assists in conducting the game of "*ti*," or any other game or pretended game of a like nature, as manager, stakeholder or *daing*, or who is according to the rules of the game or pretended game entitled to receive the surplus proceeds, or any part of the surplus proceeds, of the stakes, after deducting the amount payable to the successful player or players, or who promotes the game or pretended game by soliciting or collecting stakes or otherwise, shall be punished with imprisonment for a term which may for a first offence extend to six months, and for a subsequent offence to two years, or with fine, or with both.

Power to extend local application of Act III of 1867 within British Burma.

4. *(1)* The Chief Commissioner may, from time to time, by notification published in the official Gazette, extend to the whole or any part of the territories for the time being under his administration any such of the provisions of Act III of 1867 as do not for the time being extend thereto.

(2) From the date of any such extension so much of any rule having the force of law in operation in the territories to which the extension is made as is inconsistent with or repugnant to any provision so extended shall cease to have effect in those territories.

Power to invest 2nd class Magistrate with powers under Act III of 1867, section 5.

5. The Local Government may authorize any Magistrate of the second class to exercise the powers conferred by section 5 of Act III of 1867 on the Magistrate of the District.

Amendment of Act III of 1867, section 13.

6. In section 13 of Act III of 1867—

(*a*) for the words "public street, place or thoroughfare," where they first occur, the words "street or thoroughfare or place to which the public have access" shall be substituted; and

(*b*) in the last clause, for the words "such public place" the words "such place" shall be substituted.

Power to arrest without warrant.

7. A police-officer may arrest without warrant any person soliciting or collecting stakes for the game of *ti*, or any other game or pretended game of a like nature, in any street or thoroughfare or place to which the public have access.

Power to demand security.

8. Whenever a District Magistrate, Sub-divisional Magistrate or, when he is specially empowered in this behalf by the Local Government, a Magistrate of the first class receives information that any person within the local limits of his jurisdiction earns his livelihood, wholly or in part, by carrying on, or assisting in carrying on, the game of *ti*, or any other game or pretended game of a like nature, he may deal with such person as nearly as may be as if the information received about him were of the description mentioned in section 110 of the Code of Criminal Procedure; and for the purposes of any proceeding under this section the fact that a person earns his livelihood as aforesaid may be proved by evidence of general repute or otherwise.

X of 1882.

D. FITZPATRICK,

146. Member not to be deemed interested in prosecution.
147. Saving of prosecutions under other laws.

Rules.

148. Procedure for making rules under section 7, 48, 106 or 143.
149. Continuance of existing rules.

SECTIONS.

Recovery of Money.

150. Recovery of money.

Notices.

151. Authentication, service and validity of notices.
152. Mode of giving notice to owner or occupier of property.
153. Publication of public notices.

Alteration of Municipal Limits.

154. Notification of intention to alter limits of municipality.
155. Alteration of limits of municipality.
156. Effect of exclusion of local area from municipality.
157. Effect of including local area in municipality.

Powers to except Municipalities from Provisions of Act.

158. Power to except municipality from provisions of Act unsuited thereto.

Miscellaneous.

159. Saving of Act XI of 1879.
160. Powers of Governor General in Council and of Local Government exerciseable from time to time.
161. Decision of questions as to whether persons are "inhabitants."

An Act to amend the law relating to Municipalities in British Burma.

WHEREAS it is expedient to amend the law relating to Municipalities in British Burma; It is hereby enacted as follows :—

CHAPTER I.

PRELIMINARY.

Short title, local extent and commencement.

1. *(1)* This Act may be called the Burma Municipal Act, 1884.

(2) It extends to the territories for the time being under the administration of the Chief Commissioner of British Burma; and

(3) It shall come into force on such date as the Local Government may, by notification in the official Gazette, appoint in this behalf.

Definitions.

2. In this Act, unless there is something repugnant in the subject or context,—

"municipality" means a local area declared under Chapter II to be a municipality;

"inhabitant" includes any person ordinarily residing or carrying on business, or owning or occupying immoveable property, in any local area which is declared to be a municipality under this Act or which the Local Government has by notification proposed to declare a municipality under this Act; and

"street" means any street, road, thoroughfare, passage or place over which the public have a right of way; and includes the surface-soil and sub-soil of any such street, and the footway and drains of any such street, and any bridge, culvert or causeway forming part of any such street.

Burma Municipal Act, 1884.
(Chapter II.—Constitution of Municipalities.—Sections 3-5.)
(Chapter III.—Organization of Municipal Committees.—Sections 6-9.)

CHAPTER II.

CONSTITUTION OF MUNICIPALITIES.

Proposal to create municipality.

3. *(1)* The Local Government may, by notification published in the official Gazette and in such other manner as the Local Government may determine, propose to declare any town, or any group of towns in the immediate neighbourhood of one another, a municipality under this Act.

(2) Every notification under this section shall define the limits of the town or group of towns to which it refers, and may include within those limits any railway-station, village, building or land in the vicinity of any such town:

Provided that it shall not, without the previous consent of the Governor General in Council, so include any part of a military cantonment.

Creation of municipality.

4. *(1)* Any inhabitant of a local area in respect of which a notification has been published under section 3 may, if he objects to anything therein contained, submit his objection in writing to the Local Government within six weeks from the publication of the notification in the Gazette, and the Local Government shall take his objection into consideration.

(2) When six weeks from the publication of the notification in the Gazette have expired and the Local Government has considered the objections (if any) which have been submitted under sub-section (*1*), the Local Government may, by a notification in the official Gazette, declare the local area to be a municipality under this Act.

Application of Act to existing municipalities.

5. *(1)* The Local Government may, by notification in the official Gazette, declare any local area which is a municipality established under the British Burma Municipal Act, 1874, (VII of 1874.) to be a municipality under this Act, and shall, within three months from the date on which this Act comes into force, so declare every such local area, unless, before the expiration of that period,—

(*a*) that local area is comprised in some local area declared to be a municipality under section 4; or

(*b*) the Local Government has declared, by a notification in the official Gazette, that the provisions of this Act are unsuited to that local area.

(2) The Local Government may, by the notification issued under this section in respect of any local area, direct that the members and the president and vice-president of the committee for that local area appointed *ex officio*, by nomination and by election under the said British Burma Municipal Act, 1874, (VII of 1874) and then in office, shall, on and from a day fixed by the notification, be deemed respectively to have been appointed by virtue of an office and by name and elected under this Act as members, president and vice-president of a municipal committee for the local area, and shall hold office as such members, president and vice-president for such term as may be fixed by the notification.

CHAPTER III.

ORGANIZATION OF MUNICIPAL COMMITTEES.

Constitution of Committees.

Committee to consist of elected and appointed members.

6. There shall be established for each municipality a municipal committee having authority over that municipality, and consisting of—

(*a*) so many inhabitants of the municipality as may be determined by the Local Government elected in manner next hereinafter prescribed to represent wards of the municipality or particular classes of the inhabitants; and

(*b*) such person or persons (if any), not exceeding in number one-fourth of the committee, as the Local Government may appoint by name or by virtue of an office in this behalf:

Provided that—

(1) when the circumstances of the municipality are, in the opinion of the Local Government, such as to require it, the Local Government may appoint a larger proportion of, or all, the members of the committee; and

(2) when any places on a committee are required to be filled by election, and a sufficient number of members is not elected, the Local Government may fill those places by appointment.

Power to Local Government to make rules regarding election.

7. *(1)* The Local Government shall, for every municipality in which a system of election is introduced, make rules regulating the following matters, namely:—

(*a*) the division of the municipality into wards, or of the inhabitants into classes, or both;

(*b*) the number of representatives proper for each ward or class;

(*c*) the qualifications of electors and of candidates for election;

(*d*) the registration of electors;

(*e*) the nomination of candidates, the time of election and the mode of recording votes; and

(*f*) any other matters relating to the system of representation and of election for which it may seem expedient to provide.

(2) The Local Government may, after the municipal committee has come into existence as herein after provided, amend, after consulting the committee, the rules made under this section; but any amendment made under this sub-section shall not take effect until six months after it has been published in the official Gazette.

(3) Elective members of the committee shall be elected in accordance with the rules made under this section and for the time being in force.

Term of office of members.

8. *(1)* A member of a municipal committee, when appointed by virtue of an office, shall, unless and until the Local Government otherwise directs, continue to be a member of the committee while he continues to hold that office.

(2) The term of office of all other elected and appointed members of a committee shall be fixed by the Local Government by rules made under this Act, and may be so fixed as to provide for the retirement of members by rotation, but shall not exceed three years.

(3) An outgoing member may, if otherwise qualified, be again elected or appointed.

Resignation of member of committee.

9. A member of a municipal committee may resign by notifying in writing to the Local Government his intention to do so, and, on his resignation being accepted by the Local Government, he shall be deemed to have vacated his office.

Burma Municipal Act, 1884.
(Chapter III.—Organization of Municipal Committees.—Sections 10-18.)

Removal of member.

10. *(1)* The Local Government may remove any member of a municipal committee who ceases to be an inhabitant of the municipality, or refuses to act, or becomes in the opinion of the Local Government incapable of acting, or is declared insolvent, or is convicted of any such offence, or subjected by a Criminal Court to any such order, as implies, in the opinion of the Local Government, a defect of character which unfits him to be a member, or who without sufficient excuse neglects for more than three consecutive months to be present at the meetings of the committee.

(2) A person removed under this section on any ground except that first mentioned shall be disqualified for election until the Local Government otherwise directs.

Filling of casual vacancies.

11. *(1)* When the place of an elected member of a municipal committee becomes vacant by the resignation or removal of the member, or by his death, a new member shall be elected in manner prescribed under section 7 to fill the place.

(2) When the place of a member of a municipal committee appointed by name becomes vacant as aforesaid, the Local Government may, if it thinks fit, appoint a new member to fill the place.

(3) A person elected or appointed under this section to fill a casual vacancy shall hold office until the person whose place he fills would regularly have gone out of office, and shall then go out of office, but may be again elected or appointed.

Incorporation of municipal committee.

12. Every municipal committee shall be a body corporate by the name of the municipal committee of its municipality, shall have perpetual succession and a common seal, with power, subject to the provisions of this Act, to acquire and hold property, both moveable and immoveable, and to transfer any property held by it, and to contract and to do all other things necessary for the purposes of its constitution, and may sue and be sued in its corporate name:

Provided that a committee shall not transfer any immoveable property except in pursuance of a resolution passed at a special meeting and approved by the Local Government.

Time for committees coming into existence.

13. A municipal committee shall come into existence at such time as the Local Government may, by notification in the official Gazette, appoint in this behalf:

Provided that a committee constituted under section 5, sub-section (2), shall come into existence on the day fixed under that sub-section.

Consequences of establishment of municipal committee where municipal committee under Act VII of 1874 exists.

14. When a municipal committee comes into existence under section 13 for a municipality constituted under this Act, and that municipality is or comprises within its limits a local area which is a municipality under the British Burma Municipal Act, 1874, the following consequences shall ensue, namely:—

(a) the said Act shall cease to apply to the local area;

(b) the municipal committee (if any) constituted under that Act for the local area (hereinafter called the old committee) shall cease to exist;

(c) all property vested in the old committee shall for the purposes of this Act vest in the committee constituted under this Act (hereinafter called the new committee), subject to all rights (if any) existing over, and all debts, liabilities and obligations (if any) affecting, that property;

(d) every right and liability belonging to or incurred by the old committee may be enforced by and against the new committee in like manner as it might have been enforced by and against the old committee if this Act had not been passed;

(e) a Government officer employed by the old committee at the time when the new committee comes into existence shall be deemed to be similarly employed by the new committee and shall not be dismissed from that employment without the sanction of the Local Government; and

(f) the new committee shall be substituted for the old committee in all legal proceedings by or against the old committee pending at the time when the new committee comes into existence.

Member of municipal committee to be municipal commissioner.

15. Every member of a municipal committee constituted under this Act shall be deemed to be a municipal commissioner within the meaning of every enactment for the time being in force.

President and Vice-president.

Election of president and vice-president.

16. A municipal committee shall, from time to time, at a special meeting, elect one of its members to be president, and may, from time to time, at a like meeting, elect another of its members to be vice-president:

Provided that in such municipalities, if any, as the Local Government may, by notification in the official Gazette, exempt from the operation of this section, the president shall, until the notification is rescinded by a like notification, be appointed by the Local Government from among the members of the committee.

Term of office of president and vice-president.

17. *(1)* The term of office of a president or vice-president shall be one year, and on the expiration of that period he may be again elected or appointed.

(2) Nothing in this section shall affect section 5, sub-section (2).

Casual vacancies in office of president or vice-president.

18. *(1)* If a president elected by a municipal committee or a vice-president dies, ceases to be a member of the committee or resigns his office, the committee shall, at a special meeting, elect another of its members to be president or vice-president.

(2) If a president appointed by the Local Government dies, ceases to be a member of the committee or resigns his office, the Local Government shall appoint another president.

(3) A person elected or appointed under this section to fill a casual vacancy shall hold office

Burma Municipal Act, 1884.
(Chapter III.—Organization of Municipal Committees.—Sections 19-28.)

until the person whose place he fills would regularly have gone out of office, and shall then go out of office, but may, if otherwise qualified, be again elected or appointed.

Notification of Elections, Appointments and Removals.

19. All elections and appointments of presidents and vice-presidents, and all elections, appointments and removals of members, of municipal committees, shall be notified in the local official Gazette, and no such election or appointment shall take effect until it is so notified.

Notification of appointments, &c.

Conduct of Business.

20. *(1)* A municipal committee shall meet for the transaction of business at least once in every month, at such time as may, from time to time, be fixed by the rules made under section 27.

Time for holding meetings.

(2) The president, or, in his absence, the vice-president, may, whenever he thinks fit, and shall, on a requisition made in writing by not less than one-fifth or two of the members of the committee, convene an ordinary or a special meeting at any other time.

21. *(1)* A meeting of a municipal committee shall be either ordinary or special.

Ordinary and special meetings.

(2) Any business may be transacted at an ordinary meeting unless it is required by this Act or the rules made under this Act to be transacted at a special meeting.

22. *(1)* The quorum necessary for the transaction of business at a special meeting of a municipal committee shall be one-half of the whole committee:

Quorum.

Provided that, when the committee consists of less than six members, the quorum shall be three.

(2) The quorum necessary for the transaction of business at an ordinary meeting of a municipal committee shall be such number, not less than three, as may, from time to time, be fixed by the rules made under section 27:

Provided that, if at any ordinary or special meeting of the committee a quorum is not present, the chairman shall adjourn the meeting to such other day as he thinks fit, and the business which would have been brought before the original meeting if there had been a quorum present shall be brought before and transacted by the adjourned meeting whether there is a quorum present thereat or not.

23. *(1)* At every meeting of a municipal committee the president, if present, shall preside as chairman.

Chairman of meeting.

(2) If, when any meeting is held, the office of president is vacant, or the president is absent from the meeting and the vice-president is present, he shall preside as chairman.

(3) In any case not provided for in the foregoing portion of this section, the members present shall elect one of their number to be chairman of the meeting.

24. *(1)* Except as otherwise provided by this Act or by any rule made under this Act, all questions coming before any meeting of a municipal committee shall be decided by a majority of the votes of the members present.

Vote of majority decisive.

(2) In case of an equality of votes, the chairman at the meeting shall have a second or casting vote.

25. Every resolution passed by a municipal committee at a meeting shall be recorded in a book kept for the purpose, shall be signed by the chairman of the meeting or of the next ensuing meeting, shall be open to inspection by the public at the municipal office at all reasonable times without charge, and shall be published in some local English or Vernacular newspaper, or in such other manner as the Local Government may direct.

Resolutions to be recorded and published.

26. The discussions and proceedings of a municipal committee shall be conducted and recorded either in English or in Burmese, as the committee at a special meeting may, from time to time, decide:

Language of committee.

Provided that, if the discussions and proceedings are conducted and recorded in English, the committee shall provide for interpreting and translating them into Burmese for the benefit of members who do not understand English.

27. *(1)* A municipal committee may, from time to time, at a special meeting, make rules consistent with this Act as to—

Power to make rules as to conduct of business.

(*a*) the time and place of its meetings;

(*b*) the manner in which notice thereof is to be given;

(*c*) the quorum necessary for the transaction of business at ordinary meetings;

(*d*) the conduct of proceedings at meetings, and the adjournment of meetings;

(*e*) the person or persons to be primarily responsible for the current executive administration and their powers: that is to say, what portion of the executive authority shall be exercised by the president, by the vice-president, by sub-committees, by individual members and by officers or servants of the committee;

(*f*) the persons by whom receipts may be granted on behalf of the committee for money paid under this Act; and

(*g*) any other similar matters.

(2) A rule made under clause *(e)* shall not take effect until it has been confirmed by the Local Government, and no rule made under this section shall take effect until it has been published in such manner as the Local Government may direct.

28. In cases of emergency the president, or in his absence the vice-president, may direct the execution of any work or the doing of any act, which the committee is empowered to execute or do, and the immediate execution or doing of which is, in his opinion, necessary for the service or safety of the public, and may direct that the expense of executing the work or doing the act shall be paid from the municipal fund:

Extraordinary powers of president and vice-president in case of emergency.

Provided that—

(a) he shall not act under this section in contravention of any order of the committee passed at a meeting; and

(b) where he acts under this section, he shall report his proceedings to the next following meeting of the committee.

Burma Municipal Act, 1884.
(Chapter III.—Organization of Municipal Committees.—Sections 29-38.)

Joint Committees.

Joint committee of two or more committees or cantonment authorities.

29. A municipal committee may, from time to time, concur with any other municipal committee or cantonment authority, or with more than one such committee or authority, in appointing, out of their respective bodies, a joint committee for any purpose in which they are jointly interested, and in appointing a chairman of the joint committee, and in delegating to any such joint committee any power which might be exercised by either or any of the committees or authorities, and in framing and modifying regulations as to the proceedings of any such joint committee, and as to the conduct of correspondence relating to the purpose for which it is appointed.

Defects in Constitution and Irregularities.

Vacancies and irregularities not to invalidate proceedings.

30. Anything done or any proceeding taken under this Act shall not be questioned on account of any vacancy in a municipal committee or joint committee, or on account of any defect or irregularity not affecting the merits of the case.

Officers and Servants.

Appointment of secretary.

31. *(1)* A municipal committee shall, from time to time, at a special meeting, appoint one of its members or some other person to be its secretary, and may at a like meeting remove any person so appointed.

(2) If a secretary is a member of the committee, he shall receive no remuneration in respect of his services. If he is not a member of the committee, the committee may, with the previous sanction of the Commissioner, assign to him any such pay as it thinks fit.

Employment of other officers and servants.

32. Subject to the other provisions of this Act, and to such rules as the Local Government may make prescribing the qualifications requisite in the case of persons appointed to offices requiring professional skill, a municipal committee may appoint and remove, in addition to its secretary, such other officers and servants as may be necessary or proper for the efficient execution of its duties, and may assign to those officers and servants such pay as it thinks fit.

Power to prevent extravagance in establishments.

33. If, in the opinion of the Commissioner, the number of persons employed by a municipal committee as officers or servants, or whom the committee propose to employ as such, or the remuneration assigned by the committee to those persons or any of them, is excessive, the committee shall, on the requirement of the Commissioner, reduce the number of those persons or the remuneration, as the case may be:

Provided that the committee may appeal against any such requirement to the Local Government, and the decision of the Local Government on any such appeal shall be final.

Pensions of Government officials serving the committee.

34. In the case of a Government official, a municipal committee may—

(1) if his services are wholly lent to it, subscribe for his pension or gratuity and leave-allowances in accordance with the rules of the Government Civil Pension and Leave Codes for the time being in force; and

(2) if he devotes only a part of his time to the performance of duties in behalf of the committee, contribute to his pension or gratuity and leave-allowances in such proportion as may be determined by the Government.

Pensions of other officers and servants.

35. In the case of an officer or servant not being a Government official referred to in section 34, a municipal committee may—

(1) grant him leave-allowances and, if he is employed under the committee appointed under the British Burma Municipal Act, 1874, when this Act comes into force, and is not entitled to pension, or if his monthly pay is less than ten rupees, a gratuity; and

VII of 1874.

(2) if empowered in this behalf by the Local Government—

(a) subscribe in his behalf for pension or gratuity under the rules of the Government Civil Pension and Leave Codes for the time being in force; or

(b) purchase for him from the Government or otherwise an annuity on his retirement:

Provided that no pension, gratuity, leave-allowance or annuity shall exceed the sum to which, under the Government Civil Pension and Leave Codes for the time being in force, the servant would be entitled if the service had been service under Government.

Contracts and Transfers of Property.

Mode of executing contracts and transfers.

36. *(1)* When a contract made by or on behalf of a municipal committee exceeds in value or amount one hundred rupees, it must be in writing, and must be signed by the president or vice-president and at least one other member of the committee.

(2) A transfer of immoveable property belonging to the committee must be made by an instrument in writing, executed by the president or vice-president and by at least two other members of the committee.

(3) If any such contract or transfer is executed or made otherwise than in conformity with the provisions of this section, it shall not be binding on the committee.

Penalty on member, officer or servant of committee being interested in contract made with committee.

37. *(1)* If any member, officer or servant of a municipal committee is, otherwise than with the permission in writing of the Commissioner, directly or indirectly interested in any contract made with the committee, he shall be deemed to have committed an offence under section 168 of the Indian Penal Code.

XLV of 1860.

(2) A person shall not, by reason of being a shareholder in, or member of, any incorporated or registered company, be held to be interested in any contract entered into between the company and the committee, but he shall not take part in any proceedings of the committee relating to any such contract.

Acquisition of land.

Acquisition of land under Act X of 1870.

38. Where any land, whether within or without the limits of a municipality, is required by a municipal committee for the purposes of this Act or for any other object which it is em-

Burma Municipal Act, 1884.
(Chapter III.—Organization of Municipal Committees.—Sections 39-40.)
(Chapter IV.—Taxation.—Sections 41-43.)

powered to carry out under any other enactment for the time being in force, the Local Government may, at the request of the municipal committee, proceed to acquire it under the provisions of the Land Acquisition Act, 1870; and, on payment by the committee of the compensation awarded under that Act and of the charges incurred by the Government in connection with the proceedings, the land shall vest in the committee.

X of 1870.

Privileges and Liabilities.

Suits against committee and its officers.

39. No suit shall be instituted against a municipal committee or against an officer of any such committee in respect of an act purporting to be done by him in his official capacity until the expiration of one month next after notice in writing has been, in the case of a committee, delivered to or left at its office, and in the case of an officer, delivered to him or left at his office or place of abode, stating the cause of action and the name and place of abode of the intending plaintiff; and the plaint must contain a statement that such notice has been so delivered or left:

Provided that this section shall not apply to any suit instituted under section 54 of the Specific Relief Act, 1877.

I of 1877.

Liability for loss, waste or misapplication.

40. Every person shall be liable for the loss, waste or misapplication of any money or other property belonging to a municipal committee, if the loss, waste or misapplication is a direct consequence of his neglect or misconduct while a member of the committee, and a suit for compensation may be instituted against him by the committee or by the Secretary of State for India in Council.

CHAPTER IV.

TAXATION.

General Provisions.

Taxes which may be imposed for general purposes of Act.

41. *(1)* Subject to any general rules or special orders which the Governor General in Council may make in this behalf, a municipal committee may, for the purposes of this Act, impose, with the sanction hereinafter specified in each case, and in manner prescribed by section 45, any of the following taxes, namely:—

(A) with the previous sanction of the Local Government—

(a) a tax on buildings and lands situate within the municipality or any part thereof, not exceeding five per centum of the annual value of the buildings and lands;

(b) a tax on lands covered by buildings and situate as aforesaid, at a rate not exceeding one pie per square foot per annum;

(c) a tax on houses situate as aforesaid, according to the number of posts in each, at rates not exceeding the following, namely:—

		Rs. A.	
For a house having not more than 2 posts	...	0 8	per annum.
For a house having 3 posts	...	1 8	„
For a house having 4 posts	...	2 8	„
For a house having 5 posts	...	4 0	„
For a house having 6 posts	...	7 0	„
For a house having 7 posts	...	10 0	„

and when a house has more than seven posts, four rupees eight annas additional per annum for each post above seven;

(d) a tax on vehicles, boats and animals used for driving, riding, draught or burden, and dogs, kept within the municipality or any part thereof;

(B) with the previous sanction of the Local Government and of the Governor General in Council, any other tax:

Provided as follows:—

(e) only one of the taxes mentioned in clauses (*a*), (*b*) and (*c*) shall be imposed in respect of the same property; and

(f) in assessing a house to the tax mentioned in clause (*c*), only posts facing a road or street shall be counted, except in the case of bázárs or large buildings extending through from street to street, in which case the posts contained in one row from street to street, instead of those facing streets, may, in the discretion of the assessing authority, be counted.

(2) In this section "annual value" means the gross annual rent for which buildings and lands liable to taxation may reasonably be expected to let, and in the case of houses, may be expected to let unfurnished;

Provided that, in the case of land assessed to land-revenue or of which the land-revenue has been wholly or in part released, compounded for, redeemed or assigned, if the Local Government so directs, the annual value shall be deemed to be double the amount of the land-revenue for the time being assessed on the land, whether such assessment is leviable or not; or, when the land-revenue has been wholly or in part compounded for or redeemed, double the amount which, but for such composition or redemption, would have been leviable.

Water-tax.

42. *(1)* Besides the taxes imposed under section 41, a municipal committee, with the previous sanction of the Local Government, may, for the purpose of constructing or maintaining works for the supply of water to the municipality or any part thereof, or paying the principal or interest of any loan raised for the construction of such works, impose in manner prescribed by section 45, a tax, to be called the water-tax, upon buildings or lands which are so situated that their occupiers can benefit by the works.

(2) The rate or amount of the tax so imposed on different buildings or lands may be determined with reference, among other considerations, to their distance from the nearest point at which the water is deliverable by the works and to their level; but in fixing it regard shall be had to the principle that the total net proceeds of the tax, together with the estimated income from payments for water supplied from the works under special contracts or otherwise, should not exceed the amount required for the said purpose.

Lighting-tax.

43. Besides the taxes imposed under the foregoing sections, a municipal committee, with the previous sanction of the Local Government, may, for the purpose of lighting the public streets throughout the municipality or any part thereof, or paying the principal or interest of any loan raised for the construction of works required for lighting those streets, impose, in manner prescribed by section 45, a tax, to be called the lighting-tax, upon buildings and lands situate

Burma Municipal Act, 1884.
(Chapter IV.—Taxation.—Sections 44-51.)

within the municipality or that part thereof, as the case may be:

Provided that in fixing the rate or amount of the tax regard shall be had to the principle that the total net proceeds thereof should not exceed the amount required for the said purpose.

Scavenging-tax.

44. When a committee has, in exercise of the powers conferred by this Act, provided for the performance, with regard to any buildings or lands, by its agents of the duties usually performed by sweepers, it may, with the previous sanction of the Local Government, impose, in manner prescribed by section 45, upon those buildings and lands, in addition to any other tax imposed upon them under this Act, a tax to be called the scavenging-tax, at such rate or of such amount as it thinks fit:

Provided that in fixing the rate or amount regard shall be had to the principle that the total net proceeds of the tax should not exceed the cost of the performance of the said duties.

Procedure in imposing such taxes.

45. *(1)* A municipal committee may resolve, at a special meeting, to propose the imposition of any tax under section 41, 42, 43 or 44.

(2) When a resolution has been passed under sub-section (1), the committee shall publish a notice defining the persons or property proposed to be taxed, the amount or rate of the tax to be imposed and the system of assessment to be adopted.

(3) Any person likely to be directly affected by the proposed tax and objecting to the same may, within thirty days from the publication of the notice, submit his objection in writing to the committee; and the committee shall, at a special meeting, take his objection into consideration.

(4) If no objection is received within the said period of thirty days, or if the objections received, having been considered as aforesaid, are deemed insufficient, the committee may submit its proposals to the Local Government, with the objections (if any) which have been submitted as aforesaid and its decision thereon.

(5) The Local Government, on receiving such proposals may sanction the same, or refuse to sanction them, or return them to the committee for further consideration.

(6) When the Local Government sanctions any such proposals which require the further sanction of the Governor General in Council, it shall submit those proposals to the Governor General in Council with the objections (if any) received through the committee; and the Governor General in Council may sanction the proposals, or refuse to sanction the same, or return them to the Local Government for further consideration.

(7) When the proposals of a municipal committee in respect of a tax have been sanctioned by the Local Government, or by the Local Government and the Governor General in Council, as the case may be, the committee may, at a special meeting, direct the imposition of the tax in accordance with those proposals.

(8) In giving such direction the committee shall fix a date from which the tax shall come into force:

Provided that—

(a) no tax shall come into force until it has been notified;

(b) no tax leviable by the year shall come into force except at the commencement of the year by which it is leviable; and

(c) no other tax shall come into force less than six months from the date of the meeting at which its imposition is directed.

(9) A notification of the imposition of a tax under this Act shall be conclusive evidence that the tax has been imposed in accordance with the provisions of this Act.

Power to abolish or reduce tax.

46. A municipal committee may, at a special meeting, with the sanction of the Local Government, abolish or reduce in amount any tax imposed under the foregoing sections.

Power to Local Government to suspend levy of tax.

47. *(1)* If it at any time appears to the Local Government, on complaint made or otherwise, that any tax imposed under the foregoing sections is unfair in its incidence, or that the levy thereof or of any part thereof is injurious to the interests of the general public, it may require the municipal committee to take, within a specified period, measures to remove the objection; and, if within that period the requirement is not complied with to the satisfaction of the Local Government, the Local Government may, by notification, suspend the levy of the tax or of any part thereof until the objection has been removed.

(2) The Local Government may at any time by a like notification, rescind any such suspension.

Power to make rules for assessment, collection and remission of taxes.

48. *(1)* The Local Government may make rules for the assessment, collection and remission of taxes leviable under this Act and preventing evasion of the same:

Provided that every such rule shall be consistent with the provisions of this Act and with the proposals sanctioned in respect of the tax under section 45.

(2) In making any rule under this section the Local Government may direct that a breach of any provision thereof shall be punishable with fine which may extend to fifty rupees.

Taxes not invalid for defect of form.

49. No tax imposed under this Act shall be invalid merely for defect of form; and it shall be enough in any such tax on property, or any assessment of value for the purpose of the tax, if the property taxed or assessed is so described as to be generally known; and it shall not be necessary to name the owner or occupier thereof.

Taxes leviable under Act VII of 1874 to be deemed to be taxes under this Act.

50. All taxes leviable in any local area under the British Burma Municipal Act, 1874, at the time when a municipal committee having authority over that local area comes into existence under this Act, shall, so far as their imposition and assessment are consistent with this Act and within the powers conferred thereby, be deemed to have been imposed and assessed under this Act.

VII of 1874.

Taxes on Immoveable Property.

Preparation of assessment-list.

51. *(1)* The committee shall cause an assessment-list of all buildings and lands on which any tax is imposed to be prepared, containing—

Burma Municipal Act, 1884.
(Chapter IV.—Taxation.—Sections 52-59.)
(Chapter V.—Funds and Property.—Section 60.)

(a) the name of the street or division in which the property is situate;

(b) the designation of the property, either by name or by number, sufficient for identification;

(c) the names of the owner and occupier, if known;

(d) the annual value, area or number of posts on which the property is assessed; and

(e) the amount of the tax assessed thereon by the committee.

(2) For the purpose of preparing the list, the committee may require the owners or occupiers of the buildings or lands to furnish it with returns of the measurements or number of posts or of the rent or annual value.

Publication of notice of assessments.

52. When the assessment-list has been completed, the committee shall give public notice thereof, and of the place where the list or a copy thereof may be inspected; and every person claiming to be either owner or occupier of property included in the list, or the agent of any such person, shall be at liberty to inspect the list and to make extracts therefrom without charge.

Public notice of time fixed for revising assessment-list.

53. (1) The committee shall at the same time give public notice of a time, not less than one month from the publication of the notice, when it will proceed to revise the assessment; and in all cases in which any property is for the first time assessed, or the assessment thereof is increased, it shall also give notice thereof to the owner or occupier of the property.

(2) All objections to the assessment shall be made in writing before the time fixed in the notice or orally or in writing at that time.

Settlement of list.

54. (1) After the objections have been enquired into and the persons making them have been allowed an opportunity of being heard either in person or by authorized agent as they think fit and the revision of the assessment has been completed, the amendments made in the list shall be authenticated by the signatures of not less than two members of the committee, who shall at the same time certify that no valid objection has been made to the assessment contained in the list, except in the cases in which amendments have been entered therein; and, subject to such amendments as may thereafter be duly made, the tax so assessed shall be deemed to be the tax for the whole year by which it is leviable next following that in which the assessment is made.

(2) The list when amended under this section shall be deposited in the committee's office, and shall there be open during office-hours to all owners and occupiers of property comprised therein, and a public notice that it is so open shall forthwith be published.

Further amendments of assessment-list.

55. (1) The committee may at any time amend the list by inserting the name of any person whose name ought to be inserted, or by inserting any property which ought to have been inserted, or by altering the assessment on any property which has been insufficiently assessed through mistake, oversight or fraud, after giving notice to any person interested in the amendment of a time, not less than one month from the date of service of such notice, at which the amendment is to be made.

(2) Any person interested in any such amendment may tender his objection to the committee in writing before the time fixed in the notice, or orally or in writing at that time, and shall be allowed an opportunity of being heard in support of the same in person or by authorized agent as he thinks fit.

New list need not be prepared every year.

56. It shall be in the discretion of the committee to prepare a new assessment-list every year; or to adopt the assessment contained in the list for any year, with such alterations as may in particular cases be deemed necessary, as the assessment for the year following, giving the same notice of the assessment as if a new assessment-list had been prepared.

Remission of tax on unoccupied immoveable property.

57. When a tax payable under section 41, clause (a), (b) or (c), or under section 42, 43 or 44, is payable in one sum in respect of an entire year, and the property in respect of which it is payable is unoccupied throughout the year, or when such a tax is payable in instalments and the property is unoccupied throughout the period in respect of which an instalment is payable, the amount payable in respect of the property for the year, or the instalment, as the case may be, shall be remitted:

Provided that it shall be in the discretion of the committee to direct that no remission shall be granted unless notice in writing of the vacancy has been given to it within such time from the beginning of the year or of the period as it may, from time to time, fix in this behalf.

Taxes under section 41, clauses (a), (b) and (c), from whom due.

58. Every tax payable under section 41, clause (a), (b) or (c), shall be due jointly and severally from all persons who have been in occupation of the building or land assessed at any time during the year of assessment, or, when the tax is payable by instalments, at any time during the period in respect of which the instalment is payable, and from all persons who have held under them as tenants, mortgagees or conditional vendees.

Tax under sections 42, 43 and 44 payable by occupier.

59. Every tax leviable under section 42, 43 or 44 shall be payable by the occupier of the building or land in respect of which it is payable.

CHAPTER V.

FUNDS AND PROPERTY.

Municipal fund constituted.

60. There shall be formed for each municipality a municipal fund, and there shall, except as by this Act provided, be credited thereto—

(a) all sums received by or on behalf of the committee under this Act or otherwise;

(b) all fines realized in cases in which prosecutions are instituted under this Act or the rules made hereunder or under section 34 of Act V of 1861 for offences committed within the municipality;

(c) any sums which the Local Government may annually assign, as it is hereby empowered to do, to the municipal fund from the port fund of any port abutting on or within the municipality as being in its

Burma Municipal Act, 1884.
(Chapter V.—Funds and Property.—Sections 61-64.)

opinion a just and reasonable contribution towards the expenditure rendered necessary by the resort to the municipality of seamen from ships lying in the port; and

(*d*) when there has been included within the municipality a municipality constituted under the British Burma Municipal Act, 1874, the balance (if any) standing at the credit of the funds of that municipality at the time when the municipal committee came into existence.

61. *(1)* The committee shall set apart and apply annually out of the municipal fund—

Application of fund.

(*a*) *first*, such sum as may be required for the payment of any amounts falling due on any loan legally contracted by it;

(*b*) *secondly*, such sum as may be required to meet the charges of its own establishment, including such subscriptions and contributions as are referred to in sections 34 and 35,

(*c*) *thirdly*, such sum as may be required to pay the expenses of pauper lunatics sent to public asylums from the municipality, the expenses incurred in auditing the accounts of the committee, and such portion of the cost of the Provincial Departments for Education, Sanitation, Vaccination, Medical Relief and Public Works as may be held by the Local Government to be equitably debitable to the committee in return for services rendered to it by these Departments.

(2) Subject to the charges specified in sub-section (1) and to such rules as the Local Government may make with respect to the priority to be given to the several duties of the committee, the municipal fund shall be applicable to the payment, in whole or in part, of the charges and expenses incidental to the following matters within the municipality, and with the sanction of the Commissioner outside the municipality, when such application of the fund is for the benefit of the inhabitants, namely:—

(*a*) the construction, maintenance, improvement, cleansing and repair of streets, and of public bridges, embankments, drains, latrines, tanks and water-courses;

(*b*) the watering and lighting of the streets or any of them;

(*c*) the construction, establishment and maintenance of schools, hospitals and dispensaries, and other institutions for the promotion of education or for the benefit of the public health, and of rest-houses, zayáts, wharves, poor-houses, markets, encamping-grounds, pounds and other works of public utility, and the control and administration of public institutions of any of these descriptions;

(*d*) grants-in-aid to schools, hospitals, dispensaries, poor-houses, leper asylums and other educational or charitable institutions;

(*e*) the training of teachers and the establishment of scholarships;

(*f*) the giving of relief and the establishment and maintenance of relief-works in time of famine or scarcity:

(*g*) the supply, storage and preservation from pollution of water for the use of men or animals;

(*h*) the planting and preservation of trees;

(*i*) the taking of a census, the registration of births, marriages and deaths, public vaccination and any other sanitary measure;

(*j*) the holding of fairs and industrial exhibitions; and

(*k*) all acts and things likely to promote the safety, health, welfare or convenience of the inhabitants.

62. *(1)* There shall be formed for each municipality a school fund. To this fund shall be credited—

School fund.

(*a*) the fees levied in schools maintained at the cost of the school fund;

(*b*) any assignment that may be made to the school fund from provincial funds or from any district or local fund;

(*c*) any other funds or income that may be entrusted to the municipality for the promotion of education; and

(*d*) any sums assigned for educational purposes from the municipal fund.

(2) The Local Government may fix for any municipality the minimum proportion of the municipal fund that shall be yearly assigned to the school fund under clause (*d*): Provided that the minimum so fixed shall not exceed 5 per cent. on the gross annual income of the municipality.

(3) No expenditure, except expenditure for the promotion of education, shall be charged against the school fund. In case of doubt the Commissioner shall decide whether any expenditure is or is not for the promotion of education.

63. *(1)* The balances standing to the credit of the municipal fund and school fund shall, if there is a Government treasury or sub-treasury or a bank to which the Government treasury business has been made over situate within the municipality, be kept in that treasury, sub-treasury or bank. In any other case, the bulk of the funds shall be kept in the nearest Government treasury or sub-treasury or bank as aforesaid, and such money as may be required for current expenditure shall be kept by the committee in a strong box in such place and under such precautions as the committee may, from time to time, direct.

Custody of, and disbursements from, funds.

(2) No disbursement of such funds or any part thereof shall be made except under the signature of the president or vice-president and one other member of the committee.

64. *(1)* A municipal committee may, from time to time, with the previous sanction of the Local Government, invest any portion of its municipal fund or school fund in securities of the Government of India or such other securities as the Governor General in Council may approve in this behalf, and vary such investments for others of the like nature.

Investment of same.

(2) The income resulting from the securities and the proceeds of the sale of the same shall be credited to the municipal fund or school fund, as the case may be.

Burma Municipal Act, 1884.
(Chapter V.—Funds and Property.—Sections 65-67.)
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 68-74.)

Property vested in municipality.

65. Subject to any special reservation made by the Local Government, all property in a municipality of the nature hereinafter specified shall be vested in and belong to the municipal committee, and shall, with all other property which may become vested in the committee, be under its direction, management and control, and shall be held and applied by it for the purposes of this Act, that is to say:—

(a) all public townhalls, gates, markets, slaughter-houses, manure and night-soil depôts and public buildings of every description which have been constructed or are maintained out of municipal funds;

(b) all public streams, tanks, reservoirs, cisterns, wells, springs, aqueducts, conduits, tunnels, pipes and other waterworks, and all bridges, buildings, engines, works, materials and things connected therewith or appertaining thereto, and also any adjacent land (not being private property) appertaining to any public tank or well;

(c) all public sewers and drains, and all sewers, drains, tunnels, culverts, gutters and watercourses in, alongside or under any street, and all works, materials and things appertaining thereto;

(d) all dust, dirt, dung, ashes, refuse, animal-matter or filth, or rubbish of any kind, collected by the committee from the streets, houses, privies, sewers, cesspools or elsewhere;

(e) all public lamps, lamp-posts and apparatus connected therewith or appertaining thereto;

(f) all land or other property transferred to the committee by the Government or by gift or otherwise for local public purposes; and

(g) all streets, and the pavements, stones and other materials thereof, and also all trees, erections, materials, implements and things provided for such streets.

Management of public institutions.

66. (1) The management, control and administration of every public institution maintained out of municipal funds shall vest in the committee:

Provided that the extent of the independent authority of the committee in respect of any such institution may be prescribed by the Local Government.

(2) When any public institution is placed under the direction, management and control of the committee, all property, endowments and funds belonging thereto shall be held by the committee in trust for the purposes to which such property, endowments and funds were lawfully applicable at the time when the institution was so placed.

Transfer to Crown of property vesting in committee.

67. The committee may, with the sanction of Local Government, transfer to Her Majesty any property vesting in the committee under section 65 or section 66, but not so as to affect any trusts or public rights subject to which the property is held.

CHAPTER VI.

POWERS FOR SANITARY AND OTHER PURPOSES.

Streets and Buildings.

Power to acquire land for building-sites adjoining new streets.

68. When any land is required for a new street or for the improvement of an existing street, the committee may proceed to acquire, in addition to the land to be occupied by the street, the land necessary for the sites of the buildings to be erected on the sides of the street.

Power to close streets.

69. The committee may close temporarily any street vested in it or any part thereof for the purpose of repairs, or for the purpose of constructing or repairing any sewer, drain, culvert or bridge, or for any other public purpose; and may divert, discontinue or permanently close any such street, and sell the land or such part thereof as is not required for the purposes of this Act.

Power to permit temporary occupation of streets, &c.

70. The committee may grant permission in writing for the temporary occupation of any street or land vested in it for the purpose of depositing any building materials or making any temporary excavation therein or erection thereon, subject to such conditions as it may prescribe for the safety or convenience of persons passing by or dwelling or working in the neighbourhood, and may charge fees for such permission, and may at its discretion withdraw the permission.

Power to attach brackets for lamps.

71. The committee may attach to the outside of any building brackets for lamps in such manner as not to occasion any injury thereto or inconvenience.

Names of streets and numbers of buildings.

72. *(1)* The committee at a meeting may cause a name to be given to any street, and to be affixed on any building in such place as it thinks fit, and may also cause a number to be affixed to any building; and in like manner may, from time to time, cause such names and numbers to be altered.

(2) Whoever destroys, pulls down or defaces any such name or number, or puts up any different name or number from that put up by order of the committee, shall be punishable with fine which may extend to twenty rupees.

Roofs and external walls not to be made of inflammable materials.

73. The committee at a meeting may direct that, within certain limits, to be fixed by it, the external roofs and walls of huts or other buildings shall not be made or renewed of bamboos, grass, mats, leaves or other highly inflammable materials unless with the permission of the committee in writing; and the committee may, by written notice, require any person who has disobeyed any such direction to remove or alter the roofs or walls so made or renewed as it may think fit.

Power to regulate line of buildings.

74. *(1)* If any building or part of a building projects beyond the regular line of a public street, either existing or determined on for the future, or beyond the front of the building on either side thereof, the committee may, whenever the building or part has been either entirely or in greater part taken down or burnt down, or has fallen down, by notice require the building or part, when being rebuilt, to be set back to or towards the said regular line or the front of the adjoining buildings; and the portion of the land added to the street by such setting back or removal shall become part of the public street and shall vest in the committee:

Provided that the committee shall make full compensation to the owner for any damage he may sustain in consequence of his building or any part thereof being set back.

Burma Municipal Act, 1884.
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 75-80.)

(2) The committee may, on such terms as it thinks fit, allow any building to be set forward for the improvement of the line of the street.

Notice of new buildings.

75. *(1)* Every person intending to erect or re-erect any building shall, if required to do so by rule made by the committee in this behalf, give notice in writing of his intention to the committee, and shall, if required to do so, submit a plan showing the levels at which the foundation and lowest floor are proposed to be laid, and specifications of the works intended to be constructed, and the materials to be used, and shall obey all written directions consistent with this Act given by the committee within one month after receiving such notice, either prohibiting the erection or re-erection, if deemed likely to be injurious to the inhabitants of the neighbourhood, or in respect of all or any of the matters following, namely:—

(*a*) free passage or way in front of the building;

(*b*) space to be left about the building to secure free circulation of air and facilitate scavenging;

(*c*) ventilation and drainage;

(*d*) level and width of foundation, level of lowest floor and stability of structure; and

(*e*) the line of frontage with neighbouring buildings, if the building abuts on a street or public thoroughfare:

Provided that the committee shall make full compensation to the owner for any damage he may sustain in consequence of the prohibition of the erection or re-erection of any building, or of its requiring any land belonging to him to be added to the street.

(2) If any such building is begun or erected without giving notice, or without submitting particulars as aforesaid when required, or in contravention of the legal orders of the committee issued within one month, the committee may by notice require the building to be altered or demolished, as it may deem necessary.

Explanation.—The expression "erect any building" includes all additions or alterations which involve new foundations or increased superstructure on existing foundations, or the conversion into a dwelling-house of any building not originally constructed for human habitation, or the conversion into more than one dwelling-house of a building originally constructed as one dwelling-house only.

Removal of projections and obstructions.

76. *(1)* It shall not be lawful, unless with the written permission of the committee, for the owner or occupier of any building in a public street to add to, or place against or in front of, the building any projection or structure overhanging, projecting into or encroaching on the street or into or on any drain, sewer or aqueduct therein.

(2) The committee may, by notice, require the owner or occupier of any building to remove or alter any projection, encroachment or obstruction built or placed against or in front thereof if the same overhangs or projects into or encroaches on any public street, or projects into or encroaches on any drain, aqueduct or sewer in the street:

Provided that, in the case of a projection, encroachment or obstruction being lawfully in existence at the time of the passing of this Act, the committee shall make reasonable compensation to any person who suffers damage by the removal or alteration.

(3) The committee may give written permission to the owners or occupiers of buildings in public streets to put up open verandahs, balconies or rooms projecting from any upper storey thereof to an extent beyond the line of the plinth or basement-wall, and at a height from the level of the ground or street, to be specified in the written permission.

Bathing and Washing Places.

Bathing and washing places.

77. The committee may set apart suitable places for the purpose of bathing, and may specify the times at which, and the sex of the persons by whom, such places may be used, and may also set apart suitable places for washing animals or clothes, or for any other purpose connected with the health, cleanliness or comfort of the inhabitants; and may, by public notice, prohibit bathing, or washing animals or clothes, in any public place not so set apart, or at times or by persons other than those so specified, and all other acts not so permitted by which water in public places may be rendered foul or unfit for use.

Deposit of Offensive Matter and Slaughter-places.

Removal and deposit of offensive matter.

78. The committee may fix places within or, with the approval of the Deputy Commissioner, beyond the limits of the municipality for the deposit of refuse, rubbish or offensive matter of any kind or for the disposal of the dead bodies of animals, and may by public notice give directions as to the time, manner and conditions at, in and under which such refuse, rubbish or offensive matter or dead bodies of animals may be removed along any street and deposited at such places.

Places for slaughter of animals.

79. *(1)* The committee may, with the approval of the Deputy Commissioner, fix and abolish places either within or without the limits of the municipality for the slaughter of animals for sale, or of any specified description of such animals, and may with the like approval grant and withdraw licenses for the use of such places, or, if they belong to the committee, charge rent or fees for the use of the same.

(2) When such places are fixed by the committee beyond municipal limits, it shall have the same power to make rules for the inspection and proper regulation of the same as if they were within those limits.

(3) When any such place has been fixed, no person shall slaughter any such animal for sale within the municipality at any other place.

(4) Whoever slaughters any such animal for sale at any other place within the municipality shall be punishable with fine which may extend to twenty rupees.

Burial and Burning Places.

Powers in respect of burial and burning places.

80. *(1)* The committee may, by public notice, order any burial or burning ground which is, in its opinion, dangerous to the health of persons living in the neighbourhood, to be closed, from a date to be specified in the notice, and shall, in such case, if no suitable place for burial or burning exists within a reasonable distance, provide a fitting place for the purpose.

Burma Municipal Act, 1884.
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 81-89.)

(2) Private burial-places in such burial-grounds may be excepted from the notice, subject to such conditions as the committee may impose in this behalf:

Provided that the limits of such burial-places are sufficiently defined, and that they shall only be used for the burial of members of the family of the owner thereof.

(3) No burial or burning ground, whether public or private, shall be made or formed, after the passing of this Act, without the permission in writing of the committee.

(4) If any person buries or burns, or causes or permits to be buried or burnt, any corpse in any burial or burning ground made or formed contrary to the provisions of this section, or after the date fixed thereunder for closing the same, he shall be punishable with fine which may extend to fifty rupees.

Removal of corpses.

81. The committee may, by public notice, prescribe routes for the removal of corpses to burial or burning places.

Inflammable Materials.

Inflammable materials.

82. The committee may, where it appears to it to be necessary for the prevention of danger to life or property, by public notice, prohibit all persons from stacking or collecting bamboos, dry grass, straw or other inflammable materials, or placing mats or thatched huts or lighting fires in any place or within any limits specified in the notice.

Powers of Entry and Inspection.

Inspection of drains, privies and cesspools.

83. *(1)* The committee, by any person authorized by it in this behalf, may, after giving six hours' notice in writing to the occupier of any land or building in which any drains, privies or cesspools are situated, inspect any such drains, privies and cesspools at any time between sunrise and sunset, and may, if necessary, cause the ground to be opened where the committee or person may think fit for the purpose of preventing or removing any nuisance arising from the privies, drains or cesspools.

(2) If, on such inspection, it appears that the opening of the ground was necessary for the prevention or removal of a nuisance, the expenses thereby incurred shall be paid by the owner or occupier of the land or building; but if it is found that no nuisance exists, or but for such opening would have arisen, the ground shall be closed and made good as soon as may be, and the expense of opening, closing and making it good shall be borne by the committee.

Power to enter and inspect buildings, &c.

84. The committee, by any person authorized by it in this behalf, may, after giving twenty-four hours' notice to the occupier, or, if there is no occupier, to the owner, of any building, at any time between sunrise and sunset enter and inspect the building, and may by notice direct all or any part thereof to be forthwith internally or externally lime-washed, disinfected or otherwise cleansed for sanitary reasons.

Other powers of entry on buildings or land.

85. The committee, by any person authorized by it in this behalf, may, after giving twenty-four hours' notice to the occupier, or, if there is no occupier, to the owner, of any building or land, at any time between sunrise and sunset—

(*a*) enter on and survey and take levels of any land;

(*b*) enter, inspect and measure any building for the purpose of valuation;

(*c*) enter into any building or on any land for the purpose of examining works under construction, of ascertaining the course of sewers or drains, or of executing or repairing any work which it is by this Act empowered to execute or maintain.

Power to enter for discovery of vehicles or animals liable to taxation

86. The committee, by any person authorized by it in this behalf, may, at any time between sunrise and sunset, enter and inspect any stable, coach-house or other place wherein there is reason to believe that there is any vehicle or animal liable to taxation under this Act and which has not been so taxed.

Power to inspect places for sale of food or drink, &c., and to seize unwholesome articles exposed for sale.

87. The committee, by any person authorized by it in this behalf, may at all reasonable times enter into and inspect any market, building, shop, stall or place used for the sale of food or drink for man, or as a slaughter-house, or for the sale of drugs, and inspect and examine any food or drink, drug or animal which may be therein; and, if any article of food or drink or any animal therein appears to be intended for the consumption of man and to be unfit therefor, may seize and remove the same, or may cause it to be destroyed or to be so disposed of as to prevent its being exposed for sale or used for such consumption;

and, in case any drug is reasonably suspected to be adulterated in such manner as to lessen its efficacy or to change its operation or to render it noxious, may remove the same, giving a receipt therefor, and may cause it to be brought before a Magistrate for enquiry whether any offence has been committed in respect thereof, and for his orders as to its disposal.

Power of entry for purpose of scavenging.

88. *(1)* The committee may provide for the performance by its agents of the duties usually performed by sweepers in respect of any buildings or lands, or of any privies, drains, cesspools or other receptacles for offensive matter pertaining to buildings or land, with the consent of the occupier of the building or land, or without such consent if the occupier fails to make arrangements to the satisfaction of the committee for the performance of such duties.

(2) When the committee has undertaken to provide for the performance by its agents of such duties as aforesaid, the persons employed by it to perform the same may enter on the property at all reasonable times so far as may be necessary for the proper discharge of those duties; and the committee, by any person authorized by it in this behalf, may enter on the property at all reasonable times for the purpose of ascertaining that such duties have been duly performed.

Precautions to be observed in entering dwelling.

89. When any building, used as a human dwelling, is entered under this Act, due regard shall be paid to the social and religious sentiments of the occupiers; and before any apartment in the actual occupancy of any woman, who, according to custom, does not appear in public, is entered under this Act, notice shall be given to

Burma Municipal Act, 1884.
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 90-101.)

her that she is at liberty to withdraw, and every reasonable facility shall be afforded to her for withdrawing.

Water-pipes, Privies and Drains.

90. The committee may, by notice, require the owner of any building in any street to put up and keep in good condition proper troughs and pipes for receiving and carrying the water from the roof and other parts thereof and for discharging the same so as not to inconvenience persons passing along the street.

Troughs and pipes for rain-water.

91. *(1)* The committee may, by notice, require the owner of any building to provide any privy or cesspool, or additional privies or cesspools, which should in its opinion be provided for the building, in such manner as the committee directs.

Provision of privies, &c.

(2) The committee may, by notice, require any persons employing more than twenty workmen or labourers to provide such latrines and urinals as it may think fit, and to cause the same to be kept in proper order and to be daily cleaned.

(3) The committee may, by notice, require the owner or occupier of any building or land to have any privy provided for the same shut out by a sufficient roof and wall or fence from the view of persons passing by or dwelling in the neighbourhood, or to remove or alter, as the committee directs, any door or trapdoor of a privy opening on to any street or drain.

92. *(1)* The committee may, by notice, require the owner or occupier of any building or land to repair or alter and put in good order any drain, privy or cesspool, or to close any cesspool, belonging thereto.

Repair, alteration and closing of drains, privies and cesspools.

(2) The committee may, by notice, require any person who constructs any new drain, privy or cesspool without its permission in writing, or contrary to its directions or regulations or to the provisions of this Act, or who constructs, rebuilds or opens any drain, privy or cesspool which it has ordered to be demolished or stopped up or not to be made, to demolish the drain, privy or cesspool, or to make such alteration therein as it thinks fit.

93. The committee may, by notice, require any person who without its permission in writing newly erects or rebuilds any building over any sewer, drain, culvert, watercourse or water-pipe vested in the committee to pull down or otherwise deal with the same as it thinks fit.

Unauthorised buildings over drains, &c.

94. The committee may, by notice, require any owner or occupier on whose land any drain, latrine, urinal, cesspool or other receptacle for filth or refuse for the time being exists within fifty feet of any spring, well, tank, reservoir or other source from which water is or may be derived for public use, to remove or close the same within one week.

Removal of latrines, &c., near any source of water-supply.

95. The committee may, by notice, require the owner or occupier of any land or building to cleanse, repair, cover, fill up or drain off any private tank, well, reservoir, pool or excavation therein, which appears to the committee to be injurious to health or offensive to the neighbourhood:

Power to require drainage, &c., of unwholesome tanks, &c.

Provided that, if for the purpose of effecting any drainage under this section it is necessary to acquire any land not belonging to the person who is required to drain his land or to pay compensation to any other person, the committee shall provide the land or pay the compensation.

Dangerous Buildings and Places.

96. If any building, or any well, tank or other excavation, is for want of sufficient repair, protection or enclosure, dangerous to persons passing by or dwelling or working in the neighbourhood, the committee may, by notice, require the owner or occupier thereof to repair, protect or enclose the same; and, if it appears to it to be necessary in order to prevent imminent danger, it shall forthwith take such steps as are necessary to avert the danger.

Power to require buildings, wells, tanks, &c., to be secured.

97. If any building, wall, structure or anything affixed thereto is deemed by the committee to be in a ruinous state or in any way dangerous, it may, by notice, require the owner or occupier thereof forthwith either to remove the same or to cause such repairs to be made to the building, wall or structure as the committee consider necessary for the public safety; and, if it appears to it to be necessary in order to prevent imminent danger, the committee shall forthwith take such steps as are necessary to avert the danger.

Buildings, &c., in ruinous or dangerous state.

Buildings and Grounds in unsanitary Condition.

98. The committee may, by notice, require the owner or occupier of any land to clear away and remove any thick or noxious vegetation, jungle or undergrowth which appears to the committee to be injurious to health or offensive to the neighbourhood.

Power to require owner to clear away noxious vegetation.

99. The committee may, by notice, require the owner or occupier of any land, within three days, to cut or trim the hedges thereof bordering on any street, or branches of trees growing thereon which overhang any street and obstruct the same or cause danger thereto, or which so overhang any well, tank or other source from which water is derived for public use as to be likely to pollute the water thereof.

Power to trim hedges and trees bordering on streets, wells, &c.

100. If the owner or occupier of any building or land suffers the same to be in a filthy or unwholesome state, the committee may, by notice, require him within twenty-four hours to cleanse the same or otherwise put it in a proper state.

Cleansing of filthy buildings or land.

101. If any building appears to the committee to be unfit for human habitation in consequence of the want of proper means of drainage or ventilation or other sufficient reason, the committee may, by notice, prohibit the owner or occupier thereof from using the same for human habitation or suffering it to be so used, until the committee is satisfied that it has been rendered fit for such use.

Power to prohibit use for human habitation of buildings unfit for such use.

Burma Municipal Act, 1884.
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 102-106.)

102. The committee may, by notice, require the owner or person claiming to be the owner of any building or land which, by reason of abandonment or disputed ownership or other cause, remains untenanted and thereby becomes a resort of idle and disorderly persons or otherwise a nuisance, to secure or enclose the same within a reasonable time fixed in the notice.

Power to require untenanted buildings becoming a nuisance to be secured or enclosed.

103. *(1)* The committee, on the report of the Sanitary Commissioner that the cultivation of any description of crop or the use of any kind of manure or the irrigation of land in any specified manner in any place within the limits of the municipality is injurious to the health of persons dwelling in the neighbourhood, may, with the previous sanction of the Local Government, by notification prohibit the cultivation of the crop, the use of the manure or the irrigation so reported to be injurious, or regulate it by imposing such conditions thereon as may prevent the injury:

Cultivation, use of manure or irrigation injurious to health, after prohibition.

Provided that when on any land to which the notification applies that description of crop has been cultivated, that kind of manure has been used or irrigation has been practised in that manner during the five years preceding the notification with such continuity as the ordinary course of husbandry admits of, compensation shall be paid from the municipal fund to all persons interested in that land for any damage caused to them by the prohibition or regulation.

(2) If any person cultivates, uses manure or irrigates in disregard of the prohibition or conditions notified under sub-section *(1)*, he shall be punishable with fine which may extend to fifty rupees, and with a further fine which may extend to five rupees for every day after the first during which the offence is continued.

Offensive and Dangerous Trades.

104. *(1)* The owner or occupier of every place within the municipality used for any of the following purposes, namely:—

Regulation of offensive and dangerous trades.

melting tallow;

boiling bones, offal or blood; or

as a soap-house, oil-boiling house, dyeing-house or tannery; or,

as a brickkiln, pottery or limekiln; or

as any other manufactory or place of business from which offensive or unwholesome smells arise; or

as a yard or depôt for trade in hay, straw, thatching-grass, wood or coal, or other dangerously inflammable material; or

as a store-house for kerosine, petroleum, naphtha or any inflammable oil, spirit or explosive substance;

shall register the same in a book to be kept by the committee for the purpose.

(2) No place shall be newly used for any of the said purposes except under a license from the committee, which shall be renewable annually.

(3) The license shall not be withheld unless the committee considers that the business which it is intended to establish or maintain would be offensive or dangerous to persons residing in, or frequenting, the immediate neighbourhood.

(4) The committee may impose such conditions in respect of such license as it may think necessary.

(5) Whoever, without such registration or without a license, uses any place for any such purpose shall be punishable with fine which may extend to fifty rupees, and with further fine not exceeding ten rupees for every day during which the offence is continued after he has been convicted of such offence.

105. *(1)* If it is shown to the satisfaction of the committee, at a meeting, that any place registered or licensed under the last preceding section is a nuisance to the neighbourhood or likely to be dangerous to life, health or property, it may, by notice, require the occupier thereof to discontinue the use of the place, or to use it in such manner as will, in the opinion of the committee, render it no longer a nuisance or dangerous.

Power to prohibit such trades.

(2) Whoever, after such notice has been given, uses the place or permits it to be used in such a manner as to be a nuisance to the neighbourhood or dangerous, shall be punishable with fine which may extend to two hundred rupees, and with further fine not exceeding forty rupees for every day during which the offence is continued after he has been convicted of such offence.

Power to make Rules.

106. A committee may, from time to time, at a special meeting, make rules—

Power to make rules.

(*a*) for rendering licenses necessary for the proprietors or drivers of vehicles, boats or animals plying for hire within the limits of the municipality, and fixing the fees payable for such licenses and the conditions on which they are to be granted and may be revoked;

(*b*) for limiting the rates which may be demanded for the hire of any carriage, cart, boat or other conveyance, or of animals hired to carry loads, or for the services of persons hired to carry loads, and the loads to be carried by such conveyances, animals or persons, where they are hired within the municipality for a period not exceeding twenty-four hours, or for a service which would ordinarily be performed within twenty-four hours;

(*c*) for securing a proper registration of births, marriages and deaths, and for the taking of a census;

(*d*) for fixing, and from time to time varying, the number of persons who may occupy a building or part of a building which is let in lodgings or occupied by members of more than one family;

for the registration and inspection of such buildings;

for promoting cleanliness and ventilation in such buildings;

for the notices to be given and the precautions to be taken in the case of any infectious disease breaking out in such buildings;

and generally for the proper regulation of such buildings;

Burma Municipal Act, 1884.
(Chapter VI.—Powers for Sanitary and other Purposes.—Sections 107-112.)

(*e*) for the inspection and proper regulation of encamping-grounds, pounds, zayáts, wharves not within the limits of any port, markets and slaughter-houses;

(*f*) for the holding of fairs and industrial exhibitions within the municipality and under its control;

(*g*) for controlling and regulating the use and management of burial and burning grounds;

(*h*) for the supervision and regulation of public wells, tanks, springs or other sources from which water is or may be made available for public use; and

(*i*) for carrying out the purposes of this Act:

Provided that the committee of a municipality in which the Hackney Carriage Act, 1879, is in force shall not make rules under clauses (*a*) and (*b*) in respect of any vehicles to which that Act applies.

Penalty for infringement of rules.

107. In making any rule under section 106 the committee may direct that a breach of it shall be punishable with fine which may extend to fifty rupees, and, when the breach is a continuing breach, with a further fine which may extend to five rupees for every day after the first during which the breach continues. In lieu of, or in addition to, such fine the Magistrate may require the offender to remedy the mischief so far as within his power.

Confirmation of rules.

108. No rule made under section 106 shall come into force until it has been confirmed by the Local Government and published for such time and in such manner as the Local Government may prescribe in this behalf.

Supplemental

Execution of acts required to be done by any notice.

109 *(1)* When any notice under this chapter requires any act to be done for which no time is fixed by this Act, it shall fix a reasonable time for doing the same.

(2) When the owner or occupier of any land or building fails to comply with the terms of any notice under this chapter requiring him to do any act upon that land or building, the committee may, after six hours' notice, by its officers, cause the act to be done.

Recovery of costs of execution.

110. *(1)* Where, under this Act, the owner or occupier of property is required by the committee to execute any work and makes default in complying with the requirement, and the committee executes the work, the committee may recover the cost of the work from the person in default.

(2) If the person in default is the owner, the committee may, by way of additional remedy, recover the whole or any part of the cost from the occupier, and in such case the occupier may deduct any sum paid by him under this sub-section from the rent from time to time becoming due from him to the owner of the property in respect of which the payment is made, or otherwise recover it from the owner.

(3) Provided that an occupier shall not be required to pay, under the last sub-section, any greater sum than the amount of rent which is for the time being due from him to the owner, or which, after demand for payment of the money payable by him to the committee and notice not to pay rent without first deducting the amount so demanded, becomes payable by him to the owner, unless he refuses on application to him by the committee truly to disclose the amount of his rent and the name and address of the person to whom it is payable; but the burden of proof that the sum so demanded by the committee from the occupier exceeds the rent due at the time of the demand, or which has since accrued due, shall lie on the occupier.

(4) All money recoverable by a committee under this section may be recovered either by suit, or on application to a Magistrate having jurisdiction within the municipality by distress and sale of the moveable property of the person from whom the money is recoverable, and if payable by the owner of property shall, until it is paid, be a charge on the property.

(5) Nothing in this section shall affect any contract between an owner and an occupier.

Compensation out of municipal fund.

111 *(1)* The committee may make compensation out of the municipal fund to any person sustaining any damage by reason of the exercise of any of the powers vested in the committee, its officers and servants, under this Act, and shall make such compensation where the person sustaining the damage was not himself in default in the matter in respect of which the power was exercised.

(2) If any dispute arises touching the amount of any compensation which the committee is required by this Act to pay for injury to any building or land, it shall be settled in such manner as the parties may agree, or in default of agreement in the manner provided by the Land Acquisition Act, 1870, sections 3, 8 to 42, 51 to 53, and 56 to 59, so far as they can be made applicable. X of 1870.

Appeals against certain orders of committee.

112 *(1)* Any person aggrieved by any order made by a committee under the powers vested in it by sections 80, 101 or 105 may appeal within thirty days from the date thereof to the Commissioner or to the Deputy Commissioner as the Local Government may prescribe in this behalf, and no such order shall be liable to be called in question otherwise than by such appeal.

Provided that, if the Deputy Commissioner is himself a member of the committee, the appeal shall lie to the Commissioner or other officer empowered by the Local Government in this behalf.

(2) The appellate authority may, for sufficient cause, extend the period hereby allowed for appeal.

(3) The order of the appellate authority confirming, setting aside or modifying the order appealed against shall be final:

Provided that the order appealed against shall not be modified or set aside until the appellant and the committee have had reasonable opportunity of being heard.

4 *f*

CHAPTER VII.

OFFENCES AFFECTING THE PUBLIC HEALTH, SAFETY OR CONVENIENCE.

Depositing or throwing earth or materials or refuse, rubbish or offensive matter on roads or into drains.

113. Whoever, without the permission of the committee or in disregard of its orders, throws or deposits, or permits his servants or members of his household under his control to throw or deposit, earth or materials of any description, or refuse, rubbish or offensive matter of any kind, upon any public street or place, or into any public sewer or drain or any drain communicating therewith, shall be punishable with fine which may extend to twenty rupees.

Throwing corpse or carcass into river, &c.

114. Whoever throws or causes to be thrown any corpse or carcass or any part thereof into any river, stream, well, lake, canal, tank or any other such place shall be punishable with fine which may extend to twenty rupees.

Discharging sewage.

115. Whoever, without the permission of the committee, causes or allows the water of any sink, sewer or cesspool, or any other offensive matter, to flow, drain or be put upon any public street or place, or into any sewer or drain not set apart for the purpose, shall be punishable with fine which may extend to twenty rupees.

Non-removal of filth, &c.

116. Whoever, being the owner or occupier of any building or land, keeps or allows to be kept for more than twenty-four hours, or otherwise than in some proper receptacle, any carcass, dirt, dung, bones, ashes, night-soil or filth or any noxious or offensive matter in or upon such building or land, or suffers any such receptacle to be in a filthy or noxious state, or neglects to employ proper means to cleanse and purify the same, shall be punishable with fine which may extend to fifty rupees.

Making or altering drains without authority.

117. Whoever, without the permission of the committee, makes or causes to be made, or alters or causes to be altered, any drain leading into any of the sewers or drains vested in the committee shall be punishable with fine which may extend to fifty rupees.

Penalty for making or keeping latrines, &c., near any source of water-supply.

118. Whoever makes, without the permission of the committee, or keeps for a longer time than one week after notice to remove issued under section 94, any drain, latrine, urinal, cesspool or other receptacle for filth or refuse within fifty feet of any spring, well, tank, reservoir or other source from which water is or may be derived for public use, shall be punishable with fine which may extend to twenty rupees, and, when a notice has issued, with a further fine not exceeding five rupees for each day during which the offence is continued after the lapse of the period allowed for removal.

Keeping animals in disregard of orders.

119. Whoever keeps any swine, buffaloes, cows, oxen, sheep or goats in disregard of any orders which the committee may give to prevent them from becoming a nuisance, shall be punishable with fine which may extend to twenty rupees, and with a further fine which may extend to five rupees for every day after the first during which the offence is continued.

Feeding animals on deleterious substances.

120. Whoever feeds or allows to be fed any animal which is kept for dairy purposes or may be used for food on deleterious substances, filth or refuse of any kind, shall be punishable with fine which may extend to fifty rupees.

Driving vehicles without proper lights.

121. Whoever drives any vehicle after dark in any public street or thoroughfare unless the vehicle is properly supplied with lights or there is sufficient moonlight to render lights unnecessary, shall be punishable with fine which may extend to twenty rupees.

Discharging fire-arms, &c.

122. Whoever discharges fire-arms or lets off fireworks or fire-balloons, or engages in any game, in such a manner as to cause or be likely to cause danger to persons passing by or dwelling or working in the neighbourhood, or risk of injury to property, shall be punishable with fine which may extend to twenty rupees.

Suffering dogs to be at large.

123. Whoever, being the owner or person in charge of any dog which is likely to annoy or intimidate passengers, neglects to restrain it so that it shall not be at large without a muzzle in any public street or place, shall be punishable with fine which may extend to twenty rupees.

Altering, obstructing or encroaching upon streets, &c.

124. Whoever, without the permission of the committee, alters, obstructs or encroaches upon any public street, thoroughfare, sewer, drain or water-course, or displaces, takes up or alters the pavement or other materials or the fences or posts of any public street, place or thoroughfare, or deposits building-materials or makes any hole or excavation on or in any public street or thoroughfare, shall be punishable with fine which may extend to fifty rupees.

Quarrying, blasting, cutting timber or building.

125. Whoever quarries, blasts, cuts timber or carries on building-operations in such a manner as to cause, or be likely to cause, danger to persons passing by or dwelling or working in the neighbourhood, shall be punishable with fine which may extend to fifty rupees.

Penalty on exposure of infected persons and things.

126. Any person who—

(1) while suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against spreading the said disorder in any street, public place, shop or public conveyance, or enters any public conveyance without previously notifying to the owner, conductor or driver thereof that he is so suffering; or,

(2) being in charge of any person so suffering, so exposes the sufferer; or

(3) gives, lends, sells, transmits or exposes, without previous disinfection, any bedding, clothing, rags or other things which have been exposed to infection from any such disorder,

shall be liable to a penalty not exceeding fifty rupees; and a person who, while suffering from any such disorder, enters any public conveyance without previously notifying to the owner or driver that he is so suffering, shall in addition be ordered by the Court to pay the owner and driver

Burma Municipal Act, 1884.
(Chapter VII.—Offences affecting the Public Health, Safety or Convenience.—Sections 127-132.)
(Chapter VIII.—Control.—Sections 133-134.)

the amount of any loss and expense they may incur in carrying into effect any measures requisite for disinfection of the conveyance:

Provided that no proceedings under this section shall be taken against persons transmitting with proper precautions any bedding, clothing, rags or other things for the purpose of having the same disinfected.

Penalty on failing to provide for disinfection of public conveyance.

127. Every owner or driver of a public conveyance shall immediately provide for the disinfection of the conveyance after it has to his knowledge conveyed any person suffering from a dangerous infectious disorder, and if he fails to do so he shall be liable to a penalty not exceeding fifty rupees; but no such owner or driver shall be required to convey any person so suffering until he has been paid a sum sufficient to cover any loss or expense incurred by him in carrying into effect the provisions of this section.

Picketing animals and collecting carts.

128. Whoever, contrary to the orders of the committee, pickets animals or collects carts on any public ground, or uses any such ground as a halting-place for vehicles or animals of any description or as a place of encampment, or causes or permits animals to stray, shall be punishable with fine which may extend to twenty rupees.

Keeping corpses or carrying corpses by prohibited routes or so as to cause annoyance.

129. Whoever, without the permission of the committee, keeps a corpse or causes it to be kept in or on any building or land when seventy-two hours after death have elapsed, or carries a corpse along a route prohibited by the committee or in a manner likely to cause annoyance to the public, shall be punishable with fine which may extend to ten rupees.

Destroying direction-posts, lamp posts, &c.

130. Whoever, in any public place, without being authorised by the committee, defaces or disturbs any direction-post or lamp-post or fence, or injures any tree, or extinguishes any light shall be punishable with fine which may extend to ten rupees.

Penalty for disobedience to orders of committee under last chapter.

131. Whoever disobeys any lawful directions given by the committee by public notice under the powers conferred upon it by the last preceding chapter, or any written notice lawfully issued by it under the powers so conferred, or fails to comply with the conditions subject to which any permission was given by the committee to him under those powers, shall, if the disobedience or omission is not an offence punishable under any other section, be punishable with fine which may extend to fifty rupees, and, in the case of a continuing breach, with a further fine which may extend to five rupees for every day after the first during which the breach continues:

Provided that, when the notice fixes a time within which a certain act is to be done and no time is specified in this Act, it shall rest with the Magistrate to determine whether the time so fixed was a reasonable time within the meaning of this Act.

Prosecution to be suspended in certain cases.

132. Any prosecution for an offence under section 80, or section 105, or under section 131, when the order which has been disobeyed is appealable, shall be suspended, when the Magistrate learns that an appeal has been instituted, pending the decision of the appeal; and if the order is set aside on appeal, disobedience thereto shall not be deemed an offence against those sections.

CHAPTER VIII.

CONTROL.

Control by Commissioner and Deputy Commissioner.

133. The Commissioner or the Deputy Commissioner may—

(a) enter on and inspect, or cause to be entered on and inspected, any immoveable property situate within the limits of his division or district respectively and occupied by any municipal committee or joint committee, or any work which is in progress within those limits under the direction of any such committee or joint committee;

(b) call for and inspect any book or document in the possession or under the control of any such committee or joint committee having authority within those limits;

(c) require any such committee or joint committee to furnish such statements, accounts, reports and copies of documents relating to the proceedings or duties of the committee or joint committee, as he may think fit to call for; and

(d) record in writing, for the consideration of any such committee or joint committee, any observations he may think proper in regard to the proceedings or duties of the committee or joint committee:

Provided that—

(1) when the Deputy Commissioner is a member of a committee or joint committee, he shall not exercise, in respect of that committee or joint committee, the powers conferred upon him by this section; and

(2) in any of the municipalities of Rangoon, Maulmain, Akyab and Bassein, and any other municipalities to which the Local Government may extend this clause, the said powers shall be exercised by the Local Government and not by any authority mentioned in the foregoing part of this section.

Power to suspend action under Act.

134. *(1)* The Commissioner or the Deputy Commissioner may, by order in writing, suspend within the limits of the division or district (as the case may be) the execution of any resolution or order of a municipal committee or joint committee, or prohibit the doing within those limits of any act which is about to be done, or is being done, in pursuance of or under cover of this Act, if, in his opinion, the resolution, order or act is in excess of the powers conferred by law, or the execution of the resolution or order, or the doing of the act, is likely to lead to a serious breach of the peace, or to cause serious injury or annoyance to the public or to any class or body of persons.

(2) When a Commissioner or Deputy Commissioner makes any order under this section, he shall forthwith forward a copy thereof, with a statement of his reasons for making it, and of any representations regarding it submitted to him by the municipal committee, to the Local Government, which may thereupon rescind the order

Burma Municipal Act, 1884.
(Chapter VIII.—Control.—Sections 135-140.)

or direct that it continue in force with or without modification, permanently or for such period as it thinks fit.

Extraordinary powers of Deputy Commissioner in case of emergency.

135. *(1)* In cases of emergency, the Deputy Commissioner may provide for the execution of any work, or the doing of any act, which a municipal committee is empowered to execute or do, and the immediate execution or doing of which is in his opinion necessary for the service or safety of the public, and may direct that the expense of executing the work or doing the act shall be forthwith paid by the committee.

(2) If the expense is not so paid, the Deputy Commissioner may make an order directing the person having the custody of the balance of the municipal fund to pay the expense, or as much thereof as is, from time to time, possible, from the balance in priority to any or all other charges against the same.

(3) The Deputy Commissioner shall forthwith report to the Commissioner every case in which he uses the powers conferred upon him by this section.

Powers of Local Government in case of default of committee.

136. *(1)* If at any time it appears to the Local Government that a municipal committee has made default in performing any duty imposed on it by or under this or any other Act for the time being in force, the Local Government may, by order in writing, fix a period for the performance of that duty.

(2) If that duty is not performed within the period so fixed, the Local Government may appoint the Deputy Commissioner to perform it, and may direct that the expense of performing it shall be paid, within such time as it may fix, to the Deputy Commissioner by the committee.

(3) If the expense is not so paid, the Deputy Commissioner with the previous sanction of the Local Government, may make an order directing the person having the custody of the balance of the municipal fund to pay the expense, or so much thereof as is from time to time possible, from the balance in priority to any or all other charges against the same.

Power of Local Government to supersede committee in case of incompetency, persistent default or excess or abuse of powers.

137. *(1)* If a municipal committee is not competent to perform, or persistently makes default in the performance of, the duties imposed on it by or under this or any other Act for the time being in force, or exceeds or abuses its powers, the Local Government may, with the previous approval of the Governor General in Council, by an order published, with the reasons for making it, in the local official Gazette, declare the committee to be incompetent or in default or to have exceeded or abused its powers, as the case may be, and supersede it for a period to be specified in the order.

(2) When a committee is so superseded, the following consequences shall ensue:—

(a) All members of the committee shall, as from the date of the order, vacate their offices as such members.

(b) All powers and duties of the committee may, during the period of supersession, be exercised and performed by such person or persons as the Local Government appoints in that behalf.

(c) All property vested in the committee shall, during the period of supersession, vest in the Local Government.

(3) On the expiration of the period of supersession specified in the order, the committee shall be reconstituted, and the persons who vacated their offices under clause (*a*) shall not be deemed disqualified from being members.

Disputes.

138. *(1)* If any dispute, for the decision of which this Act does not otherwise provide, arises between two or more committees constituted under this Act, or between any such committee and a cantonment authority, the matter shall be referred—

(a) to the Deputy Commissioner, if the local authorities concerned are in the same district;

(b) to the Commissioner or Commissioners of the division or divisions, if the local authorities concerned are in different districts; and

(c) to the Local Government, if the local authorities concerned are in different divisions and the Commissioners of those divisions cannot agree.

(2) The decision of the authority to which any dispute is referred under this section shall be final.

(3) If in the case mentioned in clause (*a*) the Deputy Commissioner is a member of one of the committees concerned, his functions under this section shall be discharged by the Commissioner.

(4) "Local authority" in this section means a municipal committee or cantonment authority.

Annual reports and statements.

139. *(1)* A municipal committee shall, at the close of each year or of such other period as may, from time to time, be fixed by the Local Government in this behalf, submit to the Local Government a statement of its receipts and disbursements, in such form as the Local Government may prescribe, and a general report of its proceedings during that period:

Provided that separate accounts shall be submitted of—

(*a*) all receipts of the water-tax, lighting-tax and scavenging-tax, and of all expenditure on the purposes for which those taxes are levied, respectively; and

(*b*) all income under the heads mentioned in section 62, and all expenditure on educational purposes.

(2) Accounts submitted under this section shall be examined or audited in such manner as the Local Government prescribes.

Estimates of receipts and expenditure.

140. *(1)* A municipal committee shall submit, before such date in each year as may be directed by the Local Government, for the sanction of such authority as the Local Government may appoint in this behalf, an estimate of its probable receipts for the financial year next following, with proposals for its expenditure, and may, from time to time, submit in like manner further estimates or proposals amending the same.

(2) No expenditure shall be incurred by the committee unless it is provided for in a proposal sanctioned under this section.

Burma Municipal Act, 1884.
(Chapter VIII.—Control.—Sections 141-143.)
(Chapter IX.—Supplemental.—Sections 144-149.)

(3) An abstract of the annual estimate and proposals submitted and sanctioned as required by this section shall be published in such manner as the Local Government directs.

Sanction to works.

141. *(1)* No new work, the estimated cost of which exceeds five hundred rupees, shall be begun by a municipal committee, nor shall any contract be entered into by it in respect of any such work, until a plan and estimate thereof have been approved by the committee at a meeting.

(2) If the estimated cost of any such new work has not been specifically provided for in proposals submitted and sanctioned in manner mentioned in section 140, or exceeds—

twenty thousand rupees in the case of the municipalities of Rangoon, Maulmain, Bassein and Akyab, or

one-tenth of the estimated annual income of the municipal fund in the case of any other municipality,

it shall not be begun, nor shall any contract be entered into in respect of it, until the plan and estimate have been submitted to and approved by the Local Government, or by an officer empowered by the Local Government in this behalf.

Powers of Commissioner.

142. In all matters connected with the administration of this Act a Commissioner shall have and exercise the same authority and control over a Deputy Commissioner subordinate to him as he has and exercises over the Deputy Commissioner in the general and revenue administration.

Additional power of Local Government to frame forms and make rules.

143. The Local Government may frame forms for any proceeding of a municipal committee for which it considers that a form should be provided, and may, in addition to any other powers to make rules conferred by this Act, make rules consistent with this Act—

(*a*) as to the intermediate office or offices, if any, through which correspondence between municipal committees and the Local Government or officers of that Government and representations addressed to the Local Government under this Act shall pass;

(*b*) as to the preparation of estimates of receipts and expenditure of committees, and as to the conditions subject to which such estimates may be sanctioned;

(*c*) as to the returns, statements and reports to be submitted by committees; and

(*d*) generally for the guidance of committees and public officers in all matters connected with the carrying out of this Act.

CHAPTER IX.

SUPPLEMENTAL.

Criminal Procedure.

Powers and duties of police in respect of offences against Act and rules, and assistance to municipal authorities.

144. *(1)* Every police-officer employed in a municipality shall give immediate information to the committee of any offence committed against this Act or the rules made thereunder, and shall be bound to assist all members, officers and servants of the committee in the exercise of their lawful authority.

(2) Any such police-officer may arrest any person committing in his view any offence against this Act or the rules made thereunder—

(a) if the name and address of the person are unknown to him, or

(b) if the person declines to give his name and address, or if there is reason to doubt the accuracy of the name and address if given.

(3) A person arrested under this section may be detained until his name and address are correctly ascertained:

Provided that no person so arrested shall be detained longer than is necessary for bringing him before a Magistrate unless the order of a Magistrate for his detention is obtained.

Prosecutions.

145. Prosecutions for offences against this Act or the rules made under it shall not be instituted except by order of or with the approval of the municipal committee.

Member not to be deemed interested in prosecution.

146. A Judge or Magistrate shall not be deemed to be a party to or personally interested in any such prosecution within the meaning of section 555 of the Code of Criminal Procedure merely because he is a member of the committee by the order or with the approval of which it has been instituted.

X of 1882.

Saving of prosecutions under other laws.

147. Nothing in this Act shall prevent any person from being prosecuted under any other law for any act or omission which constitutes an offence against this Act or the rules made under it, or from being liable under that other law to any other or higher punishment or penalty than that provided by this Act or the rules made under it:

Provided that a person shall not be punished twice for the same offence.

Rules.

Procedure for making rules under section 7, 48, 106 or 143.

148. *(1)* The authority empowered to make rules under section 7, 48, 106 or 143 shall, before making them, publish, in such manner as may in its opinion be sufficient for giving information to persons interested, a draft of the proposed rules, together with a notice specifying a date at or after which the draft will be taken into consideration; and shall, before making the rules, receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(2) Every rule made under any of those sections shall be published in the local official Gazette in English and in such other language or languages as the Local Government may direct; and such publication shall be conclusive evidence that the rule has been made as required by this section.

Continuance of existing rules.

149. *(1)* The Local Government may, by notification in the official Gazette, direct that any rules made under the British Burma Municipal Act, 1874, and in force in any local area being, or comprised in, a municipality

VII of 1874.

Burma Municipal Act, 1884.
(Chapter IX.—Supplemental.—Sections 150-157.)

constituted under this Act at the time the municipal committee for that municipality comes into existence under section 13, shall, so far as they are consistent with this Act and within the powers conferred thereby, be deemed to have been made under this Act, and shall continue in force until repealed by new rules so made.

(2) The authority empowered to make such new rules shall, as soon as may be, make them and take such action as may be requisite for bringing them into force.

Recovery of Money.

Recovery of money.

150. All fees and all rents and other sums due on account of property for the time being vested in or managed by the municipal committee, and all arrears of taxes and other money due for water supplied or otherwise under this Act, may be recovered as if they were arrears of land-revenue.

Notices.

Authentication, service and validity of notices.

151. *(1)* Every notice issued by a committee under this Act or under any rule made thereunder shall be in writing, and shall be sufficiently authenticated by the signature of the president or secretary, and may be served on the person to whom it is addressed, or left at his usual place of abode or business with some adult male member or servant of his family, or, if it cannot be so served, may be posted on some conspicuous part of his place of abode or business.

(2) If the place of abode or business of the person to whom the notice is addressed is not within the limits of the municipality, the notice may be served by posting it in a registered cover addressed to his usual place of abode.

(3) If the place of abode or business of the owner of any property is not known, every such notice addressed to him as such owner may be served on the occupier.

(4) If the place of abode or business of the occupier of any property is not known, every such notice addressed to him as such occupier may be served by posting it on some conspicuous part of the property.

(5) No notice issued by the committee under this Act or under any rule made thereunder shall be invalid for defect of form.

Mode of giving notice to owner or occupier of property.

152. When any notice is, under the provisions of this Act, to be given to, or served on, the owner or occupier of any property and he is unknown, it may be given or served—

(a) by delivering a written notice to some person on the property, or, if there is no person on the property to whom it can be delivered, by fixing it on some conspicuous part of the property; or

(b) by putting into the post a prepaid letter containing a written notice, and addressed by the description of the "owner" or "occupier" of the property (naming it) in respect of which the notice is given, without further name or description.

Publication of public notices.

153. Every public notice given by a committee under this Act or under any rule made thereunder shall be published by proclamation or in such other manner as the Local Government may, by rule, direct.

Alteration of Municipal Limits.

Notification of intention to alter limits of municipality.

154. The Local Government may, by notification published in the official Gazette, and in such other manner as the Local Government may determine, declare its intention—

(a) to exclude from a municipality any local area comprised therein and defined in the notification, or

(b) to include within a municipality any local area in the vicinity of the same and defined in the notification :

Provided that, where the local area is a military cantonment or part of a military cantonment, a notification shall not be published under this section in respect of it without the previous consent of the Governor General in Council.

Alteration of limits of municipality.

155. *(1)* Any inhabitant of a municipality or local area in respect of which a notification has been published in the official Gazette under section 154 may, if he objects to the alteration proposed, submit his objection in writing to the Local Government within six weeks from the publication of the notification in the official Gazette, and the Local Government shall take his objection into consideration.

(2) When six weeks from the publication of the notification in the official Gazette have expired, and the Local Government has considered the objections (if any) which have been submitted under sub-section (1), the Local Government may, by a notification in the official Gazette, exclude the local area from the municipality or include it therein, as the case may be.

Effect of exclusion of local area from municipality.

156. *(1)* When a local area is excluded from a municipality under section 155—

(a) this Act, and all rules, orders, directions and powers made, issued or conferred under this Act, shall cease to apply thereto; and

(b) the Local Government shall, after consulting the municipal committee, frame a scheme determining what portion of the balance of the municipal and school funds and other property vested in the municipal committee shall vest in Her Majesty for the benefit of the local area, and in what manner the liabilities of the committee shall be apportioned between the committee and the Secretary of State for India in Council; and, on the publication of the scheme in the local official Gazette, the property and liabilities shall vest and be apportioned accordingly.

(2) All property vested in Her Majesty under sub-section (1) shall be applied under the orders of the Local Government to discharging the liabilities imposed on the Secretary of State for India in Council under that sub-section, or for the promotion of the safety, health, welfare or convenience of the inhabitants of the local area.

Effect of including local area in municipality.

157. When a local area is included in a municipality under section 155, this Act, and, except as the Local Government may otherwise, by notification in the official Gazette, direct, all rules, orders, directions and powers made, issued or conferred under this Act and in force

Burma Municipal Act, 1884.
(Chapter IX.—Supplemental.—Sections 158-161.)

throughout the whole municipality at the time the local area is so included, shall apply to the local area.

Powers to except Municipalities from Provisions of Act.

Power to except municipality from provisions of Act unsuited thereto.

158. *(1)* If the circumstances of any municipality are such that, in the opinion of the Local Government, any of the provisions of this Act are unsuited thereto, the Local Government may, by notification in the official Gazette, except the municipality from the operation of those provisions; and thereupon those provisions shall not apply to the municipality until again applied thereto by like notification.

(2) While the exception remains in force, the Local Government may make rules for the guidance of the committee and public officers in respect of the matters excepted from the operation of the said provisions.

Miscellaneous.

Saving of Act XI of 1879.

159. Nothing in this Act shall affect the Local Authorities Loans Act, 1879. XI of 1879

Powers of Governor General in Council and of Local Government exercisable from time to time.

160. All powers conferred by this Act on the Governor General in Council or on the Local Government may be exercised from time to time as occasion requires.

Decision of questions as to whether persons are "inhabitants."

161. If any question arises whether a person or persons of a specified class is or are an inhabitant or inhabitants of a local area within the meaning of this Act, the decision thereon of the Local Government shall be conclusive.

D. FITZPATRICK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 3rd October 1884, and is hereby promulgated for general information:—

ACT NO. XVIII OF 1884.

THE PANJÁB COURTS ACT, 1884.

CHAPTER I.

PRELIMINARY.

SECTIONS.

1. Short title, local extent and commencement.
2. Repeal of Acts.
3. Definitions.

CHAPTER II.

THE CHIEF COURT.

4. Constitution of Chief Court and appointment and tenure of Judges.
5. Rank and precedence of Judges of Chief Court.
6. Civil appellate jurisdiction.
7. Criminal jurisdiction.
8. Delegation of powers to members of Court.
9. Appeals from original jurisdiction of Chief Court.
10. Rule of decision when Judges differ.
11. Power to refer question to full bench.
12. Ministerial officers.
13. Superintendence and control of Subordinate Courts.
14. Power to make rules.
15. Registers, books, accounts and statements to be kept and furnished by Chief Court.
16. Procedure of Chief Court in exercise of civil jurisdiction.

CHAPTER III.

THE SUBORDINATE CIVIL COURTS.

Classes of Courts.

17. Classes of Courts.

Territorial Divisions.

18. Civil divisions and districts.

SECTIONS.

Divisional and District Courts.

19. Establishment of Divisional Courts.
20. Establishment of District Courts.
21. Distribution of business in Divisional Court.
22. Original jurisdiction of Divisional and District Courts in suits.
23. District Court to be principal Civil Court of original jurisdiction.

Subordinate Judges and Munsifs.

24. Appointment of Subordinate Judges.
25. Appointment of Munsifs.
26. Pecuniary limits of jurisdiction of Subordinate Judges and Munsifs.
27. Local limits of their jurisdiction.
28. Special Judges and Benches.
29. Power to transfer to Subordinate Judge or Munsif certain proceedings pending before District Court.

Small Cause Jurisdiction.

30. Power to confer Small Cause Court jurisdiction.

Suspension and Removal.

31. Suspension and removal.

Valuation of Suits.

32. Valuation of suits.

Administrative Control.

33. Controlling powers of Divisional and District Courts.
34. Power of Divisional Court to transfer business.
35. Power to distribute business.
36. Ministerial officers of Subordinate Courts.
37. Power to fine ministerial officers.
38. Delegation of District Judge's powers.

CHAPTER IV.

APPELLATE JURISDICTION IN CIVIL CASES.

39. First appeals to whom to lie.
40. Further appeal from Divisional Court.
41. Appellate decision of District or Divisional Court otherwise final.
42. Power to confer appellate jurisdiction on Subordinate Judge.
43. Period of limitation.
44. References to Chief Court under section 617 of Code of Civil Procedure.

CHAPTER V.

REVENUE COURTS.

45. Certain classes of suits cognizable by Revenue Courts only.
46. Original jurisdiction of Deputy Commissioner and his subordinates in suits.

The Panjáb Courts Act, 1884.
Chapter I.—Preliminary.—(Section 1-3.)
(Chapter II.—The Chief Court.—Sections 4-5.)

SECTIONS.
47. Appeals from original decrees.
48. Further appeals from appellate decrees.
49. No appeals except under the foregoing sections.
50. Limitation of appeals under this chapter.
51. Power to confer powers of Financial Commissioner, Commissioner and Deputy Commissioner.
52. Appointment of second Financial Commissioner.
53. Procedure of Revenue Courts how to be regulated.
54. Power to refer party to Civil Court.
55. Power for Financial Commissioner to refer question to Chief Court.

Administrative Control.

56. Controlling powers of Financial Commissioner, Commissioner and Deputy Commissioner.
57. Power to transfer business.
58. Power to distribute business.
59. Ministerial officers of Courts.
60. Power to fine ministerial officers.
61. Delegation of Deputy Commissioner's powers.

CHAPTER VI.

SETTLEMENT COURTS.

62. Power to invest Settlement-officers with powers of Civil or Revenue Courts in certain cases.
63. Power to alter subordination of Courts for purposes of section 62.

CHAPTER VII.

SUPPLEMENTAL PROVISIONS.

64. Mode of appointment and conferring powers.
65. Powers exerciseable from time to time.
66. Place of sitting of Courts.
67. Vacations.
68. Pending proceedings.
69. Appeals after Act comes into force against decrees, &c., passed before.
70. Modification of section 622 of Civil Procedure Code.
71. Amendment of the first schedule annexed to the Court-fees Act, 1870.
72. Refund of fee paid on application for revision.
73. Saving of certain appointments, rules and forms, notifications, powers and orders.
74. Amendment of Act X of 1870, section 3.
75. Amendment of Act XXVIII of 1868, section 42.

THE SCHEDULE.—ACTS REPEALED.

An Act to amend the Law relating to Courts in the Panjáb.

WHEREAS it is expedient to amend the law relating to Courts in the Panjáb; and whereas the Secretary of State for India in Council has given his previous sanction to the passing of this Act; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title, local extent and commencement.

1. *(1)* This Act may be called the Panjáb Courts Act, 1884.

(2) It extends to the territories for the time being under the administration of the Lieutenant-Governor of the Panjáb; and

(3) it shall come into force on the first day of November, 1884.

(4) Any power conferred by this Act to make rules or to issue orders creating territorial divisions, establishing Courts, appointing and posting officers, or fixing the pecuniary or local limits of their jurisdiction or conferring powers may be exercised at any time after the passing of this Act; but a rule or order so made or issued shall not take effect until the Act comes into force.

Repeal of Acts.

2. On and from that day the Acts mentioned in the schedule hereto annexed shall be repealed to the extent specified in the third column thereof.

Definitions.

3. In this Act, unless there is something repugnant in the subject or context,—

(1) "Assistant Commissioner" includes Extra Assistant Commissioner:

(2) "Revenue Court" means the Court of a Financial Commissioner, of a Commissioner, of a Deputy Commissioner, of an Assistant Commissioner, of a Tahsíldár or of a Náib Tahsíldár exercising jurisdiction in suits of any of the classes mentioned in section 45:

(3) "small cause" means a suit of the nature cognizable in a Court of Small Causes constituted under Act XI of 1865, and any other suit not being a suit of any description specified in section 19 of the Presidency Small Cause Courts Act, 1882, which the Chief Court, with the sanction of the Local Government, may direct to be treated as a small cause for the purposes of appeal:

(4) "land" means land assessed or liable to be assessed to the land-revenue or whereof the land-revenue has been wholly or in part released, compounded for, redeemed or assigned, and all land the property of Government not within the site of any town or village:

(5) "rent" means whatever is payable by an occupant of land on account of the use or occupation thereof:

(6) "tenant" means any occupant of land liable to pay rent therefor, but does not include an under-proprietor:

(7) "landlord" means any person entitled to receive rent paid by a tenant; and

(8) "value", used with reference to a suit, means the amount or value of the subject-matter of the suit.

CHAPTER II.

THE CHIEF COURT.

Constitution of Chief Court and appointment and tenure of Judges.

4. There shall continue to be a Chief Court consisting of three or more Judges, who shall be appointed by the Governor General in Council and shall hold their offices during his pleasure, and of whom one at least shall always be a barrister of not less than five years' standing.

Rank and precedence of Judges of Chief Court.

5. The Judges of the Chief Court shall have rank and precedence according to the seniority of their appointments as such Judges:

Provided that a Judge permanently appointed shall be deemed senior to an officiating Judge.

The Panjáb Courts Act, 1884.
(Chapter II.—The Chief Court.—Sections 6-14.)

Civil appellate jurisdiction.

6. The Chief Court shall be deemed, for the purposes of all enactments for the time being in force, to be the highest Civil Court of appeal in the territories to which this Act extends.

Criminal jurisdiction.

7. The Chief Court shall be the highest Court of criminal appeal or revision in the said territories, and shall have power, as a Court of original jurisdiction, to try European British subjects committed to it for trial.

Delegation of powers to members of Court.

8. *(1)* Except as by this Act or by any other enactment for the time being in force otherwise provided, the Chief Court may make rules to provide in such manner as it thinks fit for the exercise by one or more of its Judges of any of its powers :

Provided that no decree, sentence, decision or order of any Court, not being an order within the meaning of the Code of Civil Procedure, shall be reversed or modified by any Judge of the Chief Court sitting alone.

82.

(2) When the Chief Court consists of more than three Judges, it may make rules declaring what number of Judges, not being less than three, shall constitute a full bench of the Court, and may by these rules prescribe the mode of determining which Judges shall sit as a full bench, when a full bench sitting becomes necessary.

(3) Subject to the provisions of sub-section (2), the Senior Judge may determine which Judge in each case shall sit alone, and which Judges of the Court shall constitute any bench.

Appeals from original jurisdiction of Chief Court.

9. Except as otherwise provided by any enactment for the time being in force, an appeal from any decree or order made by the Chief Court—

(*a*) in exercise of its original jurisdiction in cases withdrawn from other Courts under section 25 of the Code of Civil Procedure, or

882.

(*b*) in exercise of any other original jurisdiction of a civil nature to which the Chief Court may by rule extend this section,—

shall lie in the cases and in manner following (that is to say):—

(*1*) if the decree or order is made by a single Judge, the appeal shall lie either to a bench consisting of two other Judges, or to a full bench, as the Court may, by general rule or special order, direct;

(*2*) if the decree or order is made by a bench of Judges not being a full bench, and the Judges differ in opinion, the appeal shall lie to a full bench.

Rule of decision when Judges differ.

10. Except as otherwise provided by any enactment for the time being in force,

(1) when there is a difference of opinion among the Judges composing any bench of the Chief Court, the decision shall be in accordance with the opinion of the majority of those Judges;

(2) If there is no such majority, then—

(*a*) if the bench is a full bench, or is exercising original civil jurisdiction, the decision shall be in accordance with the opinion of the Senior Judge;

(*b*) in other cases, the bench before which the question has arisen shall refer the question to a full bench, and shall dispose of the case in accordance with the decision of the full bench.

Power to refer question to full bench.

11. Any single Judge of the Chief Court and any bench of Judges of that Court, not being a full bench, may in any case refer for the decision of a full bench any question of law or custom having the force of law, or the construction of any document, or the admissibility of any evidence arising before the Judge or bench, and shall dispose of the case in accordance with the decision of the full bench on the question.

Ministerial officers.

12. *(1)* The Chief Court may appoint a Registrar and Deputy Registrar, and such other ministerial officers as may be necessary for the administration of justice by the Court, and for the exercise and performance of the powers and duties conferred and imposed on it by this Act.

(2) The appointment of the Registrar shall be subject to the sanction of the Local Government.

(3) The officers appointed under this section shall exercise such powers and discharge such duties of a non-judicial or quasi-judicial nature as the Chief Court may direct.

(4) Any such officer may be suspended or dismissed from his office by order of the Chief Court :

Provided that neither the Registrar nor the Deputy Registrar shall be dismissed without the previous sanction of the Local Government.

Superintendence and control of Subordinate Courts.

13. The general superintendence and control over all other Civil Courts shall be vested in, and all such Courts shall be subordinate to, the Chief Court.

Power to make rules.

14. *(1)* The Chief Court may make rules consistent with this Act and any other enactment for the time being in force—

(*a*) providing for the translation of any papers filed in the Chief Court and copying or printing any such papers or translations, and requiring from the persons at whose instance or on whose behalf they are filed payment of the expenses thereby incurred;

(*b*) declaring what persons shall be permitted to practise as petition-writers in the Courts of the Panjáb, and regulating the conduct of persons so practising;

(*c*) determining in what cases persons practising in those Courts shall be permitted to address the Court in English;

(*d*) prescribing forms for seals to be used by those Courts ;

(*e*) regulating the procedure in cases where any person is entitled to inspect a record of any such Court or obtain a copy of the same, and prescribing the fees payable by such persons for searches and copies;

(*f*) conferring and imposing on the ministerial officers of the Courts subject to its superintendence such powers and duties of a non-judicial or quasi-judicial nature as it thinks fit, and regulating the mode in which powers and duties so conferred and imposed shall be exercised and performed;

The Panjáb Courts Act, 1884.
(Chapter II.—The Chief Court.—Sections 15-16.)
(Chapter III.—The Subordinate Civil Courts.—Sections 17-24.)

(g) prescribing forms for such books, entries, statistics and accounts as it thinks necessary to be kept, made or compiled in those Courts or submitted to any authority;

(h) providing for the inspection of those Courts and the supervision of the working thereof; and

(i) regulating all such matters as it may think fit, with a view to promoting the efficiency of the judicial and ministerial officers of those Courts and maintaining proper discipline among those officers.

(2) A rule made under clause (a), (b), (c), (f) (g), (h) or (i) shall not take effect until it has been sanctioned by the Local Government and has been published in the official Gazette.

(3) Whoever breaks any rule made under clause (b) shall be punished with a fine which may extend to fifty rupees.

Registers, books, accounts and statements to be kept and furnished by Chief Court.

15. *(1)* The Chief Court shall keep such registers, books and accounts as may be necessary for the transaction of the business of the Court, and shall submit to the Local Government such of those registers, books and accounts, and such statements of the work done in the Court, as may be required by the said Government.

(2) The Chief Court shall also comply with such requisitions as may be made by the Governor General in Council, or by the Local Government, for certified copies of, or extracts from, the records of the Chief Court and the Courts subordinate thereto.

Procedure of Chief Court in exercise of civil jurisdiction.

16. *(1)* The Chief Court, when sitting as a Court of civil judicature, shall take evidence and record judgments and orders in such manner as it, by rule, directs, and may frame forms for any proceeding in the Court in the exercise of its civil jurisdiction.

XIV of 1882.

(2) The following provisions of the Code of Civil Procedure shall not apply to the Chief Court in the exercise of its original civil jurisdiction, namely, sections 119, 182 to 185 (both inclusive), 187, 189 to 191 (both inclusive), 192 (so far as it relates to the manner of taking evidence), 198, 200 to 204 (both inclusive), and so much of section 409 as relates to the making of a memorandum.

XIV of 1882.

(3) Section 579 of the said Code shall not apply to the Chief Court in the exercise of its appellate jurisdiction.

CHAPTER III.

THE SUBORDINATE CIVIL COURTS.

Classes of Courts.

Classes of Courts.

17. Besides the Chief Court, the Courts of Small Causes established under Act XI of 1865 and the Courts established under any other enactment for the time being in force, there shall be the following classes of Civil Courts (namely):—

(a) the Divisional Court;

(b) the Court of the District Judge;

(c) the Court of the Subordinate Judge;

(d) the Court of the Munsif.

Territorial Divisions.

Civil divisions and districts.

18. *(1)* For the purposes of this Act the Local Government shall divide the territories under its administration into civil divisions, and each civil division into civil districts.

(2) The Local Government may alter the limits or the number of these divisions and districts.

Divisional and District Courts.

Establishment of Divisional Courts.

19. *(1)* The Local Government shall appoint as many persons as it thinks necessary to be Divisional Judges, and shall for each civil division establish a Divisional Court consisting of one or more such Judges.

(2) The Local Government may, where a Divisional Court consists of more than one Judge, by general rule or special order determine which of them shall be deemed to be the senior.

Establishment of District Courts.

20. The Local Government shall appoint as many persons as it thinks necessary to be District Judges, and shall post one such person to each district as District Judge of that district:

Provided that the same person may, if the Local Government thinks fit, be appointed to be District Judge of two or more districts.

Distribution of business in Divisional Court.

21. The Chief Court may, subject to the provisions of this Act and any other enactment for the time being in force, make rules to provide for the exercise of any of the powers of a Divisional Court consisting of more than one Judge by one or more Judges of the Court:

Provided that no decree, decision or order of any Court, not being an order within the meaning of the Code of Civil Procedure, shall be reversed or modified by a single Judge of a Divisional Court consisting of more than one Judge. XIV of 1882.

Original jurisdiction of Divisional and District Courts in suits.

22. Except as otherwise provided by any enactment for the time being in force, the Divisional Court and the Court of the District Judge shall have jurisdiction in original civil suits without limit as regards the value.

District Court to be principal Civil Court of original jurisdiction.

23. Except as otherwise provided by any enactment for the time being in force, the Court of the District Judge shall be deemed to be the District Court or principal Civil Court of original jurisdiction in the district:

Provided that—

(a) for the purposes of the Indian Divorce Act, the Divisional Court shall be deemed to be the District Court for all districts comprised in the division; and IV of 1869.

(b) the Local Government may direct that the Divisional Court shall for any other purpose be deemed to be the District Court or principal Civil Court of original jurisdiction for any district comprised in the division.

Subordinate Judges and Munsifs.

Appointment of Subordinate Judges.

24. The Local Government may appoint as many persons as it thinks necessary to be Subordinate Judges.

The Panjáb Courts Act, 1884.
(Chapter III.—The Subordinate Civil Courts.—Sections 25-34.)

Appointment of Munsifs.

25. *(1)* The Local Government may fix the number of Munsifs to be appointed, and, when there is any vacancy in that number, the Chief Court may, subject to the rules (if any) made under sub-section (2), appoint such person to the same as it thinks fit.

(2) The Chief Court may, with the previous sanction of the Local Government, make rules as to the qualifications of persons to be appointed Munsifs.

Pecuniary limits of jurisdiction of Subordinate Judges and Munsifs.

26. *(1)* The jurisdiction to be exercised in original civil suits as regards the value by any person appointed to be a Subordinate Judge or Munsif shall in the case of a Subordinate Judge be determined by the Local Government, and in the case of a Munsif by the Chief Court, either by including him in a class or grade, or otherwise as it thinks fit.

(2) The jurisdiction in the case of a Subordinate Judge may be without limit, but in the case of a Munsif shall not extend to suits the value of which exceeds one thousand rupees.

Local limits of their jurisdiction.

27. *(1)* The local limits of the jurisdiction of a Subordinate Judge shall be such as the Local Government may define.

(2) The local limits of the jurisdiction of a Munsif shall be such as the Chief Court may define.

(3) When the Local Government posts a Subordinate Judge or the Chief Court posts a Munsif to a district, the local limits of the district shall, in the absence of any direction to the contrary, be deemed to be the local limits of his jurisdiction.

Special Judges and Benches.

28. *(1)* The Local Government may confer on any person all or any of the powers conferable under this Act on a Subordinate Judge or Munsif with respect to particular classes of cases, or with respect to cases generally in any local area, and may withdraw, or suspend the exercise of, any powers so conferred.

(2) The Local Government may direct any uneven number of persons invested with powers of the same description and exercisable within the same local area under this section to sit together as a bench; and those powers shall, while the direction remains in force, be exercised by the bench so constituted, and not otherwise.

(3) The decision of the majority of the members of a bench constituted under this section shall be deemed to be the decision of the bench.

(4) Persons on whom powers are conferred under this section shall be called Special Judges, and such persons and the benches constituted under this section shall be deemed for the purposes of this Act to be Subordinate Judges or Munsifs, as the Local Government may direct.

Power to transfer to Subordinate Judge or Munsif certain proceedings pending before District Court.

29. *(1)* The Chief Court may, by order, authorize any District Court to transfer to a Subordinate Judge or Munsif under its control any of the following proceedings or any class of such proceedings specified in the order, and then pending or thereafter instituted before the District Court (that is to say):—

(a) applications for certificates under Act XXVII of 1860 *(for facilitating the collection of debts on successions, and for the security of parties paying debts to the representatives of deceased persons)*;

(b) proceedings under Act XL of 1858 *(for making better provision for the care of the persons and property of Minors in the Presidency of Fort William in Bengal)* or Act IX of 1861 *(to amend the law relating to Minors)*.

(2) The District Court may withdraw any proceedings so transferred, and may either itself dispose of them, or, with the previous sanction of the Chief Court, transfer them to any other Subordinate Judge or Munsif under its control.

(3) All proceedings so transferred shall be disposed of by the Subordinate Judge or Munsif (as the case may be) subject to the rules applicable to like cases when disposed of by the District Court.

Small Cause Jurisdiction.

Power to confer Small Cause Court jurisdiction.

30. The Local Government may confer, within such local limits as it thinks fit, upon any District Judge, Subordinate Judge or Munsif the jurisdiction of a Judge of a Court of Small Causes under Act XI of 1865 for the trial of suits cognizable by such Courts up to such value, not exceeding five hundred rupees, as it thinks fit, and may withdraw any jurisdiction so conferred.

Suspension and Removal.

Suspension and removal.

31. *(1)* Any Divisional Judge, District Judge or Subordinate Judge may be suspended or removed from office by the Local Government.

(2) Any Munsif may, subject to the control of the Local Government, be suspended or removed from office by the Chief Court.

Valuation of Suits.

Valuation of suits.

32. When the subject-matter of suits of any class is such that in the opinion of the Chief Court it does not admit of being satisfactorily valued, the Chief Court may, with the previous sanction of the Local Government, direct that suits of that class shall, for all or any of the purposes of this Act, be treated as if their subject-matter were of such value as the Chief Court thinks fit to specify in this behalf.

Administrative Control.

Controlling powers of Divisional and District Courts.

33. *(1)* Subject to the general superintendence and control of the Chief Court, every Divisional Court shall control all other Civil Courts in the division.

(2) Subject as aforesaid and to the control of the Divisional Court, every District Court shall control all other Civil Courts in the district.

Power of Divisional Court to transfer business.

34. *(1)* Every Divisional Court may exercise, as regards the Courts under its control, the same powers of withdrawal, trial and transfer as are conferred by section 25 of the Code of Civil Procedure on a District Court. XI

(2) The Court trying any suit withdrawn under this section from a Court of Small Causes shall, for the purposes of the suit, be deemed to be a Court of Small Causes.

The Panjáb Courts Act, 1884.
(Chapter III.—The Subordinate Civil Courts.—Sections 35-38.)
(Chapter IV.—Appellate Jurisdiction in Civil Cases.—Sections 39-43.)

XIV of 1882.

Power to distribute business.

35. Notwithstanding anything contained in the Code of Civil Procedure, every Divisional Court and District Court may, by written order, direct that any civil business cognizable by it and the Courts under its control shall be distributed among those Courts in such manner as it thinks fit:

Provided that no direction issued under this section shall empower any Court to exercise any powers or deal with any business beyond the limits of its proper jurisdiction.

Ministerial officers of Subordinate Courts.

36. *(1)* The ministerial officers of the Divisional and District Courts and Courts of Small Causes shall be appointed, and may be suspended and dismissed, by the Judges of those Courts respectively.

(2) The ministerial officers of all Courts controlled by a District Court, other than Courts of Small Causes, shall be appointed, and may be suspended and dismissed, by the District Court.

(3) Every appointment under this section shall be subject to such rules as the Local Government prescribes in this behalf, and, in dealing with any matter under this section, a District Court or a Judge of a Court of Small Causes shall act subject to the control of the Divisional Court.

Power to fine ministerial officers.

37. *(1)* A Divisional or District Court or any Court under the control of a District Court may fine, in an amount not exceeding one month's salary, any ministerial officer of the Court for misconduct or neglect in the performance of his duties.

(2) The District Court, subject to the general control of the Divisional Court, may, on appeal or otherwise, reverse or modify an order made under sub-section (1) by any Court under its control other than a Court of Small Causes, and may of its own motion fine up to the amount of one month's salary any ministerial officer of any Court under its control other than a Court of Small Causes.

Delegation of District Judge's powers.

38. A District Court may, with the previous sanction of the Local Government, delegate to any Subordinate Judge in the district the powers conferred on a District Court by sections 33, 35 and 36 of this Act, and section 25 of the Code of Civil Procedure, to be exercised by the Subordinate Judge in any specified portion of the district subject to the control of the District Court.

XIV of 1882.

CHAPTER IV.

APPELLATE JURISDICTION IN CIVIL CASES.

First appeals to whom to lie.

39. *(1)* Appeals from the decrees of a Munsif in small causes shall, when such appeals are allowed by law, and the value of the suit does not exceed five hundred rupees, lie to the District Judge.

(2) Appeals from the decrees of a District or Subordinate Judge in original suits, when the value of the suit exceeds five thousand rupees, and appeals from the decrees of the Divisional Court in original suits, shall, when such appeals are allowed by law, lie to the Chief Court.

(3) Appeals from decrees in original suits, not hereinbefore or by any other enactment for the time being in force provided for, shall, when such appeals are allowed by law, lie to the Divisional Court.

Further appeal from Divisional Court.

40. A further appeal shall lie to the Chief Court in the following cases from an appellate decree of a Divisional Court on any ground which would be a good ground of appeal if the decree had been passed in an original suit, namely:—

(*a*) if the value of the suit exceeds five hundred rupees; or

the decree involves directly some claim to, or question respecting, property of like value;

(*b*) if the Divisional Court consists of a single Judge and the decree varies or reverses the decree of the Court below;

(*c*) if in a Divisional Court consisting of more than one Judge the appeal is heard by two or more Judges, and there is not a majority of those Judges concurring in the decree passed by the Divisional Court;

(*d*) if on the application of any party a Judge of the Divisional Court certifies that there is a question of law or custom or of general interest involved, and that the case is in his opinion of sufficient importance to justify a further appeal:

Prov ded that—

(1) an application under clause (*d*) shall not be received after the expiration of thirty days from the date on which the decree of the Divisional Court is passed, unless the applicant satisfies the Judge that he had sufficient cause for not presenting it within that period; and

(2) no further appeal shall lie in any small cause when the value of the suit does not exceed five hundred rupees.

Appellate decision of District or Divisional Court otherwise final.

41. Subject to the provisions of section 40 of this Act and sections 595 and 622 of the Code of Civil Procedure, a decree of the District or Divisional Court passed in appeal shall be final.

Power to confer appellate jurisdiction on Subordinate Judge.

42. *(1)* The Local Government may confer on a Subordinate Judge the powers of a District Judge for the purpose of hearing appeals from the Courts of Munsifs in any local area, and withdraw those powers.

(2) A Subordinate Judge shall for purposes connected with the exercise of powers so conferred be deemed to be a District Judge.

Period of limitation.

43. *(1)* The period of limitation for an appeal under section 39 or section 40 shall run from the date of the decree appealed against, and shall be as follows, that is to say:—

(*a*) when the appeal lies to the District or Divisional Court—sixty days;

(*b*) when the appeal lies to the Chief Court—ninety days.

(2) In computing these periods of sixty and ninety days, and in all respects not herein specified, the limitation of the appeals shall be governed by the provisions of the Indian Limitation Act, 1877:

The Panjáb Courts Act, 1884.
(Chapter IV.—Appellate Jurisdiction in Civil Cases.—Section 44.)
(Chapter V.—Revenue Courts.—Sections 45-47.)

Provided that, in computing the period of ninety days for an appeal under section 40, clause (*d*), the time during which the application under that clause has been pending shall be excluded.

References to Chief Court under section 617 of Code of Civil Procedure.

44. For the purposes of section 617 of the Code of Civil Procedure, every appeal to a Divisional Court under this chapter shall, except when the value of the suit exceeds five hundred rupees, be deemed to be an appeal in which the decree is final.

CHAPTER V.

REVENUE COURTS.

Certain classes of suits cognizable by Revenue Courts only.

45. Suits of any of the classes comprised in the following groups instituted on and after the date on which this Act comes into force, shall be instituted, heard and determined in Revenue Courts and not otherwise:—

First Group.

(*a*) Suits by tenants to establish a claim to a right of occupancy.

(*b*) Suits by landlords under section 6 of the Panjáb Tenancy Act, 1868, to prove that a tenant presumed to have a right of occupancy under that section has no such right.

(*c*) Suits for enhancement or abatement of rent under Chapter III of the same Act.

(*d*) Suits for ejectment of a tenant.

(*e*) Suits under section 25 of the said Act to contest liability to be ejected when notice of ejectment has been served.

Second Group.

(*f*) Suits for arrears of rent on account of land, or of any payments due on account of rights of pasturage, forest-rights, fisheries or the like.

(*g*) Suits for the recovery of any over-payment of rent.

(*h*) Suits by lambardárs for arrears of land-revenue, payable through them by the co-sharers, or for village-expenses or other dues for which the co-sharers may be responsible to the lambardár.

(*i*) Suits by co-sharers for their share of the profits of an estate or part thereof after payment of the land-revenue and village-expenses, or for a settlement of accounts.

(*j*) Suits by assignees of land-revenue for arrears of revenue due to them as such.

(*k*) Suits by superior proprietors for arrears of revenue due to them as such.

(*l*) Suits under section 9 of the Specific Relief Act to recover possession of land.

(*m*) Suits to determine disputes regarding boundaries of land which have been fixed by a Court or Revenue-officer:

Provided that the Local Government may, after consulting the Chief Court, direct that suits of any of these classes arising in any local area shall be heard and determined by the Civil Courts and not by the Revenue Courts, and cancel any such direction.

Original jurisdiction of Deputy Commissioner and his subordinates in suits.

46. (*1*) A Deputy Commissioner shall have power to try suits of any of the classes mentioned in section 45.

(*2*) An Assistant Commissioner or Tahsíldár shall have power to try suits of such classes mentioned in the second group of the same section, and within such limits as regards value, as may be determined by the Local Government either by including him in a class or grade, or otherwise as it thinks fit.

(*3*) The Local Government may invest a Náib Tahsíldár with power to try suits of the classes mentioned in section 45, clauses (*f*), (*g*), (*h*), (*i*) and (*k*), when the value does not exceed one hundred rupees.

(*4*) The powers conferred by this section shall be exercised within such local limits as the Local Government may direct, and in the absence of any such direction throughout the district or tahsíl to which the officer is posted.

Appeals from original decrees.

47. An appeal shall lie from a decree passed in an original suit of any of the classes mentioned in section 46 as follows, namely:—

(*a*) when the decree is passed by a Deputy Commissioner and the value of the suit exceeds five thousand rupees—to the Financial Commissioner;

(*b*) when the decree is passed by a Deputy Commissioner in a suit of the first group and the value of the suit does not exceed five thousand rupees, or

in a suit of the second group and the value of the suit exceeds one hundred rupees but does not exceed five thousand rupees—to the Commissioner;

(*c*) when the decree is passed by an Assistant Commissioner, Tahsíldár or Náib Tahsíldár—to the Deputy Commissioner:

Provided that—

(*1*) no appeal shall lie from a decree passed in a suit of the class mentioned in section 45, clause (*l*);

(*2*) the Local Government may direct that no appeal shall lie from the decree of any Assistant Commissioner or class or grade of Assistant Commissioners designated by it in this behalf in any suit of the classes specified in clauses (*f*) to (*k*), both inclusive, of section 45, unless—

(*a*) the value of the suit exceeds such sum, not being more than one hundred rupees, as the Local Government may fix in this behalf, or

(*b*) the decree has decided a question of title to land or to some interest in land as between parties having conflicting claims thereto or as to the amount of some rent or revenue or other payment to which there is a recurring claim or as to the principle on which revenue, profits or village-expenses or other dues should be apportioned.

(*3*) The Local Government may direct that appeals shall lie from the decrees of an Assistant Commissioner or any class of Assistant Commissioners as if those decrees were passed by a Deputy Commissioner.

The Panjáb Courts Act, 1884.
(Chapter V.—Revenue Courts.—Sections 48-56.)

Further appeals from appellate decrees.

48. A further appeal shall lie from a decree passed on appeal in a suit of any of the classes mentioned in section 45 on any ground which would be a good ground of appeal if the decree had been passed in an original suit as follows, namely:—

(*a*) when the decree is passed by a Commissioner in a suit of the first group and reverses or modifies the original decree —to the Financial Commissioner;

(*b*) when the decree is passed by a Deputy Commissioner and the value of the suit exceeds five thousand rupees—to the Financial Commissioner;

(*c*) when the decree is passed by a Deputy Commissioner and the value of the suit exceeds one hundred rupees but does not exceed five thousand rupees—to the Commissioner.

No appeals except under the foregoing sections.

49. Except as provided by the foregoing sections, no appeal shall lie from a decree passed under this chapter.

Limitation of appeals under this chapter.

50. *(1)* The period of limitation for an appeal under section 47 or 48 shall run from the date of the decree appealed against, and shall be as follows, that is to say:—

(*a*) when the appeal lies to the Court of the Deputy Commissioner or of the Commissioner—sixty days;

(*b*) when the appeal lies to the Financial Commissioner—ninety days.

(2) In computing those periods of sixty and ninety days, and in all respects not herein specified, the limitation of the appeals shall be governed by the provisions of the Indian Limitation Act, 1877.

Power to confer powers of Financial Commissioner, Commissioner and Deputy Commissioner.

51. (*1*) The Local Government may confer on any person all or any of the powers, original or appellate, of a Financial Commissioner, Commissioner or Deputy Commissioner under this chapter, and may withdraw the powers so conferred.

(*2*) Any person on whom powers are conferred under this section shall exercise those powers within such local limits and in such classes of cases as the Local Government may direct, and, except as otherwise directed by the Local Government, shall for all purposes connected with the exercise of the same be deemed a Financial Commissioner, Commissioner or Deputy Commissioner, as the case may be.

Appointment of second Financial Commissioner.

52. *(1)* The Local Government may, if it thinks fit, appoint a second Financial Commissioner, who shall hold his office during the pleasure of the Local Government.

(2) When a second Financial Commissioner is appointed, the Local Government may make rules as to the distribution of business between the two Financial Commissioners, and, until such rules are made and subject to such rules, the Financial Commissioner who is senior in respect of his appointment as such may transfer such business as he thinks fit to the other Financial Commissioner for disposal, and may withdraw and himself dispose of any business so transferred and not disposed of.

Procedure of Revenue Courts how to be regulated.

53. *(1)* The Local Government may, with the previous sanction of the Governor General in Council, make rules consistent with this Act for regulating the procedure of Revenue Courts in matters under this chapter for which a procedure is not prescribed thereby; and may, by any such rule, direct that any provisions of the Code of Civil Procedure shall apply, with or without modification, to all or any classes of cases before Revenue Courts.

(2) Until such rules are made, and subject to such rules when made and to the provisions of this Act,—

(*a*) the provisions of the Code of Civil Procedure shall, so far as applicable, apply to all proceedings whether before or after decree in cases under this chapter; and

(*b*) the Court of the Financial Commissioner shall, in respect of such cases, be deemed to be the High Court within the meaning of the said Code, and shall exercise, as regards the Courts under its control, all the powers of a High Court under the said Code.

Power to refer party to Civil Court.

54. (*1*) If, in any suit pending before a Revenue Court exercising original appellate or revisional jurisdiction under this chapter, it appears to the Court that any question in issue is more proper for decision by a Civil Court, the Revenue Court may, with the previous sanction of the Revenue Court (if any) to the control of which it is immediately subject, by order in writing, require any party to the suit to institute, within such time as it may fix in this behalf, a suit in the Civil Court with a view to obtaining a decision on the question, and, if he fails to comply with the requisition, may, if it thinks fit, decide the question against him.

(*2*) If he institutes such a suit, the Revenue Court shall dispose of the suit pending before it in accordance with the final decision of the Civil Court of first instance or appeal (as the case may be).

Power for Financial Commissioner to refer question to Chief Court.

55. (*1*) When a question of the description mentioned in section 617 of the Code of Civil Procedure arises before the Financial Commissioner in the exercise of any of his powers under this chapter, he may refer the question for the decision of the Chief Court in manner prescribed by that section:

Provided that he shall not be bound to express any opinion thereon.

(*2*) On a reference being made under sub-section (1), the subsequent proceedings in the case shall be, as nearly as may be, in conformity with the provisions of sections 618, 619 and 620 of the said Code, and the Chief Court may return for amendment the statement received from the Financial Commissioner if it is not sufficient to enable the Court to determine the question referred.

Administrative Control.

Controlling powers of Financial Commissioner, Commissioner and Deputy Commissioner.

56. (*1*) The general superintendence and control over all other Revenue Courts shall be vested in, and all such Courts shall be subordinate to, the Court of the Financial Commissioner.

The Panjáb Courts Act, 1884.
(Chapter VI.—Settlement Courts.—Sections 62-63.)
(Chapter VII.—Supplemental Provisions.—Sections 64-66.)

(2) Subject to the general superintendence and control of the Financial Commissioner, every Commissioner shall control all other Revenue Courts in his division.

(3) Subject as aforesaid and to the control of the Commissioner, every Deputy Commissioner shall control all other Revenue Courts in his district.

Power to transfer business.

57. Every Commissioner and Deputy Commissioner may exercise, as regards the Courts under his control, the same powers of withdrawal, trial and transfer as are conferred by section 25 of the Code of Civil Procedure on a District Court.

1882.

Power to distribute business.

58. Every Commissioner and Deputy Commissioner may, by written order, direct that any business cognizable under this chapter by his Court and the Courts under his control shall be distributed among those Courts in such manner as he thinks fit:

Provided that no direction issued under this section shall empower any Court to exercise any powers or deal with any business beyond the limits of its proper jurisdiction.

Ministerial officers of Courts.

59. (1) The ministerial officers of the Courts of the Financial Commissioner, Commissioner and Deputy Commissioner shall be appointed, and may be suspended and dismissed, by the Judges of those Courts, respectively.

(2) The ministerial officers of all Courts controlled by a Deputy Commissioner shall be appointed, and may be suspended and dismissed, by the Deputy Commissioner.

(3) Every appointment under this section shall be subject to such rules as the Local Government prescribes in this behalf; and in dealing with any matter under this section a Commissioner shall act subject to the control of the Financial Commissoner, and a Deputy Commissioner subject to the control of the Commissioner.

Power to fine ministerial officers.

60. (1) A Commissioner or Deputy Commissioner and the presiding officer of every Court under the control of a Deputy Commissioner may fine, in an amount not exceeding one month's salary, any ministerial officer of his Court for misconduct or neglect in the performance of his duties.

(2) The Deputy Commissioner, subject to the general control of the Commissioner, may, on appeal or otherwise, reverse or modify any order made under sub-section (1) by the presiding officer of any Court under his control, and may of his own motion fine up to the amount of one month's salary any ministerial officer of any such Court.

Delegation of Deputy Commissioner's powers.

61. A Deputy Commissioner may, with the previous sanction of the Local Government, delegate to any Assistant Commissioner in the district the powers conferred on Deputy Commissioners by sections 56, 57, 58 and 59 to be exercised by the Assistant Commissioner in any specified portion of the district subject to the control of the Deputy Commissioner.

CHAPTER VI.

SETTLEMENT COURTS.

Power to invest Settlement-officers with powers of Civil or Revenue Courts in certain cases.

62. (1) The Local Government may, by notification in the official Gazette, declare that a settlement of land-revenue is in progress in any local area, and invest any officer making or controlling the settlement with all or any of the powers of any Court constituted under this Act for the purpose of trying all or any specified class of suits and appeals relating to land, or the rent, revenue or produce of land, arising in the local area.

(2) The publication of a notification under this section shall be conclusive evidence that a settlement of land-revenue is in progress in the local area to which the notification refers.

(3) The Local Government may cancel any such notification.

(4) While the notification continues in force, the powers specified in it shall be exercised by the officers so invested, and not otherwise:

Provided as follows:—

(a) the Local Government may, by order published in the official Gazette, direct that any jurisdiction with which any officer has been invested by the notification shall be exercised solely by the Courts by which the jurisdiction would have been exercised if the notification had not been published; and

(b) any cases pending before any officer under the notification when it is cancelled may, notwithstanding the cancellation, be disposed of by him as if it continued in force, unless the Local Government directs (as it is hereby empowered to do) that those cases shall be transferred for disposal to the Courts by which they would have been disposed of if the notification had not been published.

Power to alter subordination of Courts for purposes of section 62.

63 For the purposes of section 62 the Local Government may, notwithstanding anything in this Act, from time to time direct that any of the Courts mentioned in this Act (except the Chief Court and the Court of the Financial Commissioner) shall, in respect of any specified class of cases, be subordinate to, or subject to the control or superintendence of, any authority other than those specified in this Act.

CHAPTER VII.

SUPPLEMENTAL PROVISIONS.

Mode of appointment and conferring powers.

64. Except as otherwise provided by this Act, the Local Government may, when it is empowered by this Act to make any appointment or confer any powers, appoint, or confer the powers on any person specially by name or by virtue of his office.

Powers exercisable from time to time.

65. All powers conferred by this Act may be exercised, from time to time, as occasion requires.

Place of sitting of Courts.

66. (1) The Local Government may fix the place or places at which any Court under this Act is to be held.

The Panjáb Courts Act, 1884.
(Chapter VII.—Supplemental Provisions.—Sections 67-75. The Schedule.)

(2) The place or places so fixed may be beyond the local limits of the jurisdiction of the Court.

(3) Except as may be otherwise provided by any order under this section, a Court under this Act may be held at any place within the local limits of its jurisdiction.

Vacations.

67. *(1)* Subject to the approval of the Local Government, the Chief Court shall prepare a list of days to be observed in each year as holidays in the Chief Court and the Civil Courts subordinate thereto, and the Financial Commissioner shall prepare alike list for his Court and the Courts subordinate thereto.

(2) Every such list shall be published in the official Gazette.

Pending proceedings.

68. *(1)* All cases or proceedings pending in the Chief Court on the day when this Act comes into force shall be disposed of as if this Act had not been passed.

(2) All cases or proceedings pending in any Civil Court subordinate to the Chief Court on that day shall be disposed of as if this Act had not been passed:

Provided that the Chief Court may direct that any such cases or proceedings shall be transferred for disposal to any Civil Court established under this Act which would have had jurisdiction if it had been in existence when the cases or proceedings were instituted.

(3) In the case of an appeal pending on the said day, the following shall, for the purposes of sub-section (2), be deemed to be the Court which would have had jurisdiction as aforesaid, namely:—

(a) when the value of the suit exceeds five thousand rupees,—the Chief Court;

(b) when the appeal is one in a small cause, and is pending before the Deputy Commissioner or an officer invested with the appellate powers of a Deputy Commissioner and the value of the suit does not exceed five hundred rupees,—the District Court;

(c) in other cases,—the Divisional Court.

Appeals after Act comes into force against decrees, &c., passed before.

69. Appeals from decrees, orders and decisions passed by Civil Courts and not appealed against before the date on which this Act comes into force shall lie and be disposed of as if this Act had not been passed and not otherwise:

Provided that the Courts to which such appeals shall lie shall be as follows:—

(a) when the appeal would before the said date have lain to the Chief Court, or the value of the suit exceeds five thousand rupees,—the Chief Court;

(b) in small causes when the value of the suit does not exceed five hundred rupees, and the appeal would before the said date have lain to the Deputy Commissioner, or an officer exercising the appellate powers of a Deputy Commissioner,—the District Court;

(c) in other cases,—the Divisional Court.

Modification of section 622 of Civil Procedure Code.

70. Section 622 of the Code of Civil Procedure, in its application to the territories to which this Act extends, shall be read as if the words "illegally or" were omitted, and for the purposes of that section no appeal shall be deemed to lie from the appellate decree of a Divisional Court to the Chief Court when the case does not fall under clause (a), clause (b) or clause (c) of section 40, and an application under clause (d) of that section has been refused.

Amendment of the first schedule annexed to the Court-fees Act, 1870.

71. In the first schedule annexed to the Court-fees Act, 1870, after No. 12, the following shall be inserted:—

NUMBER.		PROPER FEE.
13. Application to the Chief Court or the Court of the Financial Commissioner of the Panjáb for the exercise of its revisional jurisdiction under section 622 of the Code of Civil Procedure.	When the amount or value of the subject-matter in dispute does not exceed twenty-five rupees.	Two rupees.
	When such amount or value exceeds twenty-five rupees.	The fee leviable on a memorandum of appeal.

Refund of fee paid on application for revision.

72. If the Court, on an application under section 622 of the Civil Procedure Code, on which a fee has been paid under the last preceding section, sets aside or modifies the decree or order of a Subordinate Court, or remands the case for a fresh decision, it may grant to the applicant a certificate authorizing him to receive back from the Collector the full amount of fee paid on the application, or any smaller amount which, with regard to the circumstances of the case, it may think proper to order to be refunded.

Saving of certain appointments, rules and forms, notifications, powers and orders.

73. All appointments made under sections 5 and 22 of Act XVII of 1877, directions given under section 23, rules and forms made and prescribed under sections 19, 26 and 27, and notifications published, powers conferred and orders issued under section 49, of the same Act, shall, so far as may be, be deemed to have been respectively made, given, prescribed, published, conferred and issued under this Act.

Amendment of Act X of 1870, section 3.

74. In the Land Acquisition Act, 1870, section 3, before the words "British Burma," in both places where they occur, the words "the Panjáb" shall be inserted.

Amendment of Act XXVIII of 1868, section 42.

75. In the Panjáb Tenancy Act, 1868, section 42, for the words "and thirty-one" the words "thirty-one and forty" shall be substituted.

THE SCHEDULE.

ACTS REPEALED.

(See section 2.)

Number and year.	Title of Act.	Extent of repeal.
Act IV of 1869	The Indian Divorce Act.	So much of section 3 as defines "District Judge" in the Panjáb to mean the "Commissioner of a Division."
Act XIV of 1875.	The Panjáb Judicial Administration Act, 1875.	So far as it relates to civil or criminal judicial powers.
Act XVII of 1877.	The Panjáb Courts' Act, 1877.	The whole, except section eighteen.

D. FITZPATRICK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 16th October, 1884, and is hereby promulgated for general information:—

ACT No. XIX OF 1884.

THE RANGOON WATER-WORKS ACT, 1884.

CONTENTS.

CHAPTER I.

PRELIMINARY.

SECTIONS.

1. Short title and commencement.
2. Definitions.

CHAPTER II.

VESTING OF PROPERTY.

3. Vesting of Royal Lake and cisterns, &c., in Committee.

CHAPTER III.

CONSTRUCTION AND MAINTENANCE OF WATER-WORKS.

4. Duty of Committee to construct works for supply of water.
5. Duty of Committee to erect stand-pipes.
6. Power for Committee to execute works.
7. Power for Committee to break up streets.

CHAPTER IV.

SUPPLY OF WATER.

A.—Supply of Water for domestic purposes to Occupiers of Houses or Lands.

8. Right of occupier to certain supply of water for domestic purposes.
9. Right of occupier paying water-tax to have water brought into his house or land.
10. Construction of communication-pipes.

SECTIONS.

11. Inspection of works, pipes and fittings before connection with service-pipes.
12. Connection with service-pipes to be executed only by an officer of the Committee.
13. Power for officer of Committee to enter premises.
14. Power for Committee to turn off water when pipes are out of repair.

B.—Supply for gratuitous use in Stand-pipes.

15. Duty of Committee to supply water for gratuitous use in stand-pipes.

C.—Supply of Water for extinguishing Fires and cleansing Sewers and Streets.

16. Duty of Committee to fix fire-plugs in mains.
17. Duty of Committee to supply water for cleansing sewers and drains.

D.—Supply of Water for other than Domestic Purposes.

18. Supply for other than domestic purposes.

E.—Pressure of Water supplied.

19. Pressure at which water must be kept.

CHAPTER V.

RECIPROCAL RIGHTS OF OWNERS AND OCCUPIERS TO SUPPLY OF WATER TO HOUSES.

20. Power for occupier of house to require owner to provide works for water-supply.
21. Power for occupier to make works in default of owner.
22. What works are sufficient for supply of water to house.
23. Estimate and specification of works to be sent.
24. Power to refer to Committee.
25. Fee on reference.
26. Duty of owner to keep works in repair.
27. Power for owner to recover sums payable by occupier.
28. Saving of contracts between owners and occupiers.

CHAPTER VI.

RULES.

29. Power for Chief Commissioner to make rules.
30. Power for Committee to make rules.
31. Procedure for making rules.
32. Publication of rules.

The Rangoon Water-works Act, 1884.
(Chapter I.—Preliminary.—Sections 1-2.)
(Chapter II.—Vesting of Property.—Section 3.)

CHAPTER VII.

ARREARS AND OFFENCES.

SECTIONS.
33. Arrears of water-rents.
34. Power for Committee to turn off water on neglect to pay water-tax or water-rent.
35. Penalty for obstructing, diverting or wasting water.
36. Penalty for unauthorized application of water.
37. Penalties for causing the water of the Committee to be fouled, &c.
38. Prosecutions.

An Act to confer powers and impose duties on the Municipal Committee for the Town of Rangoon in respect to the construction and maintenance of Water-works and the supply of Water in that Town.

WHEREAS a scheme has been settled and to some extent carried out for the construction and maintenance of water-works and the supply of water to the Town of Rangoon by the Municipal Committee for that town;

And whereas it is necessary for the purposes of the scheme that the Royal Lake at Rangoon, and all existing tanks, cisterns, springs, wells, pumps, reservoirs, conduits, aqueducts, hydrants, standpipes and works, and all land, bridges, buildings, engines, works, materials and things connected therewith or appertaining thereto, should vest in, and be under the control of, the Municipal Committee for that town;

And whereas it is expedient that powers should be conferred and duties imposed upon the said Municipal Committee with respect to the construction and maintenance of the proposed water-works and the supply of water to the Town of Rangoon, and otherwise in relation thereto, and that all acts already done by the said Municipal Committee which could have been lawfully done if this Act had been in force should be validated;

It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title and commencement.

1. *(1)* This Act may be called the Rangoon Water-works Act, 1884; and

(2) It shall come into force on such date as the Chief Commissioner may, by notification in the official Gazette, fix in this behalf.

(3) All acts done before the passing of this Act which could have been lawfully done if this Act had been in force shall be deemed to have been lawfully done.

Definitions.

2. In this Act, unless there is something repugnant in the subject or context,—

(1) "town" means the local area for the time being comprised within the municipal limits of the Town of Rangoon:

(2) "street" means any street, road, thoroughfare, passage for place over which the public have a right of way; and includes the surface-soil and sub-soil of any such street, and the footway and drains of any such street, and any bridge, culvert or causeway forming part of any such street:

(3) "owner" includes—

(a) the person who is for the time being entitled to the rent of the house or land in respect of which the word is used and who is not liable to pay rent for that house or land to any other person;

(b) an agent of that person; and

(c) a trustee for that person:

(4) "house" includes schools; also factories and other buildings in which persons are employed:

(5) "water-works" includes all lakes, streams, tanks, cisterns, springs, wells, pumps, reservoirs, conduits, aqueducts, hydrants, standpipes and works, and all land, bridges, buildings, engines, works, materials and things for supplying, or used for supplying, water under this Act to the Town of Rangoon:

(6) "the Committee" means the Municipal Committee for the Town of Rangoon:

(7) "water-rent" includes any rent, reward or payment to be made to the Committee in connection with the supply of water under this Act, but does not include the water-tax leviable under the Burma Municipal Act, 1884: and

(8) a "supply of water for domestic purposes" does not include a supply of water for cattle, or for horses, or for washing carriages, where the cattle, horses or carriages are kept for sale or hire or by a common carrier, or a supply for any trade, manufacture or business, or for watering gardens, or for fountains or for any ornamental purpose.

CHAPTER II.

VESTING OF PROPERTY.

Vesting of Royal Lake and cisterns, &c., in Committee.

3. There shall vest in, and be under the control of, the Committee, freed and discharged of and from all manner of rights, titles, privileges or claims whatsoever of any other person,—

(a) the Royal Lake at Rangoon; and

(b) all existing tanks, cisterns, springs, wells, pumps, reservoirs, conduits, aqueducts, hydrants, standpipes and works, used or intended to be used for supplying water to the public in the town, and all land, bridges, buildings, engines, works, materials and things connected therewith, or appertaining thereto:

Provided as follows:—

(1) Any person may at any time, subject to such rules as the Committee make in this behalf, row, sail or fish on or in the waters of the Royal Lake:

(2) Nothing in this section shall affect the land adjacent to the Royal Lake and known as the Dalhousie Park, but that land shall be preserved as a public park for the use of the public.

The Rangoon Water-works Act, 1884.
(Chapter III.—Construction and Maintenance of Water-works.—Sections 4-7.)
(Chapter IV.—Supply of Water.—Sections 8-13.)

CHAPTER III.

CONSTRUCTION AND MAINTENANCE OF WATER-WORKS.

Duty of Committee to construct works for supply of water.

4. Subject to rules to be made under this Act by the Chief Commissioner, the Committee shall cause such mains and pipes to be laid, and such water-works to be constructed, as may be necessary for the supply of pure and wholesome water sufficient for the use of the inhabitants for domestic purposes in all parts of the town:

Provided that the Chief Commissioner may, by order in writing, from time to time exempt any part of the town from the provisions of this section, and cancel any such exemption.

Duty of Committee to erect stand-pipes.

5. The Committee shall cause such stand-pipes or pumps to be erected, at such intervals as the Chief Commissioner, by rules made under this Act, prescribes, in all the chief streets in those parts of the town in which mains or pipes have been laid under the last foregoing section.

Power for Committee to execute works.

6. The Committee may, for the purpose of constructing or maintaining any water-works for the supply of water to the town, enter upon any land and take levels of the same, and set out such parts thereof as they think necessary, and dig and break up the soil of the land:

Provided that, in the exercise of these powers the Committee shall do as little damage as may be, and shall make full compensation to all persons interested for all damage sustained by them through the exercise of these powers, and the amount of such compensation shall be determined as nearly as may be in accordance with the provisions of the Land Acquisition Act, 1870.

Power for Committee to break up streets.

7. The Committee may open and break up the soil and pavement of the streets, and lay down and place pipes, conduits and other works and engines, and, from time to time, repair, alter or remove the same, and do all other acts which the Committee, from time to time, deem necessary for supplying water to the town.

CHAPTER IV.

SUPPLY OF WATER.

A.—Supply of water for domestic purposes to Occupiers of Houses or Lands.

Right of occupier to certain supply of water for domestic purposes.

8. *(1)* Every occupier of a house or land situate in a part of the town not exempted under the proviso to section 4 shall be entitled to have free of further charge, through the communication-pipes constructed as hereinafter provided, a supply to the house or land of fifteen hundred gallons of pure and wholesome water for domestic purposes for every rupee paid to the Committee for water-tax on account of the house or land.

(2) If the Committee have reason to believe that the occupier of any house or land consumes more water than he is entitled to have free of further charge under this section, they may provide a water-metre at their own expense, and attach it to such part of the communication-pipes as they think fit.

(3) If the occupier consumes any water over and above the quantity to which he is entitled free of further charge under this section, he shall pay for it at the rate of one rupee for every fifteen hundred gallons, or part of fifteen hundred gallons.

Right of occupier paying water-tax to have water brought into his house or land.

9. Every occupier of a house or land who is entitled to a supply of water free of further charge under the last foregoing section shall, subject to the provisions of this Act, be entitled to have communication-pipes laid down from the service-pipes of the Committee, for bringing into his house or land a reasonable supply of water:

Provided that the Committee may cut off the supply of water to any house or land while the house or land is unoccupied.

Construction of communication-pipes.

10. The communication-pipes leading the water from the service-pipes of the Committee into the house or land of any occupier, and the pipes and works within the house connected therewith, shall be of such character, dimensions and material as the Committee fix and approve, and shall be constructed at the expense of the person requiring them.

Inspection of works, pipes and fittings before connection with service-pipes.

11. *(1)* Before a connection for the supply of water from the service-pipes of the Committee to any house or land is sanctioned by the Committee, the Committee shall cause all the works, pipes and fittings within the house or land to be inspected by such officer as the Committee appoint in this behalf.

(2) The cost of an inspection under this section shall be payable in advance by the person applying for the connection, at such rate as the Committee, at a special meeting, from time to time, direct.

(3) Until the officer has certified that the works, pipes and fittings have been executed and put up in a satisfactory manner, a connection with the Committee's service-pipes shall not be permitted.

Connection with service-pipes to be executed only by an officer of the Committee.

12. *(1)* The connection with the service-pipes of the Committee, and the laying of communication-pipes under any street, shall be executed by an officer of the Committee authorized in that behalf.

(2) The expense of making the connection shall be payable in advance by the person applying for the same, at such rate as the Committee, at a special meeting, from time to time, direct.

Power for officer of Committee to enter premises.

13. *(1)* The officer authorized in that behalf by the Committee may, between the hours of seven in the forenoon and five in the afternoon, enter into or on any house or land

The Rangoon Water-works Act, 1884.
(Chapter V.—Reciprocal Rights of Owners and Occupiers to supply of Water to Houses.—Sections 20-21.)

supplied with water as aforesaid in order to examine all pipes, works and fittings connected with the supply of water, and to ascertain if there is any waste or misuse of the water.

(2) If any such officer at any such time is refused admittance into any such house or land for the purposes aforesaid, or is prevented from making such examination as aforesaid, the Committee may forthwith turn off or cut off the water from the house or land.

Power for Committee to turn off water when pipes are out of repair.

14. If any pipes, works or fittings connected with the supply of water to any house or land are at any time found, on examination by any officer of the Committee authorized in that behalf, to be out of repair to such an extent as to cause any waste of water, the Committee may, after the expiry of twenty-four hours from the service of notice in writing to this effect, cause the water to be turned off or cut off from the house or land, and may recover the expense incurred for turning off or cutting off the water from the occupier of the house or land.

B.—Supply for gratuitous use in Stand-pipes.

Duty of Committee to supply water for gratuitous use in stand-pipes.

15. The Committee shall cause a sufficient quantity of pure and wholesome water to be supplied for the gratuitous use of the inhabitants of the town for domestic purposes in the stand-pipes to be erected by the Committee under section 5.

C.—Supply of water for extinguishing Fires and cleansing Sewers and Streets.

Duty of Committee to fix fire-plugs in mains.

16. The Committee shall fix and renew and keep in effective order such fire-plugs in such of the mains and other pipes laid by them, and shall deposit keys of the fire-plugs at such places, as the Chief Commissioner by rules made under this Act, directs.

Duty of Committee to supply water for cleansing sewers and drains.

17. In all the mains and pipes to which any fire-plug is fixed, the Committee shall provide and keep constantly laid on, unless prevented by unusual drought or other unavoidable accident, a sufficient supply of water for use with fire-engines, for cleansing the sewers and drains, and for cleansing and watering the streets.

D.—Supply of Water for other than domestic purposes.

Supply for other than domestic purposes.

18. (1) The Committee may, from time to time, supply any person with water by measurement for other than domestic purposes, for such remuneration and on such terms and conditions as shall be agreed on between the Committee and the person:

Provided that—

(a) notwithstanding any such agreement, a person shall not be entitled to such a supply whenever and as long as the Committee are of opinion that the supply would interfere with the proper supply of water for domestic purposes under this Act; and

(b) the Committee shall not be liable, in the absence of express stipulation under any such agreement, to any forfeiture, penalty or damages for not supplying the water if the want of the supply arises from unusual drought or other unavoidable cause or accident.

(2) When any such agreement has been entered into by the Committee with any person, the Committee may, subject to such charges or rates as may have been fixed by the Committee at a special meeting, lay down, or allow to be laid down, the necessary communication-pipes and works, of such dimensions and character as may be fixed by the Committee, for supplying the person with water in accordance with the terms of the agreement.

E.—Pressure of Water supplied.

Pressure at which water must be kept.

19. From such a day as the Chief Commissioner, by notification in the local official Gazette, directs in this behalf, the supply of water in the mains and pipes which the Committee are required to lay under this Act shall be laid on at such pressure as the Chief Commissioner, by rules made under this Act, prescribes.

CHAPTER V.

RECIPROCAL RIGHTS OF OWNERS AND OCCUPIERS TO SUPPLY OF WATER TO HOUSES.

Power for occupier of house to require owner to provide works for water-supply.

20. (1) Any occupier holding direct from the owner of a house may, by notice in writing signed by him, require the owner of the house to construct all such works as may be necessary for bringing into the house a supply of water for domestic purposes.

(2) Every notice under this section shall contain an undertaking on the part of the occupier to pay interest at the rate of one per centum per mensem, calculated from the date of the completion of the works, on the cost of the works during the residue of his term of occupation.

(3) If the house, or the land attached thereto, does not abut upon a street in which there is a supply-main, the occupier shall undertake to pay the cost of connecting the house with the nearest supply-main.

Power for occupier to make works in default of owner.

21. (1) If the owner does not, within three months from the service of the notice mentioned in the last foregoing section, cause such works as aforesaid to be completed, the occupier may cause the works to be completed, and may by way of additional remedy deduct the cost of the works from the rent payable by him in respect of the house:

Provided that the occupier shall not recover on account of the cost—

(a) a sum exceeding the amount of six months' rent; or

(b) where the house or the land attached thereto does not abut upon a street in which there is a supply-main, the cost of connecting the house with a supply-main.

The Rangoon Water-works Act, 1884.
(Chapter VI.—Rules.—Sections 29-31.)

(2) The deduction which an occupier is authorized to make under this section shall be made by six equal monthly instalments.

(3) Interest on each instalment shall be payable to the owner by the occupier at the rate of one per centum per mensem from the time when it is deducted.

What works are sufficient for supply of water to house.

22. The works shall not be deemed sufficient for bringing into the house a supply of water for domestic purposes unless the following taps, with the necessary works in connection therewith, are provided, namely :—

(*a*) two taps in the house;

(*b*) one tap in the cook-room of, or other building attached to, the house, and

(*c*) one tap in or near the stables or other out-houses belong to the house :

Provided that, if the annual rent of the house with the buildings and land attached thereto is less than three hundred rupees, it shall be sufficient to provide one tap only, together with the necessary works in connection therewith, within the house and the buildings and land attached thereto.

Estimate and specification of works to be sent.

23. Works for introducing a supply of water to a house shall not be commenced by the owner without sending a specification and estimate of the cost thereof to the occupier, nor by the occupier without sending such a specification and estimate to the owner.

Power to refer to Committee.

24. If there is any difference between the owner and the occupier respecting the cost or the sufficiency of the proposed works, either the owner or the occupier may refer the difference to the Committee, and the written award of any officer authorized by the Committee in this behalf shall be final and binding on the owner and the occupier.

Fee on reference.

25. There shall be payable by the person making a reference to the Committee under the last foregoing section a fee (not exceeding ten rupees) at the rate of two rupees for every hundred rupees of the monthly rent of the house in respect of the water-supply to which the difference has arisen.

Duty of owner to keep works in repair.

26. *(1)* The owner of any house or land shall keep all works connected with the supply of water to the house or land in substantial repair.

(2) If the owner fails to put any such works in substantial repair after being requested by the occupier to do so, the occupier may cause the necessary repairs to be made, and may by way of additional remedy deduct the cost of the repairs from the rent payable by him in respect of the house or land.

Power for owner to recover sums payable by occupier.

27. Any owner to whom any sum is payable under section 20 or section 21 may recover the sum from the person liable to pay it as if it were rent payable by that person for the house in respect of which the expenses have been incurred.

Saving of contracts between owners and occupiers.

28. Nothing in this chapter shall affect any contract in writing between the owner and occupier of any house or land.

CHAPTER VI.

RULES.

Power for Chief Commissioner to make rules.

29. The Chief Commissioner may, from time to time, make rules consistent with this Act—

(*a*) to prescribe the size and nature of the mains and pipes to be laid and the water-works to be constructed by the Committee for the supply of water under this Act;

(*b*) to prescribe the size and nature of the stand-pipes or pumps to be erected by the Committee under this Act, and the intervals at which they must be erected;

(*c*) to prescribe the mains or pipes in which fire-plugs are to be fixed, and the places at which keys of the fire-plugs are to be deposited, by the Committee under this Act;

(*d*) to prescribe the pressure at which the water supplied by the Committee under this Act is to be laid on either generally or at specified times; and

(*e*) generally to define and regulate the powers and duties of the Committee under this Act.

Power for Committee to make rules.

30. *(1)* The Committee may, from time to time, at a special meeting, make rules consistent with this Act—

(*a*) for regulating rowing, sailing and fishing on or in the Royal Lake; and

(*b*) for preventing the waste or misuse of water supplied by them, and for defining the nature of the pipes, casks, cisterns and other apparatus to be used by every person supplied by them with water.

(2) In making a rule under this section the Committee may direct that a breach of it shall be punishable with fine which may extend to fifty rupees, and, when the breach is a continuing one, with a further fine of five rupees for every day after the first during which the breach continues.

(3) If any person, having or requiring a supply of water from the Committee, fails to comply with any rules made under clause (*b*) of this section, the Committee may refuse to supply water to him, and may cut off the water supplied to him, unless and until the rules are complied with :

Provided that the stopping or cutting off the supply of water shall not relieve any person from any penalties or liabilities which he has otherwise incurred.

Procedure for making rules.

31. *(1)* The Chief Commissioner or Committee shall, before making any rules under section 29 or section 30, publish a draft of the proposed rules for the information of persons interested.

(2) The publication shall be made—

(*a*) in the case of rules under section 29, in such manner as in the opinion of the Chief Commissioner is sufficient; and

The Rangoon Water-works Act, 1884.
(Chapter VII.—Arrears and Offences.—Sections 33-38.)

(*b*) in the case of rules under section 30, in such manner as the Chief Commissioner, by order, directs.

(3) A notice shall be published with the draft rules specifying a date at or after which the draft shall be taken into consideration.

(4) The Chief Commissioner or Committee shall, before making the rules, receive and consider any objection or suggestion which is made by any person with respect to the draft before the date so specified.

Publication of rules.

32. Every rule made under section 29 or section 30 shall be published in the local official Gazette in English and in such other language or languages as the Chief Commissioner directs, and such publication shall be conclusive evidence that the rule has been made as required by section 31.

CHAPTER VII.

ARREARS AND OFFENCES.

Arrears of water-rents.

33. All arrears of water-rents under this Act may be recovered, on application to such Revenue-officer as the Local Government may appoint in this behalf, as if they were arrears of land-revenue.

Power for Committee to turn off water on neglect to pay water tax or water rent.

34. If any person supplied with water neglects to pay—

(*a*) the water-tax leviable under the Burma Municipal Act, 1881, or

(*b*) any water-rent payable by him to the Committee,

the Committee may turn off or cut off the water from the house or land in respect of which the water-tax or water-rent is payable, by cutting off the pipe to the house or land, or by such other means as the Committee think fit, and may recover in manner provided by the last foregoing section the expense of turning off or cutting off the water from the person:

Provided that the stopping or cutting off the supply of water shall not relieve any person from any penalties or liabilities which he has otherwise incurred.

Penalty for obstructing, diverting or wasting water

35. If any person unlawfully obstructs the flow of, flushes, draws off, diverts or takes, water from any water-works belonging to, or under the management or control of, the Committee, or from any water or streams by which these water-works are supplied, or wastes any water supplied to him under this Act, he shall be punished with fine which may extend to one hundred rupees.

Penalty for unauthorized application of water.

36. If any person—

(*a*) uses for other than domestic purposes any water supplied under this Act for domestic purposes; or

(*b*) where water is supplied under section 18 for a specified purpose, uses that water for any other purpose,

he shall be punished with fine which may extend to fifty rupees, without prejudice to the right of the Committee to recover from him the price of the water misused.

Penalties for causing the water of the Committee to be fouled, &c.

37. *(1)* If any person—

(*a*) bathes in, at or upon any water-works, or washes, throws or causes to enter therein any dog or other animal, or

(*b*) throws any rubbish, dirt, filth or other noisome thing into any water-works, or washes or cleanses therein any cloth, wool, leather or skin of any animal, or any clothes or other thing, or

(*c*) causes the water of any sink, sewer or drain, or of any steam-engine or boiler, or any other filthy water belonging to him or under his control, to turn or be brought into any water-works, or does any other act whereby the water in any water-works is fouled, or likely to be fouled,

he shall, for every such offence, be punished with fine which may extend to one hundred rupees, and to ten rupees in addition for each day (if more than one) during which the offence continues.

Prosecutions.

38. Prosecutions under this Act or the rules made under this Act may be instituted by the Committee or any person authorized by them in this behalf, and not otherwise.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 10th October, 1884, and is hereby promulgated for General information :—

ACT No. XX OF 1884.

An Act to amend the Indian Salt Act, 1882.

WHEREAS it is expedient to exclude the Province of Sindh from the operation of those portions of the Indian Salt Act, 1882, which do not extend by their own operation to the whole of British India; It is hereby enacted as follows :—

XII of 1882.

Repeal of words "to the Province of Sindh" and "Province" in section 1 of Act XII of 1882.

1. From such day as the Governor of Bombay in Council, by notification in the official Gazette, fixes in this behalf, the words "to the Province of Sindh" and the word "Province," in paragraphs three and four respectively of section 1 of the Indian Salt Act, 1882, shall be repealed.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 2nd October, 1884:—

No. 14 of 1884.

A Bill to repeal the Straits Settlements Emigration Act, 1877, and to amend the Indian Emigration Act, 1883.

Whereas it is expedient to repeal the Straits Settlements Emigration Act, 1877, and to amend the Indian Emigration Act, 1883, in manner hereinafter appearing; It is hereby enacted as follows:—

1. The Straits Settlements Emigration Act, 1877, is repealed. [V of 1877.]

2. For section 102 of the Indian Emigration Act, 1883, the following section shall be substituted:— [XXI of 1883.]

New section substituted for section 102 of Act XXI of 1883.

"102. On and from such a date as the Governor General in Council may, by notification in the *Gazette of India*, fix in this behalf, a Native of India who departs by sea out of British India under an agreement to labour for hire in any protected Native State adjoining the Straits Settlements to which the notification refers shall not be deemed to emigrate within the meaning of this Act."

Power for Governor General in Council to exempt emigration to Native States adjoining the Straits Settlements from Act.

STATEMENT OF OBJECTS AND REASONS.

The main object of this Bill is to repeal Act V of 1877 (the Straits Settlements Emigration Act, 1877), which extends only to the Madras Presidency. It is dictated by the policy which recently led to the enactment of Act VII of 1883, (to repeal the British Burma Labour Law, 1876.) As in the case of Burma, it is found that there is a system of "free emigration" to the Straits which not only competes with, but altogether distances, the Government system for which Act V of 1877 provides. From the information before it, the Government of India is of opinion that that Act has impeded instead of promoting emigration, that labour flows as naturally to and from the Straits as it does between Burma and India, and that attempts to control its movement in British territory merely induce it to seek an outlet from the French ports of Pondicherry and Karikal. Such provisions as in the opinion of the Government are necessary for the protection and control of the Indian immigrant after his arrival in the Straits have been embodied in a revised Labour Regulation, which is now before the Straits legislature, and will, it is expected, shortly become law. Under these circumstances, the Government of India considers that emigration from India to the Straits should be uncontrolled by law in this country save as regards the requirements of the Native Passengers Ships Act.

2. The repeal of Act V of 1877 necessitates, however, an amendment of section 102 of Act XXI of 1883 (the Indian Emigration Act, 1883). The first sub-section of that section provides for the extension of Act V of 1877 to other parts of British India. As the Act is itself now being repealed, it is clear that this sub-section should be repealed also. The second and third sub-sections of that section give the Governor General in Council power by notification to include any of the protected Native States adjoining the Straits Settlements within

the scope of any law relating to emigration to those Settlements, and exempt, on and from the date of any such notification, emigration to the protected State specified therein from the operation of Act XXI of 1883. Though there will no longer be any special law relating to emigration to the Straits, it is deemed desirable to retain the power, which these sub-sections confer, of exempting emigration to the protected States from Act XXI of 1883. A new section has therefore been substituted by section 2 of the Bill for section 102 of Act XXI of 1883 empowering the Governor General in Council to exempt emigration to the protected States from that Act whenever he considers such exemption to be desirable.

The following Report of the Select Committee on the Bill to provide more effectually for the suppression of certain forms of Gaming in British Burma was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 25th September, 1881:—

WE, the undersigned members of the Select Committee to which the Bill to provide more effectually for the suppression of certain forms of Gaming in British Burma was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report.

From Officiating Secretary to Chief Commissioner, British Burma, No. 289 IL., dated 9th September, 1881 [Paper No. 1].
Telegram from Chief Commissioner, British Burma, dated 15th September, 1881 [Paper No. 2].

2. The following is an extract from the Chief Commissioner's telegram of the 15th instant:—

"Opinions received on Burma Gaming Bill induce me to urge following points:—

"*First*, we must make touts for *ti* punishable; so please, after word 'players' in section 4, insert words 'or who promotes the game by soliciting or collecting stakes or otherwise.'

"*Second*, I fear Courts may unduly restrict meaning of word 'place'; therefore, for first eight words in clause (2), section 3, please substitute words 'every place, whether enclosed or unenclosed.'

Thirdly, our 1st class Magistrates are few; therefore please add clause as follows:—

'The Local Government may specially authorize any Magistrate of the 2nd class to exercise the powers conferred by section 5 of Act III of 1867 on the Magistrate of the district.'

Fourthly, we want power to arrest touts in public places; therefore please add clause as follows:—

'A police-officer may apprehend without warrant any person soliciting or collecting stakes for *ti* or any other game of like nature in any public street, place or thoroughfare.'

"*Fifthly*, on advice of officers consulted, I agree that section 2 of Bill may be omitted."

3. We have adopted all these suggestions except the second; and, though the Chief Commissioner adds that he lays much stress on that suggestion, we do not think it would be possible to adopt it, at least in the shape in which he proposes it. It must be remembered that the Bill is not an independent measure, but is to be read with Act III of 1867; and, if the provisions of that Act relating to common gaming-houses be referred to, it will, we think, be found that some at least of them are such that if every "place," without any distinction or limitation whatever, was to be made a "common gaming-house," they could not fairly or reasonably be applied. It may indeed be doubted whether, apart from all consideration of the harshness which the proposed amendment would involve, some of those provisions could be applied to every "place" indiscriminately without giving rise to something approaching an absurdity.

4. We have, we need hardly say, considered whether it might not be desirable to give some extension to the definition of "common gaming-house" short of that proposed by the Chief Commissioner; but we think, having regard to English decisions on the provisions of Statutes worded in a manner somewhat similar to Act III of 1867 and the

present Bill, that the definition is as wide as it is desirable to make it. We think we may reasonably count on its being held, with reference to those decisions, to include all places which are sufficiently analogous to a house, walled enclosure or room to admit of being reasonably and fairly treated as gambling-houses for the purposes of the Act.

5. It must be remembered that the question here involved has little or no importance in practice except in its bearing on the position of persons who are induced to take tickets in the *ti*; for the managers and their assistants will in all cases be subject to severe penalties under separate provisions, which are completely independent of the definition of common gaming-house; and, as regards mere ticket-holders, it appears to us that it is sufficient if they are punishable under the common gaming-house provisions of the Bill and the Act as they now stand, and under the 13th section of the Act for gambling in public. We have, however, amended the last-mentioned section so as to give it a somewhat wider range in British Burma than it has elsewhere.

6. The publication ordered by the Council has been made as follows:—

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Report of the Select Committee on the Bill to amend the Law relating to Local Self-government in British Burma was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 25th September, 1884:—

WE, the undersigned Members of the Select Committee to which the Bill to amend the law relating to Local Self-government in British Burma was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report.

From Officiating Secretary to Chief Commissioner, British Burma, No. 678-8R.M., dated 27th September, 1883, and enclosures [Papers No. 1].
From Officiating Junior Secretary to Chief Commissioner, British Burma, No. 88-8R.M., dated 4th October, 1883, and enclosures [Papers No. 2].
From Officiating Junior Secretary to Chief Commissioner, British Burma, No. 848-8R.M., dated 17th October, 1883, and enclosures [Papers No. 3].
From Officiating Junior Secretary to Chief Commissioner, British Burma, No. 587-8R.M., dated 27th December, 1883, and enclosure [Papers No. 4].
Office Memorandum from Home Department, No. 762, dated 9th May, 1884, and enclosures [Papers No. 5].
From Officiating Secretary to Chief Commissioner, British Burma, No. 481-1G.M., dated 17th June, 1884, and enclosure [Papers No. 6.

2. The Bill as now amended by us will be seen at a glance to differ considerably from the Bill as introduced. The difference is due chiefly to three causes.

3. In the first place, there has been a change in the main plan and scope of the measure. As explained in the Statement of Objects and Reasons, the original Bill was framed with a view to the inclusion within municipalities of adjoining rural areas. This course was taken, on the advice of the Local Government, in order to meet the requirements of certain rural tracts, until such time as it might be found possible to establish a system of local boards for rural districts.

From the papers since submitted, however, it appears that, upon fuller consideration, the weight of opinion is against the attempt to include in one municipality urban and rural tracts; and the Chief Commissioner now recommends that the Bill be confined, as we believe all the Municipal Acts on our Statute-book are, to urban tracts, the matter of local self-government in rural tracts being left to be dealt with separately hereafter.

In this recommendation we concur. The difficulty of framing the provisions of the Bill so as to fit in with conditions so essentially different as those of the towns and the adjoining tracts of country has turned out to be greater than was anticipated, and the call for the establishment of a system of local self-government in the rural tracts of British Burma is not so pressing as to justify our running the risk of passing an unsatisfactory measure for the sake of at once meeting it. We have accordingly reduced the Bill to the form of a Municipal Bill pure and simple.

4. Another difference between the original Bill and the present Bill is due to our having, at the request of the Chief Commissioner, adopted the course taken by the Select Committee on the Panjáb Municipal Bill of substituting for wide general powers to make rules detailed provisions regarding nuisances and other matters affecting the public health, safety and convenience. It is in this way that most of the new sections contained in Chapters VI and VII of the amended Bill are to be accounted for.

5. Lastly, the greater light thrown upon the needs of municipal government and on the difficulties likely to present themselves in the application of a Municipal Act by the prolonged discussions which took place in the Select Committee on the Panjáb Bill has led to numerous amendments in, or additions to, the Bill of minor importance. As examples we may refer to—

Section 27 (*e*) (distribution of executive powers and duties);

Section 28 (extraordinary powers of president and vice-president in case of emergency);

Sections 44 and 88 (powers to impose a scavenging-tax and to undertake the scavenging of private premises);

Sections 51-57 (special rules applicable to taxation of immoveable property);

Sections 60 and 61 (constitution and application of the municipal fund);

Sections 65-67 (provisions relating to municipal property);

Section 138 (settlement of disputes);

Sections 151-153 (relating to notices); and

Section 158 (which confers a power to exempt a municipality from any provisions of the Act which appear unsuitable to it).

This last section, we may observe, is specially necessary in view of the numerous and somewhat elaborate provisions now contained in Chapters VI and VII, some of which would probably be unsuitable in small municipalities.

6. We have now to notice such of the more important alterations of the Bill as are not accounted for by the foregoing remarks, or as otherwise seem to call for explanation.

7. Section 12 of the original Bill, which required a member of the municipal body to vacate his seat when appointed to a salaried municipal office, and section 29, which provided for the payment of fees to members for attendance at meetings, have been omitted; the former because it is not thought advisable that any person while a member of a committee should be appointed to a salaried office under the committee, and the latter because a municipal area can now comprise only a town and its immediate suburbs, and the members of the committee, being residents of that area and not having to travel any distance to the meetings, may reasonably be expected to give their services gratuitously.

8. We have, following the course taken in the Panjáb Bill, limited the rates to be imposed for water, lighting and scavenging only by providing (in effect) that they shall not exceed what is requisite to defray the cost of the services for which they are levied; and we have, as in the Panjáb Bill, provided that the proceeds of these rates shall be carried to the one municipal fund, separate accounts only being kept, instead of constituting separate funds.

9. We have substituted for section 47 of the original Bill, which required a municipal committee to make grants-in-aid to schools in accordance with such rules as the Government might make, a section (62) specifically appropriating to educational purposes the income for schools and all sums acquired by the committee in trust for educational purposes, and further requiring the assignment for educational purposes from the general municipal revenues of such sum annually, not being more than 5 per cent. of the gross annual income of the municipality, as the Local Government may fix.

This section has been suggested by the Chief Commissioner with the view of meeting practical difficulties which have occurred in British Burma, and is, in his opinion, indispensable for the purpose of carrying out the educational policy which has recently been established in that province, and under which the municipalities, whilst relieved of police-charges, have been required to provide for the maintenance of local schools. It will be observed that the section, while it compels the committee to devote a certain minimum of its funds to educational purposes, imposes no such restriction as might have been imposed under the original section as regards the particular objects on which the money shall be spent.

10. The Chief Commissioner has in an unofficial communication proposed certain modifications in and additions to the new provisions introduced from the Panjáb Bill in Chapters VI and VII. Most of these are of minor importance, and we have in general adopted them, omitting only such as appeared to us superfluous or unnecessarily stringent. In one instance we, however, have found it necessary to omit a section of considerable importance proposed by the Chief Commissioner, namely, a section similar to section 14 of Act XLVIII of 1860 giving a certain power of control over brothels and other disorderly houses; but that section we have omitted merely because we think the matter is one to be dealt with by the Magistrates and police rather than by a municipal committee.

11. The only other point which appears to call for notice in connection with this portion of the Bill is that we have substituted two sections (126 and 127) based on similar sections in the Public Health Act, 1875, for a section proposed by the Chief Commissioner, to guard against the spread of infectious diseases through the medium of public conveyances.

12. Sections 49 to 51 of the original Bill provided for the exercise by a municipal committee or its members of certain magisterial powers in nuisance cases. We have omitted these sections for the same reasons that have led to the omission of the corresponding sections of other Municipal Bills recently before the Council, namely, that a section like section 49 could have little practical effect, and that it is not desirable that the powers given by the other two sections should be conferred.

13. We have not thought it advisable to adopt a proposal made by the Chief Commissioner that the Local Government should be empowered to invest municipal officers with the powers of police-officers for the purposes of section 34 of the Police Act (V of 1861).

14. We have added a clause to section 133 providing that the powers of control over municipalities, conferred by that section on the Commissioner and Deputy Commissioner, shall, in the case of the municipalities of Rangoon, Moulmein, Akyab and Bassein, be exercised not by those officers but by the Local Government.

15. Lastly, we have to state that we have considered a proposal of the Chief Commissioner to the effect that the appropriation provisions of the Bill should be modified in such a manner as to admit of a municipal committee subscribing to a public band or contributing to fireworks or the like on great occasions. We have not adopted this proposal, because the objects in question appear to us to lie beyond the sphere of the purposes for which municipal taxation is raised in this country.

16. The publication ordered by the Council has been made as follows :—

From Officiating Secretary to Government, Panjáb, No. 415S., dated 6th September, 1884, and enclosure [Papers No. 15].
Endorsement by Officiating Under-Secretary to Government of India, Home Department, No. 1215, dated 15th September, 1884, and enclosures [Papers No. 16].

2. We have rearranged the provisions of the Bill in a manner which we trust will make them more readily intelligible; and in the following remarks we shall as far as possible take the sections in their new order.

CHAPTER II.

THE CHIEF COURT.

3. It will be observed that under the proviso to section 8, sub-section (1), a single Judge of the Chief Court is prohibited from revising or modifying any proceeding of a lower Court except an "order" within the meaning of the Code of Civil Procedure. The restriction thus imposed does not, we believe, differ to any important extent from that contained in the corresponding provision (section 21, proviso) of the original Bill, and it relieves us of the necessity of using the phrase "interlocutory order," to which some difficulty attached.

4. We have also modified the last sub-section of section 8 by placing in the hands of the Senior Judge the power of determining which Judges of the Chief Court shall sit alone and which shall constitute benches, instead of leaving the power to be delegated by the Court to such Judge as it might think fit.

5. We have in section 14 added to the matters in respect of which the Chief Court is empowered to make rules—

(1) the translation of papers filed in the Chief Court and copying or printing any such papers or translations, and the payment by parties of the expenses thereby incurred ; and

(2) the procedure in cases where a person is entitled to inspect a record of any Court or obtain a copy of it, and the fees payable for searches and copies.

We believe that these matters have long been dealt with by the Chief Court at its discretion, and we think it well that the power to deal with them should be placed on a legal basis.

CHAPTER III.

THE SUBORDINATE CIVIL COURTS.

6. The enumeration of the subordinate Civil Courts in section 17* differs from that in section 4 of the original Bill, but the substantive changes involved are smaller than might at first sight be supposed.

* (a) The Divisional Court.
(b) The Court of the District Judge.
(c) The Court of the Subordinate Judge.
(d) The Court of the Munsif.

The Divisional Court corresponds, with certain modifications, which we shall presently have to notice, to the Divisional Court of the original Bill.

7. The District Judge corresponds to the Assistant Judge of the original Bill, but his position as controlling the administration of civil justice in the district in somewhat the same manner as the District Magistrate under the Criminal Procedure Code controls the administration of criminal justice is more clearly brought out; and (section 23) his Court is, subject to certain exceptions, made the District Court for the purposes of those Acts which confer special powers on a District Court.

8. The Subordinate Judge corresponds to the Subordinate Judge of the first class of the original Bill, but we have, instead of fixing a pecuniary limit to his jurisdiction as in section 36 of the original Bill, empowered the Local Government to do so (section 26). It will thus be in the power of the Local Government to limit the jurisdiction of a Subordinate Judge to any sum it thinks fit, or to confer upon him the unlimited jurisdiction exercised by a District Judge in original suits.

9. The Munsif of the amended Bill is intended to comprise the second, third and fourth classes of Subordinate Judges of the original Bill, and his powers in original suits have been dealt with in a manner similar to that just described; that is to say, it is left (section 26) to the Chief Court to invest each Munsif with such powers as it thinks fit, provided that the limit of value does not exceed Rs. 1,000, which was the limit for Subordinate Judges of the second class under section 36 of the original Bill.

10. It will be observed that section 19 introduces an important change as regards the constitution of the Divisional Court; but as that change will be more conveniently explained when we come to speak of the appellate jurisdictions, it only remains to notice here that we have in the proviso to section 21 put the restriction on the powers of one of several Judges of a Divisional Court sitting alone on the same footing as the similar restriction in the case of the Chief Court (*supra*, paragraph 3).

11. We have inserted a new section (29), similar to section 27 of the Bengal Courts Act, providing for the transfer to a Subordinate Judge or Munsif of business under Act XXVII of 1860, Act XL of 1858 and Act IX of 1861.

12. In the section (now 30) which empowers the Local Government to confer the powers of a Small Cause Court Judge on certain judicial officers, we have, as in other cases, omitted all minute specification of pecuniary limits, and simply provided that the Local Government may confer such powers as it thinks fit within the limit of Rs. 500.

13. In dealing with a Bill of this description it is impossible to overlook the difficulties which present themselves in connection with the valuation of certain classes of suits for the purpose of determining the original jurisdiction and the course of appeal. The question of the simplest mode of valuing suits for the recovery of land is at present under the consideration of the Government of India, and we have not accordingly felt ourselves called upon to take it up; but there are certain other classes of suits which in the absence of any special provision for their valuation would be left in a very unsatisfactory position, namely, suits the subject of which does not admit of valuation on any intelligible basis. Such suits are usually valued at some low figure, and consequently may be heard without any reference to their importance or difficulty by Courts of the inferior grades. The necessity for making some special provision for them on the present occasion is the greater, inasmuch as, under the present Bill, the course of appeal will depend to a greater extent than before on the valuation.

We have accordingly introduced a new section (32) providing that, where the subject-matter of suits of any class is such that in the opinion of the Chief Court it does not admit of being satisfactorily valued, the Chief Court may, with the previous sanction of the Local Government, direct that such suits shall be treated as if the subject-matter were of such value as the Chief Court thinks fit to specify in this behalf.

14. The only other provision of this chapter which appears to call for notice is section 38. As we have explained, it is intended that the District Judge should have the general control of the administration of civil justice throughout his district; but there may be cases, as *e.g.*, that of Kulu, in which it would be convenient to delegate this control to a Subordinate Judge in some outlying portion of the district in somewhat the same way as certain powers of a District Magistrate are delegated to a Sub-divisional Officer under the Code of Criminal Procedure; and accordingly a power to effect such a delegation has been taken.

CHAPTER IV.

APPELLATE JURISDICTION IN CIVIL CASES.

15. We have omitted the words in the opening section of this chapter which conferred a power to place other classes of suits on the same footing as mufassal small causes for the

purposes of appeal, the object in view being now sufficiently met by the new definition of "small cause" (in section 3). which gives power to place small causes within the meaning of the Presidency-towns Small Cause Courts Act on the same footing as mufassal small causes.

16. We have, moreover, restricted this section, as we have the entire chapter, to appeals from decrees as distinguished from orders, the latter being sufficiently provided for by the Code of Civil Procedure.

17. The subject of further appeals, which is dealt with in the following section, is one which has given rise to much discussion, and which is surrounded on all sides with difficulties of a serious nature. We have given to it the most careful and prolonged consideration, and have come to the conclusion that the right of further appeal allowed by the Bill as introduced must be extended in some important particulars.

The Bill as introduced allowed a further appeal from the appellate decree of a Divisional Bench only in two cases, namely, if the Judges differed *or* if some question of law or custom or of general interest was involved; and in these cases it did not allow the appeal as a matter of right, but only if both Judges, or when one had left the Court, the remaining one, certified that the case was of sufficient importance to justify a further appeal. Under the Bill as now amended a further appeal will lie as a matter of right and without any certificate from a Divisional Bench in all cases where the Judges differ. There will, moreover, be a further appeal in all cases in which any one Judge certifies that there is a question of law or custom or general interest involved, and that the case is in his opinion of sufficient importance to justify a further appeal. And, lastly, there will be a further appeal in cases of a class altogether new and not contemplated in the original Bill, namely, where the value of the suit exceeds Rs. 500.

The proviso barring a further appeal in small causes when the value does not exceed Rs. 500 is retained.

18. We have, as already indicated, made another alteration which is of considerable importance, and which it is convenient to notice here.

The Bill as introduced required that the Divisional Courts should consist in all instances of at least two Judges, that except as expressly provided no decision should be reversed except by a bench of two Judges, and that the restrictions on further appeal which we have described should apply to all Divisional Courts. To that objection was taken on the ground that there may be a difficulty in finding in the Panjáb a sufficient number of competent officers to furnish two Judges for each of the Divisional Courts proposed. We need hardly say that if the objection were well-founded it would be a serious one, inasmuch as the strict limitations on the right of further appeal to the Chief Court imposed by the original Bill were framed in reliance on the strength of the Divisional Benches; and though those limitations have now been relaxed in the important particulars already described, the Bill still proceeds on the assumption that a Divisional Bench will be a stronger, more reliable and more satisfactory tribunal than the Court of a Commissioner ordinarily now is.

19. It is of course impossible for us to say whether the precise number of competent officers required to constitute Benches in all the proposed Divisions is to be found in the Panjáb at this moment, but we understand that the Lieutenant-Governor has no misgivings on the point, and we think it may be safely affirmed that the difficulty of procuring a sufficient number of competent officers for the Benches has been much exaggerated.

In order, however, to guard against every possibility of miscarriage, we have now modified the Bill in such a way that, if the Lieutenant-Governor finds, at any time, that the materials required for establishing a Bench in any particular Division are not immediately available, he can make the Divisional Court there consist of a single Judge (section 19), and in the event of his doing so a further appeal will, subject only to the proviso as to small causes contained in section 40, lie from that Judge's appellate decrees precisely as they lie at present from the appellate decrees of a Commissioner [section 40, clause (*b*)].

CHAPTER V.

REVENUE COURTS.

20. We have recast this chapter, assimilating it in form and arrangement to the portion of the Bill relating to Civil Courts, and supplying certain omissions in details, as, *e. g.*, provisions relating to ministerial officers, which it seems unnecessary to notice more particularly.

21. We have omitted from the list of suits cognizable by Revenue Courts given in the first section the so-called suits under section 49 of the Panjáb Tenancy Act, inasmuch as we find on reference to that Act that the proceedings in question are not suits but applications, and we think that the proper mode of dealing with them is to include them among the applications to be heard on the revenue side which are specified in section 42 of that Act, and from which they were apparently omitted by an oversight. We have accordingly added a section (75) to the Bill amending section 42 of the Tenancy Act so as to include them.

22. We have added to the list of suits cognizable by Revenue Courts "suits to determine disputes regarding boundaries of land" (*i.e.*, of agricultural land) "which have been fixed by

a Court or Revenue-officer." This addition has been advocated by several of the authorities consulted, and it appears to us to be a proper one, seeing that all that is ordinarily required for the decision of such disputes is the laying down on the ground of a boundary which is to be found in a map.

23. On the other hand, we have appended to the section a proviso which empowers the Local Government, after consulting the Chief Court, to retransfer to the Civil Courts the jurisdiction in any class of revenue cases cognizable in any part of the country where it appears desirable to do so.

24. We have for convenience sake divided the classes of suits into two groups, and at the instance of the Local Government included class (*d*), suits for ejectment of a tenant, in the group containing suits deemed to be of greater importance or difficulty.

25. We have in defining the powers of Assistant Commissioners and Tahsíldárs [section 46 (2)], following the same course as in the provisions relating to original civil jurisdiction, omitted all minute specification of pecuniary limits, and left it to the Local Government to fix those limits as it thinks fit.

26. We have for the same reason as in the preceding chapter omitted all reference to appeals from orders.

27. We have introduced a clause in the proviso to section 47, based on similar provisions in the Rent Laws of Bengal and the North-Western Provinces, giving power to bar appeals from decrees of certain classes of officers in money-suits when the amount involved does not exceed Rs. 100 and no question of importance, such as a question of title, is involved.

28. We have added a section (51) empowering the Local Government to confer on any person the judicial powers, original or appellate, of a Financial Commissioner, Commissioner or Deputy Commissioner under this chapter.

29. We have, in order further to provide a means of relieving the Revenue Courts of the necessity of disposing of particular matters which may be found to be more proper for consideration by the Civil Courts, introduced two new sections (54 and 55).

The first of these is copied with certain modifications from section 208A of the North-Western Provinces Rent Act, 1881, and is intended to take the place of section 49 of the original Bill, which has been the subject of adverse criticism. It empowers a Revenue Court, when it considers that any question in issue before it is more proper for decision by a Civil Court, to require any party to institute a suit in the Civil Court with a view to obtaining a decision on the question. If he fails to comply with the requisition, the Revenue Court is empowered to decide the question against him, but is not bound to do so, as under the corresponding provision of the North-Western Provinces Act. If the party institutes the suit in the Civil Court, the Revenue Court will follow the decision of that Court.

30. It has been suggested that any provision of this sort is superfluous, inasmuch as a Revenue Court being a Court of limited jurisdiction, and its decision in one case being accordingly, under section 13 of the Code of Civil Procedure, binding in other cases only to a limited extent, it may safely be compelled to decide all questions arising incidentally in any suit before it, even though they may be questions which would be obviously more proper for the consideration of a Civil Court.

To this view of the matter we are unable to assent.

31. It is undoubtedly true that in many cases, probably in the great majority of cases, it is best for all parties that the Revenue Court should take upon itself to decide all questions incidentally arising in the suit, even though some of them might be of a nature more proper for the consideration of a Civil Court. This would clearly be the right course for the Revenue Court to take when the question is a simple one and can be quickly disposed of, or when it is one not likely to arise subsequently between the parties in any other connection; but it seems equally clear that when, as must occasionally happen, some complicated and difficult question arises in a revenue-suit, and is certain to arise again between the parties unless it is finally settled, a Revenue Court ought to be allowed some discretion of the sort proposed. For, if some such discretion is not allowed, what must be the result? The question must be tried out at a great expenditure of time and money to all concerned by the Revenue Court, which *ex hypothesi* is not the best Court to try it. It may then go in appeal to the higher Revenue Courts, probably in the last resort to the Financial Commissioner, and, after all, as the decision obtained will not be binding except for certain limited purposes, the whole litigation may commence *de novo* and run a similar course through the Civil Courts.

It is in order to provide a means of avoiding scandals of this sort that we have introduced the section in question.

32. We are quite aware that the power it confers might be abused by an indolent Revenue-officer if he were free to resort to it at pleasure, but we have guarded against this by making the sanction of the immediately superior Court a condition precedent to its exercise.

33. Section 55, to which there is nothing corresponding in the original Bill, empowers the Financial Commissioner to refer to the Chief Court a point of law which he considers that Court is more competent to decide.

34. We trust that these two sections and the proviso which we have appended to section 45 (see *supra*, paragraph 23) will suffice to remove the apprehensions which have been expressed in some quarters that the Bill may force upon the Revenue Courts duties which they will be incompetent to discharge.

CHAPTER VII.

SUPPLEMENTAL PROVISIONS.

35. We have omitted section 63 of the original Bill, which provided for consultations between the two Financial Commissioners, as it is unnecessary to provide for such a matter by legislative enactment and the proposal to do so gave rise to some misapprehension.

36. We have likewise omitted section 66 of the original Bill, which expressly prohibited a judicial officer from disposing of a case in which he might appear to be interested. We are aware that such provisions have long found a place in our Courts Acts, but we think the matter is one on which legislation may well be dispensed with, the general principles applicable to it being perfectly well understood.

37. Section 68 of the original Bill, which reproduced section 48 of the present Panjáb Courts Act, gave power to the Government to appoint a single Judge to exercise the Chief Court's superintending functions. This power has never been exercised, and we are informed that the Government have no desire to retain it. We have accordingly omitted the section.

38. Sections 73 and 74 of the original Bill, which provide for the enhancement of the court-fees upon applications to the Chief Court for revision under section 622 of the Code of Civil Procedure, were introduced with a view to discouraging such applications. We fully approve of their provisions and have retained them in the revised Bill. From statistics put before us by our hon'ble colleague Mr. Barkley it appears that such applications have of late been increasing to a formidable extent in the Panjáb; and, as observed by him when he asked for leave to introduce the Bill, they are certain to increase with greater rapidity if the provisions of the Bill, which give greater finality to the decisions of the Lower Appellate Courts, become law. Moreover, from the circumstance that only about one-sixth of the applications now made to the Chief Court are successful, it may be gathered that Panjáb litigants when debarred from appealing are tempted to incur the serious trouble and expense involved in making such applications, even where there may not be the slightest prospect of success. This appears to us to be a serious evil, and the only question has been whether the increase of the court-fee proposed in the original Bill would be enough to check it. The better opinion appears to us to be that it would have but a slight effect in that direction, and that nothing short of an alteration of section 622 of the Code as applied to the Panjáb will suffice.

39. We find that a considerable divergence of opinion has arisen between some of the highest Courts in the country as to the nature of the grounds required to support an application under that section. A full bench of the Allahabad High Court has held (I. L. R. 3 All. 203) that any grounds on which a second appeal would lie are sufficient. The practical result of this, as admitted by two of the learned Judges, is that section 622 of the Code gives a second appeal in all those cases in which the earlier sections of the Code expressly deny it. It may, no doubt, be said that the Court has a discretion under section 622 to interfere or not as it thinks fit, but we apprehend that as a rule a High Court holding the opinion just referred to, and finding what would be a good ground for special appeal made out, would be in practically the same position as if it were considering a special appeal under section 551.

40. A view which is probably more in accordance with that of those who framed the section was taken by a full bench of the Bombay High Court in a case reported in I. L. R. 7 Bom. 341. The conclusion to which the Court came in that case may be stated to be that the jurisdiction conferred by section 622 of the Code is an extraordinary jurisdiction to be exercised only in extraordinary cases, and that the precise circumstances under which it is to be exercised is left to the discretion of the Court and cannot be defined.

The question has not yet come before a full bench of the Panjáb Chief Court. It is impossible to predict what the result of its being fully considered by that Court would be; and, having regard to its intimate connection with the working of the present Bill, we do not think the matter should be left in uncertainty.

41. The root of the difficulty which has sprung up in connection with the section appears to lie in that portion of the wording introduced into the Code by Act XII of 1879, which empowers the High Court to interfere on the ground that the Lower Court has acted "illegally." The Allahabad High Court has construed this as justifying the High Court's interference whenever the Court below has erred on a question of law, and it is on this point mainly that the Bombay Court has dissented from the Allahabad decision. The divergence of opinion will no doubt have eventually to be met by an amendment of the Code, but the matter is not very pressing, where, as in most parts of the country at present, the proportion of cases in which appeals to the High Court are barred is comparatively small and a tendency to resort recklessly to the section has not developed itself among litigants.

42. In the Panjáb, on the contrary, the question is already pressing, and will become more so if this Bill is passed. We are therefore compelled to deal with it separately for that province; and the conclusion to which we have come after the most careful consideration, and having regard to the special circumstances of the Province and the peculiar features of the appellate system now proposed, is that the extraordinary jurisdiction conferred by section 622 of the Code should be exerciseable only on the ground that the lower Court has exercised a jurisdiction not vested in it by law, or has failed to exercise a jurisdiction so vested, or has acted in the exercise of its jurisdiction with material irregularity. We propose, therefore (section 70 of the Bill), to limit the scope of section 622 of the Code in this way, and we believe that when so limited it will still be sufficiently wide to cover all cases which call for the exercise of revisional as distinguished from appellate jurisdiction.

43. The publication ordered by the Council has been made as follows :—

In English.

Gazette.	*Date.*
Gazette of India ...	... 5th, 12th and 19th July, 1884.
Panjáb Government Gazette ...	... 10th, 17th and 24th July, 1884.

In the Vernacular.

Province.	*Language.*	*Date.*
Panjáb	... Urdu	... 28th July, and 4th and 11th August, 1884.

We do not think that the measure has been so altered as to require republication, and we recommend that it be passed as now amended.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, Simla, on Thursday, the 2nd October, 1884.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.G., G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble J. W. Quinton.
The Hon'ble D. G. Barkley.

STRAITS SETTLEMENTS EMIGRATION ACT, 1877, REPEAL, AND EMIGRATION ACT, 1883, AMENDMENT, BILL.

The Hon'ble SIR STEUART BAYLEY introduced the Bill to repeal the Straits Settlements Emigration Act, 1877, and to amend the Indian Emigration Act, 1883, and moved that it be circulated for opinion.

The Motion was put and agreed to.

The Hon'ble SIR STEUART BAYLEY also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English and in such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

BURMA GAMING BILL.

The Hon'ble MR. ILBERT moved that the Report of the Select Committee on the Bill to provide more effectually for the suppression of certain forms of Gaming in British Burma be taken into consideration. He said:—

"We have not made many alterations in this Bill. The authorities of British Burma do not think it necessary to make the game of *ti* a lottery within the meaning of the Penal Code, and consequently we have omitted the section to which my hon'ble friend Mr. Barkley took exception on the introduction of the Bill.

"The Chief Commissioner has suggested one or two minor amendments, all of which we have adopted with one exception. He suggests that we should extend the meaning of the term 'common gaming-house' by adding to the words 'house, walled enclosure, room or place' the words 'enclosed or unenclosed.' It is difficult to say precisely what the word 'place' would or would not include in this connection. The English Courts, in construing similar expressions in the English Lottery Acts, have given the word a very wide interpretation, and their decisions, though not binding on the Indian Courts, would probably be looked to

as a guide. *But I think that the addition proposed by the Chief Commissioner* would extend the meaning of the term 'common gaming-house' further than we are warranted in extending it, would be inconsistent with the mode in which the expression is used throughout the Act of 1867 and would lead to confusion. Nor is the addition necessary, because under the Bill the professional gambler can be punished wherever he carries on his operations. And there is a section of the Act of 1867 under which light but sufficient penalties can be imposed on ordinary players in places like highways. We have, however, altered the language of this section so as to give it a somewhat wider range in British Burma than elsewhere."

The Motion was put and agreed to.

The Hon'ble MR. ILBERT also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

BURMA MUNICIPAL BILL.

The Hon'ble MR. ILBERT also moved that the Report of the Select Committee on the Bill to amend the law relating to Local Self-government in British Burma be taken into consideration. He said:—

"This measure has been for some time before a Select Committee, and it will be seen that there are some considerable differences between the Bill as introduced and the Bill as now amended. These differences are due mainly to three causes.

"In the first place, we have confined the scope of the measure to municipalities proper. The original Bill contained a provision inserted on the advice of the Chief Commissioner, Mr. Bernard, and of Mr. Crosthwaite when officiating in his place, which enabled the Local Government to include within the limits of a municipalty not merely a town but also any tract of country adjoining a town. The object of this provision was to meet the requirements of certain rural tracts until such time as it might be found possible to establish a system of local boards for rural districts.

"But it appears from the papers which have been submitted to us that on fuller consideration the weight of opinion is against the attempt to include in one municipality urban and rural tracts, and that the difficulty of framing provisions suitable both to town and to country is greater than had been anticipated. Accordingly we have adopted Mr. Bernard's recommendation that the Bill be confined, like other Municipal Acts, to urban tracts, the matter of local government in rural tracts being left to be dealt with hereafter.

"In the next place, we have followed the precedent set in the new Panjáb Municipal Act by substituting for a power to make bye-laws about nuisances detailed provisions on that subject. We submitted for the consideration of the Chief Commissioner the clauses for that purpose which had been settled by the Select Committee on the Panjáb Bill; and it is with his full approval that they have been inserted with a few modifications suggested by local circumstances. There is, as in the Panjáb Act, a power to exempt a municipality from such of the provisions as may be considered unsuitable to small places.

"And, lastly, we have further availed ourselves of the labours of the Committee on the Panjáb Bill by adopting several of the modifications and additions which had been suggested and approved in the course of the long discussions on that Bill. Most of these amendments are of minor importance, and, as they are noticed in our report, I need not dwell on them now. I will only say that they have not been adopted without full communication with the Chief Commissioner.

"There is, however, one section to which, as it deals with a subject of some importance, and as it does not follow quite the same lines as the provisions on the same subject in other Municipal Acts, I ought to direct the attention of the Council.

"By a section in the original Bill municipal committees were required to make grants-in-aid to schools in accordance with rules made by the Local Government. For this we have substituted a section specifically appropriating to

educational purposes the income from schools and all sums acquired by the committee or board for educational purposes, and further requiring the assignment for educational purposes of such sum annually, not being more than five per cent. of the gross annual income of the municipality, as the Local Government may direct. This section is, in the opinion of Mr. Bernard, indispensable for the purpose of carrying out the educational policy which has recently been established in British Burma, and under which municipalities, whilst relieved of police-charges, are required to provide for the maintenance of local schools. The same policy, as the Council are aware, has been carried out, or is in course of being carried out, in other parts of India, and the way in which it is carried out is usually to strike a bargain with the municipality and not to relieve it of its police-charges except on condition of its undertaking burdens for other objects. It may possibly be that, when Burma municipalities were relieved of their police-charges, sufficient care was not taken to impose a similar stipulation, or to make its meaning clear; but, however this may be, it appears from the papers which were laid before the Committee that in the case of one municipality practical difficulty has been experienced in securing the due appropriation of sufficient funds to educational purposes, and it is to meet difficulties of this kind that this section has been introduced."

The Motion was put and agreed to.

The Hon'ble Mr. Ilbert also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

RANGOON WATER-WORKS BILL.

The Hon'ble Mr. Ilbert also presented the Report of the Select Committee on the Bill to confer powers and impose duties on the Municipal Committee for the Town of Rangoon in respect to the construction and maintenance of Water-works and the supply of Water in that Town.

PANJÁB COURTS BILL.

The Hon'ble Mr. Barkley moved that the Report of the Select Committee on the Bill to amend the law relating to Courts in the Panjáb be taken into consideration. He said:—

"As little more than three months have elapsed since leave was given to introduce this Bill, I need not repeat the explanation I then gave of the purposes for which it was proposed to alter the law relating to Courts in the Panjáb; but, before proceeding to notice the changes in substance which the Select Committee have made in the Bill, it may be well to mention, as there seems to have been some misunderstanding on this point in some quarters, that the reference in the preamble to the previous sanction of the Secretary of State was not intended to preclude discussion of the principles involved in the Bill, but only to show that, in continuing the jurisdiction of the Chief Court over European British subjects in capital cases, this Council would not be exceeding the limits placed upon its legislative powers by section 22 of the Indian Councils Act, 1861, and section 46 of the Statute of 3 & 4 Wm. IV, c. 85. Possibly the words were not necessary, as the jurisdiction in question was conferred on the Chief Court in 1866; but when the Act constituting the Chief Court, which was passed in that year, was repealed and this jurisdiction continued by Act XVII of 1877, the sanction of the Secretary of State was recited in the preamble of that Act, and we have followed the same course in the present Bill, lest the omission of the words should give rise to misapprehension.

"Coming now to the changes made in the Bill by the Select Committee, the only point I need notice in the preliminary chapter is the power which the definition of 'small cause' gives to the Chief Court, with the sanction of the Local Government, to add for the purposes of appeal other classes of suits to those which are made cognizable by Small Cause Courts by Act XI of 1865. A power of this nature was proposed to be taken in section 42 of the Bill as introduced, the reason being that, while it appeared desirable to divide suits into two classes for the purpose of determining the course of appeal,

the definition of the suits cognizable by Small Cause Courts contained in section 6 of Act XI of 1865 did not form an altogether satisfactory basis for this division, and it was therefore thought expedient to provide a means of effecting the division on a different basis. It is probable that, when the Mufassal Small Cause Courts Act comes to be amended, it may not be necessary to retain this power; and in the meanwhile the definition adopted by the Select Committee indicates how the power is intended to be exercised by excluding those classes of suits in which the Presidency Small Cause Courts have not jurisdiction.

"In the chapter relating to the Chief Court, the principal change is that the proviso to the first sub-section of section 8 is now framed so as not to restrain the Chief Court from making rules allowing one Judge of the Court sitting alone to reverse any order within the meaning of the Civil Procedure Code. This was thought more convenient than to specify in the Bill the classes of orders which a single Judge might or might not be allowed to reverse.

"Section 19 of the original Bill has been omitted, as it appeared to be sufficiently provided for by sections 25 and 647 of the Civil Procedure Code, and a change in the language of section 12 has made it unnecessary to retain section 32, while it was thought that section 33 and a part of 31 would find a more appropriate place in a Bill amending the Civil Procedure Code than in that now before the Council.

"In the chapter relating to the Subordinate Civil Courts, the designations of those Courts have been changed so as to meet the wishes of the Local Government and give effect to the suggestions of a number of the officers whose opinions on the Bill were invited. The District Judge appeared to be a more appropriate title than the Assistant Judge for the officer whose Court will be the principal Court of original jurisdiction in a district, and who will control the other Courts of the district and hear appeals from them in certain cases; and it was thought better to retain the title of Munsif, which is borne by a large number of the officers who preside over Courts of first instance, than to designate the Courts of these officers as Courts of Subordinate Judges of particular grades.

"With regard, however, to the importance of some of the functions which the legislature has vested in the District Court, which in other Provinces is the highest Court subordinate to the High Court, section 23 makes the Divisional Court for the purposes of the Indian Divorce Act the District Court for all districts comprised in the division, and enables the Local Government to direct that any other functions of the District Court of any district should be exercised by the Divisional Court. The Bill as introduced made the Divisional Court the District Court, but provided for cases in which the powers of the District Court might more conveniently be exercised by a local Court by enabling the Local Government to confer any of the powers of a District Court upon a Deputy Commissioner or Assistant Judge. Under the section as now framed the same result may be attained, though it will be reached by a different route.

"A more important change is that the Divisional Court may consist of one or more Judges, the Bill as introduced having provided for its consisting in all cases of two Judges at least. The constitution of Appellate Courts subordinate to the Chief Court and consisting of more than one Judge is an experiment to this extent at least that we have hitherto had no experience of how such Courts may be expected to work; and, in addition to this, the sanction which has been given for the appointment of 13 Divisional Judges would not admit of the constitution of more than six Courts of two Judges each, unless some of the Judges are appointed in addition to other duties—an arrangement which may not always be found convenient. It therefore seemed desirable to give greater elasticity to the Bill by allowing a Divisional Court to consist of one Judge if, with reference to the circumstances of the case, the Local Government thinks this expedient or necessary. When it consists of more than one Judge, the Chief Court is enabled by section 24 to make rules for the exercise of the powers of the Court by one or more of the Judges, subject to a proviso similar to that which limits the exercise of the powers of the Chief Court by one Judge of that Court.

"As in the case of the Divisional Judges, the District Judge may be an officer holding that appointment in addition to other duties; for instance, the Deputy Commissioner of the district. This is necessary, as, while the scheme sanctioned by the Secretary of State for India provides 23 officers, any of whom, if considered fit to control the Subordinate Courts, might be appointed District Judge of one or more districts, some of the officers at present available for these appointments have not the training and acquirements which would admit of their being entrusted with advantage with the control of Subordinate Courts; and there are also some districts the judicial work of which is not enough to employ a separate District Judge, while they are not favourably situated for union with neighbouring districts for judicial purposes. As an instance of districts of this class I may mention Kohat, which is separated from Peshâwar, the district with which it has most affinity, by a pass situated in independent territory.

"The officers who could not be invested with controlling powers over all the Courts in a district will still be available as Subordinate Judges, and in addition to their original jurisdiction, which will be without limit as to value or amount, unless the Local Government thinks fit to impose a limit, they may be invested with the appellate jurisdiction of a District Court.

"The Chief Court is also enabled, by section 29, to authorize any District Court to transfer certain classes of proceedings which must be instituted before a District Court to a Court subordinate to it, and to withdraw them from such Court. The largest of these classes is that of applications for certificates for the collection of debts due to the estates of deceased persons—applications which are very numerous in some districts and which in most cases relate to comparatively small amounts of money. A more important class, however, is that of applications relating to the guardianship of minors, which numbered 375 in 1883, more than one-third of this total occurring in four districts.

"A power has also been taken, which may be convenient in outlying tracts, such as Kulu, where sub-divisional officers are posted, for District Courts, with the sanction of the Local Government, to delegate to a Subordinate Judge certain powers of control and transfer of business.

"While we have abstained from dealing with the mode of determining the value of suits for purposes of jurisdiction, which, in cases relating to land, is often very different from the value assessed for the purposes of the Court-fees Act, we have added a definition of 'value,' declaring it, in accordance with what has always been held by the Superior Courts where the pecuniary limits of jurisdiction are in question, to be the amount or value of the subject-matter of the suit; and we have by section 32 enabled the Chief Court, with the previous sanction of the Local Government, to regulate the jurisdiction over suits the subject-matter of which does not admit of being valued in money, such as suits relating to marriage or divorce, and suits for injunctions and for some other kinds of specific relief. This will provide a means of preventing Courts of the lowest grades from adjudicating upon suits the question involved in which is really of great importance, though, as no money-value can be fixed, they cannot be said to be beyond the pecuniary limits of the jurisdiction; and, as is pointed out in the Report of the Select Committee, the course of appeal will also in some measure depend upon the directions which may be given under this power.

"One of the greatest changes in the law which was proposed in the Bill as introduced consisted in the restrictions which it put on the right of appeal; and no part of the Bill has given rise to more discussion both in the public Press and in the opinions which have been received through the Local Government. The effect of the provisions of the chapter relating to appellate jurisdiction, as it originally stood, was that both the second appeals allowed by the general law, and the further appeals given in certain cases by the Panjáb Courts Act now in force, were taken away, while the Judges of the Divisional Court were empowered to permit a further appeal to the Chief Court when they were unable to concur in the decree to be passed, or when some question of law of custom or of general interest was involved, if they thought the case of sufficient importance

to justify a further appeal. *After considering the objections raised in various* quarters to these restrictions upon appeals from appellate decrees, the Select Committee has come to the conclusion that a further appeal must be allowed as of right in certain cases, one of which, that of a Divisional Court consisting of a single Judge, was not contemplated in the original Bill. In this case a further appeal is given if the decree in the original suit is varied or reversed by the Divisional Court, unless when the original suit was a small cause not exceeding Rs. 500 in value. This differs from the present law only in fixing a higher limit of value than Rs. 50 for the small causes, in regard to which no further appeal is admitted. The further appeal when the Judges of the Divisional Court differ as to the decree to be passed is also given as of right, and not made subject to the permission of that Court; and a further appeal is also given in all suits exceeding Rs. 500 in value or which directly involve claims to property exceeding that value. In cases of smaller value, not being small causes, a Judge of a Divisional Court is still enabled to permit a further appeal to the Chief Court, when he can certify that a question of law or custom or of general interest is involved, and that the case is in his opinion of sufficient importance to justify a further appeal. A period of thirty days has been prescribed within which this certificate must be applied for, unless sufficient cause can be shown for not presenting the application within that period.

"The next chapter, which transfers to Revenue Courts the jurisdiction now possessed by the Civil Courts in certain classes of cases, has been objected to in some quarters, especially by members of the legal profession. This transfer was, however, recommended by a Committee which sat at Lahore in 1882, of which one of the Judges of the Chief Court was president, and several other officers of great experience, including another Judge of the Chief Court and the Financial Commissioner, were members; and they made this recommendation 'after careful consideration of the agency in the Panjáb best fitted for the disposal of suits relating to land.' Of the many Judicial and Revenue Officers whose opinions have now been obtained, only one has objected to the proposed transfer; and as the classes of suits specified are those which can be most satisfactorily dealt with by officers possessing revenue experience, and exercising authority in revenue matters, and the procedure will be the same as if they were tried in the ordinary Civil Courts, unless so far as the Local Government, with the previous sanction of the Governor General in Council, may by rule prescribe any modification of that procedure, the transfer of jurisdiction does not appear to be open to any serious objection, but on the contrary has a good deal to recommend it. It is to be remembered also that it has not been proposed to deprive Tahsíldárs or Assistant or Extra Assistant Commissioners, by whom these cases will ordinarily be decided in the first instance, of their civil jurisdiction; and the officers trying the cases will therefore be officers who could have tried them if they had continued to be cognizable by the Civil Courts. The main difference then will be that the trial of these cases by officers possessing revenue experience will be secured, and that the appeals will lie to the superior Revenue authorities and not to Civil Courts of appeal.

"We have added one class of cases, namely, suits relating to boundary-disputes where the boundary has previously been determined by a Court or Revenue-officer, to those transferred to the Revenue Courts, as a local inspection is often necessary before such suits can be properly decided, and Revenue-officers in the course of their ordinary duties would have greater facilities for such an inspection than the more stationary Civil Courts.

"We have, however, qualified the transfer of jurisdiction by adding a power to the Local Government, after consulting the Chief Court, to direct that suits of any of the classes specified arising in any local area should be heard by the Civil and not by the Revenue Courts.

"We have also empowered the Local Government to bar appeals from the decrees of Assistant Commissioners in suits of certain of the classes specified when the claim is of a pecuniary nature and does not exceed one hundred rupees in amount, and no question of title or question the importance of which extends beyond the subject-matter of the particular suit is involved.

"*Instead of section 49 of the original Bill, which provided for staying proceedings* when a question of proprietary title or of the existence of the relation of landlord and tenant between the parties was involved, to enable the decision of a Civil Court upon the question to be obtained, as, on considering the criticisms which have been made on that section, there appeared to be objections to the course proposed, we have adopted a section (54) founded on section 208A of the North-Western Provinces Rent Act, 1881, but differing from that section in requiring the sanction of a superior Revenue Court to be obtained before a party is directed to sue in a Civil Court, and in not obliging the Revenue Court to decide the question against the party directed to sue if he fails to institute the suit within the time allowed for the purpose, though it is enabled to do so if it thinks fit. The first of these changes will furnish a check upon improper orders being passed under this section, such as an order directing a civil suit to be brought to decide a question which the Revenue Court might properly decide for the purposes of the suit before it, or directing a party to sue to establish his title to property when he might safely rely on his possession and leave any person contesting his title to sue him. The second leaves to the Court a discretion similar to that which it has under section 158 of the Civil Procedure Code. If, for example, the person directed to sue is advised that it would not be advisable for him to institute a civil suit within the time allowed for the purpose, he may apply for leave to withdraw the suit pending before the Revenue Court with permission to sue again, and that Court may then refrain from deciding the question and pass an order under section 373 of the Code. These changes to a great extent remove the objections which I felt to adopting the section as it stood in the North-Western Provinces Act, and there may be some cases, for instance, where a question of the fact or the validity of an adoption incidentally arises in a rent-suit, in which the power given by it will be useful.

"We have added another section (55) enabling the Financial Commissioner to make a reference to the Chief Court of the same nature as that which a subordinate Civil Court whose decree would be final may make under section 617 of the Civil Procedure Code. He will thus have the means of obtaining the decision of the Chief Court on difficult questions of law or usage having the force of law or of the construction of documents arising before him.

"We have not thought it necessary to retain section 58 of the original Bill, relating to the revisional jurisdiction of the Financial Commissioner, as he will have the powers of revision given by Part VII of the Civil Procedure Code in all cases falling under this chapter. It must be remembered that this chapter does not deal with all revenue jurisdiction, but only with jurisdiction in cases transferred by it from the Civil to the Revenue Courts; and, therefore, though a more extensive revisional authority may be required in some revenue-proceedings, it is not necessary to provide for this in the Bill now under consideration.

"Section 52, which provides for the appointment of a second Financial Commissioner and the distribution of business between the persons appointed to that office, is the only one which applies to any other business than what is cognizable by Revenue Courts under this chapter, it being necessary to arrange for the distribution of all the business of the Financial Commissioner when two officers are appointed to that office.

"We have not thought it necessary to retain section 63 of the original Bill, relating to consultations between the two Financial Commissioners, as, though such consultations may be useful to prevent the risk of conflicting decisions, there is no legal difficulty in the way of their being held when it appears advisable.

"The sections relating to special Settlement Courts, which have been placed in a separate chapter, as they provide for the transfer of the jurisdiction both of Civil and of Revenue Courts, are substantially unchanged.

"In the concluding chapter, the first section which calls for notice is section 70, which in part takes away the wider revisional jurisdiction given by section 622 of the Civil Procedure Code as amended in 1879 and re-enacted in 1882.

No such restriction was contemplated when the Bill was introduced, it having then been thought that the extension of the revisional jurisdiction went far to render the second appeals given by the Code of Civil Procedure unnecessary, and that the main question was how far the further appeals given by the local law could be restricted. The effect of the Bill as introduced, so far as second appeals under the Code were concerned, would therefore have been to substitute a power of revision in the discretion of the Court for a second appeal as of right, and the only restriction which it was proposed to place on applications for revision, which, as had been pointed out by the Committee which sat at Lahore in 1882, were often unnecessarily made, was to increase the court-fee chargeable on the application when the value of the matter in dispute exceeded twenty-five rupees.

"It was pointed out, however, that very different views of the scope of section 622 as amended in 1879 had been taken by the High Courts of Bombay and Allahabad, and that, as the Bill would increase the number of possible applicants for revision, not only by the number of persons deprived of a second or further appeal to the Chief Court, but also by the number of persons deprived of a further appeal to a Commissioner's Court, there were serious objections to relying upon section 622 as a substitute for the second appeals now allowed by law, while any modification in the direction of the wider interpretation might have the effect of giving what would be practically equivalent to a second appeal in cases where the law does not at present allow a second appeal.

"The result, indeed, of the modification made in 1879 had been greatly to increase the number of applications for revision, which rose to 707 in 1883, from about half the number in 1878, and are, it is understood, still continuing to increase.

"It was suggested by Mr. Justice Plowden, the Senior Judge of the Chief Court, with, I believe, the concurrence of his colleagues, that it would be better to cut down section 622 to its original dimensions by omitting the words added in 1879, and to give further appeals in most of the cases in which an appeal from an appellate decree is now allowed, refusing them only where a Divisional Court had heard the appeal in a suit of the small cause class not exceeding Rs. 500 or at most Rs. 1,000 in value.

"The Select Committee, however, while it decided to give a further appeal in all cases exceeding Rs. 500 in value, was unwilling to allow appeals from appellate decrees in other cases as freely as at present; and, as the principal source of difficulty in interpreting section 622 was found in the power given to the High Court to interfere on the ground that the Lower Court had acted illegally, it determined to withdraw this power, without further amending that section. The result of course will be that, when a Court whose decree is final has decided contrary to some positive rule of law, but cannot be said to have erred as to a question of jurisdiction, or to have acted with material irregularity, there will be no power to interfere; and the section, therefore, can no longer be held to cover the same ground which is at present covered by the law of second appeal.

"The increase in the court-fee on applications for revision has been objected to in some quarters, but this was recommended by the Lahore Committee of 1882, and was approved by all the Judges of the Chief Court last year; and, though there may be something to be said for reducing the court-fee now charged on particular classes of suits in Courts of first instance, there seems to be no good reason why a person applying to the highest Court of the Province for an order varying or setting aside the final decree of a lower Court should be allowed to do so without paying more than the fee prescribed for an ordinary petition to the Court. The increased court-fee may be some check upon applications which are often made without sufficient grounds, and is unlikely to have the effect of preventing applications when a real grievance exists which a Court of Revision can redress. When the application is successful, the Court is also empowered to direct a refund of so much of the fee as it thinks fit.

"I may now proceed to refer to a few of the suggestions put forward by critics of the Bill with which we have not dealt.

"It has been suggested that power should be taken in the Bill to appoint a qualified native of India to the Chief Court. This suggestion must have been made under a misapprehension of the effect of the present law, which the Bill follows in this respect. The only qualification prescribed by law is that one of the Judges must be a Barrister of not less than five years standing, and there is no legal obstacle to the appointment of a Native Judge either to the Chief Court or to any other Court under the Bill when a vacancy exists. But the passing of the Bill will not create any vacancies. It will merely enable a certain number of existing appointments to be replaced by a similar number of new appointments, while the same officers must be employed.

"It has similarly been suggested that what ought to have been aimed at was an improvement of the Courts of first instance. That this is an object to be aimed at no one will be disposed to deny, though the defects of these Courts have certainly been exaggerated. But the improvement of these Courts, as of Courts of any other grade, must be gradual, and it has not been shewn that any legislation is needed for this purpose. What is required is strict supervision by controlling authorities and care in selecting fit persons for new appointments or for promotion to higher grades, and this no legislation can secure. So far as my own experience goes, I have reason to believe that improvement in these Courts has been going on and is likely to continue, and that for the last ten years there has been more reason to doubt the competency of some of the Courts of a superior grade for the functions which they are called upon to exercise than there has been to doubt that of the great majority of the Courts of first instance.

"Another suggestion has been that an appeal should be given from the order of one Judge of the Chief Court rejecting an appeal to the Court; but, though apparently any order of a single Judge of one of the High Courts may be appealed against, a Judge of one of those Courts may be empowered by rules not merely to reject appeals but to exercise any appellate jurisdiction vested in the Court, and there is no reason to believe that appeals from orders rejecting appeals are often preferred or entertained. And it would be by no means consistent with the restrictions we are putting upon appeals in other cases to give an appeal from the order of a single Judge of the Chief Court where no appeal has hitherto been allowed by law.

"When I explained the provisions of the Bill on moving for leave to introduce it, I did not think the occasion an appropriate one for expressing any opinion of my own on the various changes in the law which it was proposed to make. Apparently this has led some of the critics of the Bill to assume that it was entirely in accordance with my own views. The Bill, however, was, as I stated at the time, based upon recommendations made by your Lordship's Government to the Secretary of State for India; and I think I may now properly mention that, before those recommendations were sent home, I had recorded my dissent from some of the proposals relating to the appellate system on which they were based. Though the provisions of the Bill on this subject have been modified in Select Committee to a much larger extent than under the circumstances I could have anticipated, and the changes made are in my opinion almost all for the better, I cannot say that it is even yet all that I could wish.

"I am aware of course that no member of a legislative body can expect to be able to get every portion of a large measure settled precisely in accordance with his own views, but at the same time I think it necessary to guard myself against being supposed to approve of all the changes in the law which this Bill will effect.

"I have never concealed my opinion that the constitution of the Divisional Benches proposed by this Bill involves a waste of power, and, though I look upon the greater liberty of appeal from their decisions now allowed as an improvement, this only makes the waste of power more apparent. As the Bill now stands, however, the Local Government will be at liberty to appoint a single Judge to the Divisional Court instead of a Bench, in any case in which it thinks proper to do so.

"A more serious objection to the Bill is that, having regard to the nature of the duties of the District Courts, whose appellate decisions are in cases of the nature of small causes made final, these Courts are at present as a class, notwithstanding individual exceptions, the weakest Courts we have, and any improvement in them must necessarily be gradual. Most of the Judges of the Chief Court had agreed to the proposal of the Lahore Committee that their decisions should be made final in small causes not exceeding Rs. 100 in value; but they are now made final in small causes not exceeding Rs. 500 in value. This, however, was agreed to by the Local Government last year after ascertaining the opinions of the Judges, and there was therefore no ground to hope for any change on this point, especially as second appeals in small causes not exceeding Rs. 500 in value are not allowed elsewhere in India.

"The finality in these cases in other provinces has, however, since 1879 been subject to a wider power of revision than will hereafter exist in the Panjáb; and the one respect in which I think the Bill has been altered for the worse is that, in amending section 622 of the Civil Procedure Code, that section was not made to cover cases where any substantial portion of the appellate decision is opposed to law or to any usage having the force of law. I presume that, where the Appellate Court has failed to determine any material issue of law properly raised before it, it will be held to have failed to exercise a jurisdiction vested in it, or to have acted with material irregularity. At the same time it is only because the right of appeal has been so largely restricted that I do not like the simultaneous restriction of the power of revision. I think that, if the suggestions for the improvement of the system of appeal made at a late stage by the Chief Court could have been accepted, section 622 might properly have been cut down to its original dimensions.

"It is no secret that one object of the recommendations made by your Lordship's Government last year was to reduce the work of the Chief Court. There seems to be an impression in some quarters that the Judges of that Court were opposed to this being done, and not merely to the particular plan which has been devised for the purpose. That this impression is mistaken is shown by the fact that the Judges in 1882 made proposals to effect the same object, which have been only partially accepted.

"I may be asked what the effect of the Bill as it now stands upon the work of the Chief Court is likely to be. My answer is that this cannot be foretold with much precision, but that the transfer of certain classes of cases to the Revenue Courts, which was originally proposed by some of the Judges, will certainly effect a considerable reduction. Of the appeals disposed of in 1883 nearly 12 per cent. related to occupancy-rights, one of the classes to be transferred, but nearly half of these belonged to a large group of cases from a single village. From information collected by Mr. Rivaz as to the classes of cases in which appeals were preferred to Commissioners and Deputy Commissioners in 1883, I gather that in 30 per cent. of the cases which, if the appellate system established by the new law had been in force, would have been appealable to Divisional Courts the appeal will now lie, if at all, to Revenue Courts. This may be above the average, and the same proportion may not apply to the appeals to the Chief Court after deducting those which will no longer lie, especially as most of these cases would be under Rs. 500 in value; but there will clearly be a substantial reduction from this cause of the number of cases in which an appeal would lie on certificate.

"Only 3 per cent. of the appeals decided by the Chief Court in 1883 were for money or moveable property not exceeding Rs. 500 in value, but there were at least 1,326 other cases (including of course a large proportion of the revenue cases) in which under the provisions of the Bill no appeal would lie to the Chief Court unless on certificate or when the Judges differ. This leaves at most 1,462 cases in which an appeal would lie as of right under the provisions of the Bill, and, as in 1883 disposals exceeded institutions, the number of appeals as of right in the course of a year would fall short of this. Some addition would be necessary for first appeals over Rs. 5,000 in value which would lie direct to the Chief Court instead of, as at present, to Commissioners, but many

of these cases have hitherto come before the Chief Court as second or further appeals. On the other hand, there will no doubt be some increase both in references under section 617, Civil Procedure Code, and in applications for revision, as the number of final appellate decrees in the Lower Appellate Courts, and therefore the number of cases in which these references or applications may be made, will be largely increased by the provisions of the Bill.

"On the whole, while there is more certainty of a large diminution of work in the Chief Court owing to the transfer of jurisdiction in certain classes of cases to Revenue Courts, than there is of much diminution of work owing to the changes made in the law of appeal and revision, it may fairly be anticipated that there will be some decrease arising from each of these causes, and that the civil judicial business will be considerably reduced."

His Honour THE LIEUTENANT-GOVERNOR said:—

"This is now the third time within ten years that extensive and radical changes have had to be made in the general administration and the judicial machinery of this province. With the restoration of peace and good order after the mutiny, the rapid development of the country and the enormous increase of material wealth and prosperity that followed, it very soon became evident that the old non-regulation machinery was no longer able to cope with the demands upon it. From that time to the present day there has been a growing and recognized necessity, arising on the one hand from the general progress of the province and on the other from the ever-increasing elaborateness and precision of our laws, for a more complete separation of judicial from executive functions, and for a closer approximation of our general administration to the system prevailing in our older provinces.

"Unfortunately, every time the much-needed reforms in this direction have been attempted, financial difficulties have intervened to prevent the complete acceptance of measures which experience had shown to be desirable, and to preclude the establishment once for all of what the Secretary of State described as 'a vigorous executive and an efficient judicial service in one of the most important Provinces of India.' The consequence has been a resort to makeshifts and temporary expedients, with the result that, as I have said, we are now for the third time within ten years forced to review our whole judicial and administrative arrangements, and to make extensive and very important changes. I need not, in this Council, point out how detrimental to the welfare of the people, to the interests of the province and the Government, and to the efficiency of the Courts of Justice, the unsettlement and uncertainty of law, procedure and agency caused by such recurring changes must necessarily be.

"The measures recently sanctioned by the Secretary of State to which this Bill is intended to give effect, so far as the sanction of the legislature is necessary for the purpose, are a greater advance than has ever been made before. But it would be sanguine to expect they will effect all that is needed. On the face of them they are incomplete. The financial grant has on this occasion been very liberal. Still we must, I fear, admit in the present case also that the financial and administrative conditions, necessarily imposed, have once more forced us to be content with measures which, though on the whole a great improvement on the existing state of things, are not free from objection, and are not acceptable to many to whose opinion the greatest weight is deservedly attached both by Government and the public.

"While therefore I welcome this Bill and the executive measures out of which it has arisen as a great boon to the province, I think it inevitable that, ere very long, further steps will have to be taken to improve the Subordinate Courts and to effect a more complete separation between the judicial and executive agency than we have been able to attempt under existing conditions. I by no means concur in the sweeping condemnation of the Lower Courts in which some critics of this Bill have indulged. At the same time I am too well aware how much they need to be reformed and improved. Hitherto the Judges of these Courts, on whose shoulders the bulk of the judicial work of the province falls, have had no adequate career opened up to them; and of this one thing I am sure, that no great improvement in the quality of the

Subordinate Courts is to be looked for until all obstacles are removed which intervene to bar the advancement of the Judges of these Courts from the lowest to the highest judicial offices, from the humble but honourable post of Munsif to the Bench of the Chief Court itself. It is in my estimation one of the merits of this Bill that it creates no obstacles to such a career, and that, so far as its provisions are concerned, there is nothing to prevent Native Uncovenanted Judges who distinguish themselves by knowledge of law and by skill and intelligence in the interpretation and application of it from rising to the highest judicial offices in the Province. For reasons which it would be out of place to enter upon here, it has not been possible at present to do all in this direction I could have wished. But it is matter for congratulation that, in connection with the present measures, the Secretary of State has declared it to be competent to the Lieutenant-Governor, with the approval of the Government of India, to appoint to district judgeships Natives in the Uncovenanted Service who show such eminent merit as to warrant giving them special promotion; and it is my intention to make a recommendation to the Government of India accordingly shortly after this Bill becomes law.

"As regards the details of the Bill, it is perhaps unnecessary that I should detain the Council with any remarks. The hon'ble the Law Member and my hon'ble colleague in charge of the Bill can speak on these with greater weight and authority than I can pretend to do. It will be sufficient for me—with reference to the very strong, and, I may say, for the most part valid, objections raised to the provisions of the original Bill, which largely curtailed the right of appeal—to express my satisfaction that the Bill has been so materially modified as substantially to meet the most important of those objections, and to state my opinion that, in this respect, the Bill as it now stands meets the reasonable requirements of the case."

The Hon'ble Mr. Ilbert said :—

"It was hardly to be expected that a measure which reorganizes the Civil Courts of a province, and which affects, or may be held to affect, the interests of a profession which is nothing if not critical, should pass without a good deal of unfavourable criticism; and this Bill has met with its fair share of criticism, favourable and unfavourable. Much of the criticism has been very sound and useful, and we have thankfully availed ourselves of it for the purpose of making alterations in the Bill which I hope and believe will be found to be material improvements. But some of it has been directed not against the detailed provisions of the Bill but against its principles, and has embodied proposals which we found ourselves unable to accept.

"Now this is not the proper stage for discussing the principle of a measure before the Council; but, with reference to some of the observations which have reached us since the date on which this Bill was referred to a Select Committee, I may be permitted to remind the Council what the objects of this measure are, and what were the circumstances and conditions under which the general scheme of administrative reorganization of which this Bill only forms a small part was framed and brought forward.

"The main objects of this Bill are, I take it, two. One is to effect a further separation between executive and judicial functions than exists at present in the province. The other is to improve the machinery for administering justice in the Civil Courts.

"Now, we have been told that in separating executive from judicial functions under this Bill we have not gone far enough, and that we have left to the Revenue Courts classes of business which might more appropriately and satisfactorily be disposed of in the ordinary Civil Courts. To this objection there are several answers. In the first place, we were afraid to heap more work on the Civil Courts, which are already overburdened. In the next place, many of the questions which we leave to the Revenue Courts, such as questions relating to the enhancement of rent, are only of a quasi-judicial character, and all of them require for their satisfactory determination knowledge of a kind which Revenue and Settlement Officers may from their peculiar experience be specially expected to possess, and which the Judges of Civil Courts would not

always—perhaps do not as a rule—possess. Then, if we have not gone quite so far as some of our friends would wish us to go, we have at least made a very great step in advance, and have assimilated in principle the system of judicial organization to that which prevails in what are known as the regulation provinces. And, lastly, we have inserted in the Bill a provision enabling a still further step to be taken if it should be found practicable and expedient to take it. I refer to the provision in section 45 which enables the Local Government to transfer certain classes of suits from the cognizance of the Revenue Courts to that of the Civil Courts.

"It must be borne in mind that this process of separating executive and judicial functions is a process which can only be carried out by gradual advances. In the earliest stage of a province like the Panjáb it is, as my hon'ble friend Mr. Barkley pointed out in moving for leave to introduce this Bill, inevitable and indispensable that large powers of various kinds should be concentrated in the hands of the same officer; as time goes on a further separation of functions becomes practicable and expedient; but even in the most advanced provinces we are hampered by serious financial and administrative difficulties in our efforts to give full effect to a principle which is, and I hope will always be, steadily kept in view.

"I now turn to the proposals for reorganizing the Civil Courts. And, in dealing with this branch of the subject, I must admit that our critics have one enormous advantage over us. They are not tied and fettered as we, the members of the Executive Government, are, by sordid considerations based on money. They are free to suggest and advise whatever they think best, and to criticize unsparingly anything which falls short of their standard of excellence. We are in a much less fortunate position. We are not living in a Republic of Plato, but in a country with limited resources. We have to cut our coat according to our cloth, and in providing an outfit for a province like the Panjáb the material at our disposal is not superfine broadcloth, but homely *patu*, and a scant supply of that.

"Let me remind my hon'ble friend Mr. Barkley and those other gentlemen who did me the honour of attending last autumn a conference on the scheme out of which this Bill arose, and whose valuable assistance on that occasion I take this opportunity of most thankfully and gratefully acknowledging—let me remind them what was the problem which we had to face, and what were the conditions under which we were allowed to approach it. The main fact with which we had to deal was that the Chief Court was hopelessly encumbered with work, and I may add that a very great part of the work with which it was encumbered was of an extremely petty character. And the problem was how to relieve them of their excess of work. But we did not approach this problem as free agents. We did not hold the purse-strings. We had behind us an authority, indeed two authorities, which dictated to us the maximum amount which we were to spend, though they left us considerable liberty within those limits. Those authorities were the Finance Department and the Secretary of State. I may remark in passing that the part which my hon'ble friend Sir Auckland Colvin, or whoever happens for the time being to hold his office, usually plays in the legislative discussions over which I have the honour to preside is the useful but not always popular part of Jorkins. I hope, however, he will not suppose that by ascribing to him this part I wish to shift exclusively on to his shoulders the responsibility for resisting popular proposals on economical grounds. There is no country in the world where it is more difficult to resist pressure for increased administrative expenditure than India; there is no country in the world where it is more important to resist that pressure. Our principal advisers are energetic and enthusiastic officials, sincerely anxious to do good and honest work, but crippled at every turn by the want of means. But the great mass of tax-payers is unrepresented, and the resources on which we can draw are limited and inelastic. Therefore, when the Finance Minister of the day takes a firm stand on economical grounds, he may always count on my honest support.

"Well, to return to our problem. There were before us two modes of relieving the Chief Court from its pressure of arrears. One was to increase its staff, the other was to reduce its work. A temporary addition had already been made to the numbers of the Chief Court, but we were told that a permanent increase was not under existing circumstances admissible, at all events (for I presume that this qualification may be inserted) not until other modes of relief had been tried and failed. As I have said, I do not wish to cast the responsibility for this decision exclusively on the Finance Department nor on the Secretary of State. There are obvious objections to increasing an expensive structure in its most expensive part. And you do not always add to the efficiency of the controlling authority by increasing its numbers. His Excellency the Commander-in-Chief will bear me out in saying that you may have too much even of that valuable commodity—Generals. I know it has been said that there ought not to have been any financial difficulty in the matter, because the accounts of the administration of justice in the Panjáb show a balance of receipts over expenditure, and that balance was enough to provide an adequate solution of our problem. Now, I do not know how far we can rely on the calculations which have been made as to this excess of receipts over expenditure, but I am quite willing to admit that I do not consider a surplus from court-fees a satisfactory source of revenue; and if my hon'ble friend Sir A. Colvin can see his way to dispense with it or to devise a satisfactory substitute for it, he will earn the gratitude of the country. But the practical question is, under existing circumstances, not whether this particular branch of Panjáb revenues shows a surplus, but whether on the Panjáb revenues as a whole there is such a surplus as would suffice for the extra expenditure which we wanted to meet. And I am afraid that His Honour the Lieutenant-Governor would reply—I see that he does reply—to this latter question with an ominous shake of the head.

"This then was how matters stood. Our mode of relief was negatived on financial grounds, and we had to make the best we could of the other mode. Not a satisfactory position you may say, but after all not worse than that of the hard-worked administrators all over this country who are daily engaged in the thankless task of making bricks without straw.

"How then were we to check the flow of petty appeals which was deluging the Chief Court? Few subjects have been more exhaustively discussed in India than the system of appeals, and we were not likely to be able to add much to all that had been said or written on the subject. On one or two matters of principle we were all pretty well agreed. One was that partial appeals were objectionable, and that where an appeal was granted the Court ought to be in a position to deal with the whole case. On the number of appeals which should be allowed in the same case there was less agreement. One appeal we agreed should always lie in ordinary cases, but no one ventured to defend on principle the present system of the Panjáb, which has been aptly described as 'sifting cases through a succession of bad Courts in the hope that they will come right in the end,' though there were some who were sceptical about the possibility of substituting anything better under existing circumstances. But all were agreed that, if greater finality was to be given to the decisions of Courts of First Appeal, something must be done towards strengthening those Courts. How then were they to be strengthened? The only feasible scheme that was suggested was to make provision for enabling an Appellate Judge to call in a colleague to his assistance—in fact, to provide for the constitution of Appellate Benches; and this was the suggestion which was ultimately adopted. The proposal has, as is natural enough, been a good deal canvassed on grounds good, bad and indifferent. Among the latter I may be permitted to class certain arguments which have a false mathematical ring about them. For instance, we have been told that as two negatives do not make an affirmative, so two unsound judges do not make a sound one, and again that the notion that greater aggregate power will result from the adoption of our proposals is almost on a par with the idea that the product of $\frac{1}{2} \times \frac{1}{2}$ is an increased quantity. I have myself far too much respect for Panjáb Judges to speak of them as negative or even as fractional quantities, and I do not quite know what would be the effect of multiplying one Judge by another. But, I suppose, I may safely assume that in the Panjáb as elsewhere the

product of 1+1 is an increased quantity, and, passing from the abstract to the concrete, that for a good many purposes two men are better than one. Do those purposes include the hearing of appeals? There are persons, whose opinions are entitled to much respect,—for instance, as you have just now heard, my hon'ble friend Mr. Barkley,—who will tell you that they do not, and that if you place two Judges to sit together one of them will content himself with saying ditto to the other. I have often heard this opinion expressed by Indian Civilians, and not the least competent among them; and it may perhaps be accounted for in their case by the fact that the training and experience which form and develope their most valuable qualities, the necessity which they are constantly under of acting alone and on their own responsibility, makes them less inclined to sit and act—perhaps less fitted to sit and act—in consultation with others. They undervalue the assistance with which they have learnt to dispense. There must, one would think, be some special reason for the prevalence of this opinion among Civilians, for there is certainly a very general prejudice among lawyers—a prejudice which I myself share—in favour of having appeals disposed of by a Bench. There may be Judges so strong as to need no assistance from a colleague, or so opinionated as to be incapable of deriving assistance from him, or so weak as to be unable to assert their own opinions against him, or so indolent as to let him bear their share of the work. But, taking the ordinary run of men, say Tom, Dick and Harry, who are neither much better nor much worse than their neighbours, or, I will add, than each other, I believe that an appeal from Tom to Dick and Harry sitting together is more satisfactory than an appeal to Dick or Harry sitting alone. It is more satisfactory to the suitor, who, if the decision is reversed on appeal, feels that the view which has prevailed is at all events that of the majority. It is more satisfactory to the Judge of first instance, who will often think, and may be entitled to think, that his own opinion is as good as the unaided opinion of the Judge above him. It is more satisfactory to the Court of Appeal, whose members have the advantage of consulting each other and clearing their minds by mutual argument before overruling the Court below.

"I believe then that if Benches can be satisfactorily constituted for hearing first appeals, it is desirable to constitute them. Can they be so constituted in the Panjáb? That is a question which it is rather for the Lieutenant-Governor to answer than for me, and it is a question which I understand—he will correct me if I am wrong—he has unhesitatingly answered in the affirmative. The provision under which Benches may be constituted has, as Mr. Barkley has pointed out, been given an experimental form, and I think that the experiment is, to say the least, worth trying.

"Having constituted the Courts of First Appeal, whether by Benches or otherwise, in what cases and to what extent should finality be given to their decisions? That is an extremely difficult question. I am aware that the Chief Court has won, and deservedly won, the confidence of the people of this province, and that any limitation on the right of access to it is not likely to be popular. I am aware also that the Chief Court is gradually doing a most useful and important work in comparing with each other the numerous laws and customs or alleged customs which come before it from different parts of the country, and in endeavouring to ascertain and formulate the common principles which underly their apparent variety. They are doing in this way the work which was done for England some six centuries ago by the King's Court,—the *Curia Regis*,—and by means of which the common law of England has been developed into a logical and consistent whole. For these reasons I am reluctant to limit the right of appeal to the Chief Court, especially in cases which involve important questions of law or custom. On the other hand, it must be borne in mind that the great mass of the cases which come before the Court—a large proportion I believe of those which under the existing system find their way up to the Chief Court—are of the most petty and simple description, involving no important question of law or custom whatever, and requiring for their disposal nothing more than a little common sense and patience. Having regard to the means at our disposal, are we justified in allowing the time of the most expensive Courts to be

occupied with cases of this description? As has been often said, no man has a right to unlimited draughts on judicial time and judicial power. To grant an unlimited right of appeal is not fair to the general tax-payer, and is a cruel kindness to the suitor himself. I am told by those on whose authority I am entitled to rely that among many classes of the Panjáb it is a point of honour to prosecute an appeal, however hopeless may be the case and however trifling may be the stake, to the utmost, and notwithstanding the knowledge that even if the appeal is successful the costs to be paid will far outweigh the stakes. The unsuccessful suitor feels himself disgraced if he does not carry his appeal as far as the law will allow him to go, and it is not until recently that he has, with the help of his legal advisers, found out how very far that is. If the law would in such cases interpose a friendly obstacle to his further progress in the path of appeal, his honour would be satisfied and his pocket would be benefited.

"I hold then that we are justified, both in the interest of the general tax-payer and in the interest of the particular suitor, in placing some limitation on the right of second appeal, and that this limitation may reasonably be framed with reference both to the nature of the suit and to the value of its subject-matter. About the particular limits to be selected there will naturally be much difference of opinion. The Committee have concurred with the view of the Local Government that the limitations on the right of further appeal proposed by the original Bill probably exceed the real requirements of the case, and it will have been seen that we have proposed to make some very important extensions of that right beyond the limits so fixed. In the case of ordinary money-claims, suits of the class called in the Bill small causes, where the value does not exceed Rs. 500, we think that one appeal should suffice, and that there should be no further appeal. In this, as Mr. Barkley has reminded us, we only follow the general law as laid down by the Civil Procedure Code for the rest of the country. In other cases we make the right of second appeal depend on the value of the suit and on the constitution of the Court by which the first appeal is heard. If the value exceeds Rs. 500, there is an absolute right of further appeal. If the Appellate Court consists of a single Judge, and he reverses or varies the decision of the Court below, then, there being one Judge against one, there is a further appeal. If, again, the appeal is heard by a Bench of two and the two do not agree, there is a further appeal. And, lastly, any one of the Judges composing a Bench may certify a case for appeal if in his opinion there is a question of law or custom or of general interest involved, and the case is of sufficient importance to justify a further appeal. We hope that this power will be exercised in such a way as to allow of all really important cases of law and custom finding their way up to the Chief Court.

"But, having settled the limitations on the right of appeal, we had to encounter another formidable difficulty. We were told that any limitation which might be imposed on this right would be illusory, because in cases where an appeal was barred a way would be found to the Chief Court under section 622 of the Civil Procedure Code, which provides for revision of the proceedings of inferior Courts. Now, it certainly was not the intention of the framers of that section that it should simply give a right of appeal in another form; but there is some reason for believing that the words which were inserted in the section in 1879 have obscured the line which was originally drawn between the class of cases in which an appeal was to lie and the class of cases in which the power of revision was to be exercisable. On referring to the Report of the Select Committee which inserted those words I find that they did so with some hesitation, for they remark—'The change is a serious one, and must be understood as made tentatively.' These doubts have been justified by the difficulty which some of the High Courts have found in interpreting the addition. Thus, the Allahabad High Court has construed the new words in such a way as would, if it were logically carried out, render nugatory any limitation on the right of appeal. The most careful consideration to which they have been subjected has been in the Bombay High Court, where Mr. Justice West in a very recent judgment has gone into the subject with all the thoroughness

which characterises his work, and has drawn a useful and instructive comparison between the revisional jurisdiction of the several High Courts and the analogous superintending and visitatorial jurisdiction exerciseable by the English Court of Queen's Bench, and its successor the High Court of Justice, under the prerogative writs of certiorari, mandamus and prohibition. Whilst insisting, very properly, on the necessity for such a jurisdiction, he remarks on the tendency which has manifested itself in recent times to confine its exercise within somewhat narrower limits than heretofore.

'In India, as in England,' he says, 'the grant of a rule under the extraordinary jurisdiction is discretional, and the power should be used only to sustain, and not further to disturb, the regular course of judicial administration, to prevent distortious or sham applications of the law, but not to promote uncertainty and restlessness, by an over-nice scrutiny of proceedings that aim at promptness rather than refinement.'

"He wisely abstains from an attempt to define precisely cases in which the power ought to be exercised, for, as he says, 'what is abnormal cannot be provided for precisely by rules'; but he makes it clear that in his opinion the jurisdiction under section 622 of the Code is an extraordinary jurisdiction, to be exercised only in extraordinary cases, and he lays down certain general principles as a guide to the discretion of the Court in exercising it. It is evident, however, that the word 'illegally' as used in the section has been a stumbling-block to him, and that he has found some difficulty in reconciling its presence with what he conceives—and, if I may venture to express an opinion, rightly conceives—to be the general scope of the jurisdiction exercisable under the section. For, as he says, 'in one sense every erroneous decision or order is illegal;' in other words, every slip on a question of law or fact would justify the interference of the High Court, which is very much the view that was taken by the late Chief Justice of the Allahabad High Court.

"Now, of course this judgment is not binding on the other High Courts, but it is the most instructive and exhaustive exposition that is to be found of the section with which we are dealing, and it is certain to be referred to whenever the meaning and intention of the section comes up to be considered in the Panjáb Chief Court or elsewhere.

"The limitations which we have considered it necessary to place on the right of appeal in the Panjáb make it eminently desirable that we should if possible prevent the revision section from being interpreted in such a way as to make those limitations nugatory. We have very carefully considered whether and how this can be effected; and the conclusion to which we have come is that we ought to strike out the word 'illegally' on which the advocates of the wider interpretation mainly rely. It is impossible to predict how a section which is of necessity expressed in wide and general terms will in practice be interpreted, but we believe that the omission of this word will materially facilitate the adoption of those views as to the scope and intention of the section which are to be found in the judgment of Mr. Justice West.

"I am sorry to have had to detain the Council so long on such a dry and technical subject, but I was anxious to show that we had not overlooked or made light of the serious difficulties which surround the subject with which we have had to deal.

"In conclusion, I will only say that I hope this measure will be accepted as what it is, namely, an honest endeavour to improve the administration of civil justice in the Pánjab to the extent to which our existing means allow us to improve it. It is an essential part, but only a part, of a much wider scheme for improving the administration of the province—a scheme which has been under consideration for many years, which makes reforms that are, and long have been, urgently required, but the introduction of which, if we were to wait until all possible objections to each of its features were removed, would be deferred until the Greek Kalends, or whatever day corresponds in the Indian calendar to that fleeting date."

The Motion was put and agreed to.

The Hon'ble MR. BARKLEY moved that in section 48, clause (b), for the words "amount or value of the subject-matter of the suit" the words "value of the suit" be substituted.

He explained that no previous notice had been given of this amendment, but that its object was merely to make an improvement in the language of the section which did not affect its substance in any way, the definition of "value" which had been added to section 3 having rendered the retention of the longer expression unnecessary.

The Motion was put and agreed to.

The Hon'ble MR. BARKLEY also moved the following amendments which he explained were necessary to make the law as to the court-fees payable on applications for revision under section 622 of the Civil Procedure Code the same in the Court of the Financial Commissioner as in the Chief Court:—

(1) That in section 71, after the words "Chief Court" the words "or the Court of the Financial Commissioner" be inserted.

(2) That in section 72, the word "Chief" be omitted.

The Motion was put and agreed to.

The Hon'ble MR. BARKLEY also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

The Council adjourned to Thursday, the 9th October, 1884.

SIMLA;
The 9th October, 1884.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 8th OCTOBER 1884.

GENERAL REMARKS.—There was good rain in some districts of the Madras Presidency and prospects continue to improve, except in Bellary, Anantapur, and parts of Coimbatore and Madura where the south-west monsoon has generally failed. In Mysore there was more rain during the past week than has been recorded for some time past, and prospects are said to have improved, though the crops are generally in a very backward condition. In Coorg the south-west monsoon is breaking up, and in one taluk the *ragi* harvest has been a good one. Rain is again reported to have fallen throughout the Deccan and Southern Mahratta Country, but more is urgently wanted in several places. General prospects in Bombay are good.

In the Berars, the Nizam's territories, and in the Central India and Rajputana States the prospects of the crops continue good. Heavy rain continued to fall in most districts of the North-Western Provinces and Oudh during the week under report, causing extensive damage to the cut and standing crops, and retarding *rabi* operations. In the Punjab *kharif* prospects are very favourable, except in the Shahpur district. In the south-east of the province some damage has been caused to the crops by the recent rain. In Bengal the prospects of the *amun* paddy have been generally much improved by the rainfall of the week; and if rain falls in the end of October, a fair harvest will be ensured in many districts. In Assam agricultural prospects are generally good.

The last report, dated 9th instant, of the Meteorological Department states that little or no rain has fallen.

There is not much change to record in agricultural operations. Harvesting continues in Madras, and *rabi* operations are generally in progress throughout the country.

Cholera, small-pox, and fever are prevalent in most provinces; but the public health is generally good.

Prices are generally stationary, with local fluctuations.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Madras—(Oct. 8th)		
Bellary ...	·55 (average)	Pasture scanty. Prices rising.
Kurnool ...	2·01 (average)	Standing crops good; sowings of cotton and white *cholum* progressing. Some small-pox and cattle-disease prevalent.
Ganjam ...	2·62 (average)	Small-pox, cholera, and cattle-disease prevalent.
Kistna ...	3·01 (average)	Standing crops, outturn below average. River 7·40 feet over anicut. Small-pox, fever, and cattle-disease in places; one death from cholera.
Chingleput (Madras) ...	1·41 (average)	Standing crops generally good; harvest wet and dry crops, yield half the average. Small-pox in 3 taluks; 67 deaths from cholera.
Coimbatore ...	·18 (average)	Standing wet crops good in 5 and fading in 3 taluks; dry crops want rain everywhere; harvest dry crops, outturn below average. Cattle suffering from want of fodder.
Tanjore ...	·92 (average)	Standing crops generally good. Rivers 1 to 6 feet high. Harvest wet and dry crops, outturn average. 55 deaths from cholera.
Madura ...	·15 (average)	Prospects fair in 3 taluks; elsewhere crops fading from want of rain. Pasture scanty. 20 deaths from cholera.
Malabar ...	3·33 (average)	First crop paddy being harvested, outturn fair. Slight small-pox and fever; 9 deaths from cholera.
Travancore ...	·04	Fever and small-pox prevalent; 6 deaths from cholera. *General Remarks.*—General prospects fair except in Bellary, Anantapur, and parts of Coimbatore and Madura, where south-west monsoon has generally failed; elsewhere prospects are improving.
Bombay—(Oct. 8th)		
Karachi ...	No rain; average of 9 other stations ·64.	River at Kotri on 6th, 13 feet 2 inches against 9 feet 1 inch on same date last year. Fever in 9 talukas; cattle-disease in 5 talukas. Loss of 30 buffaloes, 127 cows and bullocks, and 120 sheep and goats. Harvesting going on. Small-pox prevalent in 9 villages in the districts, 13 fresh cases, no deaths, 12 remaining sick. Prices—wheat, red rice, and *bajri* in Karachi 28, 30, and 36; in Kotri 30 and 36; *jute* 24, 30, and 32; and in Ghorabari 22 and 32 pounds per rupee, respectively.
Hyderabad ...	*Nil*	River at Kotri on 6th, 13 feet 2 inches against 9 feet 1 inch last year. *Kharif* harvesting commenced; *juari* and *bajri* in Hala attacked by blight, and *til* in Moro by worms. Fever in 9, cattle-disease in 4, and small-pox in 3 talukas. Prices of grain steady.
Ahmedabad ...	......	*Bajri* and *juari* in Dholka, and *modassa* and cotton crops in Dhandhuka, slightly damaged by rain in other talukas; *kharif* crops ready for reaping. Cholera in Viramgaum, 2 cases fatal, in Parantij, 1 case fatal; fever in Dholka. Wheat 31 and *bajri* 33 pounds per rupee.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bombay—*contd.*		
Baroda ...	......	Public health fair. Cattle-disease in Vadnagar. Crops in fair condition. Prices—*bajri* 33¼ and rice 23 pounds per rupee.
Surat ...	1·01	Total rainfall 39·91. Crops healthy. Slight fever in Pardi taluka. *Juari* 30, and *nagli* 40 pounds per rupee.
Nasik ...	Rain throughout the district.	*Kharif* crops flourishing; *rabi* sowing in progress. Public health generally good. 6 attacks and 6 deaths from cholera in Nasik; small-pox in Kalvan. Prices cheapening; wheat 40, *bajri* 33½, and rice 21 pounds per rupee.
Colaba (Bombay) ...	Light showers on three days; total of week ·20.	Total to date 71·68, being 2·45 above average; abnormal temperature 0° to 1° cool; vapour in air defective; wind normal; thunder and lightning on 6th and 7th.
Poona ...	Good fall of rain at Poona on 6th.	Light showers in six talukas during the week, but none at Junnar; more rain urgently wanted eastward. No improvement in *kharif* prospects; *rabi* sowing begun in eastern division; and in Junnar, *bajri* 32, and *juari* 33; in Poona, *bajri* 28, and *juari* 30 pounds per rupee.
Ahmednagar ...	Shogaon 1·10; Nagar, ·66; Jamkhed, ·58. none in the remaining talukas; very slight in Parner, Shrigonda, Karjat, Sangamner, and Akola.	Sowing of *rabi* in progress in all talukas except Nagar, where it is completed; *kharif* crops are in good condition. More rain would be beneficial. Slight fever in Sheogaon. *Juari* maximum 54 pounds in Sangamner, minimum 35 in Sheogoan; *bajri* maximum 54 pounds in Sangamner, minimum 30 in Shrigonda.
Sholapur ...	Sholapur, ·85; Barsi, ·54; Madha, none; Karmala, ·73; Pandharpur, 1·47; Sangola, ·57; Malsiras, ·23.	*Juari* 34 pounds 4 tolas and *bajri* 34 pounds 24 tolas per rupee. General prospects poor unless heavy rain fall shortly in Malsiras; prospects decidedly bad.
Dharwar ...	Maximum in Navalgund, 2·78; Kalghatgi, 1·30; Mundargi, ·96; Ron ·90; Gadaj and Kod, ·40; Mugud, Bankapur, and Ranibennur, ·25; Dharwar, Hubli, and Karajgi, ·10; Nargund, none.	More rain urgently required throughout the district. Rice and *juari* crops good; but they will suffer from drought if rain does not fall shortly in eastern talukas; scarcity of fodder is being felt; and cattle from Karajgi taluka are being removed to western talukas. Cholera abating. Rice 30 and *juari* 52 pounds per rupee.
Kanara ...	Karwar, 1·70; Kumpta, 7·6; Sirsi, 3·72; Haliyal, 1·13.	Total rainfall 93·36. Common rice in Karwar 15; districts average 15½ seers per rupee. Small-pox, 1 death in Supa. Rice plants in ear above Ghats; rice harvest on coast.
Rajkot ...	*Nil*	Weather warm; general health good. Fever in some places; cholera continues in Dhoraji. Sowing of late crops commenced in Halar; *bajri* 38 and *juari* 52 pounds per rupee.
		General Remarks.—Rain throughout the Deccan and Southern Mahratta Country; more rain urgently wanted in several places. General prospects unchanged. *Kharif* harvest in progress in parts of Sind, Kaira, Khandesh, and Ratnagiri; *rabi* being sown in parts of seven districts. Fever general, cholera, small-pox and cattle-disease in parts of several districts.
Bengal—(Oct. 8th)		
Chittagong ...	·53	Weather cool. Prospects of crops good. Prices stationary. General health good; cattle-disease still reported.
Dacca ...	1·23	Harvesting of *aushini* paddy begun; damage to crops anticipated owing to want of water; *mash*, *kalai*, and mustard being sown.
24-Pergunnahs (Calcutta)	2·31	Harvesting of *aus* paddy going on with an estimated outturn of 12 annas; prospects of *amun* paddy and sugarcane good; land being prepared for *rabi* crops. Price of common rice 11½ to 15½ seers per rupee. Public health generally good; fever as usual in this season in Barrackpore.
Moorshedabad ...	1·68	Weather cloudy and cool owing to general rainfall. Prospects of *amun* crop improved; in some parts progress made in transplanting, and if rain continues outlook will be more hopeful. Weather for *rabi* crops favourable. Rice 12 to 13 seers per rupee. Public health good.
Rajshahye ...	1·34	Rain done some good, but long drought has considerably prevented the transplanting of *amun*. Health fair.
Burdwan ...	·25	Prospects of crops in Cutwa and Raniguuge improved by late rain, especially in the latter; elsewhere still doubtful and in some thanas bad.
Rungpore ...	4·16	Weather fair; rain too late for much improvement in prospects of crops. Coarse rice selling at Rs. 4-4-0 per maund. Malarious fever prevalent.
Bhagalpur ...	5·95	Prospects of late paddy improved, and a fair harvest may now be expected. Rice 12 seers 10 chittacks per rupee.
Purneah ...	7·68	Rain done much good to standing crops; ploughing for *rabi* progressing. Common rice 15 seers per rupee. Very much fever. Ganges very high.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Bengal—*contd.*		
Patna ...	·31	Harvesting of *bhadoi* nearly completed; late rain done much good to standing paddy. Cholera still reported from Behar sub-division.
Durbhunga ...	3·83	*Rabi* being sown; late rain improved prospects of paddy. Prices falling. Public health good.
Hazaribagh ...	1·80	Weather bright and seasonable. Harvesting of *bhadoi* crop nearly over; early paddy being cut in places; prospects generally fair. Public health good.
Cuttack ...	1·39	Weather seasonable. Cutting of *beali* completed with average outturn; early *sarad* ripening; late *sarad* promising well. Price of rice stationary. Cholera rather bad in some parts of the district; cases of typical fever reported also.
		General Remarks.—The rainfall of the week has much improved the prospects of *aman* paddy generally, and rain in latter end of October will ensure fair harvest in many districts, but in a few more rain is still needed at present; harvesting of *bhadoi* crops and *aus* paddy and jute going on; lands are being prepared for *rabi* crops. Price of rice rising still in certain places. Cholera still prevalent in parts of 5 districts and fever in some.
N. W. Provinces and Oudh—		
Benares (Oct. 6th)	Average rainfall over 2·0.	Rice improved; *bajra* slightly injured by rain. Slight fever. Prices falling.
Allahabad („ „)	2·1	Rains now over apparently; sky clear. Land being prepared for *rabi*. Health excellent. Prices falling.
Gorakhpur („ 4th)	10·2 at Sadr; much heavier rain in north and east.	Fine weather wanted. Cholera decreasing. Prices stationary.
Jhansi („ 7th)	......	Some damage done to *kharif* by excessive rain: Ploughings for *rabi* commenced. Prices fluctuating. Fever prevalent; cholera decreasing.
Agra („ 4th)	Rain in all parganas, from 4·5 to 15·0.	The heavy rain has done damage to the *kharif* and deferred *rabi* ploughings. Prices steady. Fever very prevalent in all parganas.
Bareilly („ 6th)	......	Rain has done considerable damage; a few villages along Ramganga completely flooded. Health, &c., good.
Meerut („ „)	Extraordinary rain on 29th, 30th and 1st; rainfall from 4·7 to 13·2.	Great damage to crops, buildings, and roads. Fine weather now, with westward wind. Fever very prevalent; cholera—19 cases in Hapur, 5 deaths, 7 cases in Meerut, 2 deaths. Prices steady.
Kumaon („ „)	Heavy rain between the 29th and the 3rd.	Cut rice has been somewhat injured in valleys; stalks of millets used as food for animals have also been injured. General health good. Cattle-disease continues. Prices stationary.
Lucknow („ „)	Rain continued during the first five days of the week from 1·7 to 3·3.	*Juari*, *bajari* and *mash* crops damaged by the late heavy fall. *Rabi* sowings also delayed in consequence. No disease in men or cattle. Supplies ample. Prices steady.
Partabgarh („ 3rd)	Average rainfall for the week a litte over 3·5.	*Bajri* and *juari* have been injured by the late heavy rain. General health good. Prices almost stationary.
Sitapur („ 6	......	The harvest crops of *bajri*, *mash* and *tilli* are said to have suffered considerably by the late rains; but the mischief will probably be greatly repaired by the fair weather which set in on the 4th October.
Fyzabad („ „)	2·6 rain at Sadr and 2·0 to 4·4 elsewhere.	*Kharif* crops are being cut. Public health and condition of cattle good.
Rae Bareli („ 4th)	Rain all over the district.	Weather cloudy; wind variable. *Bajri*, *juari* and *mothi* somewhat injured by rain. Supplies abundant. Prices almost stationary.
Cawnpore („ 6th)	From 3·5 to 9·6 of rain fell during week.	Complaint general that crops have been injured by heavy rain. Fever and ague prevalent; and few cases of cholera in paragana Bhognipur. A little cattle-disease in paragana Ghatampur.
Farukhabad („ „)	Average rainfall of the week 6·4.	Rain now ceased, but much damage has been caused to crops, and many houses have fallen. The Ganga and Ramganga are in flood; and the low land in Aligarh tahsil is inundated. Fever increasing. Prices stationary.
		General Remarks.—There was heavy rain in most districts during the week; doing extensive damage to the cut and standing crops, and retarding *rabi* operations. Markets are well stocked, and prices so far show but slight variations. The health of the people and condition of cattle continue normal.
Punjab—(Oct. 1st)		
Delhi ...	3·0	Fever prevalent. Expected yield of *kharif* above average. Slight rise in prices.
Hissar ...	Rain at Rohtak	Excessive rain has done damage, but average or full crop expected in most places. Fever very prevalent; some cattle-disease in Rohtak.
Umballa ...	4·0	Fever still very prevalent throughout the district; *mukka* and rice being harvested; other *kharif* crops promising though much damaged by late rain; yield expected to be above average; gram sowing in progress. Prices gradually falling.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Punjab—*contd.*		
Jullundur ...	......	Crops and health good. Prospects of coming harvest favourable; *rabi* ploughing commenced. Prices stationary.
Amritsar ...	......	Health and *kharif* prospects good; *rabi* crops sown. Prices of grain and rice rising; other prices stationary.
Sialkot ...	·30	Health good. Harvest expected above average. Prices falling.
Ferozepore ...	·10 at Sadr	Fever prevalent in the district. Probable yield of *kharif* crops good. Prices fluctuating.
Lahore ...	......	General health good. Fair *kharif*; *rabi* prospects fair. Prices falling.
Rawalpindi ...	·70	Expected yield of *kharif* harvest above average in two and average in five tahsils. Fever in three and cattle-disease in three tahsils. Prices falling.
Mooltan ...	......	Fever prevailing in the district. Expected yield of *kharif* harvest good. Prices fluctuating.
Dera Ismail Khan ...	......	Health and prospects good. Expected yield of *kharif* harvest above average.
Peshawar ...	......	Slight fever prevalent. *Kharif* prospects good. Prices of wheat and *mukka* stationary, of *juar* rising, of rest falling.
		General Remarks.—Rain in many districts. Fever prevalent in the Delhi, Umballa, Ferozepore, Rawalpindi, Mooltan, and Peshawar district, and in Hissar division. Elsewhere the health of the province is good. Cattle-disease in the Rohtak district, and in three tahsils of the Rawalpindi district. *Kharif* prospects very favourable, except in the Shahpur district; but the recent rain has done damage to the crops in the south-east of the province; *rabi* sowings commenced in many districts. Prices of food-grains fluctuating, but with a falling tendency.
Central Provinces—(October 8th)		
Nagpur ...	·5	Weather clear. Prospects improving; *rabi* sowings commencing; *juari* somewhat damaged. Fever prevalent; small-pox and cattle-disease in parts. Prices steady.
Jubbulpore ...	1·71	Weather clear and cool, break beneficial. Reaping of rice commenced; poor outturn of cotton and other crops anticipated. Prices stationary.
Saugor (Oct. 7th)	·67	Weather clear for the last four days. Crops damaged; *rabi* sowings delayed from excessive moisture. Health fair. Prices rising.
Seoni ...	·21	Weather clear since 1st. Land being prepared for *rabi* sowings; rice prospects fair; wheat 30 and rice 16½ seers per rupee.
Hoshangabad ...	......	Rice being harvested; cotton and other crops damaged by excessive rain; land being prepared for *rabi*. Fever prevalent. Wheat 22 and rice 10 seers per rupee.
Khandwa ...	·82	Break beneficial. Prospects and health good. Prices falling.
Raipur ...	1·47	Weather clear and warm. Land being prepared for *rabi*. Fever prevalent. Prices falling.
Sambalpur (Oct. 4th)	......	Weather clearing. Rice excellent; other crops more or less injured Fever and cattle-disease prevalent. Common rice 26¼ seers per rupee.
		General Remarks.—There has been a general and beneficial break which will admit of *rabi* sowings commencing. Fever rather prevalent. Prices steady.
British Burma—(Oct. 8th)		
Akyab (Oct. 4th)	1·45	Total rainfall 176·44. Cholera still prevalent in town and district.
Bassein („ „)	3·64	Total rainfall 93·31. Cattle-disease in two townships.
Rangoon („ „)	1·84	Total rainfall 84·61.
Amherst (Moulmein) („ „)	2·34	Total rainfall 172·61. Prospect of crops good.
Tavoy („ „)	1·24	Total rainfall 157·42. Prospect of crops good.
Pegu (Sept. 27th)	5·81	Total rainfall 103·64. Season most favourable. Prospects everywhere better than last year.
„ (Oct. 4th)	8·38	Total rainfall 112·02.
Henzada ...	2·11	Total rainfall 85·33. Slight cattle-disease in one township.
Prome ...	......	Crop prospects good. Season most favourable.
Thoungoo ...	1·33	Total rainfall 69·77.
Thayetmyo ...	0·22	Total rainfall 30·73.
		General Remarks—Cholera still prevalent in parts of Arakan; elsewhere public health particularly good, health of cattle generally good. Crop prospects still excellent.
Assam—(Oct. 8th)		
Gauhati ...	1·25; rain during week ending 7th instant.	Mornings and nights cool, days hot. Prospects of crops and tea not very satisfactory. Cholera in the vicinity of Barpetta reported; public health fair.
Sylhet ...	2·55	State and prospects of crops, including tea, favourable. Cholera in Chhatak thana; public health good on the whole.
Cachar ...	6·49	Weather warm. Prospects of *sali* crops and tea good; common rice 15¼ seers per rupee. Public health good.
Dibrugarh ..	1·64	Weather cool. Prospects of *sail* crops fair. Public health good.

Presidency or Province and District.	Rainfall for week under report.	State of agricultural prospects.
Mysore and Coorg— (Oct. 8th)		
Bangalore ...	4·33	Standing crops much improved. Prospects more favourable.
Mysore ...	Slight rain in nine talukas; general rain, from ·54 to 2·72, has fallen in other districts.	Condition of crops and prospects of season still unfavourable. Prospects may be said to have improved, but crops generally in very backward condition. Public health good. Some cases of cholera have been reported. Prices stationary.
Mercara ...	1·99	*Ragi* crops in Nanjarajpatna taluk nearly all harvested; outturn good. South-west moonsoons breaking up at last; wind has varied.
Berar & Hyderabad— (Oct. 8th)		
Amraoti ...	1·77	Weather cloudy; breaks for four days. Crops in good condition; wheat 20 and *juari* 30 seers per rupee.
Akola ...	......	Weather cloudy. Prospects of crops good; cotton beginning to flower.
Hyderabad ...	Average rainfall during the week 1·2.	Total rainfall from 1st January 29·74. Standing crops good. No sickness. Prices—wheat 14, coarse rice 12, white *juari* 16½, yellow *juari* 20, and *tur* 19 seers per halli sicca rupee.
Central India States— (Oct. 8th)		
Indore ...	0·35	Total rainfall 36·56. Agricultural prospects excellent. Health good. Cold weather commencing with signs of close of the monsoon.
Morar (Gwalior) ...	2·79	Total rainfall 32·68. The late rains have somewhat injured the *bajri* crops. Fever prevalent. Nights cool. *Rabi* sowing commenced.
Sutna ...	3·94	Weather clear and dry. Health and prospects good.
Neemuch ...	0·15	Total rainfall 22·75. Public health good. *Makka* being reaped.
Goona ...	......	Weather clear. Health good. Total rainfall 40·73.
Agar ...	0·59	Health and prospects good.
Sehore ...	3·01	Weather cloudy. Prospects of crops and public health good.
Nowgong ...	1·96	Total rainfall 72·61. *Kharif* prospects damaged and *rabi* sowings interfered with by excessive rain. Public health good.
Manpur (Bhopawar) ...	1·97	Total rainfall 39·51. Fever increasing in Manpur; some cholera in Dhar territory, otherwise public health good.
Rajputana— (October 8th)		
Abu (Oct. 8th)	......	Weather clear, cool, and seasonable.
Sirohi („ 5th)	·30	Tanks, wells, health, and crop prospects good. Fine weather; cool at night.
Marwar („ 3rd)	......	In Jodhpore city tanks are all full. Fever still prevails. Crops in good condition. Clear week; getting cool. Prices stationary, with tendency to fall.
Meywar („ 5th)	......	Wells and tanks very good. Health fair. *Makka* harvested.
Harowti („ 4th)	Tonk, ·15; Shahpura, 1·29; Kotah previous week, 1·77.	Crops ripening. Weather fine. Health good.
Jhallawar („ 3rd)	1·64	Late rain caused harm to *makka* and delayed *rabi* sowings.
Ajmere („ 7th)	No rain	Prospects and health excellent.
Jeypore („ „)	*Nil*	*Kharif* harvesting commenced; good outturn expected. Prices steady. Fever prevalent.
Bhurtpore ...	......	No report received.
Ulwur (Oct. 7th)	3·24 (average)	Preparations for *rabi* in progress. Fever very prevalent.

Circular No. $\frac{108Ex.}{17\text{-}20}$.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department, (Museums and Exhibitions),—under date Simla, the 2nd October 1884.

Read—

Despatch from Her Majesty's Secretary of State for India, No. 105, dated 31st July 1884.

Despatch to Her Majesty's Secretary of State for India, No. 10, dated 30th August 1884.

Circular No. $\frac{102Ex.}{17\text{-}10}$, dated 5th September 1884, to Local Governments and Administrations.

Despatch to Her Majesty's Secretary of State for India, No. 13, dated 23rd September 1884.

Circular No. $\frac{106Ex.}{17\text{-}9}$, dated 29th September 1884, to Local Governments and Administrations.

Letter to the Government of Bengal, No. $\frac{1080Ex.}{17E\text{-}1}$, dated the 29th September 1884.

RESOLUTION.

The Government of India has accepted, through Her Majesty's Secretary of State, the invitation of His Royal Highness the Prince of Wales to take part in an Exhibition, to be held in London under a Royal Commission in 1886, the purpose of which, in the words of His Royal Highness, is to demonstrate on the fullest scale to the inhabitants of the British Islands the unbounded industrial resources at their command within the limits of Her Majesty's Colonial and Indian dominion.

2. The co-operation of Local Governments and Administrations in this project has already been invited, and the Government is now desirous that the general public throughout India should be made acquainted with the opportunity which will be afforded of displaying in a complete and comprehensive manner the produce, arts, and manufactures of the Empire.

3. The Exhibition will be opened at South Kensington early in May 1886, and all Indian exhibits should arrive in England before the 1st of January in that year.

4. The terms on which space can be granted, and the extent to which it will be available, cannot be made known until the receipt of further instructions from the Royal Commissioners. But it is desirable that provisional applications for space should be sent in by intending exhibitors at as early a date as possible to such address as may be determined by the local authorities. Preference will, therefore, be given to applications received before the 1st of March 1885 on the understanding that the area applied for will not necessarily be attained in full, and that the application may be subsequently withdrawn if the charge for space is not accepted.

5. All communications to the Government of India connected with the Exhibition should be addressed to the Officer in charge, Exhibition Branch, Revenue and Agriculture Office.

ORDER.—Ordered, that a copy of this Resolution be forwarded to Local Governments and Administrations noted on the margin, with a request that it may be published in Local *Gazettes* and communicated to newspapers, Vernacular and English, for general information, and with an intimation of the address to which applications for space should be submitted.

R. V. RIDDELL, *Major, R.E.*,
Mint Master

CALCUTTA MINT.
The 6th October 1884.

POST OFFICE.

NOTIFICATIONS.

Simla, the 25th September 1884.

From 1st October 1884, a change will be made in the form of application for inland money orders, and a coupon, or slip, will be attached to each, which will be delivered with the money order to the payee without extra charge. The object of the coupon is to enable a remitter to write to the payee the purpose for which the money order is sent, or any other message he pleases. The coupon will be retained by the payee.

2. Forms can be obtained gratis at the Post Office as before. The remitter will have, as at present, to fill in the amount of the order, the payee's name and address and his own name and address on the receipt and acknowledgment. Remitters will continue to receive acknowledgments for their money orders signed by the payees.

3. Remitters must fill in the side of the form printed in black. The reverse printed in red ink is to be filled in by the Post Office only.

TELEGRAPHIC MONEY ORDERS.

With effect from 1st October 1884, Telegraphic Money Orders will be obtainable at all Money Order Offices.

2. A Telegraphic Money Order is an order granted by the Post Office for payment of a sum of money through the agency of the Post Office, the remittance being advised from one Post Office to another by telegraph, and payment being made at the payee's residence. Telegraphic Money Orders will be payable at any Money Order Office.

3. If there be no Government* Telegraph Office at the station of issue, the order will be sent by post to the nearest Government Telegraph Office for transmission onwards by telegraph. If there be no Goverument Telegraph Office at the station of payment, the order will be sent by post from the nearest Government Telegraph Office.

* Railway (Guaranteed or State) Telegraph Offices are not Government Telegraph Offices within the meaning of these rules.

4. The rates of commission on Telegraphic Money Orders are as follows :—

		R	a.
On sums not exceeding Rs. 25	.	0	8
" exceeding " 25 but not exceeding Rs. 50	.	0	12
" " " 50 " " " 75	.	1	2
" " " 75 " " " 100	.	1	8
" 100 " " " 125	.	1	14
" " " 125 " " " 150	.	2	4

5. A uniform charge of R2 is made for the telegram advising the remittance, irrespective of the amount of the remittance, provided the amount does not exceed R600, payable to the same payee. These telegrams are sent "urgent."

6. The remitter may write on the coupon attached to the Money Order form any private message he desires to communicate to the payee. Such private message will be added to the telegram advising the remittance, and will be charged for at the rate of 2 annas a word. The remitter may also prepay a reply under the ordinary rules of the Telegraph Department.

7. An official acknowledgment by telegraph of payment of the remittance can be obtained by the remitter. The charge for an acknowledgment is R1.

8. Payment of a Telegraphic Money Order will be made at the residence of the payee by the postman, immediately on receipt of the telegraphic advice by the Office of Payment. With the amount of the order a copy of the telegram will be delivered to the payee.

9. A copy of the detailed rules can be had on application at the Post Office.

BRITISH POSTAL ORDERS.

1. With effect from 1st October 1884, British Postal Orders for fixed sums from 1*s.* to £1, will be available for sale to the public at all Head Post Offices, and will be obtainable on application to any Sub-Post Office from its Head Office.

2. The following are the amounts for which British Postal Orders are issued, together with the cost of each order in Indian currency, including commission and exchange :—

Amounts of British Postal Orders.		Cost in Indian currency, including commission and exchange.			Amounts of British Postal Orders.		Cost in Indian currency, including commission and exchange.		
s.	*d.*	R	*a.*	*p.*	*s.*	*d.*	R	*a.*	*p.*
1	0	0	10	9	4	6	2	14	0
1	6	0	15	9	5	0	3	3	0
2	0	1	5	6	7	6	4	11	6
2	6	1	10	3	10	[illegible]	6	4	3
3	0	1	15	3	10	6	6	9	0
3	6	2	4	3	15	0	9	6	3
4	0	2	9	0	20	0	12	7	6

Note.—The cost of a British Postal Order is liable to vary slightly owing to fluctuations of exchange. The rate of exchange in force can be ascertained from the Post Office.

3. British Postal Orders issued from any Indian Post Office are payable at any Money Order Office in the United Kingdom (including the Channel Islands and the Isle of Man) and at Gibraltar and Constantinople.

4. The purchaser of a British Postal Order must, before parting with it, fill in the name of the person to whom the order is to be paid, and may fill in the name of the Money Order Office (in the United Kingdom, &c.) at which the amount is to be paid. If the name of a Money Order Office is not entered by the purchaser, the order will be payable at any Money Order Office named by the payee.

5. The purchaser should keep a record of the number and date and name of the Office of Issue of the order, to facilitate enquiry if the order should be lost.

6. After a British Postal Order has once been paid, to whomsoever it is paid, the British Post Office will not be liable for any further claim.

7. If any erasure or alteration be made, or if the order is cut, defaced, or mutilated, payment may be refused.

8. After the expiration of three months from the last day of the month of issue, a British Postal Order will be payable only on payment by the payee of a commission equal to the amount of the original British poundage marked on the order.

HENRY F. BLANFORD,

Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta,

Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

On and from the 1st January, 1884, the terms of subscription and sale will be reduced as follow:—

Terms of subscription, payable annually in advance.

	Without postage.	With postage.
For the Calcutta Series . .	R10 0	R12 8
" Madras " . . .	" 5 0	" 6 0
" Bombay " . . .	" 7 8	" 8 8
" Allahabad " . . .	" 5 0	" 6 0
Complete set	" 20 0	" 22 8

A part of any series purchased separately, R1.

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.
" Thacker & Co., Bombay.
" Higginbotham & Co., Madras.
The Government Central Book Depôt, Bombay.
" " Book Depôt, Allahabad.

Orders and subscriptions for 1884 should be at once remitted.

NOTICE.

Indian Law Reports.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5—1, Council House Street, at the following rates, payable in advance:—

	One page.	Half page.	Quarter page.
For one issue	R 15	R10	R 6
" three issues	" 40	" 25	" 14
" six "	" 70	" 40	" 25
" twelve "	" 110	" 70	" 45

At these rates the advertisers will have the option of changing their advertisements in each issue.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY ESTABLISHMENTS.

EMPLOYMENT OF NATIVES AS DRIVERS AND SHUNTERS.

Circular No. XXIV Railway, dated Simla, 13th September 1884.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Railway Circular No. XVI, dated the 5th July 1883.

Read also—

Reports on Native Drivers and Shunters employed on the several Railways in India for the year 1883.

OBSERVATIONS.—The reports received for the year 1883 show that the numbers of Natives employed as drivers and shunters have increased from 327 and 304 to 391 and 325 respectively. No returns have been received from the Mysore, Darjeeling-Himalayan and Assam Railways, and it is probable that no facilities yet exist on these lines for the training of Natives for such employment.

2. The extracts given below show the progress made in the numbers employed, and the system of training which has been adopted on the several Railways.

East Indian Railway.

3. In his letter to the Agent, the Locomotive Superintendent reports as follows :—

"I beg to report that on 31st December 1883, we had a staff of 236 Native drivers and shunters employed in working goods and ballast trains on the usual sections of the main line, as well as mail and mixed trains on the Gya State line, and mixed trains on all the branch lines of the Undertaking.

"This number is 14 short of what we had in the same class in December 1882, and is chiefly due to reductions in grade caused by slackness of traffic during the latter part of the year. It may be remarked, however, that the 14 men in question were not lost to the service but remained *in reserve* ready for utilisation as train drivers at any moment, and in fact were promoted early this year to their former standing as soon as the traffic admitted of it.

"Very great care and discrimination continued to be exercised in selecting men for promotion to the grade of engine-drivers, none but intelligent and duly qualified men being selected for that work, the condition as to their possessing a technical knowledge of the parts of a locomotive, coupled with a proficiency in one of the vernaculars, being, as usual, a *sine qua non*, as regards their employment on the foot-plate.

"The traffic having continued slack for some time past has prevented our recruiting our staff of Native drivers with *fresh* accessions from the lower ranks, but we possess the necessary element though the opportunity for promotion may be wanting.

"Daily instruction continues to be given at all the locomotive running sheds on this line between Howrah and Ghaziabad, at set intervals during the day as well as in the evenings (as the men can be spared from their work), and these schools are appreciated by the Native staff in general, though I must point out that at large centres, such as Howrah and Asansol, we have great difficulty in inducing men in the lower grades to attend to daily instruction, seeing that in the neighbouring jute-mills, warehouses and collieries, &c., they can readily obtain employment and earn the same amount of wages, if not more, without the obligation of attending school after hours, or submitting to any demands on their spare time.

"Further, at stations, where the Locomotive staff are not provided with quarters *close to the running shed*, and have to live away in the bazar, it is a matter of considerable difficulty to get the men to attend school after they are once released from work. Notwithstanding these drawbacks, the attendance at the Native adult schools during the year was maintained at a fair average, and the teachers were fully employed.

"I have pleasure in enclosing a memorandum showing the number of Natives (with their respective rates of pay) on our running shed staff on 31st December 1883, compared with the number on 31st December 1882, as also a statement showing the saving effected through the employment of Native drivers from April 1875 up to 31st December last, from which it will be seen that the total amounted to over thirty-one lakhs on the latter date."

Comparative Statement of Natives employed in the several Running Sheds on the 31st December 1882 and 31st December 1883, with their Rates of Pay.

December 1882.	December 1883.
Native Drivers.	*Native Drivers.*

Madras Railway.

4. The Locomotive Superintendent in his letter to the Agent and Manager, Madras Railway, reports as follows:—

"Natives of good physique and possessing a fair knowledge of English are sent out as second firemen on the engine to pick up their trade as all other trades are picked up, by constantly practising it, and as soon as they are fit they are promoted respectively to first firemen, shunters and drivers.

"The following table shows the number of men of each grade in employ and their rates of pay on the 31st December for the last three years:—

	On 31st December 1881.		On 31st December 1882.		On 31st December 1883.	
	Number of men.	Rate of pay per day.	Number of men.	Rate of pay per day.	Number of men.	Rate of pay per day.
Drivers	...	...	1	Rs. 1-8	2	Rs. 1-4 to 1-8
Shunters	2	Rs. 1-2 to 1-4	3	Rs. 0-12 to 1-2	4	" 0-12 to 1-2
Specially engaged firemen	6	" 0-4 to 0-8	8	" 0-6 to 0-8	15	" 0-6 to 0-8

"During the year 1883 twenty-one English-speaking firemen, selected from among many candidates, were engaged with a view to their being promoted in the course of time to drivers. A moonshee was also provided at Madras to teach, free of cost, some of the old and experienced Native firemen who already knew a little English, so that these might learn enough English to understand the time-tables and usual telegrams.

"The difficulty experienced in the last report, *viz.*, the want of pluck or strength on the part of these men to stand the work, has been experienced again this year, and out of twenty-one selected men, engaged since the 1st January 1883, twelve had disappeared within two months as follows:—

4 lost heart at the last moment and failed to join.
3 left after doing a day's work.
2 absconded after working one month.
2 absconded after working two months.
1 resigned after working two months.

12"

South Indian Railway.

5. On the South Indian Railway there were 18 drivers on salaries ranging from Rs. 20 to Rs. 30 per mensem, and 16 shunters from Rs. 12 to Rs. 18 per mensem, as against 12 drivers on salaries varying from Rs. 17 to Rs. 30 and 19 shunters from Rs. 12 to Rs. 20 per mensem during 1882. The system for training Native lads remained the same as reported previously.

Comparative Table showing Numbers employed.

	1882.	1883.
Drivers	12	18

Total	31	34

Great Indian Peninsula Railway.

6. Extract from the Locomotive Superintendent's letter No. $\frac{A.489}{D.4306}$, dated the 2nd April 1884, to the Agent of the Company:—

"I have to say that this office letter No. $\frac{A.514}{D.4306}$ of 14th April 1883 may be considered as the annual report for the year under review, as our system has undergone no change whatever, and has been fully explained in my report quoted above. I herewith send you a statement* giving the information required, and from which it will be seen that there has been a steady improvement in the training of Natives of this country to serve as engine-drivers."

* This statement includes Turners, Firemen and Angwallahs, who are not shown in the comparative table which follows.

Comparative Table showing Numbers employed.

	1882.	1883.
Drivers Shunters	60	79
TOTAL	60	79

Bombay, Baroda, and Central India Railway.

7. The Locomotive Superintendent states that the scale of pay and promotion in force was the same as in January 1883, but the Agent adds that the question of pay for these classes of employés is under his consideration in communication with the Agent of the Great Indian Peninsula Railway Company.

Comparative Table showing Numbers employed.

	1882.	1883.
Drivers	23	24
Shunters	8	12
TOTAL	31	36

Eastern Bengal Railway.

8. In his report to the Agent the Locomotive Superintendent states that "three Native firemen were promoted to pilotmen in 1883 on a consolidated pay of Rs. 30 per mensem each, and have thus far worked tolerably satisfactorily, but it should be borne in mind that they were engaged and have been working during the slack season; therefore their energies have never sufficiently been put to the test to admit of my giving an opinion as to their fitness under pressure of work or during an emergency."

Shunters	*Nil*	3	
TOTAL	*Nil*	3	

Sind, Punjab, and Delhi Railway.

9. In submitting the report on Native drivers, the Consulting Engineer observes as follows :—

"The Locomotive Superintendent's report is valuable, as showing how the variation in the price of coal affects the question of the rate of pay in regard to economy of fuel. At the same time there is no reason why the Native driver should not in time learn to be as economical of fuel as the European.

"The Consulting Engineer has several times expressed his opinion to the Locomotive Superintendent that, if an increase of pay would tempt a superior class of men to take service as drivers, it would be desirable to give it, as the present rate of pay is decidedly low for the skilled labor required. The present opinion, however, seems to be that a higher rate of pay would not attract a better stamp of men, and that it is better to offer inducements to them to educate themselves and to train their sons at as early an age as possible.

"Mr. Sandiford, the Locomotive Superintendent, has taken considerable interest in his schools and in the training of Native drivers generally, and the question as regards this line may safely be left in his hands."

The Locomotive Superintendent's report referred to above is as follows :—

"The total number of Europeans and Eurasians has now fallen to 88, and the number of Natives risen from 547 to 636. The once numerous class of European and Eurasian

firemen has all but disappeared, which, considering that till lately they were the material from which drivers were made, is significant. The actual number of Natives employed as drivers has risen from 10 to 30, and this number is now capable of expansion, the men employed as shunters being practically drivers, and so used within station limits. The larger number of Native firemen also give more men to draw from.

„ shunters	36		27	
„ firemen	229		299	
„ cleaners and jemadars	272		280	
Grand Total	652		724	

"Comparing the European staff as at present constituted with that required before Natives were introduced, it will be seen that, instead of 74, there would have been 104 drivers, or taking the whole European class "88" together, they would require to be increased to 214; a clear saving of the difference in pay between 126 Natives and that number of Europeans, which cannot be taken at less than Rs. 1,50,000 for the twelve months under review. The Native drivers now form about 30 per cent. of the total number employed; 95 per cent. of the firemen are Natives, and all the shunters. Further increase in traffic must be met by development of the Native element in the staff.

"*Effect on working.*—The general results on the whole have been satisfactory. A very considerable saving in expenditure has been made, and, although more expensive than European enginemen in fuel, stores and repairs, the men are improving, and if only more diligent in attending in school would leave little to be complained of. Confidence, which can only be gained by experience will work its own progression.

"When the short time this movement has been under way is taken into consideration, the progress and outlook is highly satisfactory, and tested by the levelling rule—economy—has given excellent results.

"*Training.*—The system followed is that described in a previous report. The most promising men are selected from among the staff and trained as firemen, shunters and drivers, rising through the different grades; and as all Natives in connection with the train service are offered every inducement to attend school, and in addition, are especially rewarded when they display aptitude, it is believed the best men come to the front. Although so far successful as to have produced the men now working, the advancement made in education is not great, and can only be traced to the class of men from which the staff is drawn being extremely illiterate. They are capable of acquiring the purely mechanical knowledge absolutely necessary to allow of their employment on locomotives, yet make very little progress in the school provided for their mental training. Efforts have been made to induce the better class of Natives to join, but up to the present the greasy duty and laborious nature of the occupation has deterred them from doing so. But Locomotive Superintendent feels that a weak point is the lowness of education, which, although to be regretted and combated, is not surprising and can only be overcome by perseverance. The total number of scholars on the roll was 198 for the 12 months, the average attendance 78, and of these—

36 can read a little English,
32 „ „ vernacular,
130 are learning the alphabets and spelling.

"Remuneration offered has not differed from that in force during 1882 and detailed in last report—

Native drivers	Rs. 20, 25, 30
„ shunters	
„ jemadars	
„ firemen	„ 8, 10, 12, 14
„ cleaners	„ 7 to 10
„ fuel coolies	„ 6 to 10

"As the seduction of cheap labor is likely to mislead, it may be useful to formulate the condition and extent to which it can be carried on purely commercial grounds. The following illustration can be applied to the exact circumstances of any case. Taking the total emoluments of a European and a Native at Rs 300 and Rs. 50 respectively, it is evident that the European must be prepared to save Rs. 250, before he can compete with his rival, allowing other advantages, if any, not to be considered. Applied to a few different districts the cost of fuel on which is given, and for example, say, a driver runs on an average 2,500 miles per month:—

		Rs.	
Fuel on the East Indian Railway	costs	2·15	per ton of coal.
„ „ Eastern Bengal Railway	„	8·37	„ „
„ „ Great Indian Peninsula Railway	„	12·81	„ „
„ „ Sind, Punjab, and Delhi Railway	„	19·39	„ „
„ „ Punjab Northern State Railway	„	28·61	„ „
„ „ Rajputana-Malwa Railway	„	22·42	„ „

Then on East Indian Railway a European driver would have to save more than a Native by lbs. 104 per train-mile.

„	Eastern Bengal Railway	do.	do.	26·75	do.	do.
„	Great Indian Peninsula Railway	do.	do.	17·49	do.	do.
„	Sind, Punjab, and Delhi Railway	do.	do.	11·55	do.	do.
„	Punjab Northern State Railway	do.	do.	7·83	do.	do.
„	Rajputana-Malwa Railway	do.	do.	9·63	do.	do.

"In Bengal, Rs. 250, the amount by which the European is handicapped, will purchase 116 tons of coal, so that on the above mileage a man would have to save that quantity (over 100 lbs. per mile run). On the Punjab Northern State Railway Rs. 250 will only purchase 8¾ tons of coal, and on the same mileage the European need only save 7·83 lbs. per mile to stand level with the Native. These examples abundantly prove that in Bengal and places where fuel is cheap, at the present rates of labor, Europeans cannot compete with Natives at all, while in districts where fuel is very expensive the difference between the men is reduced to conditions where the highly skilled European can easily excel his less careful and expert rival.

"*Conduct.*—The general conduct of the men in the execution of their work has been satisfactory. They have been attentive and gave little trouble."

In forwarding the above report to the Consulting Engineer, the Agent makes the following remarks:—

"It is said that, by the introduction of this movement, the substitution of Natives in lieu of Europeans in the Running Department is saving at the present time at the rate of 1½ lakhs rupees annually, but paragraph 8 points out that beyond a certain limit it may not, on commercial grounds, be prudent to extend the system.

"The East Indian Railway has always been held up as the initiator of cheap (Native) labor, and the system has largely developed on that line, but it is the low rate at which their fuel is obtained which enables them to extend the measure. In fact, to save 10 per cent. in the price of labor, the East Indian Railway can afford to consume 20 per cent. extra fuel, whereas on this Railway, where fuel is nine times the cost of what it is on the East Indian Railway, we can afford to pay 37 per cent. extra wages to save 10 per cent. of fuel.

"Now at present the Native driver is certainly more than 12 per cent. more extravagant in fuel than the skilled European, but, as his services are confined to such work as will not admit of his unskilfulness affecting the revenues of the Company, it does not much matter.

"That it is quite possible for the Native to become as adept as the trained European I have no doubt, but it will take time, and I would much rather see a steady healthy development of the system than a rapid growth which might land both men and masters in difficulties.

"On the Punjab Northern State Railway, where fuel is 13 times more expensive than on the East Indian Railway, Native labor would never pay, and as a matter of fact there are very few Native drivers on that line."

Oudh and Rohilkhand Railway.

10. In his letter No. $\frac{A}{453}$ of the 11th July 1884 the Locomotive and Carriage Superintendent reports as follows:—

"I beg to report that on the 31st December 1883 we had 32 Native drivers and 42 shunters on the line, and they have given general satisfaction. There is nothing special to report on them. The men who have lately come forward as shunters and drivers are more educated than the older hands; and in most cases they have found it to their interest to try and learn to read and write some language."

Comparative Table showing Numbers employed.

Punjab Northern Railway.

11. In his letter No. 432, dated the 21st January 1884, to the Director General of Railways, the manager reports as follows:—

"Native drivers are now working all trains on the Salt Branch (main line), Khewra Extension, Khusalgarh and Sialkot Branches, or a total of 180 miles. Before the Attock Bridge was opened the line from Khairabad to Peshawar was worked by Native drivers, but this has been discontinued since the engines have run through from Rawalpindi to Peshawar.

"All shunting on the line is done by Natives.

"All firemen on the line are Natives.

"The proportion of Native to European drivers on the line on the 31st December 1883 was 1 to 3

"The general results of the employment of Natives as drivers, shunters, and firemen continue to be satisfactory."

12. The following is the report of the Locomotive Superintendent on the subject:—

Indus Valley Railway.

"There has been no change in the system of training reported last year: the classes for English at Sukkur and Jacobabad continue to be attended fairly, but the progress in learning has not been so satisfactory as could be wished. Only one Native driver has been found able to pass a sufficiently good examination in English to entitle him to the additional Rs. 5 per month allowed by the rules. The progress of the class at Jacobabad is on the whole better than at Sukkur, which is to be attributed to the facts that the Kandahar Branch line is not affected by the heavy traffic on the main line, which causes irregular attendance, and that the school room is close to the engine shed and to the Native quarters, so that the men can be readily found out and collected at any hour that is most suitable; whereas in Sukkur the school room is at a very considerable distance from both the quarters and the shed, and the men, who unfortunately are ready enough to find any excuse for not attending the school, find this one ready made. It also precludes the shed clerk from getting to it in the middle of the day, which is often a convenient time for collecting the men together. It is strongly recommended that a class room with the necessary rough furniture be provided near the engine shed, and that prizes be offered as an inducement to the scholars to improve. But it cannot be lost sight of that the small progress made is mainly due to the fact that no persons of any good social standing, and very few of any education at all offer for the employment.

"Out of a total number of 139 on the muster roll, 122 have attended the classes, and the daily attendance averages 50.

"There are 10 Native drivers employed on the following rates of pay:—

1 on Rs. 45 per month }
3 on „ 40 „ } consolidated,
1 on „ 35 „ }
2 on „ 1 per day } with overtime,
3 on „ 0-14 „ }

and 13 Native shunters on the following rates:—

1 on Rs. 35 per month, consolidated,
2 on annas 13 per day } with overtime.
10 on „ 12 „ }

"One of the best drivers has been lost on account of being connected with a robbery, and one of the shunters has had to be reduced to fireman for carelessness.

"Three of the drivers are working goods trains between Sukkur and Radhan, and seven on the mail trains between Rindli and Ruk, and on the fast local service between Jacobabad and Sukkur.

Comparative Table showing Numbers employed.

	1882.	1883.
Drivers	8	10
Shunters	12	13
TOTAL	20	23

"The increase of the staff continues to receive the most careful attention, and men are pushed on as soon as they show themselves to be reliable and skilful."

The Manager states that the question of building a school at Sukkur is under discussion with the Locomotive Superintendent.

13. In his letter No. 2251E., dated the 17th June 1884, to the Director General of Railways, the Manager reports as follows:—

Rajputana-Malwa Railway.

"*System of training adopted.*—The Locomotive Superintendent reports that a school has for some short time past been maintained at Phalera, where Native boy shunters and drivers attend as their duties allow. Besides being taught to read and write at the school, the present and any new rules and orders for working the traffic are explained to them.

"*Numbers employed.* -The following statement compares the numbers employed respectively on the 31st December 1882 and 31st December 1883:—

	On 31st December 1882.	On 31st December 1883.
Drivers	13	18
Shunters	31	41
TOTAL	44	59

"*General Remarks.*—The relative advantages and disadvantages of employing this class of labor are summed up as follows by the Locomotive Superintendent:—

"*Advantages.*—Lower salary paid to Native drivers as compared with that paid to Europeans

"*Disadvantages.*—(1) Larger consumption of coal and stores, the ratio of coal consumption of Native drivers to Europeans per engine mile being as 34·7 to 29·64, which becomes a serious consideration owing to the high cost of coal on this line.

"(2) Ignorance of the English language, in which language the line clear messages and any endorsements are written; this being so, the driver has to trust to the statements of the guard and station master.

"(3) In cases of accidents Natives are less ready of resources than Europeans. The percentage of loss of time in the case of Natives is 126 against 39 in that of Europeans, and the percentage of engine failures is 43 for Natives and 16 for Europeans.

"In conclusion I have the honor to state that, all things considered, there is no advantage to be gained in the employment of Natives as drivers and shunters on the Rajputana-Malwa Railway.'

State Railways in Central Provinces.

14. The Manager of the Wardha Coal and Nagpur and Chhattisgarh State Railways states as follows:—

"As reported last year, *vide* this office No. 5554M., dated 28th December 1882, schools for training Native lads for enginemen and shunters were not opened either for the Nagpur and Chhattisgarh or the Wardha Coal State Railway. On the former it was not necessary to establish such a school, as the requirements of the line could be met from other sources; and the Wardha Coal line being so short (only 45 miles), new men were not required; hence the necessity of establishing a school at any expense is not warranted; as, however, none of the firemen and shunters now on this line can read or write in any language, the Assistant Manager has recently opened a school for teaching them to do so in their vernacular.

"As required by Government of India Circular No. 1 Railway of 1882, a statement of the number of Native drivers and shunters employed on both these lines during the busy season of 1882-83, showing also the corresponding numbers employed during 1881-82, is enclosed.

"The statement shows an increase of the number of Natives on both lines; and on the Nagpur and Chhattisgarh, there were, during the period under reference, several men, who, although Europeans by name, were either East Indians or Natives.

"General character and the ability of the men employed on the Nagpur and Chhattisgarh State Railway are given in Locomotive Superintendent's letter No. 4025 of 31st July 1884 (copy enclosed).

"The four men on the Wardha Coal line were engaged shunting in the colliery sidings and Warora Station yard; one of them was, until recently, allowed to drive goods trains on the main line, but as he cannot read any language this has been discontinued."

The following is an extract from the letter of the Locomotive and Carriage Superintendent, reporting on the Native drivers and shunters employed on the Nagpur and Chhattisgarh State Railway during the year 1883, referred to in the Manager's letter:—

"Driver J. Manuel was appointed on this line as a Native shunter on Rs. 25 per mensem on the 7th March 1881, and from 1st January 1883 was promoted to driver on Rs. 30. During the year he was employed in shunting at the station yard, and occasionally in driving local trains between Nagpur and Kamptee. He works fairly well as a shunter, but, being unable to read or write in any language, he is not likely to be employed as a main line driver.

"Driver Khandoo Baloo was appointed as a fireman on Rs. 11 per mensem on the 1st of April 1880, and promoted to driver on 1st May 1882 on Rs. 20, and further promotion to Rs. 30 on the 1st January 1883. During the year he worked as driver of local trains between Nagpur and Kamptee, and occasionally on goods trains on main line. He can read and write a little, and may eventually become a good engineman.

"Driver Mancherjee Framjee was appointed on Rs. 60 per mensem on the 29th January 1883 and worked on goods trains on the main line, but was dismissed on the 23rd May 1883 for allowing his boiler to run so low in water as to drop the lead plug. He can read and write English.

"Shunter Gulab was appointed on Rs. 18 per mensem on the 1st January 1882, and promoted to Rs. 25 on the 1st January 1883. During this time he was employed in yard shunting and driving local trains between Nagpur and Kamptee, and occasionally goods trains on the main line. He was fined ½ month's pay on the occasion of a collision, on the 7th April 1883, between his and another engine at Amgaon station, as he had not got his head lamp lighted; also fined ⅛ month's pay on the 6th April 1883 for careless and violent shunting in Nagpur station. He can read time tables and line clears. He resigned his appointment in May 1883.

"Shunter Doctor was appointed on Rs. 32 per mensem on the 8th December 1882, and was employed in yard shunting. He is pretty well up in his work and has on one or two occasions run local trains between Nagpur and Kamptee. He can read and write English.

"Shunter Inayat Hossain was appointed on Rs. 20 per mensem on the 16th March 1883, and discharged on the 19th August 1883 on account of reduction of establishment. He was employed in yard shunting and local trains between Nagpur and Kamptee. He can read very little except time tables and line clears, and cannot write.

"Shunter Cawagee Pestonjee was appointed as a fireman on Rs. 15 per mensem on the 23rd November 1881, and promoted to shunter on Rs. 30 on the 1st January 1883. He was employed in shunting at the station yard and driving local trains between Nagpur and Kamptee, and occasionally goods trains on the main line. He can read and write English. He resigned on the 24th June 1883.

"Shunter P. Baloo was employed as a fireman on Rs. 11 per mensem on the 24th November 1880, and promoted to shunter on Rs. 18 on the 1st December 1882. During the year he was employed in yard shunting and driving Raj-Nandgaon local trains and occasionally goods trains on the main line. He can read very little except time tables and line clears, but is likely to become a good engineman."

In submitting the above reports the Chief Commissioner remarks that he is not quite satisfied that as much as possible has been done to train Native lads as drivers and shunters, and that immediate attention will be given to the matter.

Bengal Provincial Railways.

15. The Government of Bengal has issued the following Resolution, No. 1329R.E., dated the 25th March 1884, on the subject:—

"OBSERVATIONS.—In Resolution No. 1023R.E. of the 28th February 1883, noted above, it was stated: 'The progress made in the employment of Native drivers and shunters is considered on the whole satisfactory. The real difficulty still is to obtain men with the necessary qualifications, and to overcome the aversion the men have to attend the night schools provided for them.

* * * * * *

"'They should, however, be employed to the fullest extent on goods trains, and the Lieutenant-Governor trusts that the officers in charge of lines will not relax their efforts to see that this order is carried into effect.'

"2. The reports for the year 1883 show that the following progress has been made in the employment of Native drivers and shunters on the railways under the orders of this Government:—

Northern Bengal State Railway.

16. "The Locomotive Superintendent reports as follows:—

"'There are now two teachers attached to the school—one to teach Bengali and the other Hindi.

"'The numbers of pupils on the rolls are 25, of whom five learn Bengali and twenty Hindi: the average daily attendance is 12.

"'The comparative statement showing the number of Native drivers employed in the various grades during the year 1882-83, and the salaries drawn in each grade, is as under:—

1882.

Grade. Rs.	No. of men.	Salary. Rs.	
20 to 40	1	38	7 drivers, 9 shunters, and 1 assistant shunter.
	1	30	
	1	26	
	3	24	
	4	22	
	3	20	
	2	17	
	1	16	
	1	14	

1883.

Grade. Rs.	No. of men.	Salary. Rs.	
20 to 40	1	38	12 drivers, 7 shunters, and 1 assistant shunter.
	1	30	
	1	28

"'Of the 12 drivers, one was transferred from this Railway to the Calcutta and South-Eastern State Railway line in May last; two are employed in the Kaunia and Dharlla Railway line; and two in running trains in the Rungpore Branch, and seven in the main line, working goods trains.

"'The seven shunters are employed as yard shunters at Saidpur, Sara, and Siliguri.

"'The assistant shunter is employed at this station.

"'All these men, except one, are working in a satisfactory manner. They are regular in attendance.

"'The two drivers of the Kaunia and Dharlla Railway line have been awarded a reward of Rs. 5 each at the end of last half-year for keeping their engines clean and in good order.'

Tirhoot State Railway.

17. "The Assistant Locomotive Superintendent states as follows in his letter No. 632D., dated 30th December 1883, to the Manager:—

"'The number of of men employed for the years 1881, 1882, and 1883 compare as follows:—

	Grade. Rs. Rs.	1881.	1882	1883.
Drivers	15 to 40	...	2	5
Shunters		3	2	5*
Assistant shunters		...	1	2
		3	5	12

"'From these figures you will see that the number of available enginemen and shunters has been doubled in the last year. You will also note that we have now eight men capable of working trains, and two others who should be fit to go out on the line in another six or eight months' time.

"'No alteration in the mode of supplying men has been made during the year, the old rule of promoting cleaners to firemen, firemen to shunters, and shunters to drivers having been pursued, each man undergoing a careful examination before he is promoted to shunter, and again when he is promoted to driver. At the present time there are some five men having worked their way up to posts of first firemen and shed tindals, who are fit to be promoted to shunters whenever they may be required, two of whom are now actually employed in shunting in the Somastipur yard during the present increase in the number of working trains.

"'As regards the progress made to teach the men to read and write, a night school has been started here since March last, and a schoolmaster purposely employed to conduct the same. The attendance has been satisfactory on the whole.

"'During the year eight failures have occurred to engines under the charge of Native drivers. Since the 1st of this month no Europeans have been employed on goods, local or material trains, the work having been entirely and satisfactorily performed by Natives; an up and down local, an up and down goods, two ballast and one material train having been regularly running.

"'It is therefore clear that our present staff of Native enginemen is sufficient for our requirements until the line opens out or the traffic increases; and I consider that they have performed the work allotted to them for the year in question in a satisfactory manner.'

Calcutta and South-Eastern and Nalhati State Railways.

18. "The Locomotive Superintendent reports:—

"'Arrangements have been made to establish a night school on the Calcutta and South-Eastern State Railway, similar to that established at Saidpur, with a view to give a rudimentary education in Bengali and Hindi to these men, as well as to the workshop apprentices.

"'The comparative statement showing the number of Native drivers employed in various grades on the Calcutta and South-Eastern and Nalhati State Railways during the year 1882-83, and the salaries drawn in each grade, is as under:—

Calcutta and South-Eastern State Railway.

1882. Grade. Rs.	No. of men.	Salary. Rs.	1883. Grade. Rs.	No. of men.	Salary. Rs.	
20 to 40	3	30	20 to 40	1	34	7 drivers, 4 shunters, and 1 assistant shunter.
	1	20		2	30	
				2	24	
				2	20	
				4	15	
				1	12	

"'The seven drivers are employed in running trains.

"'Of the four shunters, one died in June last, and the three are employed as yard shunters at Calcutta and Diamond Harbour.

"'The assistant shunter is employed at Calcutta.

Nalhati State Railway.

1882. Grade. Rs.	No. of men.	Salary. Rs.	1883. Grade. Rs.	No. of men.	Salary. Rs.
20 to 40	2	30	20 to 40	2	30
	1	15		1	15

"'All these men have given little trouble. They are regular in attendance and careful in the performance of their duties.

"'Three drivers of the Nalhati line, and two of the Calcutta and South-Eastern State Railway line, can read and write.'

"RESOLUTION.—The large increase in the number of Native drivers and shunters employed during 1883, as compared with the number during 1882, and the favorable reports, with referenc

* Three of these men are actually working trains at the present time.

to the attendance of the men and the satisfactory performance of the duties entrusted to them, are a sufficient proof that the training of Natives for employment on locomotive engines has now passed beyond the experimental stage, and that the difficulties at first experienced in carrying out the measure have been fairly overcome.

"It is noted, however, that the men are as yet employed only on goods, local or material trains, and though, with the class of men now obtained, this limitation may be advisable for the present and for some time to come, the Lieutenant-Governor trusts that every endeavour will be made to obtain the services of a class of men of somewhat superior intelligence, who, with the necessary experience, might reasonably be expected to become competent for the working of fast mail trains. With that object in view, the night schools now provided (the attendance at which is still somewhat unsatisfactory) should be made as efficient as possible by granting prizes for regular attendance, and by regulating the pay of the men on promotion according to the result of their examination."

North-Western Provinces and Oudh Provincial Railways.

19. The following is an extract from the report of the Locomotive Superintendent:—

"Lads of about 13 years of age are engaged and employed in assisting Native workmen in the workshops, and as engine cleaners in the running shed. They are compelled to attend school from 7 to 9 A.M. daily, Sundays excepted.

"A school was started on a small scale at the Cawnpore workshops in the month of March last with seven lads on the roll, and before the end of the year their number increased to 14. The average daily attendance was 10·2. Those of the lads who are constant in attendance during the whole period of school's existence made a very fair progress in reading Urdu, Nagri, and English, and some of the elder ones can write a little.

"A trial was again made in giving good encouragement to several youths of the better class to train for drivers, all of whom liked the free school attendance but got tired of work, and in a few days all disappeared."

Burma State Railway.

20. The Locomotive Superintendent in his letter to the Manager reports as follows:—

"I have the honor to acknowledge receipt of your endorsement No. 1831-6 E. R. of 18th July 1884, forwarding British Burma Public Works Department No. 4519, dated 17th July 1884, and in reply to state that the night school organised at Rangoon and alluded to in my No. 1205 of 18th April 1883, when writing on the same subject now under notice, has been abolished for the following reasons:—

"(1) that the Natives attending the school gradually decreased in number;

"(2) the schoolmaster having resigned his appointment through his having obtained a more lucrative one.

"Steps have, however, since been taken to reorganise the school in conjunction with the Traffic Department in order to train Natives as brakesmen, guards, and drivers.

"During the last busy season two ballast trains have been successfully worked on the open lines by Natives, and it is my intention to put these men in charge of goods trains north of Latpadan during the next busy season. I regret to state that the skilled firemen who are entertained during

* These numbers do not correspond with those shown in the Report for 1882. Please see foot-notes to the general statement inserted in this Resolution.

"'Of the 12 drivers, one was transferred from this Railway to the Calcutta and South-Eastern State Railway line in May last; two are employed in the Kaunia and Dharlla Railway line; and two in running trains in the Rungpore Branch, and seven in the main line, working goods trains.

"'The seven shunters are employed as yard shunters at Saidpur, Sara, and Siliguri.

"'The assistant shunter is employed at this station.

"'All these men, except one, are working in a satisfactory manner. They are regular in attendance.

"'The two drivers of the Kaunia and Dharlla Railway line have been awarded a reward of Rs. 5 each at the end of last half-year for keeping their engines clean and in good order.'

Tirhoot State Railway.

17. "The Assistant Locomotive Superintendent states as follows in his letter No. 632D., dated 30th December 1883, to the Manager:—

"'The number of of men employed for the years 1881, 1882, and 1883 compare as follows:—

	Grade.	1881.	1882	1883.
Drivers	Rs. Rs. 15 to 40	...	2	5
Shunters		3	2	5*
Assistant shunters		...	1	2
		3	5	12

"'From these figures you will see that the number of available enginemen and shunters has been doubled in the last year. You will also note that we have now eight men capable of working trains, and two others who should be fit to go out on the line in another six or eight months' time.

"'No alteration in the mode of supplying men has been made during the year, the old rule of promoting cleaners to firemen, firemen to shunters, and shunters to drivers having been pursued, each man undergoing a careful examination before he is promoted to shunter, and again when he is promoted to driver. At the present time there are some five men having worked their way up to posts of first firemen and shed tindals, who are fit to be promoted to shunters whenever they may be required, two of whom are now actually employed in shunting in the Somastipur yard during the present increase in the number of working trains.

"'As regards the progress made to teach the men to read and write, a night school has been started here since March last, and a schoolmaster purposely employed to conduct the same. The attendance has been satisfactory on the whole

"'During the year eight failures have occurred to engines under the charge of Native drivers. Since the 1st of this month no Europeans have been employed on goods, local or material trains, the work having been entirely and satisfactorily performed by Natives; an up and down local, an up and down goods, two ballast and one material train having been regularly running.

"'It is therefore clear that our present staff of Native enginemen is sufficient for our requirements until the line opens out or the traffic increases; and I consider that they have performed the work allotted to them for the year in question in a satisfactory manner.'

Calcutta and South-Eastern and Nalhati State Railways.

18. "The Locomotive Superintendent reports:—

"'Arrangements have been made to establish a night school on the Calcutta and South-Eastern State Railway, similar to that established at Saidpur, with a view to give a rudimentary education in Bengali and Hindi to these men, as well as to the workshop apprentices.

"'The comparative statement showing the number of Native drivers employed in various grades on the Calcutta and South-Eastern and Nalhati State Railways during the year 1882-83, and the salaries drawn in each grade, is as under:—

Calcutta and South-Eastern State Railway.

1882. Grade. Rs.	No. of men.	Salary. Rs.	1883. Grade. Rs	No. of men.	Salary. Rs.	
20 to 40	3	30	20 to 40	1	34	7 drivers, 4 shunters, and 1 assistant shunter.
	1	20		2	30	
				2	24	
				2	20	
				4	15	
				1	12	

"'The seven drivers are employed in running trains.

"'Of the four shunters, one died in June last, and the three are employed as yard shunters at Calcutta and Diamond Harbour.

"'The assistant shunter is employed at Calcutta.

Nalhati State Railway.

1882. Grade. Rs.	No. of men.	Salary. Rs.	1883. Grade. Rs.	No. of men.	Salary. Rs
20 to 40	2	30	20 to 40	2	30
	1	15		1	15

"'All these men have given little trouble. They are regular in attendance and careful in the performance of their duties.

"'Three drivers of the Nalhati line, and two of the Calcutta and South-Eastern State Railway line, can read and write.'

"RESOLUTION.—The large increase in the number of Native drivers and shunters employed during 1883, as compared with the number during 1882, and the favorable reports, with referenc

* Three of these men are actually working trains at the present time.

to the attendance of the men and the satisfactory performance of the duties entrusted to them, are a sufficient proof that the training of Natives for employment on locomotive engines has now passed beyond the experimental stage, and that the difficulties at first experienced in carrying out the measure have been fairly overcome.

"It is noted, however, that the men are as yet employed only on goods, local or material trains, and though, with the class of men now obtained, this limitation may be advisable for the present and for some time to come, the Lieutenant-Governor trusts that every endeavour will be made to obtain the services of a class of men of somewhat superior intelligence, who, with the necessary experience, might reasonably be expected to become competent for the working of fast mail trains. With that object in view, the night schools now provided (the attendance at which is still somewhat unsatisfactory) should be made as efficient as possible by granting prizes for regular attendance, and by regulating the pay of the men on promotion according to the result of their examination."

Shunters	13*	20
TOTAL .	29	47

19. The following is an extract from the report of the Locomotive Superintendent:—

North-Western Provinces and Oudh Provincial Railways.

"Lads of about 13 years of age are engaged and employed in assisting Native workmen in the workshops, and as engine cleaners in the running shed. They are compelled to attend school from 7 to 9 A.M. daily, Sundays excepted.

"A school was started on a small scale at the Cawnpore workshops in the month of March last with seven lads on the roll, and before the end of the year their number increased to 14. The average daily attendance was 10·2. Those of the lads who are constant in attendance during the whole period of school's existence made a very fair progress in reading Urdu, Nagri, and English, and some of the elder ones can write a little.

"A trial was again made in giving good encouragement to several youths of the better class to train for drivers, all of whom liked the free school attendance but got tired of work, and in a few days all disappeared."

20. The Locomotive Superintendent in his letter to the Manager reports as follows:—

Burma State Railway.

"I have the honor to acknowledge receipt of your endorsement No. 1831-6 E. R. of 18th July 1884, forwarding British Burma Public Works Department No. 4519, dated 17th July 1884, and in reply to state that the night school organised at Rangoon and alluded to in my No. 1205 of 18th April 1883, when writing on the same subject now under notice, has been abolished for the following reasons:—

"(1) that the Natives attending the school gradually decreased in number;

"(2) the schoolmaster having resigned his appointment through his having obtained a more lucrative one.

"Steps have, however, since been taken to reorganise the school in conjunction with the Traffic Department in order to train Natives as brakesmen, guards, and drivers.

"During the last busy season two ballast trains have been successfully worked on the open lines by Natives, and it is my intention to put these men in charge of goods trains north of Latpadan during the next busy season. I regret to state that the skilled firemen who are entertained during

* These numbers do not correspond with those shown in the Report for 1882. Please see foot-notes to the general statement inserted in this Resolution.

the busy season generally leave this line for India during the slack season, consequently the training and promotion of these men to shunters or drivers have been hindered.

"We have now six shunters and two head jemadars who are able to do shunting, and I hope to make a more favorable report on this matter in my next.

"None of the Karen lads have as yet been sent out firing for reasons already explained in paragraph 8 of my last report.

"In conclusion I beg to state that every effort is being made to meet the wishes of the Local Government on the subject."

Bhavnagar-Gondal Railway.

21. The Manager and Engineer-in-Chief reports as follows:—

"During the past year three Native shunters have been employed in the Locomotive Department, and one of them has lately been advanced to a probationer engine driver and is doing well.

"A statement showing the progress made in training the Natives as firemen, shunters, and engine drivers on the Bhavnagar-Gondal Railway from the beginning is herewith attached for information."

YEAR.	No. of Native Firemen employed.	No. of Native Shunters employed.	No. of Native Drivers employed.	REMARKS.
1st and 2nd half-years, 1881	40	*Nil*	*Nil*	
1st half-year, 1882	34	*Nil*	*Nil*

Total	327	391	304	325

(*a*) Pilotmen.
(*b*) Employed during the busy seasons of 1882 and 1883.
(*c*) The number of drivers shown in the previous return was 6 and that of shunters 8.
(*d*) Four shunters were shown in the return for 1883 as employed on both the Tirhoot and Patna-Gya State Railways. The latter Railway is now worked by the East Indian Railway Company.
(*e*) Three of these men are actually working trains at present time.
(*f*) Two of these men are head jemadars who are able to do shunting.

2. The Government of India notices with satisfaction that there has been an increase of 64 in the number of Native drivers and of 21 in the number of Native shunters, and that the subject of training Natives for such employment continues to receive the attention of the authorities concerned.

Order.—Ordered, that this Resolution be communicated to the Governments, Administrations and officers noted in the margin for information.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces, Assam, and British Burma.
The Residents, Hyderabad and Mysore.
The Agents to the Governor-General for Rajputana, Central India, and Biluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Guaranteed Railways.
The Accountant General, Public Works Department.

Ordered also, that this Resolution be published in the Supplement to the *Gazette of India.*

F. FIREBRACE, *Major, R.E.,*
Under-Secretary.

				5,773

* Passed down to supplement the Agra Canal.

Executive Engineer, Northern Division, Ganges Canal, reports—Very good rain during the month. Canal closed for repairs on afternoon of 9th. River high. All crops very good.

Executive Engineer, Meerut Division, Ganges Canal, reports—In the 1st sub-division there was a light demand for water for rice during the first week but after the heavy rain on the 9th and 10th all demand ceased.

Executive Engineer, Bulandshahr Division, Ganges Canal, reports—There was slight demand on two rajbahas up till 8th, when rain fell and al demand ceased.

Executive Engineer, Aligarh Division, Ganges Canal, reports—Heavy and general rain on the 3rd of August stopped demand for water entirely.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports—There has been no demand and plentiful rain throughout the division all through the month. The decrease compared with last year is due to the plentiful rain compared with last year, and is almost entirely under the head of Other food-grains.

Executive Engineer, Cawnpore Division, Lower Ganges Canal, reports—An increase of 1,938 acres in indigo, which is the chief irrigated crop in this division. Food-grains have fallen off owing to the successively heavy rain, *i.e.*, 25·4 inches in August, against 3·3 in the same month last year.

Executive Engineer, Etawah Division, Lower Ganges Canal, reports—Abnormally heavy rain throughout the month, and consequently no water was taken for irrigation of rain crops. There has been an increase in indigo, but a falling off in sugarcane, as explained last month.

Executive Engineer, Eastern Jumna Canal, reports—The ample rainfall stopped all demand after the 10th August: hence the decrease in area. The decrease is chiefly in rice and other food-grains. There is an increase in sugarcane and indigo. Crops in low lands injured by excessive rain. Demand for crops previously irrigated commenced on 27th August.

Executive Engineer, Agra Canal, reports.—With the exception of one distributary, Shergarh, no irrigation was effected during August. The excess of escaped volume over supply entering division is explained by a quantity of water entering the canal by inlets, &c.

Executive Engineer, Rohilkhand Canals, reports—A very wet month; not much demand for water. Moderately heavy floods came down most of the rivers on the 10th and breached most of the earthen dams. Crops are looking very well.

Collector, Bijnor, Executive Engineer, Dun Canals, Deputy Commissioner, Jhansi, and Collector of Hamirpur, report. that—no irrigation was effected during the month of August 1884.

H. W. CONDUITT,
Offg. Asst. Secy. to Govt., N.-W. P. and Oudh, P. W. D., Irrigation Branch.

R. V. RIDDELL, *Major, R.E.*,
Mint Master.

CALCUTTA MINT,
The 6th October 1884.

POST OFFICE.

NOTIFICATIONS.

Simla, the 25th September 1884.

From 1st October 1884, a change will be made in the form of application for inland money orders, and a coupon, or slip, will be attached to each, which will be delivered with the money order to the payee without extra charge. The object of the coupon is to enable a remitter to write to the payee the purpose for which the money order is sent, or any other message he pleases. The coupon will be retained by the payee.

2. Forms can be obtained gratis at the Post Office as before. The remitter will have, as at present, to fill in the amount of the order, the payee's name and address and his own name and address on the receipt and acknowledgment. Remitters will continue to receive acknowledgments for their money orders signed by the payees.

3. Remitters must fill in the side of the form printed in black. The reverse printed in red ink is to be filled in by the Post Office only.

TELEGRAPHIC MONEY ORDERS.

With effect from 1st October 1884, Telegraphic Money Orders will be obtainable at all Money Order Offices.

2. A Telegraphic Money Order is an order granted by the Post Office for payment of a sum of money through the agency of the Post Office, the remittance being advised from one Post Office to another by telegraph, and payment being made at the payee's residence. Telegraphic Money Orders will be payable at any Money Order Office.

3. If there be no Government* Telegraph Office at the station of issue, the order will be sent by post to the nearest Government Telegraph Office for transmission onwards by telegraph. If there be no Government Telegraph Office at the station of payment, the order will be sent by post from the nearest Government Telegraph Office.

* Railway (Guaranteed or State) Telegraph Offices are not Government Telegraph Offices within the meaning of these rules.

4. The rates of commission on Telegraphic Money Orders are as follows:—

	R	a.
On sums not exceeding Rs. 25	0	8
„ exceeding „ 25 but not exceeding Rs. 50 .	0	12
„ „ „ 50 „ „ „ 75 .	1	2
„ „ „ 75 „ „ „ 100 .	1	8
„ „ „ 100 „ „ „ 125 .	1	14
„ „ „ 125 „ „ „ 150 .	2	4

5. A uniform charge of R2 is made for the telegram advising the remittance, irrespective of the amount of the remittance, provided the amount does not exceed R600, payable to the same payee. These telegrams are sent "urgent."

6. The remitter may write on the coupon attached to the Money Order form any private message he desires to communicate to the payee. Such private message will be added to the telegram advising the remittance, and will be charged for at the rate of 2 annas a word. The remitter may also prepay a reply under the ordinary rules of the Telegraph Department.

7. An official acknowledgment by telegraph of payment of the remittance can be obtained by the remitter. The charge for an acknowledgment is R1.

8. Payment of a Telegraphic Money Order will be made at the residence of the payee by the postman, immediately on receipt of the telegraphic advice by the Office of Payment. With the amount of the order a copy of the telegram will be delivered to the payee.

9. A copy of the detailed rules can be had on application at the Post Office.

BRITISH POSTAL ORDERS.

1. With effect from 1st October 1884, British Postal Orders for fixed sums, from 1*s.* to £1, will be available for sale to the public at all Head Post Offices, and will be obtainable on application to any Sub-Post Office from its Head Office.

2. The following are the amounts for which British Postal Orders are issued, together with the cost of each order in Indian currency, including commission and exchange:—

Amounts of British Postal Orders.	Cost in Indian currency, including commission and exchange.	Amounts of British Postal Orders.	Cost in Indian currency, including commission and exchange.
s. *d.*	R *a.* *p.*	*s.* *d.*	R *a.* *p.*
1 0	0 10 9	4 6	2 14 0
1 6	0 15 9	5 0	3 3 0
2 0	1 5 6	7 6	4 11 6
2 6	1 10 3	10 0	6 4 3
3 0	1 15 3	10 6	6 9 0
3 6	2 4 3	15 0	9 6 3
4 0	2 9 0	20 0	12 7 6

Note.—The cost of a British Postal Order is liable to vary slightly owing to fluctuations of exchange. The rate of exchange in force can be ascertained from the Post Office.

3. British Postal Orders issued from any Indian Post Office are payable at any Money Order Office in the United Kingdom (including the Channel Islands and the Isle of Man) and at Gibraltar and Constantinople.

4. The purchaser of a British Postal Order must, before parting with it, fill in the name of the person to whom the order is to be paid, and may fill in the name of the Money Order Office (in the United Kingdom, &c.) at which the amount is to be paid. If the name of a Money Order Office is not entered by the purchaser, the order will be payable at any Money Order Office named by the payee.

5. The purchaser should keep a record of the number and date and name of the Office of Issue of the order, to facilitate enquiry if the order should be lost.

6. After a British Postal Order has once been paid, to whomsoever it is paid, the British Post Office will not be liable for any further claim.

7. If any erasure or alteration be made, or if the order is cut, defaced, or mutilated, payment may be refused.

8. After the expiration of three months from the last day of the month of issue, a British Postal Order will be payable only on payment by the payee of a commission equal to the amount of the original British poundage marked on the order.

HENRY F. BLANFORD,

Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The "Indian Law Reports," published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta,

Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

On and from the 1st January, 1884, the terms of subscription and sale will be reduced as follow:—

Terms of subscription, payable annually in advance.

	Without postage.	With postage.
For the Calcutta Series	R10 0	R12 8
„ Madras „	„ 5 0	„ 6 0
„ Bombay „	„ 7 8	„ 8 8
„ Allahabad „	„ 5 0	„ 6 0
Complete set	„ 20 0	„ 22 8

A part of any series purchased separately, R1.

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.
„ Thacker & Co., Bombay.
„ Higginbotham & Co., Madras.
The Government Central Book Depôt, Bombay.
„ „ Book Depôt, Allahabad.

Orders and subscriptions for 1884 should be at once remitted.

NOTICE.

Indian Law Reports.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5—1, Council House Street, at the following rates, payable in advance:—

	One page.	Half page.	Quarter page.
For one issue	R 15	R10	R 6
„ three issues	„ 40	„ 25	„ 14
„ six „	„ 70	„ 40	„ 25
„ twelve „	„ 110	„ 70	„ 45

At these rates the advertisers will have the option of changing their advertisements in each issue.

OFFICIAL PAPERS.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY ESTABLISHMENTS.

EMPLOYMENT OF NATIVES AS DRIVERS AND SHUNTERS.

Circular No. XXIV Railway, dated Simla, 13th September 1884.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Railway Circular No. XVI, dated the 5th July 1883.

Read also—

Reports on Native Drivers and Shunters employed on the several Railways in India for the year 1883.

OBSERVATIONS.—The reports received for the year 1883 show that the numbers of Natives employed as drivers and shunters have increased from 327 and 304 to 391 and 325 respectively. No returns have been received from the Mysore, Darjeeling-Himalayan and Assam Railways, and it is probable that no facilities yet exist on these lines for the training of Natives for such employment.

2. The extracts given below show the progress made in the numbers employed, and the system of training which has been adopted on the several Railways.

East Indian Railway.

3. In his letter to the Agent, the Locomotive Superintendent reports as follows :—

"I beg to report that on 31st December 1883, we had a staff of 236 Native drivers and shunters employed in working goods and ballast trains on the usual sections of the main line, as well as mail and mixed trains on the Gya State line, and mixed trains on all the branch lines of the Undertaking.

"This number is 14 short of what we had in the same class in December 1882, and is chiefly due to reductions in grade caused by slackness of traffic during the latter part of the year. It may be remarked, however, that the 14 men in question were not lost to the service but remained *in reserve* ready for utilisation as train drivers at any moment, and in fact were promoted early this year to their former standing as soon as the traffic admitted of it.

"Very great care and discrimination continued to be exercised in selecting men for promotion to the grade of engine-drivers, none but intelligent and duly qualified men being selected for that work, the condition as to their possessing a technical knowledge of the parts of a locomotive, coupled with a proficiency in one of the vernaculars, being, as usual, a *sine qua non*, as regards their employment on the foot-plate.

"The traffic having continued slack for some time past has prevented our recruiting our staff of Native drivers with *fresh* accessions from the lower ranks, but we possess the necessary element though the opportunity for promotion may be wanting.

"Daily instruction continues to be given at all the locomotive running sheds on this line between Howrah and Ghaziabad, at set intervals during the day as well as in the evenings (as the men can be spared from their work), and these schools are appreciated by the Native staff in general, though I must point out that at large centres, such as Howrah and Asansol, we have great difficulty in inducing men in the lower grades to attend to daily instruction, seeing that in the neighbouring jute-mills, warehouses and collieries, &c., they can readily obtain employment and earn the same amount of wages, if not more, without the obligation of attending school after hours, or submitting to any demands on their spare time.

"Further, at stations, where the Locomotive staff are not provided with quarters *close to the running shed*, and have to live away in the bazar, it is a matter of considerable difficulty to get the men to attend school after they are once released from work. Notwithstanding these drawbacks, the attendance at the Native adult schools during the year was maintained at a fair average, and the teachers were fully employed.

"I have pleasure in enclosing a memorandum showing the number of Natives (with their respective rates of pay) on our running shed staff on 31st December 1883, compared with the number on 31st December 1882, as also a statement showing the saving effected through the employment of Native drivers from April 1875 up to 31st December last, from which it will be seen that the total amounted to over thirty-one lakhs on the latter date."

Comparative Statement of Natives employed in the several Running Sheds on the 31st December 1882 and 31st December 1883, with their Rates of Pay.

December 1882.	December 1883.
Native Drivers.	*Native Drivers.*

4. The Locomotive Superintendent in his letter to the Agent and Manager, Madras Railway, reports as follows:—

Madras Railway.

"Natives of good physique and possessing a fair knowledge of English are sent out as second firemen on the engine to pick up their trade as all other trades are picked up, by constantly practising it, and as soon as they are fit they are promoted respectively to first firemen, shunters and drivers.

"The following table shows the number of men of each grade in employ and their rates of pay on the 31st December for the last three years —

	On 31st December 1881		On 31st December 1882		On 31st December 1883	
	Number of men	Rate of pay per day	Number of men	Rate of pay per day	Number of men	Rate of pay per day
Drivers	.	...	1	Rs 1-8	2	Rs 1-4 to 1-8
Shunters	2	Rs. 1-2 to 1-4	3	Rs 0-12 to 1-2	4	„ 0-12 to 1-2
Specially engaged firemen	6	„ 0-4 to 0-8	8	„ 0-6 to 0-8	15	„ 0-6 to 0-8

"During the year 1883 twenty-one English-speaking firemen, selected from among many candidates, were engaged with a view to their being promoted in the course of time to drivers A moonshee was also provided at Madras to teach, free of cost, some of the old and experienced Native firemen who already knew a little English, so that these might learn enough English to understand the time-tables and usual telegrams.

"The difficulty experienced in the last report, *viz*, the want of pluck or strength on the part of those men to stand the work, has been experienced again this year, and out of twenty-one selected men, engaged since the 1st January 1883, twelve had disappeared within two months as follows —

4 lost heart at the last moment and failed to join
3 left after doing a day's work
2 absconded after working one month
2 absconded after working two months
1 resigned after working two months.

12"

5. On the South Indian Railway there were 18 drivers on salaries ranging from Rs. 20 to Rs. 30 per mensem, and 16 shunters from Rs. 12 to Rs. 18 per mensem, as against 12 drivers on salaries varying from Rs. 17 to Rs. 30 and 19 shunters from Rs. 12 to Rs. 20 per mensem during 1882. The system for training Native lads remained the same as reported previously.

South Indian Railway.

Comparative Table showing Numbers employed

	1882.	1883

6. Extract from the Locomotive Superintendent's letter No. $\frac{A\ 460}{D\ 4808}$, dated the 2nd April 1884, to the Agent of the Company:—

Great Indian Peninsula Railway.

"I have to say that this office letter No. $\frac{A\ 514}{D\ 4808}$ of 14th April 1883 may be considered as the annual report for the year under review, as our system has undergone no change whatever, and has been fully explained in my report quoted above. I herewith send you a statement* giving the information required, and from which it will be seen that there has been a steady improvement in the training of Natives of this country to serve as engine-drivers"

* This statement includes Turners, Firemen and Augwallahs, who are not shown in the comparative table which follows

Comparative Table showing Numbers employed.

8. In his report to the Agent the Locomotive Superintendent states that "three Native firemen were promoted to pilotmen in 1883 on a consolidated pay of Rs. 30 per mensem each, and have thus far worked tolerably satisfactorily, but it should be borne in mind that they were engaged and have been working during the slack season; therefore their energies have never sufficiently been put to the test to admit of my giving an opinion as to their fitness under pressure of work or during an emergency."

9. In submitting the report on Native drivers, the Consulting Engineer observes as follows :—

Sind, Punjab, and Delhi Railway.

"The Locomotive Superintendent's report is valuable, as showing how the variation in the price of coal affects the question of the rate of pay in regard to economy of fuel. At the same time there is no reason why the Native driver should not in time learn to be as economical of fuel as the European.

"The Consulting Engineer has several times expressed his opinion to the Locomotive Superintendent that, if an increase of pay would tempt a superior class of men to take service as drivers, it would be desirable to give it, as the present rate of pay is decidedly low for the skilled labor required. The present opinion, however, seems to be that a higher rate of pay would not attract a better stamp of men, and that it is better to offer inducements to them to educate themselves and to train their sons at as early an age as possible.

"Mr. Sandiford, the Locomotive Superintendent, has taken considerable interest in his schools and in the training of Native drivers generally, and the question as regards this line may safely be left in his hands."

The Locomotive Superintendent's report referred to above is as follows :—

"The total number of Europeans and Eurasians has now fallen to 88, and the number of Natives risen from 547 to 636. The once numerous class of European and Eurasian

firemen has all but disappeared, which, considering that till lately they were the material from which drivers were made, is significant. The actual number of Natives employed as drivers has risen from 10 to 30, and this number is now capable of expansion, the men employed as shunters being practically drivers, and so used within station limits. The larger number of Native firemen also give more men to draw from.

Designation.	31st December 1882.		31st December 1883.	
European drivers	63	105	59	88
„ shedmen	3		3	
„ firemen	12		4	
Eurasian drivers	18		15	
„ shedmen	3		3	
„ firemen	6		4	
Native drivers	10	547	30	636
„ shunters	36		27	
„ firemen	229		299	
„ cleaners and jemadars	272		280	
Grand Total	652		724	

"Comparing the European staff as at present constituted with that required before Natives were introduced, it will be seen that, instead of 74, there would have been 104 drivers, or taking the whole European class "88" together, they would require to be increased to 214; a clear saving of the difference in pay between 126 Natives and that number of Europeans, which cannot be taken at less than Rs. 1,50,000 for the twelve months under review. The Native drivers now form about 30 per cent. of the total number employed; 95 per cent. of the firemen are Natives, and all the shunters. Further increase in traffic must be met by development of the Native element in the staff.

"*Effect on working.*—The general results on the whole have been satisfactory. A very considerable saving in expenditure has been made, and, although more expensive than European enginemen in fuel, stores and repairs, the men are improving, and if only more diligent in attending in school would leave little to be complained of. Confidence, which can only be gained by experience will work its own progression.

"When the short time this movement has been under way is taken into consideration, the progress and outlook is highly satisfactory, and tested by the levelling rule—economy—has given excellent results.

"*Training.*—The system followed is that described in a previous report. The most promising men are selected from among the staff and trained as firemen, shunters and drivers, rising through the different grades; and as all Natives in connection with the train service are offered every inducement to attend school, and in addition, are especially rewarded when they display aptitude, it is believed the best men come to the front. Although so far successful as to have produced the men now working, the advancement made in education is not great, and can only be traced to the class of men from which the staff is drawn being extremely illiterate. They are capable of acquiring the purely mechanical knowledge absolutely necessary to allow of their employment on locomotives, yet make very little progress in the school provided for their mental training. Efforts have been made to induce the better class of Natives to join, but up to the present the greasy duty and laborious nature of the occupation has deterred them from doing so. But Locomotive Superintendent feels that a weak point is the lowness of education, which, although to be regretted and combated, is not surprising and can only be overcome by perseverance. The total number of scholars on the roll was 198 for the 12 months, the average attendance 78, and of these—

36 can read a little English,
32 „ „ vernacular,
130 are learning the alphabets and spelling.

"Remuneration offered has not differed from that in force during 1882 and detailed in last report—

Native drivers	Rs. 20, 25, 30
„ shunters	
„ jemadars	
„ firemen	„ 8, 10, 12, 14
„ cleaners	„ 7 to 10
„ fuel coolies	„ 6 to 10

"As the seduction of cheap labor is likely to mislead, it may be useful to formulate the condition and extent to which it can be carried on purely commercial grounds. The following illustration can be applied to the exact circumstances of any case. Taking the total emoluments of a European and a Native at Rs 300 and Rs. 50 respectively, it is evident that the European must be prepared to save Rs. 250, before he can compete with his rival, allowing other advantages, if any, not to be considered. Applied to a few different districts the cost of fuel on which is given, and for example, say, a driver runs on an average 2,500 miles per month:—

		Rs.	
Fuel on the East Indian Railway	costs	2·15	per ton of coal.
„ „ Eastern Bengal Railway	„	8·37	„ „
„ „ Great Indian Peninsula Railway	„	12·81	„ „
„ „ Sind, Punjab, and Delhi Railway	„	19·39	„ „
„ „ Punjab Northern State Railway	„	28·61	„ „
„ „ Rajputana-Malwa Railway	„	22·42	„ „

Then on	East Indian Railway a European driver would have to save more than a Native by lbs.			104	per train-mile.	
"	Eastern Bengal Railway	do.	do.	26·75	do.	do.
"	Great Indian Peninsula Railway	do.	do.	17·49	do.	do.
"	Sind, Punjab, and Delhi Railway	do.	do.	11·55	do.	do.
"	Punjab Northern State Railway	do.	do.	7·83	do.	do.
"	Rajputana-Malwa Railway	do.	do.	9·63	do.	do.

"In Bengal, Rs. 250, the amount by which the European is handicapped, will purchase 116 tons of coal, so that on the above mileage a man would have to save that quantity (over 100 lbs. per mile run). On the Punjab Northern State Railway Rs. 250 will only purchase 8¾ tons of coal, and on the same mileage the European need only save 7·83 lbs. per mile to stand level with the Native. These examples abundantly prove that in Bengal and places where fuel is cheap, at the present rates of labor, Europeans cannot compete with Natives at all, while in districts where fuel is very expensive the difference between the men is reduced to conditions where the highly skilled European can easily excel his less careful and expert rival.

"*Conduct.*—The general conduct of the men in the execution of their work has been satisfactory. They have been attentive and gave little trouble."

In forwarding the above report to the Consulting Engineer, the Agent makes the following remarks:—

"It is said that, by the introduction of this movement, the substitution of Natives in lieu of Europeans in the Running Department is saving at the present time at the rate of 1½ lakhs rupees annually, but paragraph 8 points out that beyond a certain limit it may not, on commercial grounds, be prudent to extend the system.

"The East Indian Railway has always been held up as the initiator of cheap (Native) labor, and the system has largely developed on that line, but it is the low rate at which their fuel is obtained which enables them to extend the measure. In fact, to save 10 per cent. in the price of labor, the East Indian Railway can afford to consume 20 per cent. extra fuel, whereas on this Railway, where fuel is nine times the cost of what it is on the East Indian Railway, we can afford to pay 37 per cent. extra wages to save 10 per cent. of fuel.

"Now at present the Native driver is certainly more than 12 per cent. more extravagant in fuel than the skilled European, but, as his services are confined to such work as will not admit of his unskilfulness affecting the revenues of the Company, it does not much matter.

"That it is quite possible for the Native to become as adept as the trained European I have no doubt, but it will take time, and I would much rather see a steady healthy development of the system than a rapid growth which might land both men and masters in difficulties.

"On the Punjab Northern State Railway, where fuel is 13 times more expensive than on the East Indian Railway, Native labor would never pay, and as a matter of fact there are very few Native drivers on that line."

Oudh and Rohilkhand Railway.

10. In his letter No. $\frac{A}{453}$ of the 11th July 1884 the Locomotive and Carriage Superintendent reports as follows:—

"I beg to report that on the 31st December 1883 we had 32 Native drivers and 42 shunters on the line, and they have given general satisfaction. There is nothing special to report on them. The men who have lately come forward as shunters and drivers are more educated than the older hands; and in most cases they have found it to their interest to try and learn to read and write some language."

Comparative Table showing Numbers employed.

	1882.	1883.
Drivers	29	32
Shunters	40	42
TOTAL	69	74

Punjab Northern Railway.

11. In his letter No. 432, dated the 21st January 1884, to the Director General of Railways, the manager reports as follows:—

"Native drivers are now working all trains on the Salt Branch (main line), Khewra Extension, Khusalgarh and Sialkot Branches, or a total of 180 miles. Before the Attock Bridge was opened the line from Khairabad to Peshawar was worked by Native drivers, but this has been discontinued since the engines have run through from Rawalpindi to Peshawar.

"All shunting on the line is done by Natives.

"All firemen on the line are Natives.

"The proportion of Native to European drivers on the line on the 31st December 1883 was 1 to 3.

"The general results of the employment of Natives as drivers, shunters, and firemen continue to be satisfactory."

Comparative Table showing Numbers employed.

	1882.	1883.

Shunters	5	7
TOTAL	16	21

12. The following is the report of the Locomotive Superintendent on the subject :—

Indus Valley Railway.

"There has been no change in the system of training reported last year: the classes for English at Sukkur and Jacobabad continue to be attended fairly, but the progress in learning has not been so satisfactory as could be wished. Only one Native driver has been found able to pass a sufficiently good examination in English to entitle him to the additional Rs. 5 per month allowed by the rules. The progress of the class at Jacobabad is on the whole better than at Sukkur, which is to be attributed to the facts that the Kandahar Branch line is not affected by the heavy traffic on the main line, which causes irregular attendance, and that the school room is close to the engine shed and to the Native quarters, so that the men can be readily found out and collected at any hour that is most suitable; whereas in Sukkur the school room is at a very considerable distance from both the quarters and the shed, and the men, who unfortunately are ready enough to find any excuse for not attending the school, find this one ready made. It also precludes the shed clerk from getting to it in the middle of the day, which is often a convenient time for collecting the men together. It is strongly recommended that a class room with the necessary rough furniture be provided near the engine shed, and that prizes be offered as an inducement to the scholars to improve. But it cannot be lost sight of that the small progress made is mainly due to the fact that no persons of any good social standing, and very few of any education at all offer for the employment.

"Out of a total number of 139 on the muster roll, 122 have attended the classes, and the daily attendance averages 50.

"There are 10 Native drivers employed on the following rates of pay:—

1 on Rs. 45 per month }
3 on „ 40 „ } consolidated,
1 on „ 35 „ }
2 on „ 1 per day } with overtime,
3 on „ 0-14 „ }

and 13 Native shunters on the following rates:—

1 on Rs. 35 per month, consolidated,
2 on annas 13 per day } with overtime.
10 on „ 12 „ }

"One of the best drivers has been lost on account of being connected with a robbery, and one of the shunters has had to be reduced to fireman for carelessness.

"Three of the drivers are working goods trains between Sukkur and Radhan, and seven on the mail trains between Rindli and Ruk, and on the fast local service between Jacobabad and Sukkur.

Comparative Table showing Numbers employed.

	1882.	1883.
Drivers	8	10
Shunters	12	13
TOTAL	20	23

"The increase of the staff continues to receive the most careful attention, and men are pushed on as soon as they show themselves to be reliable and skilful."

The Manager states that the question of building a school at Sukkur is under discussion with the Locomotive Superintendent.

13. In his letter No. 2251E., dated the 17th June 1884, to the Director General of Railways, the Manager reports as follows:—

Rajputana-Malwa Railway.

"*System of training adopted.*—The Locomotive Superintendent reports that a school has for some short time past been maintained at Phalera, where Native boy shunters and drivers attend as their duties allow. Besides being taught to read and write at the school, the present and any new rules and orders for working the traffic are explained to them.

"*Numbers employed.* -The following statement compares the numbers employed respectively on the 31st December 1882 and 31st December 1883 :—

	On 31st December 1882.	On 31st December 1883.
Drivers	13	18
Shunters	31	41
TOTAL .	44	59

"*General Remarks.*—The relative advantages and disadvantages of employing this class of labor are summed up as follows by the Locomotive Superintendent:—

"*Advantages.*—Lower salary paid to Native drivers as compared with that paid to Europeans

"*Disadvantages.*—(1) Larger consumption of coal and stores, the ratio of coal consumption of Native drivers to Europeans per engine mile being as 34·7 to 29·64, which becomes a serious consideration owing to the high cost of coal on this line.

"(2) Ignorance of the English language, in which language the line clear messages and any endorsements are written; this being so, the driver has to trust to the statements of the guard and station master.

"(3) In cases of accidents Natives are less ready of resources than Europeans. The percentage of loss of time in the case of Natives is 126 against 39 in that of Europeans, and the percentage of engine failures is 43 for Natives and 16 for Europeans.

"In conclusion I have the honor to state that, all things considered, there is no advantage to be gained in the employment of Natives as drivers and shunters on the Rajputana-Malwa Railway.'

State Railways in Central Provinces.

14. The Manager of the Wardha Coal and Nagpur and Chhattisgarh State Railways states as follows :—

"As reported last year, *vide* this office No. 5554M., dated 28th December 1882, schools for training Native lads for enginemen and shunters were not opened either for the Nagpur and Chhattisgarh or the Wardha Coal State Railway. On the former it was not necessary to establish such a school, as the requirements of the line could be met from other sources; and the Wardha Coal line being so short (only 45 miles), new men were not required; hence the necessity of establishing a school at any expense is not warranted; as, however, none of the firemen and shunters now on this line can read or write in any language, the Assistant Manager has recently opened a school for teaching them to do so in their vernacular.

"As required by Government of India Circular No. 1 Railway of 1882, a statement of the number of Native drivers and shunters employed on both these lines during the busy season of 1882-83, showing also the corresponding numbers employed during 1881-82, is enclosed.

"The statement shows an increase of the number of Natives on both lines; and on the Nagpur and Chhattisgarh, there were, during the period under reference, several men, who, although Europeans by name, were either East Indians or Natives.

"General character and the ability of the men employed on the Nagpur and Chhattisgarh State Railway are given in Locomotive Superintendent's letter No. 4025 of 31st July 1884 (copy enclosed).

"The four men on the Wardha Coal line were engaged shunting in the colliery sidings and Warora Station yard; one of them was, until recently, allowed to drive goods trains on the main line, but as he cannot read any language this has been discontinued."

Statement of Native Drivers and Shunters employed on Nagpur and Chhattisgarh and Wardha Coal State Railways during the busy Seasons of 1882-83 and 1881-82.

The following is an extract from the letter of the Locomotive and Carriage Superintendent, reporting on the Native drivers and shunters employed on the Nagpur and Chhattisgarh State Railway during the year 1883, referred to in the Manager's letter:—

"Driver J. Manuel was appointed on this line as a Native shunter on Rs. 25 per mensem on the 7th March 1881, and from 1st January 1883 was promoted to driver on Rs. 30. During the year he was employed in shunting at the station yard, and occasionally in driving local trains between Nagpur and Kamptee. He works fairly well as a shunter, but, being unable to read or write in any language, he is not likely to be employed as a main line driver.

"Driver Khandoo Baloo was appointed as a fireman on Rs. 11 per mensem on the 1st of April 1880, and promoted to driver on 1st May 1882 on Rs. 20, and further promotion to Rs. 30 on the 1st January 1883. During the year he worked as driver of local trains between Nagpur and Kamptee, and occasionally on goods trains on main line. He can read and write a little, and may eventually become a good engineman.

"Driver Mancherjee Framjee was appointed on Rs. 60 per mensem on the 29th January 1883 and worked on goods trains on the main line, but was dismissed on the 23rd May 1883 for allowing his boiler to run so low in water as to drop the lead plug. He can read and write English.

"Shunter Gulab was appointed on Rs. 18 per mensem on the 1st January 1882, and promoted to Rs. 25 on the 1st January 1883. During this time he was employed in yard shunting and driving local trains between Nagpur and Kamptee, and occasionally goods trains on the main line. He was fined ½ month's pay on the occasion of a collision, on the 7th April 1883, between his and another engine at Amgaon station, as he had not got his head lamp lighted; also fined ½ month's pay on the 6th April 1883 for careless and violent shunting in Nagpur station. He can read time tables and line clears. He resigned his appointment in May 1883.

"Shunter Doctor was appointed on Rs. 32 per mensem on the 8th December 1882, and was employed in yard shunting. He is pretty well up in his work and has on one or two occasions run local trains between Nagpur and Kamptee. He can read and write English.

"Shunter Inayat Hossain was appointed on Rs. 20 per mensem on the 16th March 1883, and discharged on the 19th August 1883 on account of reduction of establishment. He was employed in yard shunting and local trains between Nagpur and Kamptee. He can read very little except time tables and line clears, and cannot write.

"Shunter Cawagee Pestonjee was appointed as a fireman on Rs. 15 per mensem on the 23rd November 1881, and promoted to shunter on Rs. 30 on the 1st January 1883. He was employed in shunting at the station yard and driving local trains between Nagpur and Kamptee, and occasionally goods trains on the main line. He can read and write English. He resigned on the 24th June 1883.

"Shunter P. Baloo was employed as a fireman on Rs. 11 per mensem on the 24th November 1880, and promoted to shunter on Rs. 18 on the 1st December 1882. During the year he was employed in yard shunting and driving Raj-Nandgaon local trains and occasionally goods trains on the main line. He can read very little except time tables and line clears, but is likely to become a good engineman."

In submitting the above reports the Chief Commissioner remarks that he is not quite satisfied that as much as possible has been done to train Native lads as drivers and shunters, and that immediate attention will be given to the matter.

Bengal Provincial Railways.

15. The Government of Bengal has issued the following Resolution, No. 1329R.E., dated the 25th March 1884, on the subject:—

"OBSERVATIONS.—In Resolution No 1023R.E. of the 28th February 1883, noted above, it was stated: 'The progress made in the employment of Native drivers and shunters is considered on the whole satisfactory. The real difficulty still is to obtain men with the necessary qualifications, and to overcome the aversion the men have to attend the night schools provided for them.

* * * * * *

"'They should, however, be employed to the fullest extent on goods trains, and the Lieutenant-Governor trusts that the officers in charge of lines will not relax their efforts to see that this order is carried into effect.'

"2. The reports for the year 1883 show that the following progress has been made in the employment of Native drivers and shunters on the railways under the orders of this Government:—

Northern Bengal State Railway.

16. "The Locomotive Superintendent reports as follows:—

"'There are now two teachers attached to the school—one to teach Bengali and the other Hindi.

"'The numbers of pupils on the rolls are 25, of whom five learn Bengali and twenty Hindi: the average daily attendance is 12.

"'The comparative statement showing the number of Native drivers employed in the various grades during the year 1882-83, and the salaries drawn in each grade, is as under:—

1882.

Grade. Rs.	No. of men.	Salary. Rs.	
20 to 40	1	38	7 drivers, 9 shunters, and 1 assistant shunter.
	1	30	
	1	26	
	3	24	
	4	22	
	3	20	
	2	17	
	1	16	
	1	14	

1883.

Grade. Rs.	No. of men.	Salary. Rs.	
20 to 40	1	38	12 drivers, 7 shunters, and 1 assistant shunter.
	1	30	
	1	28	
	3	26	
	1	24	
	3	22

	1	18	
	3	16	
	1	14	

"'Of the 12 drivers, one was transferred from this Railway to the Calcutta and South-Eastern State Railway line in May last; two are employed in the Kaunia and Dharlla Railway line; and two in running trains in the Rungpore Branch, and seven in the main line, working goods trains.

"'The seven shunters are employed as yard shunters at Saidpur, Sara, and Siliguri.

"'The assistant shunter is employed at this station.

"'All these men, except one, are working in a satisfactory manner. They are regular in attendance.

"'The two drivers of the Kaunia and Dharlla Railway line have been awarded a reward of Rs. 5 each at the end of last half-year for keeping their engines clean and in good order.'

Tirhoot State Railway.

17. "The Assistant Locomotive Superintendent states as follows in his letter No. 632D., dated 30th December 1883, to the Manager:—

"'The number of of men employed for the years 1881, 1882, and 1883 compare as follows:—

	Grade.	1881.	1882	1883.
Drivers	Rs. Rs. 15 to 40	...	2	5
Shunters		3	2	5*
Assistant shunters		...	1	2
		3	5	12

"'From these figures you will see that the number of available enginemen and shunters has been doubled in the last year. You will also note that we have now eight men capable of working trains, and two others who should be fit to go out on the line in another six or eight months' time.

"'No alteration in the mode of supplying men has been made during the year, the old rule of promoting cleaners to firemen, firemen to shunters, and shunters to drivers having been pursued, each man undergoing a careful examination before he is promoted to shunter, and again when he is promoted to driver. At the present time there are some five men having worked their way up to posts of first firemen and shed tindals, who are fit to be promoted to shunters whenever they may be required, two of whom are now actually employed in shunting in the Somastipur yard during the present increase in the number of working trains.

"'As regards the progress made to teach the men to read and write, a night school has been started here since March last, and a schoolmaster purposely employed to conduct the same. The attendance has been satisfactory on the whole.

"'During the year eight failures have occurred to engines under the charge of Native drivers. Since the 1st of this month no Europeans have been employed on goods, local or material trains, the work having been entirely and satisfactorily performed by Natives; an up and down local, an up and down goods, two ballast and one material train having been regularly running.

"'It is therefore clear that our present staff of Native enginemen is sufficient for our requirements until the line opens out or the traffic increases; and I consider that they have performed the work allotted to them for the year in question in a satisfactory manner.'

Calcutta and South-Eastern and Nalhati State Railways.

18. "The Locomotive Superintendent reports:—

"'Arrangements have been made to establish a night school on the Calcutta and South-Eastern State Railway, similar to that established at Saidpur, with a view to give a rudimentary education in Bengali and Hindi to these men, as well as to the workshop apprentices.

"'The comparative statement showing the number of Native drivers employed in various grades on the Calcutta and South-Eastern and Nalhati State Railways during the year 1882-83, and the salaries drawn in each grade, is as under:—

Calcutta and South-Eastern State Railway.

1882. Grade. Rs.	No. of men.	Salary. Rs.	1883. Grade. Rs	No. of men.	Salary. Rs.	
20 to 40	3	30	20 to 40	1	34	7 drivers, 4 shunters, and 1 assistant shunter.
	1	20		2	30	
				2	24	
				2	20	
				4	15	
				1	12	

"'The seven drivers are employed in running trains.

"'Of the four shunters, one died in June last, and the three are employed as yard shunters at Calcutta and Diamond Harbour.

"'The assistant shunter is employed at Calcutta.

Nalhati State Railway.

1882. Grade. Rs.	No. of men.	Salary. Rs.	1883. Grade. Rs.	No. of men.	Salary. Rs.
20 to 40	2	30	20 to 40	2	30
	1	15		1	15

"'All these men have given little trouble. They are regular in attendance and careful in the performance of their duties.

"'Three drivers of the Nalhati line, and two of the Calcutta and South-Eastern State Railway line, can read and write.'

"RESOLUTION.—The large increase in the number of Native drivers and shunters employed during 1883, as compared with the number during 1882, and the favorable reports, with referenc

* Three of these men are actually working trains at the present time.

to the attendance of the men and the satisfactory performance of the duties entrusted to them, are a sufficient proof that the training of Natives for employment on locomotive engines has now passed beyond the experimental stage, and that the difficulties at first experienced in carrying out the measure have been fairly overcome.

"It is noted, however, that the men are as yet employed only on goods, local or material trains, and though, with the class of men now obtained, this limitation may be advisable for the present and for some time to come, the Lieutenant-Governor trusts that every endeavour will be made to obtain the services of a class of men of somewhat superior intelligence, who, with the necessary experience, might reasonably be expected to become competent for the working of fast mail trains. With that object in view, the night schools now provided (the attendance at which is still somewhat unsatisfactory) should be made as efficient as possible by granting prizes for regular attendance, and by regulating the pay of the men on promotion according to the result of their examination."

Comparative Table showing Total Numbers employed.

	1882.	1883.
Drivers	16*	27
Shunters	13*	20
TOTAL	29	47

19. The following is an extract from the report of the Locomotive Superintendent:—

North-Western Provinces and Oudh Provincial Railways.

"Lads of about 13 years of age are engaged and employed in assisting Native workmen in the workshops, and as engine cleaners in the running shed. They are compelled to attend school from 7 to 9 A.M. daily, Sundays excepted.

"A school was started on a small scale at the Cawnpore workshops in the month of March last with seven lads on the roll, and before the end of the year their number increased to 14. The average daily attendance was 10·2. Those of the lads who are constant in attendance during the whole period of school's existence made a very fair progress in reading Urdu, Nagri, and English, and some of the elder ones can write a little.

"A trial was again made in giving good encouragement to several youths of the better class to train for drivers, all of whom liked the free school attendance but got tired of work, and in a few days all disappeared."

Comparative Table showing Numbers employed.

20. The Locomotive Superintendent in his letter to the Manager reports as follows:—

Burma State Railway.

"I have the honor to acknowledge receipt of your endorsement No. 1831-6 E. R. of 18th July 1884, forwarding British Burma Public Works Department No. 4519, dated 17th July 1884, and in reply to state that the night school organised at Rangoon and alluded to in my No. 1205 of 18th April 1883, when writing on the same subject now under notice, has been abolished for the following reasons:—

"(1) that the Natives attending the school gradually decreased in number;

"(2) the schoolmaster having resigned his appointment through his having obtained a more lucrative one.

"Steps have, however, since been taken to reorganise the school in conjunction with the Traffic Department in order to train Natives as brakesmen, guards, and drivers.

"During the last busy season two ballast trains have been successfully worked on the open lines by Natives, and it is my intention to put these men in charge of goods trains north of Latpadan during the next busy season. I regret to state that the skilled firemen who are entertained during

* These numbers do not correspond with those shown in the Report for 1882. Please see foot-notes to the general statement inserted in this Resolution.

the busy season generally leave this line for India during the slack season, consequently the training and promotion of these men to shunters or drivers have been hindered.

"We have now six shunters and two head jemadars who are able to do shunting, and I hope to make a more favorable report on this matter in my next.

"None of the Karen lads have as yet been sent out firing for reasons already explained in paragraph 8 of my last report.

"In conclusion I beg to state that every effort is being made to meet the wishes of the Local Government on the subject."

(*a*) Pilotmen.
(*b*) Employed during the busy seasons of 1882 and 1883.
(*c*) The number of drivers shown in the previous return was 5 and that of shunters 8.
(*d*) Four shunters were shown in the return for 1882 as employed on both the Tirhoot and Patna-Gya State Railways. The latter Railway is now worked by the East Indian Railway Company.
(*e*) Three of these men are actually working trains at present time.
(*f*) Two of these men are head jemadars who are able to do shunting.

2. The Government of India notices with satisfaction that there has been an increase of 64 in the number of Native drivers and of 21 in the number of Native shunters, and that the subject of training Natives for such employment continues to receive the attention of the authorities concerned.

Order.—Ordered, that this Resolution be communicated to the Governments, Administrations and officers noted in the margin for information.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces, Assam, and British Burma.
The Residents, Hyderabad and Mysore.
The Agents to the Governor-General for Rajputana, Central India, and Biluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Guaranteed Railways.
The Accountant General, Public Works Department.

Ordered also, that this Resolution be published in the Supplement to the *Gazette of India.*

F. FIREBRACE, *Major, R.E.,*
Under-Secretary.

* Passed down to supplement the Agra Canal.

Executive Engineer, Northern Division, Ganges Canal, reports—Very good rain during the month. Canal closed for repairs on afternoon of 9th. River high. All crops very good.

Executive Engineer, Meerut Division, Ganges Canal, reports—In the 1st sub-division there was a light demand for water for rice during the first week, but after the heavy rain on the 9th and 10th all demand ceased.

Executive Engineer, Bulandshahr Division, Ganges Canal, reports—There was slight demand on two rajbahas up till 8th, when rain fell and all demand ceased.

Executive Engineer, Aligarh Division, Ganges Canal, reports—Heavy and general rain on the 3rd of August stopped demand for water entirely.

Executive Engineer, Mainpuri Division, Lower Ganges Canal, reports—There has been no demand and plentiful rain throughout the division all through the month. The decrease compared with last year is due to the plentiful rain compared with last year, and is almost entirely under the head of Other food-grains.

Executive Engineer, Cawnpore Division, Lower Ganges Canal, reports—An increase of 1,898 acres in indigo, which is the chief irrigated crop in this division. Food-grains have fallen off owing to the successively heavy rain, *i.e.*, 25·4 inches in August, against 3·3 in the same month last year.

Executive Engineer, Etawah Division, Lower Ganges Canal, reports—Abnormally heavy rain throughout the month, and consequently no water was taken for irrigation of rain crops. There has been an [illegible] in indigo, but a falling off in sugarcane, as explained last month.

Executive Engineer, Eastern Jumna Canal, reports—The ample rainfall stopped all demand after the 10th August: hence the decrease in area. The decrease is chiefly in rice and other food-grains. There is an increase in sugarcane and indigo. Crops in low lands injured by excessive rain. Demand for crops previously irrigated commenced on 27th August.

Executive Engineer, Agra Canal, reports.—With the exception of one distributary, Shergarh, no irrigation was effected during August. The excess of escaped volume over supply entering division is explained by a quantity of water entering the canal by inlets, &c.

Executive Engineer, Rohilkhand Canals, reports—A very wet month; not much demand for water. Moderately heavy floods came down most of the rivers on the 10th and breached most of the earthen dams. Crops are looking very well.

Collector, Bijnor, Executive Engineer, Dun Canals, Deputy Commissioner, Jhansi, and Collector of Hamirpur, report that—no irrigation was effected during the month of August 1884.

H. W. CONDUITT,
Offg. Asst. Secy. to Govt., N.-W. P. and Oudh, P. W. D., Irrigation Branch.

H

The 16th September 1884.

G. F. E. S. NEILL, *Major, M.S.C.,*
Under-Secy. to the Govt. of Bengal,
P. W. Department.

EXTRA SUPPLEMENT TO
The Gazette of India.

CALCUTTA, SATURDAY, OCTOBER 11, 1884.

GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.

REPORT OF THE GOVERNMENT OF BENGAL ON THE BENGAL TENANCY BILL, 1884.

Dated 24th April, 1884.

From—Babu Pronob Nath Ghosal, Naib, Roy Luchmiput Sing Bahadur's Zamindari, Kutabpur, District Rungpur,

To—The Secretary to the Government of India, Legislative Department.

Being given to understand in the *Calcutta Gazette*, dated April 16th, 1884, that the Bengal Tenancy Bill is republished for further criticism, I beg to submit the following:—

Enhancement of rent, Chapter V, section 43 (*b*).—"That there has been a rise in the average prices of staple food-crops in the locality or at the usual markets."

Reduction of rent, Chapter V, section 51 (*b*).—"On the ground that there has been a fall in the average prices of staple food-crops in the locality or at the usual markets."

The sections quoted above will in some places be ruinous to the raiyat, ruinous to zamindar and disadvantageous to the Government.

That the price of the * * * great regulator of * * * all other things.

The legislator thinks that when the price of the staple food rises the cultivator gets much; he must pay a portion of his profits to his landlord. But this is a sad mistake; it is an admitted fact, and argued over and over by the greatest writers of political economy, that the "price of the staple food is the great regulator of the prices of all other things." As the price of the staple food increases, the price of all the articles that are necessary for an agriculturist are proportionately increasing.

The raiyat is not a farthing richer than he was when the price of the staple food was low. Those raiyats that are seen flourishing transact money-lending business. If the fact be doubted, the Government might enquire the actual state of the cultivators.

It will be difficult also for some of the zamindars to derive benefit by the above legislation. The price of the staple food was so difficult to settle in the law Courts that neither the zamindar nor the raiyat trouble themselves much with it for the enhancement or reduction of rent. But when the price-list will be out, the apple of discord will be in the field. It will be a bait too tempting either for the zamindars or for the raiyat to resist. The patnidars will take the rigour of the law, and when the raiyats will be unable to pay, they will relinquish their land. The patnidar, being a loser, will manage to have his patni sold. And the innocent zamindar who let out a flourishing patni will get back a tenantless tract filled with tigers and jackals. All the districts of Bengal are not equally populous. The Collectors of Rajshahi Division will testify at what price the patni taluqs are sold there. The sad fate of enhancement is too vivid here. If the raiyats, getting advantage of the reduced price, take shelter of the Court, the poor zamindar will be unable to cope with a large number of men single-handed. The profit will be reduced low, and it will be difficult for him to sell his property. The price of the landed property will be as fluctuating as any thing else. Moreover, the delay of the Civil Court in

deciding a large number of cases will stop collection, and the landlord, unable to pay the Government rent, will lose his property. The Government will not be a gainer by this arrangement. Those places that were flourishing during the time of permanent settlement are now jungly wastes. The Government rent, which the settlement-officer settled at the time of the permanent settlement, now becomes extremely burdensome. The underlings of those officers also had something to do in some places. Some parts of the Bardwan District are not well paying, and some of the zamindars of Dinajpur are highly rack-rented by the Government. There is almost no profit. The zamindars allow their raiyats to keep their rents in arrear, because interest is only profit. There are other methods also by which they make up their loss. If the rent of these raiyats be suddenly reduced by the price-list, the Government will be in difficulty to have the property brought by others.

No. 866T. R., dated 21st June, 1884.

From—Officiating Secretary to Government, Bengal,

To—Secretary to Government of India, Revenue and Agricultural Department.

I am directed to submit, for the information of the Government of India, copies of the papers noted on the margin, regarding the non-payment of rent by the raiyats of certain zamindars of the Maimansingh district, and to suggest that, if it be deemed necessary, the correspondence should be sent to the Legislative Department for consideration in connection with the pending Tenancy Bill.

Memorial from Babu Mohima Chandra Rai Chaudhri and other zamindars of Maimansingh, of January, 1883.
Letter from the Officiating Magistrate of Maimansingh, No. 828, dated 26th February, 1883.
Memorial from Babu Kashi Kishore Roy Chaudhri, and other zamindars of the Maimansingh district, dated the 24th January, 1884.
Letter from the Commissioner of the Dacca Division, No. 51M., dated the 28th April, 1884, and enclosures.
Resolution of this Government, No. 864T. R., dated the 21st June, 1884.

Dated January, 1883.

Memorial of certain Zamindars of Maimansingh District.

To the Hon'ble Augustus Rivers Thompson, C.S.I., C.I.E., Lieutenant-Governor of Bengal.

The humble memorial of zamindars, taluqdars and other actual proprietors of soil, Maimansingh—

1. MOST RESPECTFULLY SHEWETH,—That the greater portion of the raiyats of pargana Maimansingh have stopped payment of their rent on the ground that an order has come from Government to the effect that no raiyat shall have to pay more than Rs. 3-6 per ara, *i.e* about 13 annas per bigha.

2. The raiyats declare that this order has come to one Maulvi Hamiduddin, pleader of the District Court, who, it is stated, has assured them that within three months he will get a law passed which will reduce their rent to Rs. 3-6 per ara, and that they need not pay any rent now. The said Maulvi Sahib receives a fee of five pice per head from the raiyats for his undertaking to fix their rent at the above rate.

3. Your memorialists are informed by the raiyats that, on going to Maulvi Sahib, he takes down their names and quantity of land under their cultivation in a register kept for the purpose, and then he puts down the rent in another column at the rate of Rs. 3-6 per ara; for this service his muharrir receives a pice per head.

4. Some raiyats again say that they have heard that two constables and one head-constable have by beat of drum in different hats and bazars declared that the raiyats need not pay more than Rs. 3-6 per ara.

5. Your memorialists regret to mention that on the basis of these rumours these credulous raiyats have become much excited, and the wicked portion of the raiyats and other designing men, taking advantage of this state of affairs, are spreading different kinds of rumours (too numerous to be enumerated here) for the purpose of inducing the raiyats to become refractory and stop payment of their rent.

6. Your memorialists would not have encroached upon Your Honour's valuable time had not the raiyats stopped payment of their rent.

7. Your memorialists, with very great regret, beg to submit that they have not been as yet able to collect the amount necessary for the payment of the Government revenue, and most of them have been compelled to borrow money for that purpose.

8. Your memorialists also beg to bring to Your Honour's notice that, in consequence of some wild rumours which are afloat about some laws that are soon to be enacted in favour of the raiyats, raiyats of some villages in pargana Alapsing, adjoining the town of Nasirabad,

have stopped payment of their rents, although many of them have executed kabuliyats and been paying rents accordingly.

9. The raiyats of Kagmari have declined to pay rents as agreed to by them by registered kabuliyats, according to which they have been paying their rents for the last two or three years. On the strength of these kabuliyats some decrees have been obtained in the Civil Courts by the zamindars, but still the raiyats withhold payment in the assurance that it will not be in the power of the zamindars to sue all the raiyats. The raiyats of some places in Hussenshahi and Shushung have also leagued together against their zamindars and have joined the raiyats of pargana Maimansingh in their attempt to obtain a *mukarrari* tenure on payment of a nominal rent for their holdings.

10. Your memorialists have every reason to believe that, if these credulous raiyats are allowed to withhold the payment of rent in the manner that they are doing, it will soon bring ruin upon the zamindars of this district. Your memorialists therefore pray that Your Honour will be kind enough to take into your kind consideration the deplorable condition of the zamindars, and be pleased to issue an order to the District Magistrate to disabuse the minds of the tenantry by an order declaring the falsity of these rumours.

Your memorialists, as in duty bound, shall ever pray.

No. 828, dated 25th February, 1883.

From—Officiating Magistrate, Maimansingh,
To—Commissioner, Dacca Division.

I have the honour to report upon the petition by certain zamindars of this district forwarded with your memorandum No. 39, dated the 16th February, 1883.

2. It is true that a report has got about that a rate of Rs. 3-6 per ara was about to be fixed by Government, and this had the effect of making many raiyats refuse to pay at a higher rate, and Maulvi Hamiduddin was accused of being its author.

3. As Maulvi Hamiduddin is now on his trial for cheating raiyats by collecting money from them under pretence of getting a law passed fixing Rs. 3-6 per ara, it is premature to form an opinion yet as to whether he did so or not. He says he merely engaged to get up a petition to Government to hasten the passing of the new Rent Act.

4. I cannot ascertain any foundation for the allegation as to the police having acted as alleged in paragraph 4 of the petition.

5. The raiyats in several parts of this district have been recusant since 1873, when some zamindars began to measure with a view to enhancement of rent.

6. The non-payment of rent has spread owing to the story about the Rs. 3-6 rate only lately, *i.e.*, since the beginning of this year, and I have widely had it proclaimed that the rumour was unfounded, and Maulvi Hamiduddin has also publicly stated so himself, so that I do not think the zamindars rents will be much affected by the temporary* recusancy.

* See No. 1 from Babu Keshub Chandra Acharjya.

7. As regards the statement in paragraph 8, these raiyats are, I understand, willing to pay the rents in their kabuliyats, but not to let their lands be measured by ijaradars who took a sublease, and a suit by whom for measurement is pending in the Civil Court.

8. As regards the Kagmari raiyats, it is true that they have refused to pay rents they gave registered kabuliyats for; but the terms of these kabuliyats are such as it is impossible to believe a body of khudkhast raiyats could have willingly and knowingly agreed to, barring as they do not only the accrual of, but making those already possessed of renounce all claim to, rights of occupancy and become tenants-at-will, liable to eviction at pleasure. It seems to me, therefore, that the zamindars of Kagmari have no one but themselves to blame for the state of things that has arisen on their estates.

9. I have not heard of, nor can I find any foundation for, the alegation that any raiyats demand a mukarrari tenure at a nominal rent, except in so far as their refusing to agree to pay rents enhanced largely above rates previously paid can be so regarded.

10. In fact, I believe that in this district very low rates of rent were and are prevalent. These were largely supplemented by the exaction of numerous cesses. Of late, zamindars have in several cases got or tried to get agreements at enhanced rates, at the same time continuing to exact the cesses as before. This, combined with the discovery that they had been induced to contract themselves out of all benefit by prospective legislation (the beneficial results of which to the raiyats have been by rumour much exaggerated) have made the raiyats recalcitrant in some parts. But in the parganas Sherepore, Patiladah, Jafarshahi, Pukharea, Shusung,

Nasirujial, Hazradi, Juanshahi, Rum-Bhowail, and Atia, there is no such recusancy among the raiyats. It is confined to Maimansingh and Alapsing, Kagmari, Hussenshahi, and Joar Hossenpore parganas, and not all over these.

* * * * * * * *

Dated 24th January, 1884.

Memorial of Zamíndárs of Maimansingh District.

The Hon'ble Augustus Rivers Thompson, C.S.I. and C.I.E., Lieutenant-Governor of Bengal.

The humble memorial of the undersigned zamíndárs of Maimansingh—

MOST RESPECTFULLY SHEWETH,—That, since the submission of their memorial to your Honour in January last, your memorialists have not been able to realise any rent from the refractory raiyats. Owing to the rumour spread by evil-disposed persons as to the rate of Rs. 3-6 per ara being fixed by Government, as well as the high expectations the raiyats entertain of the Rent Bill, they have formed a strong combination not to pay their rents, and openly avow that without seeing the result of the present Rent Bill they will not pay any rent at all.

2. That your memorialists beg to submit that most of them have been paying their revenue and cesses to the Collectorate by having recourse to money-lenders.

3. That the general attitude of the raiyats of pargana Maimansingh is day by day becoming more and more defiant, and the contagion is fast spreading in parts of the neighbouring parganas, such as Hussenshahi, Nasirujial, Raidum, and Shushung, and Alapsing also is not free from the contagion.

4. That the present deplorable condition of the landholders of this district can to a certain extent be ascertained by referring to the number of estates which were to be sold by the Collector on the 25th of May, 1883, for arrears of revenue due for the kist of January last; 284 estates were in arrears; but for the extreme kindness and generous treatment of the Collector of this district, all of these estates might have been sold, and 16 estates were sold. So large a number of estates were never in arrears; and so many estates were never sold for any one kist in this district within the last twenty years.

5. That your memorialists beg to submit that in pargana Maimansingh the bulk of the rent is realised in the months of Agran, Pous, and Magh, but during the last Bengali year your memorialists were not able to realise from the raiyats more than four to five annas of the whole rent, and since Agran of 1289 B. S. they have been unable to realise any amount of rent, and that, if such a state of things be allowed to continue, it is not expected that your memorialists shall be able to realise their rent even this year (1290 B. S.).

6. That your memorialists beg to submit that the present agrarian disturbance is not due to any claim for enhancement of rent on behalf of the zamíndárs, but it simply relates to the withholding by the raiyats of payment of rents which have been secured by registered kabuliyats and other authentic records, and been paid during the past years.

7. That the critical position in which your memorialists are at present placed can be imagined from what has been stated above, and nothing short of coercive measures taken by the executive authorities are likely to suppress such an agrarian disturbance.

8. That your memorialists further beg to state that, notwithstanding they have succeeded in obtaining rent-decrees against a large number of tenants, they have not been able to realise any portion of the same owing to the combination of the villagers in keeping away the properties of the judgment-debtors.

9. That, in conclusion, your memorialists beg leave to observe that neither the current laws nor the Rent Bill make any provisions for the speedy realization of just rents when raiyats combine and refuse to pay their rents, as they are doing here at present: it is absolutely necessary that the law should make some provision to secure to the zamíndárs their just rights, and to enable them to realize their rents easily and speedily. The law, as it applies to the zamíndárs, was found insufficient by the Court of Wards to secure the speedy realization of rents even in ordinary circumstances, and accordingly a special Act was passed to enable them to do so. If Government has found it impracticable to realize quickly the rents of estates under the Court of Wards, it is only reasonable to suppose that the zamíndárs have still greater difficulty in collecting their rents.

10. And that, pending the passing of the Rent Bill, your memorialists pray that your Honour will grant them such redress as may appear feasible and proper.

And your memorialists, as in duty bound, shall ever pray

No. 51M., dated 28th April, 1884.

From—Officiating Commissioner, Dacca Division,

To—Secretary to Government, Bengal.

With reference to Government letter No. 335—121L.R., dated 26th January, 1884, and Mr. MacDonnell's demi-official of 9th February, 1884, I have the honour to submit a copy of Mr. Waller, the Collector of Maimansingh's, report, No. 114—18G., dated 16th instant, and to submit my own report thereon.

The pargana of Maimansingh, in the District of Maimansingh, is of large area and very populous. There are between thirty and forty thousand rent-payers in this pargana. The chief landholders are—

Rai Kashi Kishore, Rai Bahadur.
Sreemutty Bisheswari Chaudhuraní.
Bábú Grija Kanto Lahiri.
Bábú Tarini Kanto Lahiri.
Rájá Harish Chandra Rai.
Bábú Satish Chandra Rai.

There are also several smaller shareholders. The chief places where the landholders reside are—

Ramgopalpore.
Gouripore.
Kalipore.
Golokpore.
Bhowanipore.

The estate extends over an area of 451·77 square miles.

2. Of the disputes between the landowners and tenants I have been personally cognizant during the past 16 years (since 1868). In that year, when I was first acting as Collector of Maimansingh, there was an outbreak of the tenantry against the chief landholder, Rai Kashi Kishore, Rai Bahadur, the first signer of the petition. An European Deputy Magistrate was deputed by me to enquire into the matter on the spot, and the disputes were then settled. Again, about 1875 and 1876, there was a very general union among the raiyats to resist the payments of enhanced rates of rent. The raiyats then, as now, refused to pay any rent at all. Owing, however, to the exertions of the then local officers, Messrs. Pawsey and Pratt, the raiyats were persuaded to agree to the zamíndárs' terms, and many paid rents at enhanced rates. Ever since then the zamíndárs have been increasing their demands for kabuliyats at enhanced rates, and there has been more or less friction. This culminated in 1882, when the raiyats again, for the third time, combined together and resisted the landholders. This time the combination has assumed a more serious aspect than on the other occasions, probably because the raiyats are becoming more and more aware of there rights, and are determined not to be persuaded to anything against their interests by the local officials. They are perhaps not so much to blame, for I fear it must be recorded that the Maimansingh pargana zamíndárs, relying on the support formerly given to them by the officials, have been very exacting in their demands; and though I am not prepared to say that the kabuliyats got out of the raiyats are wholly illegal and unjust, yet it must be allowed that very hard bargains have been driven with the raiyats. No doubt the raiyats agreed to the kabuliyats at the time either through ignorance of their rights or under the impression that the Collector had still power to give orders binding on them (at least so I believe they construed the interference of Messrs. Pawsey and Pratt in favour of the zamíndárs in 1875-76). Any way, however that may be, the raiyats now are determined to force the zamíndárs to withdraw and cancel these kabuliyats, and they will not listen to any other terms. If the obnoxious kabuliyats are withdrawn, they will pay in the rents they consider fair and equitable. This much I ascertained when on tour in this pargana in December, 1883, and I see no reason to believe that the raiyats are likely to abandon their attitude. They seem determined (to use a slang phrase) "to see the zamíndárs out" this time. There appears to me to be only two courses open to the zamíndárs—that is, either (1) to give up the kabuliyats (but I hardly think they will do this); or (2) to fight the question out in the Civil Courts, as is being done in another pargana in the Maimansingh district (Kagmari).

3. It will be seen from the above that it is quite hopeless to expect that, after being in a state of combination against their landlords for nearly two years past, the raiyats will pay in any rent unless the zamíndárs accede to their terms, or they are compelled to give in.

4. There are other minor causes for dispute among less numerous sections of the tenantry, such as (1) levy of illegal cesses; (2) destruction by the zamíndárs of the mandals' rights; (3) the non-keeping of proper accounts by the zamíndárs. A special report was made to Government concerning pargana Maimansingh last year, *vide* the correspondence noted on the margin.

No. 120A., dated 8th May, 1883.

5. As regards the Kagmari pargana, which is also a very large one, being 344 square miles in area, and having a very numerous body of tenantry, the disputes in this pargana are not of such old standing as those in pargana Maimansingh; but they are hardly less virulent, and the chief cause of dispute between the landlords and tenants is the same, namely, the rates at which rents are to be paid. In January last (1884), in company with Mr. Waller, the Collector, I held a meeting of the chief tenants who had disputes with one of the chief landowners, Bindu Bashini Chaudhrani. After hearing their side of the case, I recommended them to agree to arbitration, one arbitrator being appointed by the Collector, one by the zamíndár, and one by the tenants—the result of the arbitration to be regarded as a decree of Court. To

this they seemed to agree at the time; but I understand that, since then, they have expressed a determination not to agree to any arbitration until they see the result of their appeals to the High Court in certain cases. When these are decided, they may consider the matter again.

6. The landlord, Bindu Bashini Chaudhurani, is a widow lady with minor sons, and I am not quite satisfied that her management of her estate is as good as it might be; and I have ordered the Collector to go into the matter and report fully whether the estate should not, in the interests of the minor heirs, be taken under the management of the Court of Wards.

7. As regards the disputes in pargana Atia, I visited the pargana in February, 1884. I have reported in this office No. 616M., dated 6th March, 1884, that they have been satisfactorily disposed of by amicable arrangement. This is also a very large* pargana, with many tenants.

*Area 779·67 square miles.

8. From the above it will be seen that everything has been done that can be done to try and obtain a peaceful solution of the disputes; but those in pargana Maimansingh and Kagmari are of such a nature as not to admit, at present at all events, of any such termination. It is not an easy matter to settle disputes in which many thousands of raiyats are concerned, in a tract of country extending over an area of about 1,000 square miles.

9. The disputes in pargana Hussenshahi have been noticed in former years, especially in 1880 and 1881. There was certain correspondence as noted on the margin. The Government declined to sanction the quartering of special police: the disputes have now much quieted down.

Dacca Commissioner's No. 92, dated 23rd March, 1882.
Government, Judicial Department, No. 1710J., dated 8th April, 1882.

10. In pargana Alapsing the disputes are confined to a few villages only, such as Ghagra, Pan Ghagra, and Chorkhai, in the property of Horo Sundary Debya. A special police-force has been quartered in these villages. As Alapsing is one of the largest and wealthiest parganas in the district of Maimansingh, it cannot be considered that a dispute existing in a few villages can very much affect the pargana as a whole. The disputes in Alapsing are as to the right of the zamíndár to measure the village lands. As the raiyats resisted that by force, they were clearly in the wrong, and a special police-force has been rightly quartered on them for their lawless conduct.

11. As regards parganas Raidum, Nasirujial and Shusung—especially the latter—there are no disputes of any magnitude whatever; nor am I aware, nor Mr. Waller, of any union of the tenantry to resist their landlords. This part of the petition is clearly an exaggeration of the state of things.

12. As regards the number of estates for sale under Act XI of 1859, almost the whole of these were small estates in which there were a large number of shareholders, owing to dissension among whom the estates were allowed to fall into arrears. I do not consider these as any indication of a general failure on the part of the zamíndárs to meet their liabilities owing to the non-payment of the rents. The zamíndárs of Maimansingh were far too favourably dealt with at the time of the Permanent Settlement to have been brought to such straits so soon.

No. 114-18G., dated 16th April, 1884.

From—Officiating Collector, Maimansingh,

To—Commissioner, Dacca Division.

I have the honour to submit a report upon the petition submitted to His Honour the Lieutenant-Governor by Bábú Kashi Kishore Rai Chaudhrí, for self and on behalf of the zamíndárs of Maimansingh: this, I presume, means of pargana Maimansingh, that being one of the portions of the district in which the raiyats have combined strongly not to pay rent, and it being also the pargana in which the property of Bábú Kashi Kishore Rai is situate. I was also, however, directed by Mr. Secretary MacDonnell demi-officially to go with fulness into the origin and growth of the disputes between landlords and raiyats in the various portions of the Maimansingh district, showing such detail as might be necessary and the parties who are to blame. I was also directed to submit copies of the kabuliyats alluded to by the Registrar-General in his Registration Report for 1882-83, with such remarks on them as might seem to be desirable; and I was informed that despatch was not so much an object as the ascertainment of the facts fully and correctly. These instructions reached me about the first week in March, and I proceeded at once to endeavour to ascertain what was necessary by enquiry both from the zamíndárs and the raiyats. I had, however, made but little progress when my health unfortunately failed, and I became so incapacitated for work as to have to apply for sick leave to Europe. As, however, I have now been a year and a half in this district, I shall endeavour, before leaving the district, to submit a report, which, though necessarily imperfect as being based upon insufficient information in detail for the above-stated reasons, will contain all the light that I can throw on the matter.

2. I now proceed, in the first instance, to deal with the petition of Bábú Kashi Kishore Rai Chaudhrí and others, clause by clause.

2A. The statement in the first clause, that since January, 1883, the petitioners have not been able to realize any rent from the refractory raiyats, is not correct. Bábú Kashi Kishore Rai Chaudhrí himself admits through his náib, from whom I enquired, that during the present year (1290 B. S.) he has realized some Rs. 31,50 out of a rental of about Rs. 1,35,000. Some raiyats have no doubt stopped payment altogether, but this is rather the exception, and the greater part have paid small amounts, but have no doubt designedly withheld payment of the balance. That a rumour as to a universal rate of Rs 3-6 per ara for all classes of land got about very widely there can be no doubt; whence it originated I have not been able to discover; but the zamíndárs allege with one consent that it was spread among the raiyats by a Mussulman vakíl of the Judge's Court, and the probable foundation for it was a calculation professing to be founded on the maximum amount (one-fifth) of the produce, which, it was said, would be payable as rent under the provisions of the new Rent Bill. That the raiyats have got extravagant expectations of the new Rent Bill is indubitable, and as an example of this I may cite the case of a leading raiyat who lately informed me, on behalf of himself and others, that they were all firmly persuaded that the new Rent Bill would fix the rate of rent at what he declared was the rate at which the raiyats held their land after the Permanent Settlement, that is to say, at Rs. 2-2 per bíghá, or, as he informed me, twice the jama of one rupee one anna per bíghá, at which the Permanent Settlement was made by Government with the zamíndárs.

3. As regards clause 2, I have not been able to ascertain that any of the zamíndárs had to borrow money to pay their revenue. The allegation seems to have meant that the current collections were insufficient to cover current expenditure during the year, and that previous savings had to be indented upon.

4. As regards clause 3, it does not seem that the recusancy of the raiyats has spread much, if at all, during the last year. But those landlords whose properties adjoin those which are disaffected are of course in continual fear that the recusancy may spread into their estates. It is true that parts, not of the Hussenshahi, but of the Nasirujial, Raidum, Shusung, and Alapsing parganas, have been disaffected.

5. As regards clause 4, it is true that on the 25th May, 1883, there were put up to sale for arrears of revenue for the kist of previous January 283 estates, and, of these, 18 estates were actually sold. The following figures show the number of estates in arrears of the same kist during the last five years:—

1882, advertised for sale	. . . .	178, sold	7
1881, ditto	. . . .	180 „	10
1880, ditto	. . . .	72 „	5
1879, ditto	. . . .	93 „	8
1878, ditto	. . . .	105 „	2

from which it appears that there were not nearly so many estates in arrears in previous years; but that this was due, as alleged, to the inability of the proprietors to pay owing to their raiyats not paying their rents is not so except to a very small extent. The fact is that for some years past it had been apparently a custom here to accept payment of arrears as a matter of course up to, and even on, the day on which estates were to be put up for sale. This seemed to me to be contrary to the law, and I refused to continue the practice, and hence a large number of estates declared to be liable for sale; but, considering that the practice had for a long time previously been prevalent, and after hearing what the defaulters had to say in each case, I exempted the greater part of them. The greater part of these fell into arrears owing to quarrels between co-sharers, and they were almost without exception small properties, or small shares with separate accounts.

6. The allegation in paragraph 5 has been already answered by what has been stated as regards paragraph 1.

7. As regards paragraph 6, though it is true, no doubt, that the present combination of the raiyats is in many cases due to no present claim to enhancement of rent on behalf of the zamíndárs in the sense of a claim to now enhance the rent last received or demanded by them, there can also be no doubt that the present combination originated distinctly and directly from the enhancement made within the last ten years or so. That many of the raiyats who now withhold the rent have executed registered kabuliyats contracting to pay the rent specified in them, is undoubted; but whether they ever actually paid those amounts in full is a matter I have strong doubts about, and I am inclined to believe that they have not done so. There are, however, a considerable number of raiyats who have paid for two or more years past a considerably larger rent than they now profess themselves willing to pay, and who, since a year or so, have become unwilling to continue to pay at the previous rate.

8. As regards paragraph 7, the refusal to pay rents has no doubt very much curtailed the income of those zamíndárs whose raiyats are recusant; but I do not believe that the raiyats would for their own sakes so far ruin their landlords as to force them to allow their estates to be sold for arrears. What coercive measures on the part of the executive authorities are alluded to does not appear, but presumably what is meant is either the quartering of extra police on the recusant villages, or the intimidation of the raiyats by giving them to understand that a persistence in recusancy on their part would be met by criminal prosecutions and punish-

ments. I am, however, myself very strongly of opinion that the only remedy for the present state of affairs is for the zamíndárs themselves to adopt a conciliatory tone, to ascertain and redress, as far as they can with justice to themselves, what are the grievances of their raiyats, and to sacrifice some portion of the enhanced rents which the raiyats are called on to pay under the kabuliyats which have been taken from them, and to cancel those kabuliyats so far as they have been drafted with the object of preventing their raiyats acquiring or enjoying any of the rights provided for them by law.

9. As regards paragraph 8, it does not appear from the figures supplied to me by the Judge that the zamíndárs have had recourse to any considerable extent to suits to recover rent; also it would appear that there has been no general difficulty in the way of executing such decrees when obtained. Whatever difficulty there might be in finding out and attaching moveable property, there could be none of an unusual kind in attaching houses, lands or crops.

10. As regards paragraph 9, it is only necessary to say that a general combination to refuse rents must no doubt virtually render a zamíndár powerless. It would, however, be within his power, provided his claim were undeniable, to select and sue and sell up a number of ringleaders, and so break up the combination. So far as regards the petition of Bábú Kashi Kishore Rai Chaudhrí.

11. As regards the general state of the district, I would point out that, whereas the district has a population of 3,051,966 and 40 parganas, the combination to withhold rent is confined to six parganas or parts of parganas. It is also remarkable that recusancy is confined to the estates of the Hindu zamíndárs, nine-tenths of whose raiyats are Muhammadans. There is no recusancy, so far as I am aware, in the estate of any Muhammadan landlord. Of the parganas in which recusancy prevails, by far the most important are those of Maimansingh near the Sadr Division, and Kagmari, on the west of the district, in the Atia sub-division. The Maimansingh pargana is divided among its various proprietors as under—

Names of proprietors.	Hissa.			
	As.	G.	C.	K.
1. Srimutty Bisheswari Debya Chaudhraní	4	0	0	0
2. Bábú Kashi Kishore Rai Chaudhrí	4	0	0	0
3. „ Tarini Kanto Lahiri Chaudhrí	1	6	2	2
4. „ Abhoya Kanto Lahiri Chaudhrí	0	13	1	1
5. „ Girja Kanto Lahiri Chaudhrí	1	6	2	2
6. Srimutty Brohmomoe Debya Chaudhraní	0	6	2	2
7. „ Ram Sundari Debya Chaudhraní	0	6	2	2
8. Bábú Satis Chandra Rai Chaudhrí and Srimutty Bama Sundari Debya Chaudhraní	1	6	2	2
9. Bábú Krishna Chandra Sannial	0	2	3	2
10. „ Krishna Prasad Lahirí	0	1	2	2
11. „ Mohendra Chandra Chaudhrí	0	5	0	0
12. Srimutty Bhobo Sundari Debya, wife of Bábú Tarini Kanto Lahiri	0	5	0	0
13. Bábú Ishan Chandra Acharjya Chaudhrí	0	1	1	0
14. Srimutty Syama Sundari Debya Chaudhraní	0	1	1	0
15. „ Jogodomba Debya Chaudhraní	0	1	1	0
16. Bábú Grish Chandra Rai and Gobinda Chandra Rai	0	6	3	1
17. Raja Harish Chandra Chaudhrí	1	8	0	2
TOTAL ..	16	0	0	0

Of these, the principal are Bábú Kashi Kishore Rai Chaudhrí of Ramgopalpore, and Srimutty Bisheswari Debya Chaudhraní, of Gouripore, who hold jointly eight annas of the pargana Raja Harish Chandra Chaudhrí holds a title over 1⅝ annas of the pargana, and Bábú Girja Kanto Lahiri, Bábú Tarini Kanto Lahiri, Bábú Abhoya Kanto Lahiri, Ram Sundari Debya, and Brohmomoe Debya hold four annas more. The other shareholders are comparatively insignificant. The Ramgopalpore and Gouripore zamíndárs collect their rents separately.

12. As regards Ramgopalpore, the naib has furnished me the following information. There has been a system of resettlements every five years, for the last 50 years at all events. In fact, this is said to be the custom of the pargana. Up to the year 1279 the estate was let out for the most part in íjáras for terms of five years. As these fell in, measurements and resettlements were made. In 1279 the first khas bundabast was made. The rates then are said to have been up to a maximum of Rs. 8 per ara (equal to 4 bíghás 17 cottahs 4 chittacks) for first-class rice-lands, lowest rates for the same being Rs. 4 for asali and Rs. 3 for char, for the same class rice-lands. About half of the whole number of raiyats gave registered kabuliyats, the terms of which were such that no sorts of right, except to hold at the rents specified for the term of the lease, could accrue. A specimen form is given in Appendix A. The second khás settlement took place about the year 1284B. S., and the third, which would therefore have taken place about 1289B. S., has, owing to the present state of affairs, not been completed. The statements of several of the Ramgopalpore and Gouripore raiyats are given in Appendix B. I cannot vouch for the truth of them, but they speak for themselves as to what the raiyats wish to be believed in the case. The number of registered kabuliyats for short terms taken during the last seven years in pargana Maimansingh will be found in Appendix C, as got from the records of the Registration Department.

13. As regards Gouripore, the estate, the naib informs me, was till 1273 under the Court of Wards. While under the Court of Wards, it was farmed out to a Mr. Brodie, who again sublet in ijáras. On the release of the estate by the Court, the only collection-papers got are said to have been some gramwari jama-wásil-bákí papers, from which the late proprietors ascertained the total rental of each village, and then let out in ijáras for terms of five years by auction. There were two such settlements spreading over a period of ten years. In 1283 there was a measurement of nearly the whole estate, and the first khás bundabast was made. The prevalent average rate for first-class rice-land was, it is said, Rs. 5 to Rs. 6 per ara. The kabuliyats were then taken for five years up to 1288 (B.S.). In 1289 (B.S.) Pous, recusancy began. A specimen form of kabuliyat is given in Appendix D. No raiyat in this zamíndárí is said to have any right of occupancy It would appear that, both in this estate and Ramgopalpore, ijáras were not only let by auction to highest bidder, but the ijáradár also levied ijáradárí, at a rate of two annas per rupee over and above the amount payable by him to the zamíndár.

14. Bábú Girja Kanto Lahiri says that when he succeeded his father 16 years ago, about one-fourth of his share was let in ijaras for a term of five years. He says that the village mandals or patwaris kept papers showing the lands held by each raiyat, and that the ijaras were let out so as to give about 10 per cent. profit to the farmer, he levying ijaradari at the rate of two annas per rupee over and above the nominal rental. A Mr. Manson, he says, held a five years' ijara of the whole of his share from 1278 (B.S.) till 1282, when he died. The zamíndár then made an enhancement of from two to four annas per rupee all round, but without taking kabuliyats. Between 1284 and 1285 there was measurement, resettlement and enhancement of two annas per rupee. He says that, since the death of Mr. Manson, the raiyats, paying rents amounting to Rs. 22,000, stopped paying more than one-third of his demand, stating that they would not pay any more the two annas enchancement made by Mr. Manson presumably as ijardari. The total nominal rental of this share is between Rs. 50.000 and Rs 51,000 per annum, but not more than Rs. 40,000, have been collected since Mr. Manson's death. The zamíndár holds kabuliyats for some Rs. 10,000 or Rs. 12,000 for a term of five years. The raiyats now say that these are invalid. About 20 years ago the average rate of first-class rice-lands was, he says, Rs. 4 per ara. In 1253 his rental was Rs. 21,000 at the time his estate was under batwára. At his father's death the rental was Rs. 33,000. In Appendix E will be found the statement of some raiyats of Bábú Girja Kanto Lahiri. A specimen of the kabuliyats taken by this zamíndár will also be found in Appendix F.

15 As regards the estate of Rájá Harish Chandra Chaudhri, I was not able, before my health gave way, to ascertain the history of its management; but from the statements of the raiyats, which will be found in Appendix G, it appears that there were measurements from 1270 to 1272, followed by enhancement. Again, in 1284 there was another resettlement at enhanced rates, and a few five years' kabuliyats taken, of which a specimen will be found in Appendix H. Then, in 1287 the Rájá gave a lease of his whole share to Bábú Keshub Chandra Acharjya Chaudhri at a rental of Rs. 45,700. The latter who is a vakíl of the Judge's Court, is a zamíndár also, and holds a share in pargana Alapsing. According to his account he levied under this lease in 1287 (B. S) R20,650, in 1288 (B. S.) R43,290, in 1289 (B.S.) Rs. 26,024, and in 1290 (B.S.) Rs. 4,100 only; and now, the Rájá having sued him for arrears due under the lease, he states that the Rájá fraudulently increased the apparent rental by some Rs. 6,000; and it appears that the lessee, besides demanding this excess rent, has also been demanding on his own account an enhancement and cesses amounting to some 50 per cent.

16. I believe that the history of the management of the other shares of the pargana is more or less similar, except that, the shareholders being less powerful and wealthy than those whose management has been described, were less able to dictate terms to their raiyats. I called for information from almost all of them, but there is an apparent reluctance to furnish any.

17. A review of the history of the policy of the zamíndárs towards their raiyats in the Maimansingh pargana shows that, so far as this portion of the Lower Provinces is concerned, there might almost as well have existed no rent-law at all since 1859, for the provisions of that and subsequent Acts passed by the legislature for the regulation of the relations between landlord and tenant seem to have been entirely ignored. Rents have been capriciously enhanced from time to time, and the objectionable system of farming out portions of the estate to the highest bidder seems to have been the rule. When the raiyats, during so many years, quietly submitted to such a state of things, it is an obvious deduction that this could only have occurred among a peasantry incredibly and entirely ignorant that they had any rights at all, or that the rent demandable from them by their landlord could be limited by anything but his will. This probably is to be ascribed to the remoteness of the district and its consequent backwardness. The zamíndárs, while obliged to admit that this has in fact been the result of their management of their estates, plead that it having been always the custom of the pargana to revise the rent-roll at short intervals, they were perfectly justified, notwithstanding the provisions of the Rent Acts, in preserving the *status quo* ante 1859, and trying to prevent the accrual of rights of occupancy. They also state that the raiyats, for their own interest and quite voluntarily, used frequently to change the lands they held by surrendering some and cultivating others. Where a raiyat believed that he was liable to summary ejectment after a

short term in the event of his not consenting to the term of a resettlement, it became, of course, of little moment to him what land he held or what land he surrendered, his great object being to hold the best lands he could at the least rates. Even at present, so far as I have been able to ascertain, there exists a most complete and incredible ignorance among these raiyats of the provisions of the rent-law—a state exposing them, on the one hand, to being deprived of their legal rights without knowing it, and, on the other hand, being duped by designing persons into absurd and impossible ideas as regards what the Government may do for them by the new Bill.

18. As regards the average rates per bíghá which the raiyats have combined to refuse to pay, it does not, so far as I can judge, appear that even the highest rate of Rs. 8 per ara first-class rice-land is so heavy as to have driven the raiyat into recusancy. The ara containing 4 bíghás 17 cottahs and 4 chittacks, the incidence per bíghá will not be much over 1 rupee 10 annas; but enhancements have been so large within a comparatively short period that, even were the rate per bíghá very much less, raiyats who could recollect how very much less rent they had to pay 20 years ago could not but be discontented on comparing their rents then with those now demanded from them.

19. I have said that the raiyats are for the most part ignorant of their rights under the law; but, while this is so, it can yet be readily understood that a feeling might quickly spread through such as ignorant mass that somehow, without having any definite idea how, they had been wronged by their zamíndárs and placed at a disadvantage; and this is what, it seems to me, has occurred during the last two years in Maimansingh pargana. What the main grievance of the raiyats at present appears to be as present in their own minds is (1) the high rents they are now asked to pay, *i.e.*, high as compared with what they remember as paid by them not many years ago, and (2) the heavy rate of interest to which they are liable on arrears. But from my point of view their real grievances are rather (1) that they are all tenants-at-will, and (2) liable to capricious enhancements. Besides these, they have been required to pay cesses amounting to some four annas per rupee; but in this respect they are not worse off than most other raiyats in the district, and this cannot be the cause of their present combination. The raiyats apparently intend now with one consent to deny that they ever executed the obnoxious kabuliyats, and in some cases in which they have been sued for rent on kabuliyats of late in the Civil Courts, the Munsifs have, I believe, either discredited or refused to enforce these documents. In Appendix I will be found copies of two such judgments.

20. No doubt there was considerable scope both for false personification and for obtaining an either constrained or unintelligent consent from the raiyats, who were brought up by scores at a time to admit execution before the Sub-Registrar. Fraudulent personification, however, can but in few cases have been called for to secure the end in view, because it is clear from the raiyats' own statements that they were either constrained by pressure or induced through ignorance to appear *in propriâ personâ* and admit execution.

21. To sum up the above as regards pargana Maimansingh, it would seem that the origin of the present combination to withhold rent is to be attributed to the discontent of the raiyats at the frequent resettlements and enhancements of late years, and to an undefined idea becoming prevalent that they had not been fairly dealt with combined with extravagant hopes raised for them of the benefits to accrue from the new Rent Bill.

22. The only remaining part in the district in which recusancy prevails is pargana Kagmari. This belongs to the following proprietors:—

1.	Srimati Jahnavi Chaudhrani	6 annas.
2.	„ Bindubashini Chaudhrani	5 „
3.	Ananda Mohan Ghosh Chaudhri and several others	5 „

23. It is the raiyats of Bindubashini Chaudhrani who have strongly combined, especially in the north pargana, not to pay rent. These men have elected what are called *Bidrohi* Rájás who are their leaders, and whom the disaffected implicitly obey, and who coerce the wavering by intimidation. These men levy contributions from the willing as well a unwilling to supply funds for the struggle against the zamíndár, and there is said to be a body of clubmen retained out of these funds for the protection of the recusant raiyats. There has been no agrarian outbreak hitherto, but there is existing among the raiyats of this quarter a lawless and defiant spirit, different from what appears hitherto in pargana Maimansingh. The zamíndár kachahri had to be deserted until lately, when a small guard of police entertained for each at the cost of the zamíndár was deputed to protect her amlá. Some of these police, it is alleged, were lately assaulted by a crowd of raiyats, and the matter was personally investigated by Bábú N. K. Bose, Assistant Magistrate of Jamalpore, before whom upwards of 30 of these raiyats are now under trial on charges of assaulting police and rescuing prisoners.

24. The five annas share of the pargana has been since Pous 1288 (B.S.) under the management of the widow of Bábú Dwarkanath Rai Chaudhri, the late zamíndár. In Appendix J will be found a tabular statement showing the rents prevailing in the villages of the pargana up to 1285 (B.S.). In 1286 there was a large enhancement, and registered kabuliyats for a term of three years taken, a specimen of which is given in Appendix K. Again in 1289 (B.S.) there was a further enhancement, and similar kabuliyats for a term of

three years were taken. The rates exacted in 1288 and 1289 will also be found in Appendix J. These speak for themselves, and, together with the short term of the settlement and the terms of the kabuliyats, seem quite sufficient to account for the present refusal to pay rent.

25. By the settlement of 1286 (B.S.) the gross rental, which in 1285 (B.S.) was Rs. 70,000 (and not very long before had been Rs. 40,000, while it was held in ijara for some 30 years) was raised to the sum of a lakh and a quarter, and in 1289 to a lakh and a half. How raiyats were induced to consent to give kabuliyats on such terms, and to consent to such enhancements within such a short time, does not clearly appear. Babu Dwarkanath Rai Chaudri was a very violent and tyrannical man, and his estate was famous for riots and bloodshed. The raiyats declare that they have partly consented through fear, and partly because they were assured that the extreme terms of the kabuliyats would never be acted upon. It is now stated on the part of the zamindar that there was nothing wonderful in their agreeing to the enhancements, as even now by the resettlement of 1289 they are not bound to pay more as rent under their kabuliyats than they previously (*i. e.*, presumably before 1286 B.S.) had to pay in the shape of rent, *plus* cesses and abwabs. There is, however, nothing to show that it was intended not to exact the same amount of cesses, &c., over and above the present enhanced rates, and the raiyats evidently believe that, were the present combination broken up, they would have to pay the old cesses as well as the enhanced rents. The zamindar, I understand, brought some test cases for arrears on some of these kabuliyats, and got decrees both in the Munsif's Court and before the Subordinate Judge on appeal, and some of these are now pending on appeal to the High Court; and till the decision of the High Court is known, I do not believe that either party will be induced to come to terms by any concession.

26. My last proposal was that the obnoxious kabuliyats should be cancelled by the zamindar, and the raiyats agree to pay the rents of the settlements of 1286 (B.S.) But neither party has consented to these terms. It seems that the full amount of rents stipulated for in the kabuliyats have not been in any year paid by the raiyats.

27. There have been also disputes in the villages of Ghagra, &c., in pargana Alapsing. Here the zamindar, Srimati Hara Sundari Debya Chaudhrani, who owns a 1 anna 6 gundas 2 cowris and 2 krants share of the pargana, made a measurement of the lands of these villages in 1287 (B. S.), and enhanced the rents by a regular assessment on the area. The raiyats refuse to agree to this, denying the correctness of the measurement-pole, and alleging the rates to be excessive. A special police-force has since November, 1882, been quartered in these villages to keep the peace, and there has been no disturbance worth mentioning. These villages are only about six miles from the sadr station. Both sides at present seem to be willing to submit to arbitration, and arbitrations have been agreed to, and, if they can be got to act, the matter may be amicably settled.

28. There was recusancy to a considerable extent in the estate of Babu Mohima Chandra Rai Chaudhri of Attarabari, in pargana Hussenshahi, but he has managed to come to terms with his tenants.

29. The kabuliyats which I mentioned in my Registration Report as having been read by me at Netrokona were executed by raiyats of the Maharaja of Shusung, but the terms of these are as objectionable as any I have seen (as will appear from the specimen given in Appendix L). Recusancy has not appeared yet in the Maharaja's estates, and this I attribute partly to the respect his raiyats have for the Maharajah, and mostly to the fact that the rates of rent, noted in the margin, are much less than those of the last kabuliyats taken in pargana Maimansingh.

Bhiti		Rs. 5	per ara.
Zirat, 1st class	„	4-12	ditto.
Do. 2nd „	„	4	ditto.
Do. 3rd „	„	2-8	ditto.

30. As regards the kabuliyats, of which specimens are given in the appendices annexed, the objectionable clauses are those stipulating for—

(1) A very heavy rate of interest of arrears, *i. e.*, 25 per cent. per month, Rs. 3-2 per cent. per month.

(2) Liability to enhancement at will at end of the term, or to give up the land.

(3) Liability to pay any future demand of Government from the zemindar.

APPENDIX A.

No. 3640.

Lessee.—Shaik Madhu.

Lessor.—Babu Kashi Kishore Rai Chaudhri of Ramgopalpore, pargana Maimansingh.

Terms in the Kabuliyat.

1. That I shall pay interest at the rate of 25 per cent. per mensem on the amount of the lapsed instalment.

2. That I shall maintain the present boundaries of my holding, and shall inform you of any dispute that may arise with others about the same.

3. That I shall enjoy the fruits of the trees in my holding.

4. That I shall not be able to cut the valuable trees in my holding without your permission.

5. That I shall not be able to make any alteration in the present condition of my holding by excavation or any other means.

6. That I shall not be able to alienate my homestead and zirat lands, or to mortgage the same, and that the said lands will not be liable for my other debts.

7. That you will be able to make a measurement of my holding during the stipulated period, and that you will get rent for any land that by such measurement may be found in excess of the amount entered in the kabuliyat, or grant me a proportionate reduction in my jama according to the rates mentioned therein if the amount of the land fell short.

8. That I shall pay separately and according to law the cost that has been or will be demanded by Government, that the amounts of road and public works cesses have been included in the jama entered in this kabuliyat, and that I shall get a remission of the same provided you were allowed it.

9. That the loss arising from the lands being left fallow shall be borne by me, and that I shall be entitled to the profit accruing from the cultivation of the same during the stipulated period.

10. That after the expiry of the term you will be able to make a fresh settlement and to enhance the rent according to law.

11. That I shall not do anything illegal.

12. That I shall not be able to claim a right to occupy if I go elsewhere during the continuance of the present lease, or if I fail to execute a fresh kabuliyat after the expiry of its term.

13. That when the chaukidar of the village dies or is dismissed or resigns the post, I shall immediately appoint another man in his place.

14. That on the occurrence of any police case I shall supply you myself, and the police through the chaukidar, with the information required to be given according to the provision of the law.

15. That I shall not do anything in contravention of the stipulation entered in paragraphs 2, 4, 5, 6, 7 and 13, and that I shall pay compensation for the loss which you may suffer in consequence of my acting in contravention of the said stipulation.

APPENDIX B.

Mahomed Pachu Sircar, of Morabali, raiyat of Gouripore and Ramgopalpore—

Holds 1 pura 11 aras 4 cottahs since father's death in 1275; in 1265 paid Rs. 27 to the two tarafs in equal shares; in 1266 rents enhanced to Rs. 54-8; the land was measured and assessed at rates of Rs. 6 for bhiti, Rs. 4 for first class rice, Rs 3 for second class, and Rs. 2 for third class. Before this the rates which had been all along were for bhiti Rs. 2-3-4, for first class Rs. 2, for second class Rs. 1-8, for third class Rs. 1-4. Till 1272 paid Rs 54-8; in 1273 a new assessment—Rs. 92-14-6, at rates for bhiti Rs. 8, for first class Rs. 5 or Rs. 5-4, for second class Rs. 4, and third same as before. In 1285 there was a measurement, and bhiti assessed at Rs. 9-12, and all other kinds of zirat at Rs. 5. My total assessment was Rs. 141-9-6 under this.

Kali Sircar held ijara for five years to 1280 under Ramgopalpore, though Gouripore share was khas For five years to 1273 there was an ijaradar of Ramgopalpore, Nabu Nandi.

I held ijara of my village for five years to 1269. I got it at an auction sale. I bid Rs. 209; the jamabandi was Rs 200. There was two annas per rupee ijaradari Kabuliyats were first taken in 1284. I thought that I could hold my land if I paid whatever was demanded, and otherwise would be ejected. I never heard of right of occupancy. When I gave my kabuliyat I did not know I was giving away any rights. My three sharers pay at the old rate and I at the new. We have paid the Rs. 141 odd for five years. The rent for 1290 is due I do not intend to pay it. I cannot. I am willing to pay the former Rs. 92. The above applies to all the raiyats in my village. I was constrained to give the kabuliyats. I have heard from the Munsif's vakils about a right accruing in three years; also about a twelve years' right, I have heard about a new law, and I hope that the Rs. 2-2 at which the raiyats took the land at the Permanent Settlement from the zamindár (they getting it at 17 annas) will not be exceeded. I have not heard that this will be so. I believe our rents will be reduced.

MAIMANSINGH,

The 13th March 1884.

Asan Sarkar, son of Mahomed Mitu, of Konapara, pargana Maimansingh, thana Iswargunge. Raiyat of the Gouripore and Ramgopalpore zamindars.

Holding with three other persons jointly 1 pura 14 aras of land since 1264 or 1265 B. S. In 1266 B.S. these lands were assessed at Rs. 85* (1 pura 9 aras at Rs. 3 and 5 aras at Rs. 2 per ara.) Homestead and rice-lands were assessed at the same rate. Of the land alluded to above, 1 ara 3 cottahs are hemestead, and 1 pura 12 aras and 13 cottahs rice lands. Does not know how much of the latter amount of lands would be of the first, second, or third class. The zamindárs demand Rs. 150 since 1288 B.S. for the said lands (bhiti Rs. 13 or Rs. 14 per ara, rice-lands first class Rs. 7-4, second class Rs. 5-8, and third class Rs. 4-8). Unwilling to pay at these rates owing to the deteriorated condition of the lands. Willing to pay the former jama Rs. 85. Has not stopped payment at this rate. Did not give any kabuliyat. In 1289 B.S. the Ramgopalpore zamindár forged two kabuliyats, one in his name and the other in the name of his nephew and co-partner Mahomed Azim. These kabuliyats were presented for registration, but the District Registrar refused to register them. Raiyats have occupancy-right in their holdings. Heard of the new Bill from the pleaders at Iswargunge and others. Heard that provisions have been made therein to the effect that raiyats would be able to dispose of their holdings as they liked. Did not hear of the provisions made in respect of the raiyats' holdings. The measurement was made during the years 1284, 1285, 1286 B.S. There has been no increase or decrease in the area of his holdings. Paid up the rent (old jama up to 1289 B.S.).

*	Rs.	As.
Ramgopalpore	45	8
Gouripore	39	8

Shaik Mairish, son of Shaik Hanif, of Sibprosadpore, pargana Maimansingh, thana Netrokona.

Holding 4½ aras of land under the Gouripore and Ramgopalpore zamindars (eight cottahs bhiti and 4 aras rice lands). Holds since about 125 years; the jama was Rs. 9 previous to 1264 B.S. In 1264 it was enhanced to Rs. 15 (bhiti Rs. 6 per ara and rice lands Rs. 3 per ara). The jama was further enhanced to Rs. 26 in 1284. Has paid at the rate of Rs. 15 up to 1289 B.S., also paid Rs. 7 for 1290 B.S. The zamindars have assessed bhiti Rs. 10, first class rice Rs. 5-12, second class rice Rs. 5-8, and third class rice Rs. 4-12. Is not willing to pay the enhanced jama (Rs. 26) owing to the deteriorated condition of the lands, and as he cannot afford to pay. Measurement made in 1284 B.S. No increase or decrease in the area of his holding. Kabuliyat taken in 1284 B.S. He was given to understand that it was executed for Rs. 15; afterwards learnt that it was executed for Rs. 26. Appealed to the Commissioner but did not get any redress. Would not have objected to the execution of a kabuliyat for a juma of Rs. 15. Cannot read and write. Did not know whether the execution of any kabuliyat for a temporary period would affect his interest in the holding. Has no idea of his right in the land. Has not heard of the new Bill. Cannot say what is the extent of each class of rice lands in his possession.

Syed Newaz, son of Syed Anu of Char Bhagnamari, pargana Maimansingh, thana Iswargunge. Raiyat of Gouripore and Ramgopalpore zamindars; aged 80 years.

Holding 5 aras 14 cottahs of land since his father's time (100 years). Does not know what was the jama previous to 1274 B.S. Since that year till 1289 B.S. has paid Rs. 9-2-6 per year (bhiti 11 cottahs=Rs. 1-6 at Rs. 2 per ara, rice lands 5 aras 3 cottahs=Rs.7-12-6 at Rs.1-8 per ara) in equal shares to both zamindars. Since 1287 B.S. both the zamindars demand Rs. 29, at the rate of Rs. 4-12 or Rs. 5 per ara of all classes of land. Does not get sufficient crops to the demand. Previous to 1274 B.S. the rates were bhiti Rs. 2, rice first class Rs. 1-4, second class 12 annas, and third class 10 annas per ara. Has given a kabuliyat since seven or eight years ago. Does not know the contents of the kabuliyat. Had no idea of his right in the land. Can read and write. Measurement was made in 1286 or 1287 B.S. Did not understand the measurement. Heard of the new Bill from the people who passed by his house. Heard that provision has been made to the effect that a raiyat would be able to dispose of his holding in any way he liked. Did not hear of the provision made in respect of the rent.

Aib, son of Shaik Kader, of Banjia, pargana Maimansingh, thana Netrokona. Raiyat of Gouripore and Ramgopalpore.

Holds 2 puras of land since about 200 years at a jama of Rs. 24, at the rate of 12 annas per ara. Paid the said jama till 1286. The zamindar demands Rs. 160 at the rate of Rs. 4 per pura since 1287 B.S. Has not paid any amount during the last four years. Tendered payment to the tahsildars Radu Sarkar, Beehu Sarkar and others. Has not given any kabuliyat. Measurement has not been made during his lifetime. The other raiyats of Banjia stopped payment since the Pous kist of 1289 B.S. They have ere that kist paid at the rates of Rs. 2 for bhiti and first class rice, Rs. 1-12 for second class, and Rs. 1-8 for the third class rice lands. Willing to pay at these rates; afterwards says not willing to pay even at these rates. Thinks that zamindar has no right to enhance the jama which he paid for years. Did

not hear of the provision made in the new Bill in respect of rents. Heard that a raiyat will be able to excavate tanks, saw trees and use them for his own purpose, and dispose of his holding in any way he liked. Also heard that the zamindar will not be able to eject a raiyat.

Elim Sarkar, son of Mahomed Aiab, of Ramchandranagor, thana Iswargunge, pargana Maimansingh. Raiyat of Bisebwari Chaudhrani and Kashi Kishore Babu.

Holds 8 cottahs of homestead lands, 12½ cottahs of zirát bhiti, and 8 aras 8½ cottahs of rice lands, altogether 9 aras 13 cottahs. The rice lands are of three classes—first class Rs. 2-8, second class Rs. 2, and third class Rs. 1-12 per ara. Rates of homestead bhiti and zirat bhiti are Rs. 4 and Rs. 2-8 respectively. Holds the above-mentioned land since 1261 B.S., and has paid a jama of Rs. 31-8* to the zamindars, without any objection on his or their parts, from 1261 B.S. to 1288 B.S. Is willing to pay the same jama now, but the zamindars want Rs. 55† as rent, 4 annas per rupee as *parbbi* of *pooja*, and 4 annas per rupee as interest. Does not know at what rate each class of land has been assessed by the zamindar.

	Rs.	A.	P.
* Gouripore	22	8	0
Ramgopalpore	9	0	0
† Gouripore	40	0	0
Ramgopalpore	15	0	0
TOTAL	55	0	0

In 1284 B.S. the zamindar of Gouripur took a kabuliyat from him for Rs. 40 on account of the rent in hor share. He was given to understand at that time that he would not be required to pay any amount in excess of his former jama. He was tahsildar of Ramchandranagor mouza up to 1288 B.S. He did not object to the execution of the kabuliyat for the above-mentioned reason. The term was five years. In 1289 B.S. a fresh kabuliyat was asked for for the same enhanced amount of rent; but he has not given it, which is the ground of his dismissal from the tahsildarship. Had no idea of his right at the time of executing the kabuliyat, nor did he know that it would in any way be prejudicial to his interest. In 1283 Chayet or 1284 Bysak the mouza was measured on behalf of the zamindar. The measurement was not accurately made; five or six cottahs of land might have been found in excess over the amount of land previously assessed. Since 1284 B.S. other raiyats have paid a jama in excess of what they paid previously. Heard of the new Bill from the pleaders and amlas at Iswargunge. Does not know what provision has been made about the rents of the raiyats' holdings. Heard that the zamindar would not be able to eject the raiyats, and that the raiyats would be able to deal with their holdings in any way they liked. Does not like to pay the enhanced rent, as the lands do not yield sufficient crop now.

W. MAUDE,
For Officiating Collector.

The 15th March, 1884.

APPENDIX C.

Statement showing the number of registered Kabuliyats for short terms taken during the last seven years in pargana Maimansingh.

For Officiating Collector.

APPENDIX D.

No. 251.

Lessee—Shaik Shahabaz.

Lessor—Srimati Biseswari Chaudhrani, of Gouripore, pargana Maimansingh.

Terms in the Kabuliyat.

1. That I shall pay my rent according to kistbandi, and in default of the same shall pay interest without objection at the rate of Rs. 3-2 per cent. per mensem on the amount of the lapsed instalment.

2. That I shall not be able to set up a plea of payment of rent unless it is supported by a receipt.

3. That I shall not cut or allow any one else to cut any tree, and that if I do so I shall pay compensation at the rate of Rs. 10 per tree.

4. That I shall bear the loss arising from the land being left fallow, and shall be entitled to the profit accruing from its cultivation during the stipulated period; that I shall not be able to raise any objection if I were dispossessed from any land in my holding during that time, and if I do, it will not be valid.

5. That I shall not alter the present condition of the land by excavation or any other way. If it is necessary to do so, I shall take a sanad from you. That otherwise I shall pay a compensation without objection.

6. That I shall not be able to alienate the land or to mortgage the same within or after the expiry of the stipulated period, and that the said land will not be liable for my debts.

7. That I shall maintain the present boundaries of my holding, and that I shall inform you and take necessary care whenever any dispute arises with others regarding the same. That otherwise I shall be held responsible for any loss that may be sustained by you.

8. That you will be able to let out the lands mentioned in this kabuliyat to others on my removal elsewhere or on my death, and that neither myself nor my heirs shall be able to make any objection to the same.

9. That on the expiry of the term stated in the kabuliyat, you will be able to make a new settlement at an enhanced jama after making a fresh measurement, and that I shall not be able to raise any objection to it; and if I raise any such objection, it will be rejected.

10. That I shall not be able to claim any land other than that mentioned in this kabuliyat. That I shall pay rent at double the prevailing rates if I occupy lands other than those entered in this kabuliyat.

11. That I shall immediately quit possession of the lands mentioned in this kabuliyat if any raiyat has already been residing upon the same, or if any new raiyat were settled in it, and that you will allow me a proportionate reduction in my rent for the land so quitted.

12. That on the occurrence of any police case, I shall give information of it to you and the police in due time and conduct the case, and that otherwise I shall be held responsible for it.

13. That if the chaukidar of the village be dismissed, or he resigns his post, I shall immediately appoint another man in his place.

14. That I shall not do anything illegal or prejudicial to your interest, or which has been prohibited by you; and that if I were to do it I shall be held responsible for the same.

15. That I shall pay separately any amount that may be demanded by Government in future.

W. MAUDE,
For Officiating Collector.

APPENDIX E.

Pakai, son of Juman Fakir, of Haripur char, pargana Maimansingh, thana Kotwali, Girija Babu's raiyat.

Holding 3 aras (bhiti 4 cottahs, zirat 2 aras 12 cottahs) of land since 20 or 25 years; jama Rs. 6 at Rs. 2 per ara. Enhanced to Rs. 18 since four or five years (cannot say the rate.) Paid till 1289. Not willing to pay the old jama, because the lands do not yield sufficient crops now. Cannot say when the measurement was made. Has not given any kabuliyat. Is willing to give a kabuliyat for five years for the old jama. Has no idea of his right in the land. Has heard that the jama will be reduced by the new Bill by rumour. Cannot say to what extent the reduction will be allowed. The 3 aras of land yielded 30 or 35 maunds of paddy 20 years back. They now yield 20 or 25 maunds. Paddy is now sold at Re. 1 per maund. Previously it was sold at 2 maunds or 14 passaries per rupee. No dispute about the standard of measurement.

Kadu, son of Kurtulia, of char Haripur, pargana Maimansingh, thana Kotwali. Raiyat of Girijakant Babu.

Holding 4 aras 8 cottahs since 100 or 125 years. Since grandfather, jama Rs. 9-8 (bhiti 4 cottahs and 4 aras 4 cottahs zirat; rate Rs. 2 per ara of all kinds of land); enhanced to Rs. 18-12 since four or five years (does not say the rate of rent). Paid at the old rate till 1289 B.S. There is now a balance of Rs. 4-8 only for 1290 B. S. Not willing to pay the old jama. Cannot afford to pay owing to the deteriorated condition of the lands. Last measurement was made five or six years ago. No change in the area of his holding. No complaint about the standard of measurement. Has not given a kabuliyat. Willing to give a kabuliyat

for the old jama. Zamindars have right to eject their raiyats and to let out their lands to those who offer a higher rent. Has no idea of occupancy right. The land which yielded 10 or 11 maunds of paddy 20 or 22 years back now yields 9 or 10 maunds. Paddy was sold at the rate of 5 or 6 maunds previously; it now sells at a maund per rupee. Has not heard that the rent would be reduced by the new Bill.

Shaik Fazullah, son of Shaik Asanullah, of char Raghatpore, pargana Maimansingh. Raiyat of Girijakant Babu.

Holding 3 aras 8 cottahs since his grandfather (125 years). Rs. 8 jama (bhiti 8 cottahs =Rs. 2 at Rs. 4, and zirat 3 aras=Rs. 6 at Rs. 2) till 1285. Enhanced to Rs. 15-8 (bhiti at Rs. 9 and zirat Rs. 3-8) in 1286 B. S. Has paid up in full till 1289 at the old rate. There is an arrear of Rs. 2 at that rate for 1290 B. S. Last measurement was made in 1284 or 1285 B.S. No increase or decrease in the area of his holding. Not willing to pay the enhanced jama as he cannot afford to pay. Lands do not yield sufficient crops. Has not given any kabuliyat. Willing to pay the former jama. Has no idea of his right in the lands. Has not heard that his rent will be reduced by the new Bill. Rushee is the standard of local measurement 7½ aib make one poa, 16 poas make one rushee. The zamindar made the measurement with the same standard rushee with which the first measurement was made. First class land now yields 10 maunds of paddy, two maunds mustard. But 30 years before it yielded about 16 maunds paddy and 4 or 5 maunds mustard per ara. Jute 8 or 9 maunds per ara now. Formerly no jute was sown. Formerly paddy was sold 2 or 3 maunds per rupee. Now it is sold to 7 passaries per rupee.

W. MAUDE,
for Officiating Collector.

APPENDIX F.

No. 23 of 1281.

Lessee.—Shib Ram Nath.

Lessor.—Baboo Girija Kanto Lahiri Chaudhri, of Kalipore, pargana Maimansingh.

Terms in the Kubuliyat.

That I hereby accept the lease of the above-mentioned land for a term of five years from Bysack 1287 to Cheyt 1291 B. S., on the following conditions:—

That I shall pay the annual rent every year according to the undermentioned instalments, and take a receipt for the same.

That in default I shall pay interest at six pies per rupee per mensem on the amount of the lapsed instalment.

That if the rent of a whole year fall into arrear, you will be able to hold me liable for it, and at the same time to deprive me of my right to occupy the holding and to bring it under your khás management during the continuance of the present lease.

That you will be able also to deprive me of my temporary right in the land, to bring it under your khás management, and to let out the same to others if I go elsewhere, and do not reside upon it with my family.

That myself and my heirs and successors as well as my moveable and immoveable properties shall be liable for the rent that may accrue during the time of my tenancy, and that you will be able to recover the rent by the sale of my moveable and immoveable properties.

That I shall not be able to alienate any portion of my land in any way.

That I shall not be able to make any alteration or excavation in the lands; that if I excavate a tank, I shall pay compensation at such rate per ara as may be prevalent at the time, and shall fill up the said tank by procuring earth from elsewhere.

That the said land will not be liable for my debts other than rent due to you, nor will it be liable to sale or alienation in execution of any decree.

That you will be able to make a measurement of the land during the continuance of my present lease; that I shall pay rent at the following rates for any land that by such measurement may be found in excess of the amount within the boundaries of the holding entered in this kabuliyat; that the aforesaid annual jama shall continue during the stipulated period if no measurement is made.

That I shall give up without objection any portion of the land that may be ordered by you during the continuance of my present lease, and that you will grant me a proportionate reduction in my jama according to the following rates.

That I shall be entitled to the profit accruing from the cultivation of the land, and shall bear the loss arising from its being left fallow during the stipulated period.

That I shall maintain the present boundaries of my holding.

That I shall not be able to cut, sell or give away any valuable or fruit tree without your

permission. That I shall pay compensation at the rate of Rs. 14 per tree if I cut, sell or give away any tree.

That I shall pay separately, and in addition to my annual jama, the amount of the present road and public works cesses, or any other cess that may be assessed according to law.

That after the expiry of the stipulated period, you will be able to make a fresh settlement of the holding at such jama as it may please you.

That my holding would be liable for khás management if I do not renew the settlement within one year after the expiry of the present term.

That I shall pay the rent of the land for the period I am allowed to occupy it after the expiration of the present term, at the rate at which you may be pleased to demand of me.

That my heirs and successors shall conform to the above-mentioned conditions if I die before the expiry of the stipulated period.

W. MAUDE,
for Officiating Collector.

APPENDIX G.

Shaik Deru, son of Sheik Pequ Munshi, of Dariakona, pargana Maimansingh, thana Netrokona. Raiyat of Raja Harish Chandra Chaudhri. Ijara to Kesab Bábú since 1287 B. S.

Holding 8 aras 11¼ cottahs since 50 or 60 years (bhiti 1 ara=Rs. 4, zirát 7 aras 11¼ cottahs = Rs. 15, at Rs. 2 per ara). Paid this jama till 1274 or 1275. Increased to Rs. 29-8 in 1274 or 1275 B.S. (bhiti Rs. 7 and zirát Rs. 22-8 at Rs. 5 per ara). Paid this jama till 1284 B.S. Increased to Rs. 56-6* in 1285 B S. Paid the old jama for 1285 and 1286 B.S. to Rájá Harish Chandra Chaudhrí, but has not received farak. Ijára to Kesab Bábú in 1287 B.S.; ijáradár demands 2 annas ijáradárí, 2 annas expenses, 4 annas interest on account of infringement of instalment and 1 anna as road and public-works cesses. Paid the old jama till 1289 B. S.; also paid a part of the rent for 1290 B. S. Not willing to pay the enhanced amount of jama or the ijáradárí, &c., as the lands do not yield sufficient crops. Last measurement was made in 1270 or 1272 B. S. Zirát lands of all classes are assessed at the same rate. There are three classes of rice-lands in the mauza. Rájá Harish Chandra took a kabuliyat in 1285 or 1286. Excuted the kabuliyat reluctantly. Had no idea of his right when the kabuliyat was taken. Does not know what provision has been made in the new Bill in respect of the rents of a raiyat's holding.

* Bhiti at Rs. 10 per ara.
Zirát at Rs. 6 "

Mahajan Khan, son of Robkhan, of Narandia, pargana Maimansingh, thana Netrokona. Raiyat of Raja Harish Chandra Chaudhri. Ijaradar Kesab Bábú since 1287 B. S.

Holding 5 aras of bhiti and zirát lands (does not know the amount of each kind) since grandfather's time (150 years). Paid a jama of Rs. 10 till 1285 B.S. at Rs. 2 per ara. Harish Bábú demanded Rs. 25 in 1286 B.S. at the rates of Rs. 5 for some lands and Rs. 6 for others. Kesab Bábú also demands the same jama. Paid both of them till 1289 B.S. at the old rate. Not willing to pay the enhanced jama, as he cannot afford to do so owing to the deteriorated condition of the lands. Last measurement was made in 1284 B.S. No change in the area of his holding. Cannot tell the extent of each class of lands in his holding. Prevalent rate Rs. 2 per ara of all classes of lands. Has not given any kabuliyat. None of the raiyats of Narandia have given. Has not heard of the provision made in the new Bill about the rent of a raiyat's holding.

Sheik Nachha, son of Husan, of Kharicha, pargana Maimansingh, thana Kotwali. Raiyat of Raja Harish Chaudhrí. Ijara to Kesab Bábú since 1287 B. S.

Holding 16 aras 8 cottahs of land since 40 or 45 years (bhiti 8 cottahs and zirát 16 aras). Jama Rs. 45. Says that the rates are Rs. 4 bhiti and Rs. 2 zirát (but the jama at this rate would be less that Rs. 45). Paid in full till 1289 B.S. Kesab Bábú demands Rs. 80 (ijáradárí 2 annas, enhanced rent 4 annas, 2 annas miscellaneous expenses, and 1 anna public-works and road cesses per rupee of the old jama). Paid at the old rate for a part of the year 1290 B. S. Not willing to pay the enhanced jama to Kesab Bábú owing to deteriorated condition of lands. Zirát lands in the village are of one and the same class. Measurement made 15 or 20 years ago. Has not given any kabuliyat. Has not heard what provision has been made in the new Bill in respect of the rent of a raiyat's holding.

Safi Mahomed, son of Shaik Mohabullab, of Singerhati, pargana Maimansingh, thana Netrokona. Raja Harish Chandra Chaudhrí's raiyat. Kesab Bábú Ijardar since 1287 B. S.

Holding 8 aras 11 cottahs of land since grandfather (period about 40 or 50 years, cannot say), at a jama of Rs. 17 3 at the rate of Rs. 2 per ara (bhiti 8 cottahs, zirát 8 aras 3 cottahs, both assessed at the same rate). Paid this jama to Harish Chandra Chaudhrí

till 1286 B.S. and to Kesab Bábú till 1288 B.S. Paid Rs. 10 in excess in 1288 B.S. Kesab demands 9 annas per rupee over the jama (2 annas ijáradárí, 4 annas enhanced rent, 2 annas expenses, 1 anna public works and road cesses). Has not paid the rent for 1290 B.S. Not willing to pay the enhanced rent, as the lands do not yield more crops than before. Has not given any kabuliyat. Has not heard what provision has been made in the new Bill in respect of rent. Last measurement was made 25 or 20 years ago.

Dhalu, son of Shaik Dukhai, of Manikdi, pargana Maimansingh, thána Iswargunge. Rájá Harish Chandra zamindár. Kesab Bábú izáradár since 1287 B.S.

Holding 9 aras of lands at a jama of Rs. 17 for 14 years (bhiti 4 cottahs at Rs. 7, rice first class 12 cottahs at Rs. 4, second class 1 ara at Rs. 3-8, third class 1 ara at Rs. 2, and fourth class 6 aras at Re. 1 per ara). Paid to Harish Chandra Chaudhrí till 1286 B.S. Paid the old jama to Kesab Bábú till 1289 B.S. Tendered payment for 1290 B.S., but it has not been accepted. Kesab Bábú demands Rs. 24-8 since 1287 B.S., *i.e.*, 8 annas per rupee over the jama (2 annas ijáradárí, 1 anna road and publicwork cesses and 5 annas mufassal expenses). Not willing to pay the enhanced amount, as the lands do not yield more crops than before. Last measurement was made in 1287 B.S. No increase or decrease in the area of his holding. Has not executed any kabuliyat. Heard nothing of the new Bill.

Korim Baksa, son of Khosal Maral of Borotola, pargana Maimansingh, thána Netrokona. Rájá Hurrish Chandra Chaudhrí's raiyat. Ijára to Kesab Bábú in 1287 B.S.

Holding 15 aras 3 cottahs 1 pakhi of land since great-grandfather (about 250 years). Jama Rs. 30-8-6 till 1284 B.S. (bhiti 18¾ cottahs and zirát 14 aras ½ cotta at Rs. 2 per ara). Enhanced to Rs. 95-14-6 in 1285 (bhiti at Rs. 10 and zirát at Rs. 6 *plus* 1 anna as road cess, 1 anna as Durgapuja expenses, 6 pies Jhulion Jatra, 3 pies Doljatra, 1 anna mufassal expenses and 4 annas as interest on account of infringement of instalment). Ijára to Kesab Bábú in 1287 B.S. Jama enhanced to Rs. 111 in that year, *plus* two annas ijáradárí, one anna road-cess, 1 anna 9 pies puja khorcha and one anna mufassal khorcha (bhiti 11, zirát 7). Paid at the old rate up to date. Not willing to pay more than that. No improvement in the lands. Last measurement made 20 or 25 years ago. Has not given any kabuliyat. Heard that Rájá Harish Chandra Chaudhrí has got a forged kabuliyat executed in his name in 1285 for three years. Has not heard of the provisions made in respect of rent in the new Bill. Can write his name.

APPENDIX H.

Lessees.—Kali Charan Dé and Gour Mohan Nayi.

Lessor.—Rájá Harish Chandra Chaudhrí, of Golokpore, pargana Maimansingh.

Terms in the Kabuliyat.

That we are tenants-at-will residing in mauza Biska.

That we hereby execute this kabuliyat for a term of three years from Bysack 1286 to Chaitra 1288 B.S.

That we shall pay our rent every year, and take receipts or dakhilas for the same.

That no plea of payment of rent will hold good unless it is supported by a receipt.

That if we do not pay the rent according to the kistbandí, you will be able to recover the same by distraint and sale of our crops on your own authority or by the sale of the moveable and immoveable properties held in our own names or in the name of others as provided in the law.

That you will be able to keep our holding under your khás management, or to let it out to others.

That we shall pay separately the amounts of road and public works cesses that are being paid to Government or may be demanded hereafter.

That, if ordered, we shall quit the cultivated lands when any raiyat will be settled in the same, and that we will be allowed a proportionate reduction in our rent.

That we shall maintain the present boundaries of our holding.

That we shall not be able to cause any damage by excavation.

That we shall not be able to cut any tree without your permission, and that if we do it, we shall pay the value at Rs. 14 per tree.

That we shall be entitled to the profit accruing from the cultivation of the land, and that we shall bear the loss arising from the lands being left fallow during the continuance of the present lease.

That, as usual, we shall pay separately the salary of the chaukídár.

That on the occurrence of any police case, we shall inform you and the police about it in due time.

That our holding will not be liable for our debts.

That we shall make a new settlement of our holding, and that otherwise you will be able to let out the same to any one else.

W. MAUDE,
for Officiating Collector.

APPENDIX I.

District Maimansingh in the Court of the First Munsif at Netrokona the 17th day of January, 1884.

Suit No. 737 of 1883.

Mahomed Iasin ... ... *Plaintiff,*

against

Sheik Salem ... ... *Defendant.*

The plaintiff sues upon a kabuliyat to recover arrears of rent from the defendant in respect of a holding in ijára.

The defendant denies the execution of the kabuliyat. He says he holds the land directly under the zamíndárs of Ramgopalpore and Gouripore.

The only point which we need consider is whether the kabuliyat was duly executed by the defendant.

Plaintiff has called three witnesses to prove the kabuliyat. These men no doubt testify to the genuineness of the document; but considering the conflicting statements made by them, on certain very material points, and their relation to the plaintiff, as well as the circumstances and the probabilities of the case, I do not consider it safe to rely upon their evidence.

Plaintiff's first witness says after the kabuliyat a pattá also was written, and duly granted by the plaintiff to the defendant. The second witness denies that such was the case. According to him, the defendant did not get any pattá, but the execution of the kabuliyat was followed by a second writing, called a chalán, towards the settlement of the defendant's debt in respect to the arrears of rent which had accrued due up to the date of the kabuliyat. The third witness gives the lie to both the first and second witnesses. He says there was neither any pattá nor any chalán. Now, I think the contradictions noted above are very serious. Plaintiff's pleader attempted to reconcile these conflicting statements by referring to the witnesses' departure from the sitting at which the kabuliyat was written at different times. But I am not satisfied with his explanation. The witnesses do not say that they do not know whether any other documents were written in that *majlish* or not. They have no doubts on the point. What they state, they state emphatically. Whether we accept the story of the chalán or the pattá, or neither of them, it must be admitted that any such writing, if it had really followed the execution of the kabuliyat, would have been witnessed by all the witnesses. To refer to the time of the witnesses leaving the *majlish* in order to explain their contradictory statements seems to me to be a vain attempt after all.

The witnesses all agree in stating that the kabuliyat was not executed for a higher jama, but for the rental which the defendant had all along paid. This is at direct variance with the statement made in the kabuliyat on this subject. I think the witnesses felt it difficult, or rather not very advantageous to the plaintiff's cause, to have to say that the new kabuliyat reserved a higher jama, and accordingly they shaped their evidence in a way calculated to injure the plaintiff's cause the least.

The defendant has proved his defence by producing a kabuliyat which he had executed to Kashi Kishore Bábú on account of his eight annas proprietary share in the holding in 1286, or two years before the date on which the plaintiff's kabuliyat is said to have been executed, and by producing certain dakhilas which he had received from the patwárí of Biseswari Debya, the owner of the other half of the holding. This kabuliyat and the dakhilas or rent-receipts have been duly attested. The plaintiff's pleader has no valid objection to offer to the kabuliyat, but he contends that the dakhilas filed by the defendant were not granted to him, but to a second Salim of his village. Plaintiff's principal witness, Banu, attempted to avoid the unfavourable effect of the dakhilas by this voluntary statement. I do not consider Banu to be so reliable or truthful a witness as to accept his uncorroborated testimony on this point as sufficient. Plaintiff could produce this second Salim to confirm Banu's evidence, but he has not done so. In the absence of satisfactory evidence to the effect I cannot say with Banu that the dakhilas produced by the defendant were not granted to him. The kabuliyat, Exhibit B, and the dakhilas, Exhibits A to A3, go a long way to show that the defendant holds the land under the zamíndárs direct. The refuting evidence thus has succeeded in establishing one very important point.

It has been contended that the defendant has been gained over by Kashi Kishore Bábú, and the kabuliyat, Exhibit B, is a collusive instrument. Looking at the date of the kabuliyat, I cannot, however, say that there is any truth in this contention. Kashi Bábú's

kabuliyat is earlier in date than plaintiff's. The presumption rather points the other way. Defendant having executed a kabuliyat in favour of the zámíndar could not possibly have been in a hurry to execute another in favour of the plaintiff.

Plaintiff's father is still alive. Why was not the kabuliyat executed in his favour? The explanation offered by the plaintiff on this point also wants corroboration.

Indeed, a careful review of the whole evidence and the probabilities of the case leads me to the conclusion that the balance of evidence is in defendant's favour. Not only is the testimony of plaintiff's witnesses conflicting, but the witnesses themselves also are related to him, and the circumstances are such as throw great doubt on the claim. I accordingly hold that the kabuliyat has not been satisfactorily proved.

Plaintiff's suit is dismissed with costs. Defendant's costs shall be paid by plaintiff.

ANANDA NATH MOZOOMDAR,

The 17th January 1884. *First Munsif.*

District Maimansingh, in the Court of the First Munsiff at Netrokona, the 21st day of January 1884.

SUIT No. 714 OF 1883.

Sheik Taribullah . . . . *Plaintiff,*

against

Sheik Asmat . . . . *Defendant.*

The plaintiff sues in his ijára right to recover arrears of rent for 1289, and up to kist Bhadro of 1290 B.S., in respect of defendant's holding in village Jhansi.

The plaintiff relies upon a kabuliyat alleged to have been executed by the defendant in Choitro 1283 B.S., in favour of Kashi Kishore Rai Chaudhri, his (plaintiff's) lessor.

The defendant denies plaintiff's right to sue; he also denies the kabuliyat and the existence of the relation of landlord and tenant between the plaintiff or his lessor and himself. He repudiates all connection with the land in question, and disputes his liability.

The following issues have been raised in this case:—

1. Is the plaintiff entitled to maintain this suit?
2. Did the defendant execute any kabuliyat in plaintiff's (lessor's) favour, and is the kabuliyat relied on by the plaintiff as genuine?
3. Is the defendant liable for the arrears of rent in question?

The plaintiff is not the zamindar's servant, but his lessee. In his capacity as lessee, he is certainly entitled to maintain this suit for arrears of rent.

The evidence of the execution of the kabuliyat (Exhibit II) by the defendant is by no means so satisfactory and convincing that I can find the second question in the affirmative.

Three witnesses to the kabuliyat have given evidence in this case, but I am not satisfied with their answers. In the first place, they do not seem to know the executant of the kabuliyat sufficiently well. All the three witnesses made the acquaintance of the defendant for the first time in their lives on the day of the kabuliyat. To give weight to their evidence they have, no doubt, stated that on one or two occasions afterwards they chanced to see the defendant again. I really feel it very unsafe to make the defendant liable under a kabuliyat whose execution by him is based on such meagre and untrustworthy proof. In the second place, two of the witnesses to the kabuliyat do not seem to have taken any further trouble to acquaint themselves with the circumstances under with the kabuliyat was executed than what was necessary to affix their signatures to the instrument as witnesses. In the third place, it has not been proved that the contents of the kabuliyat were read and explained to the executant, who is admittedly an illiterate man. And lastly, the erasures, or rather alterations, in the kabuliyat wherever the defendant's name appears, cast such grave doubts on the genuineness of the document that I am not at all disposed to allow the plaintiff to reap any benefit from it. The defendant's family name is Sheik, but everywhere in the kabuliyat he was originally styled Khan; and I know not when, but certainly *after*, the execution of the kabuliyat, the name Khan was altered into Sheik. When or how, and by whose authority, the alteration took place do not appear from the evidence. The plaintiff's pleader has taken no pains to explain the circumstances under which the alteration took place. These evident traces of manipulation even in the name of executant of the kabuliyat, are strong proofs of the very indifferent and perfunctory manner in which the kabuliyat was drawn up, written and executed, if executed by the defendant it ever was. I have lately had occasion to see many kabuliyats drawn and executed mechanically, but never before did I chance to see proofs positive of such carelessness. Now, when the executant's name was wrongly stated, I very much doubt if the other preliminaries and essentials were settled with any better care.

The Registrar's endorsement no doubt shows that one Asmat Sheik admitted execution before him. How a kabuliyat executed by Asmat Khan could be registered by one

Asmat Sheik I really do not understand. If the alteration in defendant's name took place after execution, and before registration, how is it that the Sub-Registrar did not notice it, and no explanation thereof has been inserted in the document? Explanations of erasures and interlineations are not wanting in the kabuliyat, and it is therefore the more suspicious that explanations on so important an alteration are not to be found in the kabuliyat.

The witnesses to the kabuliyat gave their evidence so as to imply that no mistake in the name of the defendant was committed at the time the kabuliyat was written and executed. This is certainly a significant fact. Either the alteration took place in their absence and without their knowledge, or they concealed the fact of the alteration deliberately. Whatever may be the real case, the kabuliyat cannot be accepted as genuine.

The plentiff Taribullah stated in his evidence that the holding comprised in the kabuliyat originally stood in the name of Poran Sheik, and that it was only at the date of the kabuliyat that the defendant came to be recognised as the raiyat in possession thereof, although Poran continued to hold on as before. There is wide scope for suspicion even in this. It goes a great way to prove that there is rule in the matter.

I have given the subject my careful consideration, and feel strongly induced to find the kabuliyat to be spurious.

The defendant denies the relation of landlord and tenant. Beyond plaintiff's own evidence there is nothing to show that the defendant ever made any payment under the terms of the kabuliyat. No collection papers have been filed, and Taribullah's evidence is both interested and uncorroborated. Under the circumstance, I think the plaintiff has failed to make out a case which, independently of the kabuliyat, would entitle him to succeed in this case.

Plaintiff's suit is dismissed with costs. Defendant's costs shall be paid by plaintiff without interest.

ANANDA NATH MOZOOMDAR,
First Munsif.

The 21st January 1884.

APPENDIX J.

Statement showing the rates of rent, Paguldigha, quarter estate of late Bábú Dwarkanath Rai Chaudhrí of Kagmari.

NAMES OF VILLAGES.	For what year or years.	Homestead land.			First class zirát lands.			Lowest class zirát lands.

APPENDIX K.

No. 30 of 1882.

Lessee.—Samir Ali Akanda, son of Alam Akanda, of Dawlutpore, Pargana Kagmari, Station Pingna.

Lessor.—Bábú Dwarkanath Raí Chaudhrí, of Sontosh, Pargana and Station Pingna.

That 12½ pakhis of land having been let out to me at an annual jama of Rs. 29-3-6* for a period of two years, *viz.*, 1289 and 1290 B.S., I hereby agree to pay the said jama according to the following instalments, and to hold the same land for the stipulated period.

	Rs.	A.	P.
* Homestead land 12½g at Rs. 4 per pakhi=	2	8	0
Zirát land 11 pakhi 17½g at Rs. 2-4 per pakhi=	26	11	6

That no plea of payment of rent will hold good unless it is supported by a receipt.

That in default of payment according to kistbandí, I shall pay interest at two pice per rupee per annum.

That I shall maintain the present boundaries of my holding.

That I shall not be able to cut or sell any fruit-tree.

That I shall not be able to claim any remission of rent during the stipulated period; that I shall bear the loss which may arise by my leaving the lands fallow; and that I shall be entitled to the profit that may accrue by the cultivation of the same during that period.

That in addition to the stipulated rent I shall pay any amount that the Government may demand of you.

That I shall have no title to the lands mentioned in this kabuliyat, or right to hold the same after the expiry of the stipulated period; that you will be able to keep the same under your khás management or to make a fresh settlement with me or any one else; that no objection on my part or on the part of my heirs to such proceedings will be valid.

W. MAUDE,
for Officiating Collector.

APPENDIX L.

No. 485, volume 5 of 1883.

Lessee.—Madhu Khan, son of Bhikan Khan, deceased, of Nandipur Darjigati, Pargana Shusung.

Lessor.—Mahárájá Raj Krishna Sing Bahadoor, of Durgapore, Pargana Shusung.

Terms in the Kabuliyat.

1. That I shall pay the rent every month in equal instalments as mentioned above, and in default I shall pay interest at Rs. 3-2 per cent. per mensem on the amount of the lapsed instalment.

2. That no plea of payment of rent will hold good unless it is supported by a receipt.

3. That I shall be entitled only to enjoy the fruit of the existing trees or of the trees that I sow; that I shall not be able to cut or allow any one else to cut any tree or make any injury to it, a d that if I do so, I shall be liable for the damage.

4. That I shall be entitled to the profit that may accrue from the cultivation of the land, and that I shall bear the loss arising from the land being left fallow during the continuance of the present lease.

5. That I shall not be able to make any excavation or alteration in the lands injurious to the Mahárájá's interest.

6. That I shall not be able to dig a pond or erect a building in my holding without the written permission of the Mahárájá.

7. That I shall not be able to alienate the land or mortgage the same, and that the said land will not be liable for my debts.

8. That I shall maintain the present boundaries of my holding.

9. That on the expiry of the term of this lease, the Mahárájá will be able, whenever he pleases, to make a new settlement at an enhanced jama after making a fresh measurement; that if I do not agree to the settlement, the Mahárájá will be able to let out the land to others; and that no objection on my part or on the part of my heirs as to occupancy-right, &c., will be valid.

10. That the Mahárájá will be able to make a measurement of my holding during the continuance of my present lease; that I shall pay rent at the present rates for any land that may, by such measurement, be found in excess, or that the Mahárájá, if it pleases him, will be able to let out the excess land to others during the continuance of the present lease; and

that if the land be found less than the amount entered in this kabuliyat, I shall be entitled to a proportionate reduction in my jama at the above-mentioned rate.

11. That I myself shall reside and cultivate the homestead and zirát lands respectively in my holding; that I shall not be able to sublet any portion of the same to any one else; and that, if I do so, I shall have no title to or occupancy-right in the land thus sublet, and the Mahárájá will be able to take khás possession of it and to let it out to others.

12. That if I do not reside in the holding with my family, I shall lose my occupancy-right in the same, and the Mahárájá will be able to take khás possession of it and let it to another raiyat.

13. That if necessary, the Mahárájá will be able to evict me from any portion of my holding during the continuance of this lease, and allow me a proportionate reduction in my rent according to the rates alluded to.

14. That I shall have no title to the garden prepared by me or to prefer any claim against the Mahárájá on that account, if I voluntarily remove myself elsewhere, or if the Mahárájá eject me from my holding on the violation of any of the conditons herein set forth.

15. That on my removal from the land, either voluntarily or being ejected by the Mahárájá in consequence of the violation of any of the conditions herein set forth, I shall not be able to claim any damage from him on account of the ponds dug or the buildings or other katcha houses erected with his permission during my tenancy, and if I do so it will not be valid.

16. That I shall pay separately and without objection the amount of the present road and public-works cesses or any other cesses that may be assessed hereafter.

17. That if I do not pay the rent voluntarily, the Mahárájá will be able to recover the same with interest by distraint and sale of the produce of my holding and moveable and immoveable properties.

18. That after the expiry of the term of this lease till a resettlement has been made, the above-mentioned conditions will remain in force and apply to myself and my heirs.

W. MAUDE,
For Offg. Collector.

No. 4662, volume 39 of 1880.

Lessee.—Shaik Isab, of Gopalpore, pargana Maimansingh.

Lessor.—Krishna Chandra Sanyal Chaudhri, of Dawakhola, pargana Maimansingh.

Terms in the kabuliyat.

That I do hereby execute this kabuliyat for a term of five years from Bysack 1287 to Chaitra 1291 B.S., and declare that I shall hold the land mentioned in it for the stipulated period without any right of occupancy.

That I shall pay the rent every year according to the undermentioned instalments.

That in default I shall pay interest at six pies per rupee per mensem on the amount of the lapsed instalment.

That during the continuance of the present lease I shall be entitled to the profit accruing from the cultivation of the land, and that I shall bear the loss that may arise from the lands being left fallow.

That I shall not be able to cut any tree, and that if I do so I shall pay the compensation at R10 per tree and the damage.

That I shall maintain the present boundaries of my holding.

That on the expiry of the stipulated period, I shall make a fresh settlement and execute a fresh kabuliyat for such terms and at such rates of rent as may be desired by you.

That you will be able to eject me from my holding on your own authority, and to keep it under your khás management or to let it out to any one else if I do not execute a fresh kabuliyat or remove myself elsewhere during the continuance of this lease, and that neither myself nor my heirs shall be able to make any objection to it, and if any objection be preferred it will be rejected.

That I shall pay separately, in addition to the amount of the rent entered in this kabuliyat, any amount that may be demanded by Government in future.

That my heirs and successors shall conform to the aforesaid conditions in case I die before the expiry of the term of this lease.

W. MAUDE,
For Offg. Collector.

Dated 21st June, 1884.

Resolution by Government, Bengal.

READ—

A memorial of the 24th January, 1884, from Bábú Kashi Kishore Rai Chaudhri and other zamíndárs of the Maimansingh district, complaining of the non-payment of rent and of the generally defiant attitude of their raiyats.

Read also—

A letter, No. 114—18G., dated 16th April, from the Officiating Collector of Maimansingh, and a letter No. 51M., dated 28th idem, from the Commissioner of Dacca, reporting on the zamíndárs' memorial.

The Lieutenant-Governor, having given his careful attention to the papers cited in the preamble, comes reluctantly to the conclusion that the Government must for the present abstain from interference in this matter. A perusal of the papers will show that this conclusion is to be regretted, not only because the continuance of the state of things, as reported by the Collector and Commissioner, and complained of by the memorialists, is fraught with injury to the best interests of zamíndárs and raiyats alike, but also because it seriously endangers the public peace. Measures for the preservation of the peace have, indeed, been taken in the shape of quartering a special police-force in some parts of the disturbed localities, representations having been made that the execution of decrees for rent was impeded by the attitude of the raiyats. But it is manifest that these measures cannot be always continued, while the maintenance of a special police-force at the sole expense of the raiyats cannot, under the circumstances of the case, be justified. There can no longer be any doubt that the unsettled state of these parganas has been to a very great extent caused by the conduct of the zamíndárs themselves. At their door lies much of the blame; and no special and exceptional arrangements for the preservation of order, which fail to take account of that consideration, or which impose on the zamíndárs no financial responsibility, can, under the circumstances, be quite satisfactory; for this is the third time, within the short space of 15 years, that enhancements of rent by the memorialists have driven their raiyats into open hostility against their landlords. On two previous occasions, in 1868 and 1875, official action was brought to bear upon the raiyats, who were persuaded under such influence to agree to their zamíndárs' terms. "*Since then,*" says the Commissioner, "*the zamíndárs have been increasing their demands for kabuliyats at enhanced rates, and there has been more or less friction. This culminated in 1882, when the raiyats again, for the third time, combined together and resisted the zamíndárs. This time the combination has assumed a more serious aspect than on the other occasions, probably because the raiyats are becoming more and more aware of their rights, and are determined not to be persuaded to anything against their interests by the local officials. They are perhaps not so much to blame, for I fear it must be recorded that the Maimansingh pargana zamíndárs, relying on the support formerly given to them by the officials, have been very exacting in their demands, and though I am not prepared to say that the kabuliyats got out of the raiyats are wholly illegal and unjust, yet it must be allowed that very hard bargains have been driven with the raiyats.*" This is the opinion of a Commissioner who has had a very long experience of this part of Bengal, and it is more than borne out by the following remarks of the Collector of the district:—

"A review of the history of the policy of the zamíndárs towards their raiyats in the Maimansingh pargana shows that, so far as this portion of the Lower Provinces is concerned, there might almost as well have existed no rent-law at all since 1859, for the provisions of that and subsequent Acts passed by the legislature for the regulation of the relations between landlord and tenant seem to have been entirely ignored. Rents have been capriciously enhanced from time to time, and the objectionable system of farming out portions of the estate to the highest bidder seems to have been the rule. When the raiyats, during so many years, quietly submitted to such a state of things, it is an obvious deduction that this could only have occurred among a peasantry incredibly and entirely ignorant that they had any rights at all, or that the rent demandable from them by their landlord could be limited by anything but his will. This probably is to be ascribed to the remoteness of the district and its consequent backwardness. The zamíndárs, while obliged to admit that this has in fact been the result of their management of their estates, plead that, it having been always the custom of the pargana to revise the rent-roll at short intervals, they were perfectly justified, notwithstanding the provisions of the Rent Acts, in preserving the *status quo ante* 1859, and trying to prevent the accrual of rights of occupancy. They also state that the raiyats, for their own interest and quite voluntarily, used frequently to change the lands they held by surrendering some and cultivating others. Where a raiyat believed that he was liable to summary ejectment after a short term in the event of his not consenting to the term of a resettlement, it became of course of little moment to him what land he held or what land he surrendered, his great object being to hold the best lands he could at the least rates. Even at present, so far as I have been able to ascertain, there exists a most complete and incredible ignorance among these raiyats of the provisions of the rent-law—a state exposing them, on the one hand, to being deprived of their legal rights without knowing it, and, on the other hand, being duped by designing persons into absurd and impossible ideas as regards what the Government may do for them by the new Bill.

"As regards the average rates per bíghá which the raiyats have combined to refuse to pay, it does not, so far as I can judge, appear that even the highest rate of R8 per ara, first-class rice-land, is so heavy as to have driven the raiyats into recusancy. The ara containing 4 bíghás 17 cottahs and 4 chittacks, the incidence per bíghá will not be much over 1 rupee 10 annas; but enhancements have been so large within a comparatively short period that, even were the rate per bíghá very much less, raiyats who could recollect how very much less rent they had to pay 20 years ago could not but be discontented on comparing their rents then with those now demanded from them."

If the preceding statements of the Collector of the district and the Commissioner of the Division were only partially true, they would give a sufficient answer to those who contend that there is no need for any change in the Rent Law as far as it affects Eastern Bengal.

8. The Lieutenant-Governor has already observed that he is reluctantly compelled by the state of the law to abstain from interference in this case. Yet it cannot be doubted that the case is one which eminently calls for such interference as would be effective in securing the just rights of the raiyats, recording the rents to which the zamíndárs are fairly and equitably entitled, and by the imposition of reasonable limitations upon enhancements restoring peace and harmony to the district. If, however, the Government cannot now interfere, and the parties to the dispute are unwilling to come to an amicable agreement, and if, as a consequence, costly litigation with all the bad blood and embarrassment which it entails is the only resource to which they have to look, the only hope that remains is that the early passing of the Tenancy Bill will supply an effective remedy for this and similar evils. In the provisions of Chapter X of that Bill is embodied exactly that procedure which the Maimansingh zamíndárs would have the Government apply. Those provisions meet with opposition from persons inexperienced in Mufassal administration, or who have not yet felt the pressure which conflicts like those under notice impose. But if the provisions were now law, the Maimansingh zamíndárs would not have appealed in vain for help to the Government, nor would the raiyats have had recourse to a "no rent" policy as their best ground of resistance. The fair and equitable procedure of Chapter X of the Bill would have enabled the Government to meet the wants of the case and the reasonable wishes of both parties without recourse to the unsatisfactory process of repression through special police. In the present condition of the law, the only power which the Lieutenant-Governor can exercise is to maintain the peace between the opposing parties.

A. P. MACDONNELL,
Offg. Secy. to the Govt. of Bengal.

No. 491-9-24R., dated 23rd July, 1884.

Endorsed by Under-Secretary to Government of India, Revenue and Agricultural Department.

Transferred to the Legislative Department for disposal.

No. 499R., dated 25th July, 1884.

Office Memorandum by Revenue and Agricultural Department.

The undersigned is directed to forward the papers noted on the margin to the Legislative Department, with the suggestion that, in compliance with the request of the Government of Bengal, they may be communicated to the Select Committee on the Tenancy Bill. The papers in question appear to this Department to be likely to be of some use to the Select Committee in connection with the question of zirát land in Bihár.

Endorsement from Government of Bengal, No. 26T. R., dated 15th April 1884, and enclosures.
Letter to Government of Bengal. No. 321, dated 14th May 1884.
Letter from Government of Bengal, No. 584T. R., dated 29th May 1884, and enclosures.

No. 26T. R., dated 15th April, 1884.

From—Officiating Secretary to Government, Bengal,
To—Commissioner, Patna Division.

I am desired by the Lieutenant-Governor to acknowledge the receipt of your letter No. 10G. of the 4th January 1884, with enclosures, reporting on the petition of the raiyats of Dhanour, in the Sáran district, who have complained regarding the retention by the manager of the Dhanguha indigo-factory of certain lands which they claim as forming portions of their holdings. In reply, I am to communicate to you the following instructions and remarks.

2. The facts of the case, as the Lieutenant-Governor understands them, are not disputed. The village of Dhanour, in the Sáran district, is held in coparcenery by two shareholders—Bunmali Sahai and Mussamat Ram Dulari Kuar—the former owning a two-thirds and the latter a one-third share in it. Both proprietors let their share in thíka to the Dhanguha indigo-factory—Bhumali Sahai for six and the lady for seven years, both leases commencing from 1878.

corresponding to 1283 Faslí. Thus, one lease expired in 1879 and the other in 1880. On obtaining the thíka of the whole village, the indigo-factory entered into arrangements with the raiyats whereby a certain quantity of land (in all 64 bíghás) was appropriated to the cultivation of indigo, no compensation being made to the raiyats for the loss of these lands, but a reduction proportionate to the quantity of land so appropriated being made by the factory from the rents payable by the raiyats.

3. The factory's thíka for the two-thirds share of the village expired in 1879 (1288 Faslí), but the manager was permitted to hold over for another year, until the lease for the one-third share had also fallen in. Then a renewal was had by the factory of the thíka of the latter or smaller share, but Bunmali Sahai, refusing to renew to the factory the thíka of his share, let it instead to some residents in the village of Dhanour, whom the Collector calls tenure-holders but whom you call raiyats. Whether the parties with whom Bunmali Sahai thus contracted were tenure-holders or raiyats, it seems clear that they were not the raiyats from whom the factory had in 1873 taken the lands for indigo-cultivation, and that the proprietor's (Bunmali Sahai's) object in settling with them was to get, through them, into actual and direct possession of these lands, and so convert them into his *khamar* or *nij-jote*. The manager of the indigo-factory, however, was apparently unwilling to allow any portion of the land, which under colour of the leases for the entire village, had been converted into indigo-ziráts, to lapse from his possession, and he accordingly resisted the attempts of Bunmali Sahai's lessees to recover possession. As the latter proceeded in the Criminal Courts, doubtless to save the expense of a civil suit, they naturally failed.

4. Meanwhile, as the Lieutenant-Governor understands the facts, the raiyats from whom the factory had in 1873 taken the lands appealed for aid to the Collector; and the latter's action was, in the first place, directed to inducing Bunmali Sahai to agree to a settlement of the so-called ziráts (should the factory be willing to surrender them) with the original holders, instead of with the new thíkadárs, to whom Bunmali Sahai had leased his share. Having succeeded in this, Mr. Quinn next strove to induce the manager of the factory to relinquish the lands which had been taken up for indigo in 1873 to those raiyats from whom they had been taken, and with this object he invoked the good offices of the Secretary of the Indigo-planters Association. Mr. Hudson, the Secretary of the Association, went to the spot, but his efforts at reconciling the parties were unsuccessful. He succeeded, indeed, in inducing Mr. McGregor, the manager of the indigo-factory, to agree to the restoration of two-thirds of the lands, or a share proportionate to the share of the proprietor who had refused to renew his lease to the factory; but Mr. McGregor absolutely refused to restore the remainder. The village being held in joint ownership, it is understood that the lands of which Mr. McGregor has resolved to maintain possession were in 1873 acquired from the same raiyats, or from some of them, to whom he is willing to restore lands proportionate to the share in the village of which he has failed to secure a renewed lease. The raiyats, however, were not satisfied with the terms offered by the factory-manager. They demanded the restoration of all the lands which the factory took up in 1873 for indigo-cultivation, their contention, judging from their petition to Government, being that, as they had made over their lands to the factory for the term of the first lease only, and then for one year further, pending the expiration of the Mussamat's case, and as that term had expired, they were entitled to receive their lands back again. Mr. Hudson, the Secretary to the Association, while expressing sympathy with the raiyats, declares his inability to give them possession of lands "which no Civil Court would," and the Lieutenant-Governor understands him to be of opinion that the fact of the raiyats having given up or at least lost possession of these lands eight years ago, and not having since paid rent for them, weakens their claim to possession of them now.

5. The facts being such, some difference of opinion exists between you and the Collector as to how the matter should be regarded by Government. Mr. Quinn, the Collector, although he does not see how he can help the raiyats without the acquiescence of the manager of the factory, contends that the claims of the raiyats are just and reasonable; while the Lieutenant-Governor understands you to maintain that, as the raiyats have been so long out of possession, the question is really one between the zamíndár and the thíkadár, in connection with which the raiyats have now no *locus standi*. You are therefore opposed to any further action on this and such like cases, not only for the reason stated, but also because you think that "we cause much more harm than good, both to one side and the other, by executive interference in endeavouring to secure the raiyats the resumption of possession of lands, by an arbitrary and, so to speak, not legitimate action, which have gone out of their possession many years ago, either by their own formal consent or by tacit compliance with the general usage of the times."

6. The questions raised by the correspondence have an importance beyond the particular case under consideration. On the wider issues I am to make some remarks later on; but, restricting attention in the first instance to the particular case, I am to observe that the Lieutenant-Governor leans more to the views expressed by Mr. Quinn than to those which you advance. Mr. Rivers Thompson cannot agree with you in thinking that the question is one between the zamíndár and the planter, in which the raiyats have now no right to interfere. On the contrary, in this particular case at all events, the question is, in his opinion, one between the planter and the raiyats. The planter in 1873 took into his possession certain raiyati lands

in which to cultivate indigo during the currency of his lease. His thíka in no way empowered him to take possession of any lands (unless indeed the proprietor's *khamar* or *nij-jote*, if any such existed in the village); and in regard to the lands, therefore, of which he did take khás possession, he must be regarded (in the absence of a special contract or condition with the raiyats, of which no mention is here made) either as a trespasser, or as holding of the raiyats in consideration of the rent for which allowance was made to the raiyat when the lands were first acquired for indigo. In either case the raiyats were entitled to recover their lands within the period of limitation allowed by the law. The renewal of the thíka did not in any way affect the question as between these raiyats and the planter-thíkadár. A *thíka* lease, which is a license to collect rents, gives the planter no legal authority whatever to oust occupancy-raiyats who punctually pay their rents, or any raiyat, from a portion of his holding; and therefore the retention by the planter in this particular case of land against the will of the raiyat from whom the land was taken, and in violation of an expressed or implied contract such as that to which the raiyats in their petition refer, appears to the Lieutenant-Governor to be of a character which no Civil Court would sustain.

7. The Lieutenant-Governor is disposed to agree with you that, with a view to redressing abuses of the sort brought to light in this case, it is not desirable to go far back on the past if the facts be doubtful. Where the facts are disputed, some period may with advantage be fixed before which enquiries as to the manner in which indigo-zirát lands were acquired should not be prosecuted, and the Lieutenant-Governor agrees in thinking 12 years from the expiry of the last contract, if any, an appropriate period. The case here in point is, however, one in which the facts do not seem to be disputed, and the period also which has elapsed since the lands were first taken up for indigo is not sufficiently long to weaken the raiyats' claim to have their lands restored. It is quite true that, under the law as it stands, the Executive Government cannot compel the manager of the Dhanguha factory in this case to relinquish the lands in question. It can only express to the Association, of which the manager is a member, its view of the facts. The case, however, seems to be precisely one of those with which the Indigo-planters Association may be reasonably expected to deal effectively, and the Lieutenant-Governor trusts that the manager of the factory, in refusing to recognize the just claims of the raiyats, shall not be permitted to cover himself, as with a sufficient shield, by the plea that he has obtained a new thíka lease from a part-owner of the village. As between the only parties who are concerned in the matter—the planter and the raiyat—it is wholly immaterial whether the lease has been renewed or not. The lease gives the planter no authority to hold the lands, and, therefore, unless the raiyats from whom the lands were originally taken consent to their retention by the factory, the equity of the case, in the Lieutenant-Governor's view, requires that the lands should be restored to the raiyats.

8. Turning now to the more general aspect of the questions raised, the Lieutenant-Governor regrets to find that in indigo-districts in Bihár the practice of turning raiyatí land into so-called zirát, or *khamar* or *nij-jote*, under colour of thíka leases, is still prevalent. Many improvements in the system of cultivating indigo have been introduced into Bihár under the auspices of the Indigo-planters Association, but this system of converting raiyatí land into zirát, of which possession is retained by the planter and ultimately by the proprietor to the detriment of the raiyát, is a most serious abuse against which Sir Ashley Eden, so long ago as 1877, protested in the unofficial communication to the then Commissioner of Patna, which preceded the formation of the Planters Association. To the extinction of this abuse the Lieutenant-Governor earnestly trusts that both the Association and the executive officers of Government will devote their best efforts. In the particular case under notice, it does not appear that the manager of the Dhanguha factory *forcibly* converted these lands into zirát; but the Lieutenant-Governor, from this correspondence as well as from other sources of information, has reason to fear that the consent of raiyats is not often an ingredient in the procedure of acquiring lands for indigo in villages leased out to factories. It is true that the Planters Association has resolved—and the Lieutenant-Governor has noticed the resolution with special satisfaction—not to countenance the acquisition of lands for indigo, except under the written consent of the raiyat, and with specific conditions as to continuance of, and termination of, the contract. Adherence to that resolution will no doubt obviate many of the abuses inherent in the present system; but it would seem from this case, and from the 10th paragraph of Mr. Quinn's letter of 27th November, that the resolution of the Association has not yet been made a rule of action by planters generally. In the provisions of the Tenancy Bill, which enable the occupancy-raiyat to sub-let, the planter will find an additional method of obtaining the land which he wants, while preserving intact the raiyat's right to hold it, and while compensating him—which is certainly a necessary and reasonable condition—for its temporary loss. But until that provision becomes law, the Lieutenant-Governor would be very glad indeed to find that the resolution of the Association, to which, in the last paragraph of your note of 22nd November, you refer, had gained a general adherence from all indigo-planters in the province. At all events, the forcible acquisition of lands under colour of thíka leases is an illegality and an injustice to the people regarding which it is impossible to be silent, and the Lieutenant-Governor, therefore, looks to you, and to the District-officers of your division, to give your active support to the Planters Association in suppressing such illegalities by all legal means. The Association's rule which provides for the interchange of

written agreements as evidence of such consent would simplify and facilitate proceedings for the suppression of such illegalities.

9. No doubt it has been, and still is, to the advantage of proprietors in Bihár to look without disfavour on this practice of converting raiyatí into so-called zirát lands; and herein, as this case very clearly shows, the objects of zamíndárs have been to acquire possession of the lands after the termination of the planter's lease, and to treat them afterwards as *khamar* or *nij-jote* or demesne land, in dealing with which the landlord's power is much less fettered by the law than it is in the case of raiyatí land. It is very obvious, however, to the Lieutenant-Governor that indigo-ziráts, constituted in the manner of which this case furnishes an example, are clearly distinguishable from *khamar* or *nij-jote* or demesne lands, and that they cannot be confounded with *khamar* or *nij-jote* lands without inflicting a serious injury on the cultivating classes throughout these Provinces. The test or criterion of the *khamar* or *nij-jote* lands is cultivation, or holding for cultivation, by the owner, either directly or by means of hired labour. These indigo-ziráts fail altogether to fulfil the requisite conditions of that definition; and the sooner it is recognized by proprietors generally that the forcible acquisition of raiyatí lands by thíkadárs will not avail *per se* to convert them into *khamar* or *nij-jote*, the greater chance will there be of the abandonment of a custom which has done, and, if not suppressed, is likely to do, much harm to the country. The Lieutenant-Governor will take an early opportunity of representing these views to the Government of India with the object of having them affirmed in the Tenancy Bill now before the Legislative Council.

No. 26T. R., dated 15th April, 1884.

Endorsed by Offg. Secretary to Government, Bengal.

Copy forwarded to the Secretary to the Government of India, Revenue and Agricultural Department, with the request that, with the permission of His Excellency the Governor General in Council, it may be communicated to the Select Committee on the Tenancy Bill.

No. 321R., dated 14th May, 1884.

From—Under Secretary to Government of India, Revenue and Agricultural Department,
To—Secretary to Government, Bengal.

In acknowledging the receipt of your endorsement No. 26 T. R., dated the 15th ultimo, forwarding, for communication to the Select Committee on the Bengal Tenancy Bill, copy of a letter* to the address of the Commissioner of the Patna Division, I am directed to request that, with the permission of His Honour the Lieutenant-Governor, you will be good enough to supply this Department with the complete correspondence referred to therein relating to the petition of the raiyats of Dhanour, in the Sáran district, against the retention by the manager of the Dhanguha indigo-factory of certain lands which they claim as forming portions of their holdings.

* No. 25 T. R., dated the 15th April.

No. 584T. R., dated 29th May, 1884.

From—Officiating Under Secretary to Government, Bengal,
To—Secretary to Government of India, Revenue and Agricultural Department.

With reference to Mr. Holderness' letter No. 321R., dated the 14th May, 1884, I am directed to forward the accompanying copies of papers noted on the margin relating to the petition of the raiyats of Dhanour, in the Sáran district, against the retention by the manager of the Dhanguha indigo-factory of certain lands which they claim as forming portions of their holdings.

Letter No. 10G., dated the 4th January 1884, and enclosures, from the Commissioner of Patna.
Petition of Soondunun Misser and others of Mauzá Dhanour, Pargana Gowa, in Sáran.

No. 10G., dated 4th January, 1884.

From—Commissioner, Patna Division,
To—Secretary to Government, Bengal.

With reference to Government order No. 2616—959L. R., dated 30th November 1882, forwarding a petition (herewith returned) from certain raiyats of mauza Dhanour, in the district of Sáran, against the indigo-factory of Dhanguha, I have the honour to report as follows.

2. The proprietor of the Dhanguha factory, which is an outwork of the Arrah concern, held separate leases from the two shareholders of village Dhanour. One of the leases, which was given by Bunmali Sahai, who represented two-thirds share of the village, ran from 1283F. to 1288F., and the other, representing one-third share, given by Mussamat Ram Dulari Kuar, ran from 1283F. to 1289F. It appears that, when the factory took these

leases, it induced the raiyats to give certain lands from their holdings for the cultivation of indigo, and these lands have been treated by it as zirát lands. On the expiry of the first-mentioned lease in 1288, the lease was allowed to continue in occupation of the whole village up to the end of 1289F., when he obtained a renewal of the lease for the one-third share. The other shareholder declined to renew the lease to the factory, but gave a lease of some lands which the factory held as zirát to certain raiyats in the village.

3. These raiyats claimed possession, and proceedings were taken under section 530 of the old Criminal Procedure Code, the result being an order passed in favour of the factory. At the same time, the Secretary to the Planters Association was addressed on the subject, and the Magistrate again wrote to him on receipt of the petition from the raiyats. Mr. Hudson, the Secretary, wrote in reply as follows:—

"Although the raiyats have lost their title to the lands they claim, which are now and have been in indigo for nine years, yet they were originally the holders and are entitled in all fairness to a hearing. Their claim to get put in possession of these lands is somewhat weakened if, as is represented to me, they acknowledged in Court some two years ago that they had no claim to these lands, and that they had allowed them to revert to the máliks as their zirát. Consequently, and taking also into consideration the fact that these raiyats have been out of possession of these lands for nine years, and have not paid rent for them during that period, they would now, if the factory is forced by the Association to give the lands up, revert to the málik, who is, I conjecture, at the bottom of the raiyats' action in petitioning Government. I have therefore suggested to Mr. McGregor that he should restore these lands to the raiyats, on the understanding that they should release them to him, he making them over to the raiyats to sub-let them to him for a period.

"Most of the raiyats seem quite content with this arrangement, and several propose that they should receive 100 per cent. over the amount they pay the málik, and a sum in cash as a *peshgi* loan on the sub-leases.

"It is necessary, before anything is done, to get all the raiyats' consent to this arrangement, to prevent future complications as to the particular patches of the land leased by each, and to have the sub-leases registered The land taken forcible possession of by the raiyats last year, about 10 bíghás, still remain in their possession.

"The only element of uncertainty that appears to remain after this arrangement has been carried out is the future action of the málik. If he does not contest the right of the raiyats to re-enter and execute sub-leases for the lands, I think a satisfactory settlement will have been arrived at.

"I need hardly add that, should Mr. McGregor not settle with these raiyats within a reasonable period, he must vacate the land."

4. The Collector, Mr. Quinn, in forwarding to me the Secretary's reply, observed as follows:—

"I agree with him (Secretary) in the opinion that the raiyats from whom holdings, these so-called zirát lands, were originally taken are the persons with whom the settlement should be made, and that, if the manager fail to satisfy them, he must release the lands. I would fix the current Faslí year as the period within which the matter must be settled, failing which the lands belonging to the share for which the factory does not hold a lease must be relinquished.

"In my opinion, the factory, in this instance, has absolutely no case. The so-called ziráts are either *boná fide* ziráts, in which case the factory is bound to relinquish the portion of them lying outside the share of which the manager has the lease, or they are not *boná fide* zirát lands, but lands belonging to the raiyats from whose holdings they were taken eight or nine years ago, in which case they should be restored to the raiyats.

"I agree with the Secretary in considering that the lands are not zirát at all, but portions of the raiyats' holdings, and in this view it is clearly incumbent on the factory to relinquish the lands if the manager cannot come to terms with the raiyats.

"With your approval, then, I will ask the Secretary to obtain from the manager an engagement that he will relinquish the lands in dispute at the end of the current Faslí year, if he cannot come to terms with the raiyats in the meantime as regards compensations for the present year, as well as the rent to be paid in future years.

"This case is further complicated by the fact that the shareholder who has not renewed the lease, and who probably cares little for the rights of the raiyats, has treated the so-called ziráts as real *boná fide* ziráts, and has given separate leases of them to certain raiyats not identical with the original occupants of the land. Some of these men have since got possession of a portion of the land, and they cannot be turned out by force; but otherwise I think these leases must be simply ignored as conveying no right."

5. In reply, I wrote to the Collector as follows:—

"I approve of the action you propose to take in the matter, and I note that the case is further complicated by the fact that the shareholder who has not renewed the lease, and who probably cares little for the rights of the raiyats, has treated the so-called ziráts as real *boná fide*

landlord's ziráts, and has given separate leases of them to certain raiyats not identical with the original occupants of the land. You say that some of these men have since got possession of a portion of the land, and they cannot be turned out by force, but otherwise you think these leases must be simply ignored as conveying no right. It seems to me that, if we are justified in our interference with the claims of an indigo-factory as regards lands of this nature, so far as to press the negotiation of a compromise and the restoration by such factory of these lands to raiyats in the position assumed by the present petitioners in the case now under consideration, it is equally incumbent upon us to interfere on their behalf in the *primâ facie* unjust assumption by the zamíndárs of the lands in question as landlord's ziráts, and the re-settlement of them with raiyats not identical with the original occupants of the land. I do not gather from your letter that you are prepared to take action against the zamíndár, but I think, to be consistent, we should exercise the same interference in the one case as in the other. On this point I shall be glad to be favoured with your opinion.

"It is worthy of consideration that the result of the direct action taken by us in this matter benefits not the persons in the position of the petitioners, but the zamíndárs, who, as you rightly conjecture, care little for the rights of the raiyats. Are we then to leave the zamíndár to thus unjustly ignore such rights to the benefit of his own interest?"

6. On receipt of my letter the Collector wrote to the Secretary, saying that both the Commissioner and himself agreed with him in the opinion that the lands in dispute should be treated, not as ziráts, but as lands appertaining to the raiyats' holdings, from which they were originally taken, and in this view it was clearly incumbent on the factory to relinquish them if it cannot come to terms with the raiyats. Mr. Quinn also suggested that the settlement should include an agreement as regards the compensation to be paid for the occupation of the lands during the present year, as well as an agreement for their cultivation in future years, and, in case no settlement could be arrived at, the lands should be given up at the close of the present Faslí year.

7. The Collector also wrote to the two-thirds shareholder of the village, who refused to renew the lease to the factory, pointing out to him the desirability of restoring to the raiyats the lands which originally belonged to their holdings, but which were converted into zirát lands by the factory, so far as his interest in the village was concerned. This person, Bunmali Sahai, who was employed as sharishtádár in the Sub-Judge's Court in Muzaffarpur, after some correspondence promised to enquire into the matter on the spot during the Dusserah vacation, and do all that was necessary to secure to the tenants their rights. I do not find that he has done anything.

8. Subsequently, Mr. Hudson visited the village Dhanour with a view to settle the matter amicably on the spot. He offered to the raiyats possession of the lands they were entitled to in proportion to the share of the proprietor whose lease to the factory had expired, but the raiyats would not agree to this. They would take the whole or none. The following extract from Mr. Hudson's letter will explain how he proposed to settle the matter:—

"In accordance with my promise, I went to Dhanour village on the 15th instant. I saw the raiyats and the lands in dispute. I explained to them that I had come at your request to endeavour to settle the matter amicably, by giving them, with Mr. McGregor's consent, possession of the lands they were entitled to.

"My first difficulty was to ascertain the amount that had been taken up in indigo in 1283 Fasli, or eight years ago, by the factory by virtue of their thíka lease of the patti. I found the amount was 64 bíghás: that in 1288 Faslí the lease of Bunmali Sahai's two-thirds share of the patti expired. The raiyats thereon took forcible possession of about nine bíghás of this land. Then remained 55 bíghás. Bunmali Sahai gave a letter authorising the factory to continue to hold these lands for the current season, and took his share of the rents, and promised to renew his lease to the factory the following year. He did not do so, and again the raiyats took forcible possession of 25 bíghás more of this land.

"Now, the proportion of this zirát land which, by the Association rule, the factory should give up on the expiry of Bunmali Sahai's share is 42 bighas 13 katas, leaving 21 bighas 7 katas, the balance in the ratio of the other one-third share, the lease of which runs for some years. This portion Mr. McGregor considered he had a right to retain until the lease expires.

"After many enquiries and explanations, and much discussion, I offered to divide off the balance of the lands of which the raiyats had not already taken possession and make them over to them; but their spokesmen declined this, and demanded that I should hand *all* the lands over to them, 'as I was ordered by the Collector.' I then explained that I could only settle this matter as I was permitted by the Planters Association and with the permission of Mr. McGregor; that I would engage for him that they would receive an agreement from Mr. McGregor that at the expiry of his current lease the 21 bíghas 7 katas would be handed over to them, and in the meantime he entered their names in the village jamabandí and an attested copy given to them each year, and that I would endeavour to fix a compensation for the use of them that would satisfy both parties; but they would listen to nothing. 'They must have all the lands or none,' they said, and one man became impertinent, and so I left the place."

9. It appears to me that in this particular case we cannot carry our interference any further, but must leave the raiyats to seek redress in the Civil Court. My views on the subject are expressed in a note recorded by me on the 22nd November last, a copy of which was forwarded to the Collector for his guidance. I now beg to submit a copy of the note for the information of the Government.

10. Mr. Quinn has addressed a further letter* on the subject, in which he asks for definite instructions on the question of the restoration of land originally taken from the holdings of raiyats by a factory during a lease, and held by it for several years continuously. I submit at his request a copy of this letter for the orders of Government, together with a copy of Mr. Hudson's letter of the 17th November, therein referred to. My views on the subject are contained in the note referred to above, and I have only to add that I consider we should not adhere to any hard-and-fast rule, but that we should only exercise executive interference in cases where the raiyats could definitely point out the lands in question as their original holdings.

* No. 2208, dated 27th November, 1883.

No. 2208, dated 27th November, 1883.

From—Magistrate of Sárau,

To—Commissioner of Patna Division.

With reference to your letter No. 295G., dated 24th instant, I have the honour to forward copies of the correspondence which has since taken place on the subject of the Dhanour lands.

1. Letter dated 27th July 1883, from the Secretary, Bihár Indigo-planters Association.
2. This office reply No. 1624, dated 18th August 1883, to the Secretary, Bihár Indigo-planters Association.
3. This office letter No. 1789, dated 14th September 1883, to Bábú Bunmali Sahai.
4. Letter dated 5th September 1883, from Secretary, Bihár Indigo-planters Association, with enclosures.
5. Reply to Bábú Bunmali Sahai, dated 27th September 1883, copy of which has been sent to the Secretary with this office memorandum No. 1914, dated 2nd October 1883.
6. Letter dated 27th September 1883, from Secretary, Bihár Indigo-planters Association.
7. This office letter No. 2047, dated 29th October 1883, to the Secretary, Bihár Indigo-planters Association.
8. Letter dated 31st October 1883, from the Manager of Arwah factory.
9. Copy of letter dated 17th November 1883 from Secretary, Bihár Indigo-planters Association, is not sent herewith, as a copy of the same has been sent by him directly to the Commissioner.

2. The raiyats are still dissatisfied as might naturally be expected, as they have not got back the lands claimed by them.

3. The facts are simple enough. The manager of Arroah factory obtained leases of two shares in the village, and on the strength of these leases he induced the raiyats to make over, for the cultivation of indigo, portions of their holdings, which he has since treated as factory ziráts. For these lands no compensation was paid, but the rent was simply reduced in proportion to the area surrendered. On the expiration of the lease, one of the shareholders in the village renewed the lease to the factory, but the other declined to do so. In the meantime the factory have held on the whole of the so-called ziráts, with the exception of some fields of which the raiyats have forcibly recovered possession.

4. Bábú Bunmali Sahai, the proprietor, who refused to renew the lease to the factory, showed very little regard for the interests of his raiyats, and gave a lease of his share to some tenureholders of the village, with the object of recovering for his benefit a share of the factory ziráts proportionate to his interest in the village; and he had evidently no intention of restoring the lands to the original holders, but on the receipt of a strong appeal from me he expressed his willingness, in his letter of the 27th September, to let the Secretary to the Indigo-planters Association settle the disputed lands (meaning the ziráts) with the raiyats out of whose holdings they had been taken.

5. Mr. Hudson's letter of the 17th instant contains a narrative of what has since taken place. The manager is willing to make a partition of the ziráts and to relinquish a share proportionate to the interest of the proprietor who has refused to renew his lease. As regards the remaining share, however, he point blank refuses to restore the lands to the raiyats until the expiration of his second lease. He agrees, however, to enter their names in the rent-roll in respect of these lands. Mr. Hudson also states that he promised the raiyats to endeavour to fix compensation for the use of the land, and it may, I suppose, be inferred that the manager was willing to pay such compensation.

6. The raiyats on their part object to any partition of the zirát lands, or to one portion of them being treated differently from the other. Their case is that the whole of the ziráts belong to their holdings, and that the whole should be restored to them—a proceeding to which the proprietor who has not renewed the lease to the factory has consented.

7. The Secretary to the Association declares his inability to enforce the immediate restoration of the land to the raiyats, and there the matter stands at present.

8. I must, under these circumstances, ask for instructions as to what course should be adopted. The raiyats appeal to me, and it is necessary to give them some answer. In my opinion, the whole of the lands should be made over to them, but I cannot take them out of the manager's possession without his consent.

9. I now come to the general question of which Mr. Hudson speaks. The question of ziráts in Sáran, as I have frequently stated, is really a question between the planter and the raiyats, and not one between the planter and zamíndár, as might at first sight appear to be the case. Occasionally, as in the present instance, the matter is somewhat complicated owing to differences between the planter and some of the shereholders among the proprietors, but this does not affect the main issue which has to be decided.

10. The main facts of all the cases which have come before me are much the same. A planter obtains a lease of a village, and on the strength of this lease acquires land for the cultivation of indigo by taking it out of the raiyats' holdings. When the lease expires the raiyats come to me and ask to have their lands restored to them. The manager, having renewed the lease with the proprietor, refuses to restore the lands, and the Association at present are not prepared to compel him to do so.

11. The question is—what action the Collector should take in such cases. When the raiyats admit that the planter has held possession during the previous lease and is still in possession, should he refuse to interfere, or under what circumstances should he interfere? Hitherto I have interfered in this way. I have first enquired as to the facts from the planter concerned, and have then referred the matter to the Association. In the case of the Marhora raiyats the Association ordered the planter to restore the lands, and this was ultimately done but in subsequent cases I have failed to obtain restitution of the lands.

12. Mr. Hudson informs me that in the Marhora case the Association ordered the, restoration of the lands on the ground that the manager admitted that, when he got them, he promised to restore them on the expiration of the lease, and in subsequent cases no such promise has been alleged. It may then be taken that when a manager gets lands from the raiyats during a lease from the proprietor, and refuses to give them up on renewal of the lease, the Association will not, in the absence of some express directions from Government, compel restoration, unless the planter has engaged to restore them on the expiration of the lease.

13. What is now wanted are some instructions from Government. I, as Collector, will of course carry out such instructions as I may receive, and I am confident that the Association will also be ready to give a very respectful hearing to the views of Government as to the course which should be adopted by them.

14. As regards a period of limitation there is this to be said. The raiyats' case is that they do not wish to break the agreement under which they have given up land, but that the lands are given, and from the nature of the case can only be given, for the period of the lease. and when the lease expires the agreement ceases; so that, if the planter wishes to hold on the land, he must do so under a fresh agreement. It is not a question of disputing old titles, They do not complain of the planters' former act in taking the land, but they complain of his present act in holding land on the strength of an agreement which has expired From this point of view the question of limitation does not seem to arise at all.

15. It is argued, however, that, when from whatever cause the raiyat has been for a long period out of possession of land, he loses his claim to it. In many cases the raiyat who gave the land dies, and his place is taken by a raiyat who never possessed it; and when the planter finally gives up the lease in such cases, the probability is that the land is separately assessed to a high rate of rent by the zamíndár, so that the raiyat derives no benefit. It is also difficult, after the lapse of many years, to ascertain to what holding each plot belongs, so that the work of restitution is often impracticable. I think that there is much in these arguments, and I have all along been in favour of fixing some period of limitation, as I stated in my last annual report.

16. In all the cases that have come before me, the period for which the land has been held without objection has been during one lease of seven years, and in each case the raiyats have applied for restitution of the land on the first renewal of the lease, so that in none of these cases can it be said that the factory has been in possession for a long course of years. In each case also the raiyats have declared their ability to point out the lands belonging to the several holdings. If the Association are to interfere at all, I must confess that I think they should interfere in such cases.

17. I would on the whole be disposed to fix the period at 12 years or two consecutive leases, and would say that, when the planter has held for 12 years without objection, it should be left to the raiyat to prove by a suit in Court that his interest, if he ever had any, has not lapsed; and in cases in which the planter has held for two consecutive leases without objection, even if the aggregate period should not amount to 12 years, I would infer that the raiyat had agreed that the planter should keep the land so long as he held or renewed the lease. I may add that the late Lieutenant-Governor, when visiting Chapra in 1881, was in favour of fixing some period of limitation in dealing with raiyats' claims to factory-lands.

18. I shall be glad to have the instructions of Government in this matter as soon as possible, as there are several cases in which the same question is involved, and I would request the favour of your forwarding this letter in its entirety to Government, as my statement of a matter in which I feel that my own reputation is concerned.

19. I regret to learn that you consider that I have exercised too much interference in, this respect in recent cases; and, in order that I may have an opportunity of justifying myself I request that you will be so good as to inform me of the cases to which you refer. I have endeavoured to follow one uniform course of procedure in all such cases since I have come to the district, and thought that I had succeeded in doing so, and also that the line which I adopted met with your approval. The task which I have undertaken is not a light or agreeable one, and I have no wish to act otherwise than in accordance with the instructions which I may receive. All that I desire is that the question may be fully understood, and that definite instructions may be laid down for future guidance.

20. I need hardly add that what I have written refers to only one branch of the indigo-question. As regards the new arrangements under which indigo is grown for most factories, an immense improvement on the old system has no doubt taken place, but none the less is it necessary to lay down some rule regarding lands acquired under the old system.

Dated 17th November, 1883.

From—General Secretary, Bihár Indigo-planters Association,

To—Magistrate and Collector, Sáran.

I have the honour to acknowledge your letter No. 2047, dated the 29th October 1883. In accordance with my promise I went to Dhanour village on the 15th instant. I saw the raiyats and the lands in dispute. I explained to them that I had come at your request to endeavour to settle the matter amicably, by giving them, with Mr. McGregor's consent possession of the lands they were entitled to.

My first difficulty was to ascertain the amount that had been taken up in indigo in 1283 Faslí, or eight years ago, by the factory by virtue of their thíka lease of the patti. I found the amount was 64 bíghás: that in 1288 Faslí the lease of Bunmali Sahai's two-thirds share of the patti expired. The raiyats thereon took forcible possession of about 9 bíghás of this land. Then remained 55 bíghás. Bunmali Sahai gave a letter authorizing the factory to continue to hold these lands for the current season, and took his share of the rents, and promised to renew his lease to the factory the following year. He did not do so, and again the raiyats took forcible possession of 25 bíghás more of this land.

Now, the proportion of this zirát land which, by the Association rule, the factory should give up on the expiry of Bunmali Sahai's share is 42 bíghás 13 katas, leaving 21 bíghás 7 katas, the balance in the ratio of the other one-third share, the lease of which runs for some years. This portion Mr. McGregor considered he had a right to retain until the lease expires.

After many enquiries and explanations and much discussion I offered to divide off the balance of the lands of which the raiyats had not already taken possession, and make them over to them; but their spokesmen declined this, and demanded that I should hand *all* the hands over to them "as I was ordered by the Collector." I then explained that I could only settle this matter as I was permitted by the Planters' Association and with the permission of Mr. McGregor; that I would engage for him that they would receive an agreement from Mr. McGregor that at the expiry of his current lease the 21 bíghás 7 katas would be handed over to them, and in the meantime he entered their names in the village jamabandí and an attested copy given them each year, and that I would endeavour to fix a compensation for the use of them that would satisfy both parties; but they would listen to nothing. "They must have all the lands or none" they said, and one man became impertinent, and so I left the place.

I have been engaged now for over five years as Secretary of the Association in endeavouring to have these kinds of disputes settled amicably and fairly, and this is the first occasion in which, after having brought the parties face to face, I have failed.

On the one hand, the planter considers I am exceeding the bounds of reasonable expectation in asking him to give up possession of lands which he has occupied and cultivated eight years of his thíkadárí lease. On the other, the raiyats expect me, at your request as they consider, to put them in re-possession of lands which they gave up, or at least lost possession of, eight years ago, and for which from that time they have ceased to pay rent.

I entirely sympathise with the raiyat, but I cannot do impossibilities. I cannot give him possession of lands straight off which no Civil Court would. I can only offer a compromise that both parties may be persuaded to accept.

The men affected in this case are not wretched low caste raiyats, but apparently nearly all Brahmans. They are quite Tite Montie, and will accept no compromise.

I am willing to do my utmost to ensure that they eventually get all their lands back again, and offer them immediate possession of the portions in the ratio of the expired thíkadárí lease. Further than this I cannot go until it is authoritatively decided what action the Association is expected to take in these retrospective cases.

Dated 22nd November, 1883.

Memorandum by Commissioner, Patna Division.

I have received a copy of Mr. Hudson's letter to the Magistrate and Collector, Sáran, dated 17th November, 1883, acknowledging the letter No. 2047, dated 29th October 1883.

The subject relates to the matter of Dhanour village, about which there has been some correspondence already between the Collector of Sáran and myself. It is not necessary for me here to enter into the details of that correspondence, further than to record that the investigation on the subject has elicited the fact that, though nominally the raiyats who were the original petitioners in the case are apparently urging their rights to the restoration of the lands in question to themselves by the indigo-factory, the actual proprietor has, as a matter of fact, actually re-settled those lands in thíka to others than the petitioners before us, and moreover, that, so far as I gather from the papers I have seen, that proprietor has absolutely entered into such a negotiation with the new thíkadár that eventually these lands, when relinquished by the factory, shall be absorbed in his own zirát, or be otherwise disposed of to his own advantage, totally to the ignoring of the alleged rights or claims of the present petitioners, now so persistently pressed. At my instance the Collector called on the proprietor (who holds an appointment as sharishtádár in the Court of the Sub-Judge at Muzaffarpur) for an explanation, and, so far as I remember, that explanation was altogether unsatisfactory and beside the point. Since then I have not received any further communication from the Collector.

It would seem now that this letter from Mr. Hudson is in reply to one from the Collector pressing a speedy settlement of the matter of the petitioners' claims as raiyats of the lands in question. From Mr. Hudson's letter I gather that his endeavours to settle the matter amicably, by giving to these raiyats possession of the lands, or the area of lands they were entitled to, in proportion to the share held by the proprietor I have mentioned above, have failed: this because the raiyats would not agree to take only a proportion, but demanded the whole or none.

So far as this individual case is concerned, I consider that the interference of the Magistrate and Collector cannot with consistency be further applied, and, unless the Collector can show me very strong reasons for exercising further interference upon the facts which have been elicited, I am decidedly of opinion that the petitioners should be referred to the legitimate Courts for such redress as they may conceive themselves entitled to for possession of the land to which they lay claim. They solicited our interference for arbitration, and such arbitration could, under the circumstances, follow only the lines which Mr. Hudson proposed; since they reject these, they should most certainly be left to their own course, so far as that course does not involve any forcible assumption of possession of lands in the cultivation of the factory to which the petitioners can only raise a presumptive claim now, after many years of actual possession by the factory. This point the Magistrate, in his position as such, can very easily deal with. There is one other point in this special case on which I wish to remark. The original question which initiated the dispute was the refusal of Bunmali Sahai, the part proprietor, to renew the lease for his share of the property, and the particular lands concerned are spoken of as "zirát lands." These lands being such, it would be a natural conclusion that the dispute, as a matter of fact, should be between the factory as *de facto* and *de jure* part proprietor on the one side (by virtue of the renewed lease), and Bunmali Sahai as part proprietor on the other, and that the question of the apportionment of these lands ought to lie conclusively between these two parties, that is to say, the apportionment being non-necessitated by the fact of Bunmali Sahai having formerly leased his whole proprietary right to the factory, and now having declined to renew the lease, the question of distribution of such lands, at this distance of time, from the original arrangements, is one which it is impossible for the Collector to interfere in, in one way or another, as regards claims of previous cultivators to individual plots. I do not see how interference could be exercised without the Collector entering upon a regular re-settlement of the lands—an operation altogether out of the sphere of his executive jurisdiction and totally beyond his legal authority. Neither do I think that the Planters Association can be consistently pressed by us to engage through their Secretary upon such a re-settlement in detail in cases of this nature, where the question of the factory possession is one extending over a number of years. This brings me to what Mr. Hudson in his letter speaks of as the general question which he wishes to have authoritatively settled, namely, is the Association expected to enter into cases where raiyats complain that a planter is retaining lands which they at a former period held as part of their *jotes*, and of which he has since held *cultivating possession* for a period of years by the renewal of his thíkadárí lease?

I am very decidedly of opinion that we cause much more harm than good, both to the one side and the other, by executive interference in endeavouring to secure the raiyats the resumption of possession of lands by an arbitrary and, so to speak, not legitimate action, which have gone out of their possession many years ago, either by their own formal consent, or by tacit compliance with the general usage of the time, it matters not.

We raise hopes and false expectations in the raiyats concerned, who, either of their own action, or by the advice of others acting for their own totally separate self-interest, come forward with these claims, such as in the instance now under review.

It is because I think that in Sáran somewhat too much interference in this respect is exercised—and has been exercised in more recent cases—that I wish to record my opinion here as I have done above. I myself consider that executive interference in these matters can be applied with satisfactory effect only in those instances where the raiyat can show by clear proof, or where there is no moral question of his having held *certain definite* land in his cultivation, and having relinquished it to a factory conditionally for indigo-cultivation for the period of a thíkadárí lease, or other period; this as a matter of fact under past circumstances, can only be determined in the more recent instances of such reliquishment of land; and I would, therefore, as a general principle, adopt, say, a period of five years back in determining whether executive interference should be applied, either directly or through the Planters Association. Of course, I do not mean to say that in no other instance should the Collector endeavour to bring about a settlement, notwithstanding that the evidence of the raiyats' holdings may be clear and definite, because the original relinquishment was at a period further than five years back.

As regards new transactions, I would enforce most positively to the full the resolution of the Association that no lands should be taken for indigo without the written consent of the raiyat, containing definite conditions for period of termination of the transaction. This I am aware the Secretary of the Association is doing his utmost to enforce, and he will receive full support from the executive.

---

dated 14th November, 1882.

Petition of certain Raiyats of Mauzá Dhanour, Pargana Gowa, Sáran District.

To His Honour the Lieutenant-Governor of Bengal.

The humble petition of Soondermun Missir, Jeetram Upadheya, Phagoo Missir, Chuttoo Missir, Ramdeni Missir, Harichurn Missir, Bahadur Missir, Gokhool Missir, Tupsi Missir, Doorga Missir, and others, raiyats of mauzá Dhanour, pargana Gowa, in Sáran, most respectfully lay before your Honour the oppressions of the manager of Dhanguha Indigo-factory.

1. MAY IT PLEASE YOUR HONOUR—That your Honour's petitioners are raiyats of mauzá Dhanour, pargana Gowa, which was given in lease to the said factory by Bábú Bunmali Sahai, proprietor, in 1283F., for a term of six years, and by Lalla Surbjit Lall for a term of seven years only. That your Honour's humble petitioners gave some of their lands in factory for indigo-cultivation for six years.

2. That the term of the lease executed by Bábú Bunmali Sahai expired in the last year, but as the term of the lease executed by the said Surbjit Lall was remaining for one year more, the said manager desired your Honour's petitioners to allow him the indigo-cultivation till the remaining one year's term may expire, and which was consented by your Honour's humble petitioners, and the said manager promised to give up possession of the lands in question after cutting the *khooti* without any objection.

3. That this year, when the manager cut the *khooti* and the lands became empty, he attempted to retain possession as he did before, but your Honour's humble petitioners did not agree, and cultivated their respective lands.

4. That when Bábú Bunmali Sahai, a larger shareholder of the said mauzá, refused to lease again his share to the said factory, then the manager most cunningly has taken fresh lease from the said Lalla Surbjit Lall, who has small share in the village, and on that strength he began to institute criminal cases against your Honour's petitioners.

5. That your Honour's petitioners have cultivated and sown some of their lands, and at the time of sowing the remaining fields resistance was offered by the factory, and its servants drove away two bullocks which your Honour's poor petitioners have not found as yet. That Phagoo Missir, one of your Honour's petitioners, was assaulted by the factory servants, a case of which is still pending here in the Criminal Court.

6. That your Worship's petitioners are very poor men, and have no means to engage pleaders and mukhtárs to protect them against the factory ligitations.

7. That the object of the manager is that, when the raiyats will become harassed by continued litigations, and would be reduced to poverty, they will then be obliged to give up their lands to the factory. Under such circumstances, your Honour's petitioners see no hope of getting out of this difficulty, unless your Honour is pleased to order the factory-manager to give up possession of your Honour's petitioners' lands, as your Honour did with Marhora factory raiyats' case last year.

And, as in duty bound, your Honour's petitioners shall ever pray.

No. 1986, dated 8th August, 1884.

From—Officiating Registrar, High Court, Calcutta,

To—Secretary to Government of India, Legislative Department.

I am directed to acknowledge the receipt of your letter No. 785, dated the 5th May, in which the attention of the Court is invited to the Report of the Select Committee on the Bengal Tenancy Bill, and the advice of the Judges is asked on certain matters connected with the proposed measure.

2. The Court has carefully considered the three points indicated in your letter as those upon which their assistance is specially desired. The Select Committee wish, in the first place, to learn what modifications it may be desirable to make, whether by rules or otherwise, in the Code of Civil Procedure with a view to expedite the trial of rent-suits, and in particular whether it is desirable that landlord should be empowered to institute, by means of a single plaint, suits for arrears against a number of raiyats holding independently of each other. It is proposed, in section 163 of the draft Bill, to exclude rent-suits from the operation of sections 121 to 127, 129, 305 and 320 to 325C of the Code of Civil Procedure. This proposal is free from objection, but the Judges fear that no modifications other than those indicated in this section can be made in the ordinary law applicable to civil suits without opening the door to evils which would outweigh the advantages to be derived from increased expedition. The suggestion made in the Report of the Select Committee, that suits for arrears of rent should be allowed to be brought by means of a single plaint against a number of raiyats holding independently of each other, would, the Judges believe, be impracticable and lead to delays worse in all probability than those now experienced. The defences set up in a number of suits might be so various that any provision of this nature would very frequently lead only to confusion. The proposal seems to have originated in paragraph 5 of the letter noted in the margin, from the Government of the North-Western Provinces and Oudh, to the Government of India. It is there stated that "in the bulk of rent-cases there is no dispute as to the correctness of the claim. It is generally certified by the village patwárí and not contested by the tenant, and all that the landowner wishes is assistance to realize his claim, by putting in action the machinery which will compel the tenant to pay the sum due, without which the landholder cannot pay the Government demand." To meet this state of things Sir George Couper suggested the remedy now under consideration. How far the proposal would in the North-Western Provinces meet the difficulty felt the Judges are unable to say, but they are convinced that in Bengal, where patwárí papers are not available, it would fail in its object. The Judges have carefully considered the question whether, leaving the law unaltered, any changes could be made in the executive orders issued to subordinate Judicial Officers with a view to expedite the decision of rent-suits. The orders at present in force seem to provide almost all that is necessary to secure the postponement of all other suits to rent-suits, and the prompt decision of all rent-suits which are not contested. The Court proposes, however, to direct that in future undefended rent suits shall have priority over short suits, though both shall, as far as possible, be taken up on the date fixed. It is probable that for their own sakes the majority of Munsifs at present adopt this procedure, but it will now be rendered imperative for them to do so. The rules direct that every summons in any suit for arrears of rent (other than a suit for enhancement) shall command the defendant to appear at the expiration of fourteen clear days after the service thereof. The Judges have considered the possibility of compelling the defendant's appearance within a shorter period, but, looking to the difficulties of communication in many parts of the country, they are of opinion that no change in this direction would be expedient.

No. 5A, dated the 30th January, 1882.

Vide page 222 of the Court's Civil Rules and Circular Orders.

3. It would, the Judges believe, be extremely dangerous to enact any such provision as that proposed in clause (*b*) of paragraph 2, to restrict the right to claim a re-trial where a decree has been given *ex parte*, and on this point they agree entirely with the Select Committee. It is true, as has been represented to the Committee, that landlords are frequently involved in unnecessary expense and delay by the tactics of their raiyats, who deny service of summons, but it seems absolutely essential, in order to prevent fraud by dishonest agents of landlords in collusion with the process-servers, that raiyats against whom decrees are passed *ex parte* should have an opportunity of applying for a re-hearing.

4. The third suggestion, which like that discussed in the last paragraph, was made to the Select Committee by the Hon'ble the late Rai Kristodás Pál Bahadur, is that a defendant in a suit for arrears should not be allowed to appeal from a decree passed against him except on depositing the amount of the decree. This proposal, which might no doubt serve to obviate some of the inconvenience, expense and delay now caused to zamíndárs by recalcitrant raiyats, would, however, it is believed, in many cases involve the defendants in very serious hardship, and the Court is not therefore disposed to recommend its adoption. It may be observed further that it is always open to a zamíndár to execute his decree notwithstanding that it is under appeal, in which case, if execution is stayed, the law provides that security shall be given for the due performance of the order that may ultimately be passed.

5. The Judges are fully sensible of the necessity for affording assistance to the landlords in the speedy and cheap recovery of the rents due to them, and are aware that at present much real cause for complaint exists. It would, therefore, have been a matter for satisfaction to them had they been able to accept any of the suggestions put forward for the simplification of procedure and the removal of the means now too often employed by raiyats to harass their zamíndárs. It is, however, scarcely possible legally to facilitate the recovery of rents without putting into the hands of unscrupulous landlords or their subordinates weapons which may be easily used for the oppression of their tenants.

6. The solution of the difficulty must, the Judges believe, be sought in a direction different from that suggested. The evils of which the landlords chiefly complain are the expense and delay involved in suits against their raiyats. The true remedy for these is to be found in executive rather than in legislative action. The main expense to which a landlord seeking to recover his rents by means of the Civil Courts is put is the necessity for paying the heavy institution-fees levied. Before the transfer of rent-suits from the Revenue-officers to the Civil Courts effected by Act VIII (B.C.) of 1869, the fees levied in these suits were only one-fourth of those payable in ordinary suits in the Civil Courts. When the jurisdiction was altered, it was considered anomalous that relief should be given more cheaply in the same Courts in one class of suits than in another, and the fees in rent-suits were increased four-fold. A reduction in the fees to their original standard would afford a very appreciable relief to landlords, and, though some loss would be incurred by the Government, the revenue derived from court-fees so largely exceeds the expenditure on Civil Courts and establishments that it might be possible to give up some portion of the surplus for the benefit of suitors. Some relief might also be given by holding out to raiyats inducements to compromise their suits or not to defend them, similar to those provided in small causes in the Presidency-towns by Act XV of 1882, section 73.

7. One of the principal causes of the delay in the proceedings is to be found in the frequent adjournments, which are rendered unavoidable by the heavy pressure of work upon the subordinate Judicial Officers. In many places, where more than one Munsif is stationed, an officer has, in accordance with a suggestion made by Sir Ashley Eden, been specially set apart for the hearing of rent-suits, and the evil has thus to some extent been diminished. Where, however, this is the case the work devolving on the rent-suit Munsif is not unfrequently more than he can perform with punctuality and despatch, and in many places where there is only one Munsif the most strenuous exertions on the part of that officer fail to prevent the accumulation of arrears. In view of these facts it seems to the Judges that an increase in the judicial staff and their establishments in these provinces can alone prevent the delay now too often experienced. The sanction of the Local Government has on several occasions recently been obtained to the appointment of extra Munsifs to deal with accumulations of arrears, and the Court has now under consideration a suggestion which has been made to enable it to meet sudden emergencies with greater promptitude than is at present possible.

8. Regarding the general provisions of the Bill, apart from its purely judicial aspect, the Court does not propose as a body to address the Government. Some of the Judges, however, will probably hereafter submit minutes embodying their individual opinions.

Extract from The Bengalee *of 30th August, 1884.*

A Tale of Rackrenting.

It is impossible to deny that, at the present moment, the relations between landlords and tenants are not of the happiest order. In Maimansingh, in the Midnapur district, and in other places, the most unhappy differences mark those relations which should be characterized by mutual esteem and confidence. It would be absurd to hold that the zamíndárs are immaculate or that the raiyats are free from all blame. The fault must be shared between the two parties in common. We have no sympathy with Maimansingh raiyats who would withhold lawful rent from their zamíndárs. The zamíndárs have come into possession of property. In many cases they have paid money for it, and surely they expect the just return of capital. But while we cannot sympathize with those who would seek to deprive the zamíndár of his lawful profits, our feeling is of the deepest indignation against the zamíndár who, taking advantage of the helplessness of the raiyat, does not scruple to rackrent him to such an extent that life becomes a burden to him. It is true that in some districts the raiyat has obtained an advantage over the zamíndár. But it is much more true that in most districts the raiyat is a poor, helpless, ignorant man, who is incapable of protecting his rights, and who oftentimes is the victim of nameless sufferings. We have before us the facts of a case, upon high judicial authority, which will indicate to the reader the amount of rackrenting that sometimes takes place in the remote mufassal. We take the facts from the judgment of the

Munsif of Midnapur. Here is a table which shows the old rates and the enhanced rates claimed by the zamíndár:—

Number of the suit.	Old rates of rent as admitted by Defendants.	Enhanced rates as claimed by Plaintiffs.
	R a. p.	R a. p.
No. 2716	5 11 0	11 2 2
„ 2718	0 6 0	3 14 6⅓
„ 2719	1 1 0	4 15 15⅓
„ 2720	2 2 10	5 6 16⅓
„ 2726	1 13 0	5 12 10¾
„ 2727	1 6 0	2 4 1
„ 2728	0 5 15	1 3 1⅓
„ 2732	7 7 0	8 8 14⅓
„ 2735	10 8 0	15 3 1⅞
„ 2737	5 8 0	7 8 1¼
„ 2739	1 6 8	2 5 13⅓

We would invite the attention of the reader to the remarks of the Munsif in this connection:—

"The accompanying table will show the old and the enhanced rates. In almost all the cases the enhancement was twice, thrice and four times the old rents, and in no case is it less than 50 per cent. Let us first weigh the probabilities in the cases and ascertain whether it was probable for the raiyats to submit to these exorbitant terms.

* * * *

"Was it then probable for these poor raiyats to submit to these exorbitant rates, twice and thrice their old rates, when the prospects of their crops were not quite certain, when their application to have this uncertainty removed met with no sympathy from their landlord, and when their sufferings were so great as to compel them to forward a petition to the Governor of the province? My answer to this question is undoubtedly in the negative. The probabilities therefore are all in favour of the defendants."

It is necessary for us to add anything. We are quite sure that proceedings such as those to which we have called attention will be looked upon as unworthy and iniquitous by all right-minded zamíndárs, who, we are persuaded, are only too anxious to see harmony and good-will established between them and their raiyats. The facts, however, also point to the necessity of providing a law to protect the helpless raiyats, who, in too many cases, are not able to help themselves. The justification of the Rent Bill therefore seems to be complete.

No. 2566, dated Calcutta, the 13th September, 1884.

From—C. S. Bayley, Esq., Offg. Registrar of the High Court of Judicature at Fort William in Bengal,

To—The Secretary to the Government of India, Home Department.

High Court,
English Department,
Civil.

Present:
The Hon'ble Sir R. Garth, Kt., Chief Justice.

In continuation of my letter No. 1986, dated the 8th August 1884, I am directed to forward, for the consideration of His Excellency the Governor General in Council, the enclosed copy of a minute recorded by the Hon'ble the Chief Justice, on the subject of the Bengal Tenancy Bill.

THE BENGAL TENANCY BILL, 1884.

If I were to consult my own wishes, without regard to what I consider to be my duty to the public, I should decline to offer any further advice to the Government with reference to the Bengal Rent Bill.

But the measure appears to me to be one of such vital importance to the agricultural community, which forms the mass of the population of this Province, that I feel, in justice to them, that I ought to say what I think about it.

It is a great satisfaction to me, that my good friend Mr. Justice Field, who has made the land laws in this and other countries his peculiar study, and who is probably as well acquainted with the Bengal Rent Law as any living man, has addressed the Government so fully upon the subject.

I could wish that every Judge of the Court had done the same. The Civilian Judges, especially, who have had a large experience in the Mofussil, besides that which they have gained in the High Court, might, I believe, have given the Government the most valuable assistance; and my learned colleague, Mr. Justice Mitter, who is also a thorough master of the subject, would, I am sure, have done good service to his countrymen by affording to the Government the benefit of his knowledge and experience.

But we can hardly be surprised, in the present state of things, that any Judge of the High Court should hesitate to advise the Legislature upon this or any other subject, when his advice is likely to be opposed to the wishes of the Government.

There was a time, when the opinions of High Court Judges, however adverse they might be to those of the Government, were invariably treated with respect. I am sorry to say this is not so now.

I feel this so painfully, and I consider that the interests of the public are likely to be so seriously affected by it, that I cannot help taking this opportunity of saying a few words upon the subject, more especially as it is in some sort connected with the Bill which I am about to discuss.

Since His Excellency the present Viceroy arrived in this country, there have been two principal measures, which have excited a more than usual amount of public interest and attention. One of these is the Rent Law, now under consideration, and the other what is generally known as the "Ilbert Bill."

Upon both these measures, the Judges of the High Court have been consulted by the Government.

They were first consulted upon the Rent Bill in March 1881, when it was in the form usually known as "Mr. Reynolds' Bill." They were again consulted upon it in March 1883, when it had been amended under the orders of the Secretary of State. And they have now been consulted upon it for the third time, in the shape that it has assumed under the hands of the Select Committee.

I suppose that there hardly ever was a measure, which has undergone from time to time more numerous and important changes, than this Bill. I had twice nearly completed what I wished to say upon it in 1882, when in consequence of these changes, I was obliged to commence my labours afresh.

At length, however, I completed a minute, and submitted it officially to the Government of India as well as the Government of Bengal in October of that year. I was of opinion, and did my best to explain, that the Bill was in great measure unwise and uncalled for; that its effect would be to deprive the zemindars of the rights and position which they had acquired under the Permanent Settlement; that it would be productive in many ways of injustice and litigation, and above all, that it would do more harm than good to the class of persons whom it was especially designed to benefit, namely, the cultivating ryots.

Whether I was right or wrong in this view of the matter, is a question which still remains to be solved. Suffice it for my present purpose to say, that I gave the Government the best advice I could. I had studied the subject with a great deal of care and attention; and although I was quite aware that my views were opposed to those of Government, they were at least, I need hardly say, thoroughly honest and disinterested.

No sooner, however, was this Minute published, than a most bitter and scurrilous libel, in connection with it, was circulated by one of the Secretaries to the Government of India, who had been an active member of the Rent Commission, and who had advocated some of the views which the Bill was intended to carry out.

This libel will, of course, be in His Excellency's recollection. It was commented upon very freely in the public papers, and, so far as I can judge from those comments, (for I never read the libel itself), it consisted for the most part of a succession of personal attacks upon myself, imputing to me not only gross

ignorance and incapacity, but even a want of good faith in the advice which I had given to the Government.

Now, if this were a matter which merely concerned myself, I should not have thought it worthy of remark. I took no notice of it at the time; I was by no means desirous of inflicting upon the author a heavier penalty than he had brought upon himself; and I was still less desirous of placing Lord Ripon in a difficulty, which I believe I should have done, if I had called his attention publicly to the subject.

But the matter is not one which merely concerns myself. Its real importance and significance, especially having regard to what has since occurred, seems to me to consist, not in the libel itself, but in the fact that the Government allowed it to be published, under these circumstances, without the slightest sign of disapproval.

I was asked to advise the Government upon a legislative measure. I advised them to the best of my ability. My advice was strongly opposed to the Government policy; and forthwith this libel was printed, at the Government Press, by one of the Government Secretaries, and although marked "private" was circulated freely amongst some of the highest officials, without any rebuke or apparent disapprobation on the part of the Government.

Let us now see what happened on the occasion of the Ilbert Bill.

The Judges were asked in the month of May of last year to give the Government their views upon that Bill. And they accordingly did their best to explain them in a letter, dated the 23rd May 1883, which contained the unanimous opinion of the European members of the Court.

If this document had no other merit, it was at least a faithful exposition of what we believed to be the truth.

Our advice was asked as *Judges of the High Court;* and we gave it *in that capacity, and in no other:* and yet so little respect is shown to us or our opinion, that Lord Hartington, the late Secretary of State for India, well knowing that our advice had been asked by the Indian Government, denounced our minute publicly in the House of Commons, "*as not being invested with any judicial authority, but rather as the offspring of partisanship.*"

Now it is perfectly true, that at the time when Lord Hartington used these words, he had ceased to fill the office of Secretary of State for India. But it is equally true, that the Ilbert Bill had been brought forward under his auspices, at a time when he did fill that office, and that it was in defending his own policy and that of the Government of India, that he thought fit to insult the Judges in these terms.

Here, again, the Government of India, when their attention is called to the subject, receive our remonstrance in silence; and, for aught that we know to the contrary, are perfectly content that we should be thus insulted.

This is the treatment to which Judges of the High Court are now subjected, when the views which they think it right to express are opposed to the Government policy.

When our views are in accord with the Government policy, the treatment we receive is very different. I have myself, before now, been fortunate enough to approve of Government measures; and my advice has then been not only received with gratitude, but referred to in the Council Chamber with the utmost respect.

Now I cannot help thinking, that in the interests of the public (entirely without regard to what may be the feelings of the Judges), this mode of dealing with the advice of the High Court upon matters of deep concern to the State is open to grave objection.

I believe there is no country in the world, in which the Government, and especially the Legislative branch of it, is more dependent upon its officers, both executive and judicial, for information and advice, than it is in British India.

In measures which involve any material changes of the substantive law, I believe it would be difficult, if not impossible, for the Legislature to proceed safely, without first consulting the High Courts. As a matter of fact, those Courts always are consulted upon measures of that kind. And I do most respectfully submit to His Excellency, that it does not tend to encourage honest advice, or indeed any advice at all, from the Judges, nor to improve the confidential relations which ought to exist between the High Courts and the Government, if when their views are opposed to the Government policy, they are to be treated with open disrespect.

There has always, since I have been in Calcutta, been some difference of opinion amongst the members of the Court, as to how far it is the duty of the Judges to advise the Government upon Legislative measures. Whether it is our duty or not, I have always myself endeavoured to give them the best advice I could; and so long as His Excellency is pleased to ask my advice, I shall continue, so far as my time and other duties allow me, to give it.

But I cannot help thinking, that it would be better for the Government not to consult us at all, unless they really desire to have our honest advice; and I think, moreover, that it is hardly fair to consult us, if our advice is to be received with favour or disfavour, as it may be more or less in accord with the Government policy.

Introductory.

I now proceed to discuss the subject of the present Rent Bill; and I must preface my remarks by saying, that in the main the opinions which I expressed in my former Minute of 1882 remain unchanged.

In some few respects I think the Bill has been improved; but on the whole I regret to say, I consider that the alterations which have been made are not for the better.

There are two very remarkable features about the Bill, both of which have been observed upon, and as it seems to me, with truth, in the protest of the late lamented member of the Select Committee, the Hon'ble Kristo Dás Pál.

One is, that notwithstanding the many differences of opinion, which arose in the course of the controversy, upon what were obviously questions of fact, no witnesses were examined before the Select Committee, except a few zamíndárs, upon the subject of sub-letting.

It is true that the rules by which the Select Committee were governed did not admit of the examination of witnesses. But why should that be the rule? This is just one of those cases which shows how necessary it is, in order to obtain proper materials for the purpose of legislation in India, to appoint Select Committees with power to take evidence as is constantly done in the House of Commons.

When a measure, which involves disputed questions of fact, comes before the House of Commons, it is constantly referred to a Select Committee; and the very best evidence that can be procured is examined before that Committee upon both sides of the question. It is surely only just that a tribunal of that kind should be constituted here. A Committee composed of an equal number of gentlemen on either side of the question, with a chairman selected for his moderation and fairness, would, I believe, give more satisfaction and confidence to the public, than any number of Select Committees, such as that which was constituted in this instance.

The large majority of that Committee were entirely in favor of the main principles involved in the Bill; and it was hardly likeby that the great body of agriculturists, who were so deeply interested in the matter, who had held crowded meetings all over the country, and sent up to the Government the most earnest memorials, should have been satisfied with a discussion, where the native gentlemen who represented their views were completely overborne by numbers.

I heartily wish, in common, I believe, with thousands of others, that Committees such as I have suggested were appointed in this country.

The other remarkable feature about the Bill, to which also the Hon'ble

Kristo Dás Pál alluded, is that although it professes to restore the ancient and customary law of Bengal, there is hardly a single particular in which that principle is adhered to.

In paragraph 38 of the despatch from the Government of India to the Secretary of State, dated the 21st March 1883, we find two main proposals, which had been made by the Government of Bengal to the Government of India, embodying the leading principles upon which, in the opinion of Sir Ashley Eden, the new Rent Law ought to be based.

Those proposals were—

1stly, that the great body of cultivators should be restored to the position which they held under the ancient land law and custom of the country; and

2ndly, that the beneficial interest of the settled raiyats, who formed the mass of the cultivating classes of Bengal, should be determined by authoritatively establishing renewed or revised rates on a system analogous to that of the old pargana rates.

The spirit of these proposals was approved at that time by the Government of India, as well as by the Secretary of State; and although in paragraph 108 of the despatch their spirit was to some extent departed from, yet still there were two intelligible principles to work upon, which showed what Sir Ashley Eden's intentions were, and of which, if they had only been carried out fairly, the zamíndárs might have had no reason to complain.

I would now invite attention to the provisions of the present Bill; and I would ask, whether any reasonable man, looking at those provisions, can say that the principles, which I have mentioned, have been adhered to with even tolerable fairness.

It seems to me that at least three-fourths of the provisions of the Bill are entirely inconsistent with the rights, both of the cultivators and of the zamíndárs, at the time of the Permanent Settlement.

I would ask, how many of the provisions contained in chapters II, III, IV, V, VI, VII, VIII, IX, X, XII, XIII, XV, XVI, XVII, or XIX were ever known or thought of in the year 1793?

Whatever Sir Ashley Eden's original intentions may have been, it seems to me that the principles which he laid down have been virtually ignored.

It will be observed that from the category of chapters which I have above enumerated, I have omitted chapter XI. I agree that it is most desirable, although no doubt very difficult, to devise some effectual means of reviving the old pargana rates. I sincerely hope that what is proposed in this chapter will be a success. I know so little of that branch of the subject, that I will not presume to give my opinion upon it. But I fully believe, that if it only works fairly well, it will be an improvement upon the present state of things.

And now, as to the Bill itself, I regret that I have neither the time nor the knowledge to deal with it in detail, as Mr. Justice Field has done.

I propose to confine myself at present to certain salient points, which are within the range of my own knowledge and experience, and which appear to me to be specially deserving of the consideration of the Legislature.

Government not bound by the provisions of the Bill.

The first point, to which I desire to call attention, is that the Government do not appear to be bound in any way by the provisions of the Bill. The rule is, that the Crown is never bound by an Act of the Legislature, unless it is expressly named; and I find no definition or expression in this Bill, which extends its operation to the Crown.

Now why should this be? The Government are some of the largest landlords in Bengal. They hold a vast number of estates in their own hands, which they have not been able to settle with zamíndárs; and they also hold a number

of estates, which belong either to minors or lunatics, in their character of the Court of Wards.

The tenants and raiyats upon those estates are entitled, I presume, to as much consideration as the tenants and raiyats of ordinary landlords; and if it is right to protect the latter by the stringent rules and conditions which are contained in this Bill, it seems also right to protect the former in the same way.

Let us refer once again to the avowed principles upon which the Bill was originally based.

The object of it was to *restore the tenantry to the position which they occupied at the time of the Permanent Settlement.* If it is just to restore the tenantry to this position on estates held by ordinary landlords, is it not equally just to restore them to that position on estates which are in the hands of Government?

A case, or rather a batch of cases, which has lately come before the High Court on appeal, tends to illustrate, in a very remarkable way, the extraordinary powers which the Government possess over their tenants in this Province, and the severity with which those powers may be exercised.

The facts will speak for themselves.

There is a very old family of zamíndárs in the district of Midnapore, who have been the "maliks," or proprietors, of some large estates there, called the Jellamutta estates, for upwards of a century.

These estates consist of thirteen parganas; but only three of them have been permanently settled, because the terms offered by the Government for a permanent settlement of the other ten parganas were higher than the zamíndárs could prudently accept; and consequently those ten estates have been settled by the Government from time to time upon temporary settlements, either with the zamíndárs or with strangers; and sometimes they have not been settled at all, but have been taken by the Government into their own hands.

When the Government takes possession of an estate under such circumstances, or settles it for a time with strangers, it is customary to allow the zamíndárs a certain share or percentage of the profits, which is called *Malikana.*

And as each succeeding settlement comes to an end, or when, after the expiration of a settlement, the Government thinks the circumstances will warrant an increase in the rental, they are in the habit of making a fresh estimate of the rents, which each tenant or raiyat upon the estate ought to pay, and then offering to settle it, first with the zamíndárs, and then, if they so please, with other persons, at a revenue proportionate to that estimate.

The last estimate of this kind made upon the estates in question was in the year 1877. The Government had undoubtedly since 1840 carried out some expensive embankments along the coast, in order to keep out the salt-water. But these benefits were common to the district, and not confined to the estates in question.

The new estimate of the rental was, however, so largely out of proportion to the rents which had been previously paid, that it at once gave rise to the utmost consternation.

The raiyats were almost all admittedly occupancy raiyats, described as old khudkasht raiyats in the settlement of 1845.

The rents had been raised by this estimate in very many cases to 50, 100, and 150 per cent. beyond what had been paid before; and in some instances as high as 200 and even 300 per cent.

The average increase expected was about 63 per cent.; and the result was, that in one comparatively small estate the rental of about 6,000 raiyats was raised from Rs. 43,000 to Rs. 73,000.

This estimate having been made, the Government proposed to the zamíndár to take a settlement on the basis of it. But the zamíndár declined the

proposal. He was as much startled as the tenants at the severity of the enhancement: and he knew that it would be utterly out of the question for him to attempt to realise from the tenants anything like the amount.

A settlement therefore having been found impossible on these terms, the Government resolved to take the estates into their own hands, rather than reduce the assessment to any sum which the zamíndár could enforce by law.

It appears from the Administration Reports that the whole 75,000 raiyats on the estates repudiated the settlement; and that the Government in one year issued 25,000 Collectors' certificates against them, and proceeded to execution and sale. These certificates are summary proceedings taken under the Public Demands Act (Act VII of 1880, B.C.), by which a mere certificate recorded *ex-parte* by the Collector, that a sum of money is due from any person for a public demand, is capable of execution as a decree.

The only remedy for the person against whom such a certificate is made is by a regular suit in Court to recover the money from the Government by proving that it was not due. The suits of raiyats on estates held or managed by the Government are considered to be public demands within the meaning of this Act.

It now becomes necessary to explain the state of the law, which regulated at that time the enhancement of tenants' rents on estates in the hands of Government.

The earliest statute upon that subject is Regulation VII of 1822, under which the settlement officer was at liberty to enhance the rents of the tenants and raiyats upon such estates (other than those holding at fixed rates) up to any amount he thought proper, subject only to the sanction of the Board of Revenue.

This arbitrary power had been in great measure controlled by the Rent Law of 1859, under which (in the case at least of occupancy raiyats) it became necessary for the Government, as it was for other landlords, to specify and prove in each case the ground upon which the rents were sought to be enhanced; and the provisions of this Act of 1859 were afterwards continued by the Act of 1869.

This was the state of the law at the time when the rental estimate, which I have mentioned, was made upon the estates in question; and having regard to the temper of the raiyats, the Government saw very plainly, that in the teeth of that law it would be impossible for them to realise from the tenants anything like the estimated rental.

They determined, therefore, to have recourse to some legislative measure, which would remove, or tend to remove, their difficulties. And accordingly Act III of 1878 (B. C.), which was introduced in that year, in effect provided, that where, in the course of any settlement proceedings under Regulation VII of 1822, a higher rent had been recorded by the Government, as demandable from any tenant or raiyat, than had been previously paid by him, such rent should be *deemed to have been correctly enhanced, until the contrary was proved*: and there was a further provision, that any suit which might be brought by a tenant or raiyat to contest the correctness of the enhanced rent, *should be brought within four months of a notice of enhancement.*

After this Act was passed, the Board confirmed the settlement of 1877; but it was found that it would still be necessary to specify in the notices of enhancement not only the particular occupancy holding to be enhanced, but also the old rent and the reasons why Government contended that the enhanced rent was demandable in each case; and it was feared that some trouble would be caused to Government by having to go into these details, and that the enhancement could not be enforced even with the aid of Act III of 1878.

Accordingly in 1879 Act VIII of that year (B. C.) was passed, with retrospective effect upon all settlements confirmed by the Government after the passing of Act III of 1878. This Act (which was substituted for Act III of 1878) contained (in addition to throwing the onus on the raiyat) provisions enabling the Government to publish a rent-roll or jummabundi of a whole

estate with certain formalities, and provided that the amount of rent recorded against each raiyat should be payable by him, unless by a suit instituted within four months from the publication of the rent-roll he should prove that the rent had not been assessed in accordance with the Act.

This Act was made retrospective, *for the very purpose of legalising ex post facto the enhancement which had been made on the estates in question*, and throwing upon the tenants and raiyats in all cases the burthen of proving that the estimated rent recorded against them was incorrect. In fact, instead of the onus of proof being thrown upon the Government, to show that their enhancement was correct, this Act threw upon the tenants the onus of proving that it was wrong; and it obliged the tenants to bring their suits to try the correctness of the estimate within the short period of four months from the time when this notice of it was given in the village.

No doubt this short limitation and the ignorance of the great majority of the raiyats of the change which had thus suddenly been made in the law, prevented a good many of them from contesting the enhancement. But no less than 2,654 suits were nevertheless brought against the Government for that purpose.

Having brought these suits, it was necessary, of course, for the tenants to ascertain the grounds upon which their rents had been enhanced; because, the onus being upon them to prove that the enhancement was improper, it was impossible to launch their cases, without knowing upon what grounds the enhancement had been made.

But this was very difficult, because the Government had not given any particular grounds in respect of particular holdings, but had in their notice claimed to assess all the raiyats on all possible grounds, and thus imposed on them the burthen of proving the negative of each of those grounds.

The Government also attempted practically to cut down the four months allowed for suing to two, by objecting that no suit could be instituted against the Secretary of State without two months' notice under section 424 of the Civil Procedure Code; and they insisted also, that such notice should specify the grounds of the action in detail.

Many of the raiyats served their notices on the Collector, but the Collector declined in his written statement to admit or deny the receipt of those notices, and put the raiyats to strict proof of them. He was, however, compelled to produce these notices in the course of the trial.

The consequence of these overwhelming difficulties thrown in the way of the tenants was, that in a large number of suits the raiyats were literally helpless. They knew not upon what grounds their individual rents had been raised; and as the Government refused to give them any information, the Munsif who tried their cases decided that they had not proved that the enhancement was improper, and dismissed all the cases, with extra costs for having interrogated the Collector.

The Judge on appeal set aside the enhanced rents upon ponds dug by the raiyats themselves, and upon homestead lands, but declined to interfere with the rest of the enhancement.

A good many of these decisions have been appealed by the raiyats to the High Court upon points of law; and the result of the appeals is not yet known; but that result is unimportant for my present purpose.

Now here is a very remarkable history, which tells its own tale too plainly to need any comment. This same Government, which takes these large estates out of the hands of the zamíndár, in order to impose upon the raiyats this extraordinary enhancement, and which, for the purpose of enforcing that enhancement, passes two retrospective Acts, which virtually render it impossible for the raiyats to resist the imposition,—this same Government, I say, is endeavouring by this Bill, in the case of permanently-settled zamíndárs and other landlords, to restrict the enhancement of rents to 25 per cent., and to allow that enhancement only on certain specified grounds, which grounds must be strictly proved by the landlords before any enhancement can be made.

Now why should this be? The tenants and raiyats are surely entitled to the same rights, and to the same consideration, whether their landlord for the time being is the Government, or a permanently-settled zamíndár, or a temporarily-settled zamíndár. Government officers may make mistakes like other people; and they are probably not less likely to make mistakes, because they are unfettered by the control of the law.

For myself, I fail to see the slightest reason why the Government, when they are in the position of landlords, either by taking revenue-paying estates into their own possession, or managing the property of minors and insane persons in the character of the Court of Wards, should not be placed under the same wholesome restrictions with regard to the exercise of their powers, as any other landlords.

It seems to me a most fortunate thing, in the interest of justice and of the Bengal tenantry, that the facts of this Jellamatta settlement should have been brought before the public, while the Rent Law is under discussion.

I am one of those who consider, that the powers of Government over their tenants should not be greater than those of other landlords. And I think, moreover, that the certificate system, by which the mere fact of a Government officer recording a debt against a person behind his back is made equivalent to a decree against that person so as to subject him to execution without his having had any opportunity of answering the claim, is cruelly unjust.

The Government, as it seems to me, ought to be bound to prove their claims against tenants, or any other debtors; and if the discussion of the Rent Bill should bring about any wholesome reform in that respect, it will be attended, in my opinion, with at least one good result.

Section 3 (7).

The next point which I wish to observe upon, and which I consider of great importance, is that the various kinds of tenancies should be properly defined.

I see that in the report of the Committee they say, that they do not consider it expedient to attempt any such definitions. But considering that this new law would have the effect of readjusting the whole system of agrarian holdings, it seems to me that the great aim which the Legislature ought to have in view is to prevent, as far as possible, confusion and uncertainty in the future.

They are proposing to deprive landlords of a number of rights and privileges which they have hitherto possessed; they are conferring rights upon tenants which they have never yet enjoyed, and changing the status and relations, which these different classes of agriculturists are to occupy in the future. It seems to me therefore that in justice to the agriculturists themselves, and to prevent confusion and uncertainty, the least they can do is to define as nearly as may be what a tenure-holder or a raiyat is according to their own view of his position; and I think it would be extremely hard to impose that burden upon a number of judicial officers, the large majority of whom disapprove of the proposed changes, and probably, like myself, are unable to comprehend the principles upon which they are based.

Section 5.

Having said this much, and in the hope that in this respect the Bill, if it is to pass, may be reconsidered and amended by the Legislature, I will just notice in passing how misleading and inaccurate the description of a tenure-holder is in this section.

A tenure-holder is described as a person who has acquired from a proprietor or from another tenure-holder the right to collect rents.

Now it seems to me, that it would be just as correct to describe a tradesman, who has bought a shop, as a person who has acquired *a right to collect*

debts, as it is to describe a tenure-holder as one who has acquired *a right to collect rents.*

It may be generally true of tenure-holders, that they have a right to collect rents; because most of them have tenants [introduced either by themselves or others] by whom rents are payable.

But it is by no means of the essence of a tenure-holder's interest, that he should have a right to collect rents; and still less, that he should have acquired that right from his immediate landlord.

His right to collect rents is merely one of the incidents of his position, when his land is let to tenants; as it is one of the incidents of a tradesman's position, that he has a right to collect debts, when he has customers from whom they are due.

A more correct description of a tenure-holder would be, "one who holds a tenure, mediately or immediately, under a proprietor, and who is not himself a raiyat." But this of course leaves the important question open—what is a raiyat? and what is the true distinction between a raiyat and a tenure-holder?

The description which I have suggested is correct as far as it goes; and it is at any rate not calculated to mislead; whereas the description proposed in this section would be wholly inappropriate to a large class of tenure-holders.

Suppose, for instance, that a settlement were made with a zamíndár at the present day of a tract of waste in the Sunderbuns. I have now before me a grant of this kind, which was made very lately. Such a proprietor would be at liberty to grant any leases he may think proper of any portions of that tract.

He may grant mokurrari leases, either permanent or for life; he may grant putni leases, or jungleburi-tenures; and in each of these cases, the object for which he makes the grant, and the object of the lessee in taking it, would probably be the cultivation of the soil.

But each of these grantees would be at liberty (subject, of course, to any special conditions which his lease may contain) to cultivate or not, as may suit his convenience; and each would be at liberty to grant his land for sub-tenures, or to let it out to raiyats, or to cultivate it himself with his own coolies. But whether he does one thing or the other, I take it he would be equally a tenure-holder; and that any raiyats, to whom he lets the soil for purposes of cultivation, would be capable of acquiring occupancy rights.

And yet to describe any one of these grantees "as a person who has acquired from the proprietor a right to collect rents," would be a manifest misdescription.

The truth is, that each successive tenure-holder is to all intents and purposes as much an owner of the soil, to the extent of the interest which he acquires in it, as a tenant of land in England.

He is of course bound, as every tenant is, by the conditions which are imposed upon him, either by the general law, or by custom having the force of law, or by the contract which he makes with his superior landlord on the one hand, or his sub-tenants on the other; but subject to those conditions he may deal with the land as he pleases.

If when he acquires his tenure, the land is occupied by raiyats, he can of course only deal with those raiyats, as the law, or the contracts under which they hold, allows him; but if the land is waste or partly waste, when he acquires it, he may either leave it so, or utilise it in any way he thinks proper.

It seems to me, therefore, that the description of a tenure-holder in this section is utterly misleading. It may no doubt be a difficulty to define the line which is to separate the two great classes of "tenure-holders" and "raiyats." But I think it is a duty which the Legislature should take upon themselves, even though they may perform it imperfectly, rather than to place several hundred judicial officers in a difficulty, which they may each attempt to solve in a different way.

Section 26.

I might with reason congratulate the zamíndárs that the Secretary of State had retained the 12 years' occupancy rule, if the effect of his decision had not been rendered almost nugatory by sub-section 2 of section 26.

It may be interesting to review shortly the history of this question, since the amendment of the Rent Law was first proposed in 1879.

By the present law a raiyat can only earn his occupancy right by renting his land for 12 successive years.

The Committee of 1879 recommended an alteration of this rule; and by the Bill which was prepared by the Government of Bengal, it was proposed that a 3 years' occupation, instead of 12, should be sufficient to acquire the right.

I believe that the Government of India were in favour of a still shorter period. But be this as may be, the Secretary of State in Council, after much consideration, determined that the 12 years' rule should be adhered to.

The Government of India were dissatisfied with that decision, and begged the Secretary of State to reconsider it. But notwithstanding this protest the Secretary of State would not alter his decision.

Accordingly, by the amended Bill, which was framed in the year 1883, the 12 years' rule was re-enacted. But by the same Bill the penalty imposed upon a landlord for ejecting a non-occupancy raiyat was made so cruelly severe, that it virtually would have given all raiyats the occupancy right, and so have neutralized the decision of the Secretary of State.

This was pointed out very forcibly by several gentlemen who were consulted upon the Bill; and the penalty clause was consequently withdrawn.

Now again, by section 26 of the present Bill, the 12 years' rule is re-enacted. But we find in connection with it sub-section (2), which will be at least as effectual in neutralizing the 12 years' rule, as the penalty clause which was withdrawn.

That sub-section provides, that *instead of a raiyat acquiring his occupancy right by a 12 years' occupation of his land, the law is to presume, that he has acquired it*, and the presumption is to be made under such circumstances, that in the great majority of cases, it will be practically impossible for any landlord to rebut it.

Whatever therefore the intention of the Legislature may have been in framing this sub-section, it is certain that the rule which it lays down will defeat the wishes of the Secretary of State; and its effect will be to place landholders in an infinitely worse position, than if the proposed 3 years' rule had been accepted.

Now, here I would ask, why should the Select Committee have gone out of their way to lay down a rule in violation of all the principles of evidence, in favour of the raiyat, and to the prejudice of the landlord?

One leading rule in such cases, which is substantially adopted in section 101 of the Indian Evidence Act, is this:—

See Taylor on Evidence, section 268.

"The burthen of proof lies on the party, who substantially asserts the affirmative of the issue."

And this accords with the rule of the civil law, "*Ei incumbit probatio, qui dicit, non qui negat.*"

And another rule of evidence which is equally well known is this:—

See section 103 of the Evidence Act.

"Where any fact is especially within the knowledge of any person, the burthen of proving that fact is upon him."

The justice and good sense of these rules must be apparent, even to those who know nothing of law; and one looks therefore for some explanation, why the Select Committee in this instance should have so completely reversed it. I suppose we may consider that the explanation, such as it is, is given in the following passage of the Committee's Report.

Speaking of the presumption which is proposed by that sub-section, the Committee say—

"It (that is, the presumption) appears to be warranted by the existing state of things in the Lower Provinces, and whilst it tends to simplify litigation, it is a presumption, which a landlord ought to have no difficulty in rebutting, in any case in which it does not hold good."

We are not informed what the state of things is in the Lower Provinces, which is supposed to justify such a departure from the established rules of evidence; but I presume the reason is, that because the large majority of raiyats in the Lower Provinces have already rights of occupancy, it is fair to presume, as against landlords, that all raiyats have the right of occupancy, until the contrary appears.

If so, I suppose upon the same principle it would be equally fair to presume, that in any part of the country, where putni leases are the prevailing form of tenure, all tenure-holders are putnidars until the contrary appears.

Or to bring the illustration nearer home, I believe that most of the large houses in Calcutta are let upon a four years' lease. If so, it would be fair to presume upon the same principle, as against the owners of houses, that every tenant in Calcutta who occupies a large house has a four years' lease.

There are several parts of England, where tenant-farmers as a rule have leases for seven or fourteen years. I wonder what landlords there would say to a presumption of law, that every tenant in those parts of the country had a lease for seven or fourteen years—!

The truth is, that any presumption against a proprietor, that a tenant of his *has acquired as against him a permanent right or tenure*, is an obvious injustice.

And it becomes a still greater injustice, when according to law *the only way in which a tenant can earn or acquire such a right is by an act of his own.* Why should it be presumed as against a landlord that his tenant has done an act, which is to confer a benefit upon himself to the prejudice of his landlord?

And again, when we look at the facility which the tenant has of proving this right, as compared with the difficulty which a landlord has in disproving it, the injustice becomes still more glaring.

To the raiyat himself it should be a very easy matter to prove, if the fact is so, that he or his father, or the person under whom he claims, has occupied land for so many years.

It must be a matter within his own knowledge, or that of his family and his neighbours, and no one (as a rule) can be so capable as himself of proving it.

To the landlord, on the contrary, it might, and would in the great majority of cases, be a task of the greatest difficulty to prove the negative of the proposition. I really can hardly believe that the gentlemen, who constituted the Select Committee, could have considered the difficulty in which a landlord would be placed, when they proposed this sub-section.

Let us take a case by way of illustration, and see what a landlord under such circumstance would have to prove.

We must bear in mind, that by sub-section (3) of the same section a person is to be deemed, for the purposes of that section, to have held land continuously in a village or estate, *notwithstanding that the particular land held by him has been different at different times* in such village or estate.

And we must also bear in mind, that by section 27, sub-section (*b*), "where two or more estates have been created by one or more partitions taking place, whether before or after the commencement of the Act, but since the 1st day of January 1853, the area comprised in the parent estate, of which they would have formed part, if no such partition had taken place, shall be deemed to be a single estate."

Now we will suppose an estate to have been partitioned between ten different shareholders in the year 1870; and that a raiyat is found occupying a piece of land in one of the partitioned portions in the year 1884.

A question arises between him and his landlord whether he has an occu-

pancy right in the land which he holds; and an issue having been raised upon that point, the presumption according to section 26 is in favour of the raiyat.

The raiyat therefore at the trial *says nothing*, and *does nothing*; but leaves it to the landlord to prove the negative of the proposition.

Now what has the landlord to do in order to rebut the presumption?

He must first call his own patwaris or gomastas to prove that the raiyat or those under whom he claims have not occupied the particular piece of land in question for 12 years. But that proof would not be enough; because although the raiyat or those under whom he claims may not have occupied the piece of land in question for 12 years, they may have occupied some other land or lands on the same portion of the estate; and if so, that would answer the raiyat's purpose quite as well, as if he or his predecessors had occupied the land in question.

So the landlord must proceed to call every patwari or gomasta upon his portion of the estate (which may consist perhaps of 3,000 or 4,000 acres) to prove negatively, that the raiyat, or those under whom he claims, have not occupied any land in any portion of the estate for the last 12 years.

But even that proof would not nearly suffice in the case which I have supposed; because as the parent estate was partitioned in 1870, the landlord must needs go on to show, that the raiyat has not occupied, during the last 12 years, any land *in any of the other nine partitioned portions of the parent estate.*

He would therefore have to call all the persons who have acted as patwaris or gomastas in all the other nine portions of the parent estate during the last 12 years.

Some of these would most probably be hostile to his interests; and unless all these people prove to the satisfaction of the court the negative proposition, *that the raiyat has not occupied any land on any portion of the parent estate for the full period of 12 years*, the presumption in favour of the tenant's right of occupancy will prevail.

It seems to me that to place landlords deliberately in such a difficulty as this would be a cruel injustice. The time occupied, and the expense involved, in a trial of this kind, would be out of all proportion to its importance; and this burthen is to be thrown upon the landlord, directly in opposition to the ordinary rules of evidence, merely for the purpose of relieving the raiyat from proving a case, which, if it is an honest one, he ought to be able to establish without the least difficulty.

The raiyat, as a rule, must know perfectly well where he and his forefathers have lived; and if they have changed their residence, he or his family or his neighbours ought to know best how to prove it.

I repeat, that if sub-sections 2 and 3 of section 26 are to become the law of the land, the decision of the Secretary of State as regards the 12 years' rule will become a dead letter.

Sections 37 and 38.

I have not the least doubt that these sections, which are designed for the purpose of preventing sub-letting, have been proposed with the very best intentions. But I cannot but think that they are unwise; and I am satisfied that they will lead to a torrent of litigation.

I have already expressed my opinion that one great aim of this Bill, if it is to become law at all, should be to distinguish the various kinds of agricultural holdings, so as to prevent confusion in the future; whereas these sections, as it seems to me, are fraught with confusion and uncertainty.

It may be doubtful, as the Bill now stands, whether the occupancy raiyat himself will gain or lose by becoming a tenure-holder.

He would free himself, by becoming a tenure-holder, from the law of preemption and distraint; but on the other hand, he would not have the power over his tenants, as he would if he were an occupancy raiyat.

Whatever his own interest may be however, it will clearly be the interest of his tenants to make him a tenure-holder if they can; because they may then gain occupancy rights under him, and secure themselves other privileges, which as sub-raiyats they do not possess.

There will therefore be perpetual disputes upon this point. The occupancy raiyat, if he chooses to retain that status, and yet does not wish to cultivate the land himself, will endeavour to prevent the arrangements which he makes with his cultivators, coming within the category of sub-lettings.

If he makes his bargains cleverly with these people, it will be difficult for any court to say, whether the cultivators are *servants* or *sub-tenants*.

He may allow them to cultivate his land, and give them a portion of the produce as wages; or he may pay them a sum by way of wages, and take a portion of the crop as his share, leaving them the rest.

Then the provisos in these sections will give rise to interminable differences.

Are women, on account of their sex, to be allowed to under-let the whole of their jotes, without becoming tenure-holders? If so, a man who acquires such a jote, will acquire it in his wife's name.

Is a woman to be considered disabled merely because she is a woman? and at what age is a man to be considered disabled? Some men may be disabled at 50, whilst others can work perfectly well at 70. It will be very difficult for any court to decide whether a man is really disabled.

And so with regard to illness, what amount of bodily ailment or infirmity is to be a sufficient excuse for a man's under-letting? Doctors' certificates, especially those of native doctors, are in my experience very easily procurable.

Again, suppose that a man absent from home on military or domestic service, lets the whole of his jote to sub-tenants; and when he returns, takes immediate steps to put an end to their sub-tenancies—How long is he to be allowed for this purpose? Is he liable to be registered as a tenure-holder as soon as he returns home, or will he have a reasonable time to determine his tenants' interests? and if the latter, what will be a reasonable time? The questions which will arise under these provisos will be endless; and the result, I am satisfied, will be constant litigation.

I quite agree with Mr. Field, and many others, that it would be an excellent thing to prevent sub-letting; but I don't quite see how it is to be prevented.

Transferability of Occupancy Tenures.

As regards the transferability of occupancy tenures, I have already said a good deal in my former minute; and I am still of the same opinion as I was then.

It is admitted that occupancy tenures were not transferable at the time of the Permanent Settlement, and the only arguments which are advanced now in favour of the right of transfer are—

1st—that the custom of transferring tenures has become much more general of late years; and

2nd—that if the right of transfer were allowed, it would render occupancy rights more valuable.

With regard to the first of these arguments, it may be true that in some districts the customary right of transfer has become more general; but that only means, that in those districts the landlords have either openly permitted transfers, or, at any rate, have allowed the practice to continue unchecked during a long course of years.

But no one goes so far as to deny, that the landlords in these districts had a right to prevent the practice, if they had chosen to do so; and if so, it is difficult to see why other landlords, who have adhered to and protected their rights, should now be arbitrarily deprived of them.

This is only another illustration of the way in which the law has been strained in favour of the raiyats, and to the prejudice of the landlord, entirely regardless of what was the state of things at the time of the Permanent Settlement.

As regard the second argument, I quite admit that to make the occupancy-right saleable would increase its value in the market. But it does not at all follow, that this will be beneficial to the raiyats himself. On the contrary, I consider that there is no surer mode of exterminating occupancy-raiyats as a class than by permitting them to transfer their tenures; and I believe it would be found, on enquiry, that in those districts where occupancy-rights have become transferable by custom, a large portion of them have already found their way into the hands of mahajans, planters, and others, whilst the original owners of those tenures have become non-occupancy raiyats.

If the Government really mean to benefit the occupancy-raiyat, let them take every possible means of preventing him from ruining himself by parting with his ancestral jotes, and becoming the prey of those whose interest it is to deprive him of his status and property.

The men who are most interested in making occupancy-rights transferable are land-jobbers, mahajans, and above all, so far as I can understand, planters. So long as a planter can make himself complete master of the soil without actually cultivating it himself, he cares not whether the position which he occupies is that of a zamíndár, or a tenure-holder, or an occupancy-raiyat. And if the law makes occupancy-rights saleable in the market, and confers upon the owners of those rights larger powers over their sub-tenants, than it gives to zamíndárs and tenure-holders, the occupancy-right is the position which it will best answer the planter's purpose to secure. And secure it he will; and who can blame him?

Sooner or later occupancy-raiyats will want money. Their families will increase in number; discord and partition will sever the ancestral holdings; marriages and *shrads* become more and more expensive; Brahmins will have to be fed; and good seasons and prosperity will not last for ever. If the occupancy-right *can be* sold and mortgaged, most assuredly it *will be* sold and mortgaged; and that in a very few years. The man of money will buy up all the occupancy-rights, which are to be made the most valuable in the soil, and the occupancy-raiyats of the present day will become in a few short years either non-occupancy-raiyats or coolies.

Only see what has happened within the last 150 years in our own country. How many of the old yeoman families, who were the copy-holders and customary tenants of former days (answering as nearly as may be to the khudkhast raiyats here), are in existence now? How many of the old country gentleman's families retain their ancestral property? The few of each class who are now to be found owe the slender remnant which still belongs to them to the law of entail. The rest has gone, and to whom? To those, for the most part, who answer to the land-jobbers, the mahajans, and the trades-people of India, that is to say, land agents, bankers, merchants, trades-people, and the other money-making classes. The land finds its way sooner or later into the hands of the man who makes money; and it is so, and will be so, in British India.

Amongst other interesting papers, which I have read upon the subject of the Rent Bill, I have been specially struck by a paper written by Mr. Herbert Reily, the manager of the Chanchal Estates. He has had a long experience of these estates, and has studied and watched attentively the condition of the tenantry. I would especially call attention to the remarks made by this gentleman upon the mischief of allowing occupancy-raiyats to sublet or to transfer their occupancy jotes. (See especially paragraph 6 and 10 of his minute.) He describes the state of indebtedness to the mahajans in which these poor people live, and what he says of Chanchal is true, I believe, in all parts of Bengal. A very large proportion of the raiyats, even the better classes, are in this unhappy condition; and there can be no reasonable doubt, that a little adversity or extra pressure would compel them to sell their little properties. I say there-

fore again,—and I say it far more in the interest of the raiyats, than in that of the zamíndárs—"If you want to ruin occupancy-raiyats, give them the power of transferring their interests." If you want, on the other hand, to do them a real benefit, prevent those interests from being transferred, even on estates where they are transferable now.

There never was, as it seems to me, a more fallacious argument, than that the raiyat must needs be benefitted, by making his interest transferable, and consequently, *more valuable.*

No doubt you may thus make the estate itself *more valuable in the market*; but that is only when the raiyat *parts with it.* To the raiyat himself, its value is never so great, as when he retains it in his own hands, and gets a good crop out of it.

By making it *more valuable in the market* you tempt the man to turn it into money, and transfer its value to other people.

By preventing its transfer, you oblige him to keep its value for himself and his family.

In my opinion, therefore, by making the occupancy-right transferable, you not only do the zamíndár a wrong, but you do the occupancy-raiyat a much greater wrong. You are taking away the best, and indeed the only safeguard, which is calculated to preserve him from ruin.

Chapter XIII.—Distraint and Ejectment.

It is needless to remind His Excellency, that one of the principal objects of the new Rent Law was to provide more effectual means of enabling landlords to realize their rents.

That was the avowed purpose of the Bill which was introduced into the Bengal Council in 1877; and it has been admitted over and over again, that the landlords are fairly entitled to all the assistance in this respect which Government can reasonably afford them.

Now, what has this Bill done for the landlords? Absolutely nothing. On the contrary, it has taken away from them two of their most effectual remedies, namely (*a*) the right of the ejectment, given by the Act of 1859, if the rent is not paid within so many days from the date of the decree, and (*b*) the right of distraint.

Now, why should landlords be deprived of these remedies? The raiyats themselves have never complained of one or the other. There is surely nothing unjust in ejecting a man from his holding, who after subjecting his landlord unjustly to the expense and delay of a lawsuit, is unable or unwilling to pay the sum decreed; and as for distress, the complaints, such as they are, which have been made about it have been greatly exaggerated.

I believe that the most oppressive exercise of the right of distress, which we have ever heard of, occurred upon the estates of the Durbhungah Raj during the minority of the present Maharajah, when the estates were under Government management.

And there is a special reason, why a large portion of the rent of these estates can only be realized in that way. The Durbhungah property for a long distance lies on the boundary of Nepaul. The tenants cultivate one plot in one year, and another the next year; and unless the landlord watches his opportunity, and puts in a distraint upon the crops, the raiyats carry them off across the Nepaulese boundary, and the rent is never realized at all. The only way of getting the rent from these people is to make a distress upon the crops; and if the landlord is to be put to the delay and expense of an application to the court, before he can use his remedy, he may as well not apply at all.

The best proof that the remedy by distress is reasonable, and that it is not, generally speaking, exercised illegally, is shown by this incontestable and significant fact, that suits for illegal distresses are very rare. If the right were improperly exercised, the tenants would be only too ready to bring suits

against the landlord; whereas the fact is, that of late years, there are hardly any such suits.

I find from the High Court Reports, that in 1881 the number of suits for arrears of rent was 144,127, whilst suits of all kinds relating to distraint were only 330; and in 1882 suits for arrears of rent numbered 155,668, whilst suits for distraint were only 282 ! ! !

This really seems a complete answer to the charge that the right of distress has been improperly exercised; and as for the right of ejectment, if it is considered that the time now given to the defendant to pay the rent is too short, make it longer; but do not take away one of the few remedies, which have proved effectual to the landlord.

Rent-suits.

As the High Court has already addressed the Government upon the subject of rent-suits, I will say nothing more about it here. I only trust that what the Court has recommended with regard to additional Munsiffs, and relieving landlords from the payment of stamp fees, may be favourably considered by the Government.

Khamar and Nij-jote Lands.

I have now only a few words to say with reference to Khamar and Nij-jote lands. I agree in the main with what is said in the protest of the late Rai Kristo Das Pal upon that subject. I cannot see why any attempt should be made to contract the right of landlords to lands of that description, or to leave the determination of those rights to the executive authorities, instead of to the courts of law. Here again is an instance, as it seems to me, in which an attempt is made to strain the law unduly to the prejudice of the landlord, and in favour of the tenants.

Proposed Registration Law.

Having thus considered it my duty to criticise unfavourably some of the most important points connected with this Bill, I am glad to be able to express my sincere satisfaction at the prospect which is held out by His Honour the Lieutenant-Governor, of a registration law being passed in aid of or in connection with this measure.

I have already, over and over again, expressed a strong opinion in favour of the extension of the registration law. I have called the attention of the Government to it on several occasions; and notably, in my Minutes on the Transfer of Property Act, and in my former Minute upon the Rent Law.

I believe that a good Registration Act would be the means of preventing in great measure the attempts at fraud and forgery which disgrace our Civil Courts; and that if the advice which I ventured to give the Government in my former Minute were carried out, it would be the means of checking, if not entirely preventing, the objectionable practices to which I referred in pages 11 and 12, and which operate as a sad injustice upon tenants generally, and especially upon the poorer class of raiyats.

Let the proprietors and tenure-holders of every estate be duly registered, either in the zamíndár's sherishta, or in any Government office; let no one but the registered landlords be entitled to recover rent from the tenants or raiyats; let the tenants or raiyats, on the other hand, be bound to pay their rents to the registered landlords, and to no one else; and let the receipt of those landlords be a good discharge for the rent.

A law of this kind, well devised and enforced, would, I am satisfied, be the greatest possible blessing to the agricultural community; it would relieve landlords from most of the difficulties under which they now labour in collecting their rents; and it would relieve tenants, and especially raiyats, from the hardship which they continually undergo of having to pay their rents twice over.

A registration law such as this would, of course, for the first three or four years, be productive of some litigation, because it would compel claimants to enforce their claims at once in an honest way, instead of waiting for years, in the hope of some fortunate chance turning up in their favour.

The Registration Act of 1876 has been productive of litigation for this very reason; but claims under that Act are now becoming settled; and titles, as time runs on, will be more and more secured.

I would invite the attention of the Governor General in Council to what I said upon this subject in page 12 of my former Minute.

Conclusion.

In dealing with the Bill in its present shape, I have confined myself, as I proposed to do, to the discussion of some of its leading features. I have done so, partly from lack of time, and partly because I cannot help hoping, that both the Government of India and the Secretary of State, after giving due weight to the numerous and very important memorials which have been presented against the Bill from all parts of the Province, and to the opinions of the large body of Government officers, who, like myself, are opposed to the measure, may think fit, either to withdraw, or very materially to modify, the present Bill.

Whatever may be the form which it may assume at a later stage, if the Secretary of State should approve of the Bill I shall consider it my duty to address the Government again on such of the details as I consider objectionable.

I thought it right in the year 1882, and I think it right now, to warn the Government as earnestly as I can against a policy, which, in my opinion, will ruin, or seriously injure, the large majority of the zamíndárs, and will be scarcely less injurious to the cultivating raiyats.

It seems to me inconsistent with the good faith of the British nation, which the native community have hitherto had reason to respect, to deprive the zamíndárs of the rights and position which they have acquired under the Permanent Settlement.

I believe it to be not only unjust but impolitic to sacrifice the fortunes of the zamíndárs in order to enrich a large body of mahajans and middlemen, who will neither be responsible to the Government for the revenue, nor be likely to prove as good landlords to the raiyats, or as faithful servants to the Crown, as the ancient landed aristocracy of the Province.

CALCUTTA,
The 13th September 1884.

RICHARD GARTH.

No. 2611, dated 15th September, 1884.

From—Officiating Registrar, High Court, Calcutta,

To—Secretary to Government of India, Legislative Department.

In continuation of my letter No. 1986, dated the 8th ultimo, I am directed to forward for the consideration and orders of His Excellency the Governor General in Council, the enclosed printed minute by the Hon'ble Mr. Justice Field on the Bengal Tenancy Bill.

2. Seventy-nine spare copies of the minute are forwarded separately.

Dated 11th September 1884.

Minute by the HON'BLE MR. JUSTICE FIELD *on the Bengal Tenancy Bill, 1884.*

(As amended by the Select Committee.)

Definition of "Estate."

1. *Section 3.*—In order to understand the definition of "estate" we must refer to sections 10, 11, and 12 of Act VII (B.C.) of 1876. From these sections and the proviso to the definition of "estate" in the Bill it will be manifest that *khas mahals* or other lands in the possession and under direct management of Government are not included in the term "estate," unless they happen to be revenue-paying lands, entered in the General Register of revenue-paying lands mentioned in sections 6 and 7 of Act VII (B.C.) of 1876. From this

and the definition of "proprietor" given in sub-section 2, section 3 of the Bill, it follows that in respect of such *khas mahals* Government is not a proprietor, nor is Government a tenure-holder; and, therefore, tenants on such Government lands are not raiyats (see sub-sections 2 and 3 of section 5), and therefore not entitled to the benefits proposed to be conferred by the Bill upon raiyats. The result of this will be that raiyats upon Government estates will be in a less favourable position than raiyats on the estates of private individuals; and thus Government apparently does not accept as fair and equitable for its own tenants the law proposed to be enacted as fair and equitable for the tenants of zamindars.

Raiyats in Government Estates not entitled to the benefits of the Bill.

2. The definition of "proprietor" is defective as it stands. The omission of the words "of a share of or interest in," which are to be found in the definition in the Bill which I had the honour to draft for the Commission, will lead to the most inconvenient results. These words were intentionally inserted in order to include *Mutwalis* of Muhammadan endowments, *Shebaits* of Hindu endowments and other persons, of whom it is impossible to predicate that they own the land or an estate. I do no not see the force of the word "under" in the definition of "tenant." The definition of "landlord" would appear to have been framed without reference to the provisions of the General Clauses Act as to the singular including the plural. The definition of "rent" does not appear to accord with the other provisions of the Bill. I take it that a tenure-holder will be admitted to pay rent. But according to the definition in sub-section 1 of section 5, he does not get the use or occupation of the land, but merely the right to collect the rents. The words "use or occupation," which imply the landlord's ownership, show how extremely difficult it is to formulate the idea of a landlord who is not a proprietor or owner.

Definition of "Proprietor" defective.

Definition of "Rent."

3. The definition of "holding" is to my mind, defective, and not in accordance with popular ideas. On referring to section 176 we find that there may be an *under-tenure* subordinate to a *holding*. A "holding" has hitherto been always understood to mean the land held by a raiyat, or the raiyat's interest in such land; and though there may be a holding in, and subordinate to, an under-tenure, the idea of an under-tenure within and subordinate to a holding is altogether foreign from the ideas of the people. It appears to me that a well known and received phraseology ought not to be altered without the very strongest reasons. The words "under one set of conditions" in the definition of "holding" will be sure to lead to doubt and consequent litigation. It is very usual for a holding to consist of different kinds of lands, *bastu*, *udbastu*, *dehi*, paddy land, lands that grow two crops—paddy and the cold weather crop. The rates of rent of these different kinds of lands are different. Small additions of plots of different kinds are made to the holding from time to time, and portions are occasionally given up. Nevertheless, all the land that the raiyat at any time holds, of different descriptions and at different rates, is understood to constitute his "holding." It can scarcely be said that all these parcels are held under one lease—commonly there is no lease—or under one set of conditions—for they vary as regards different portions of the holding.

Definition of "Holding."

4. The definition of "patni tenure," read with Schedule II of the Bill, does not convey the idea that such a tenure is devisable. This incident was expressly inserted in section 14 of the Bill drafted for the Commission, and is a necessary consequence of the progress of the law since the Patni Regulation was passed 65 years ago. I note that the definitions of "tenure," "land," "lease," and "pottah" have been omitted. The necessity for these definitions were allowed by a Commission whose Members were practically acquainted with the law of these Provinces, and I think that their omission is a mistake.

Patni Tenure.

Definitions omitted.

5. *Section 5 (1)*.—I do not see the force of the word "primarily," as the Bill does not proceed to provide for the secondary meaning of the term "tenure-holder." The definition as it stands appears to be defective. It excludes *jangalburi talukdars*, who have always been understood to be tenure-holders. These talukdars did not acquire merely the right to collect rents. They acquired an interest in the land itself, which they agreed to take with full power to reclaim and cultivate—part of it themselves—and part by letting it to tenants after reclamation, or before reclamation to persons who would reclaim and cultivate, or sublet for reclamation and cultivation. Then the "tenure-holder" of the definition in the Bill is not a tenant, for he does not hold land, and he does not pay rent, for he pays and delivers nothing for the *use* and *occupation* of land. Again, the definition would include a mere agent or a mortgagee in possession, who are not generally understood to be tenure-holders. The definition appears to have been framed with a view to avoid the admission that a tenure-holder obtains an interest in the soil itself. When land is acquired under the Land Acquisition Act, the tenure-holder is allowed compensation for his interest in the soil, and there are numerous other facts well known to persons acquainted with the common law of these Provinces, which leave no doubt that the

Definition of "Tenure-Holder."

tenure-holder acquires not merely the right to collect rents, but a substantial interest in the land itself. If a tenure-holder acquires no interest in the land, how can he give the use or occupation thereof to a tenant under him? Then regard being had to sub-section 3 of section 5, the definition of "raiyat" must fail. With reference to this sub-section it has already been pointed out that persons holding land in certain Government estates will not be raiyats, and will not, therefore, be entitled to the benefits of raiyats under the Bill, and it may further be pointed out that the same disability will attach to raiyats under lakhirajdars not registered under Act VII (B. C.) of 1876, *Shebaits*, *Mutwalis*, and other classes of landlords. What also becomes of persons holding under the Mukararidars and the Istemrardars of Regulations of 1793, persons of whom it is impossible to predicate that they acquired the right to collect rents? As to the definition of "raiyat" in sub-section 2, the observations already made apply to the use of the word "primarily." Then what is the exact force of the term "acquired"? No doubt it was intended to mean that the raiyat gets something more than the use and occupation mentioned in the definition of rent in sub-section 3 of section 5. But what this additional something is, and in what respect it differs from proprietorship or ownership, the Bill does not explain, and I find it impossible to conceive. As to sub-section 4, I have little hesitation in saying that there is no local custom in any part of the Lower Provinces of Bengal, which will assist any Court in determining whether a tenant is a tenure-holder or a raiyat. If there is any such local custom, which I have not met with in my experience, it would appear necessary to say which of the three principles of decision stated in the sub-section shall prevail, when their results conflict.

Danger of the proposed presumption.

6. *Section 5 (5).*—Is the tenant to be presumed to be a tenure-holder as against his landlord, or against or in favour of his sub-tenants or both; or further as regards strangers? According to the provisions here made, if a man has a thousand bighas, and he sublets one cottah, he is to be presumed to be a tenure-holder. I entertain little doubt that these provisions, if ever attempted to be worked, will lead to enormous litigation.

Error on the subject of Diluvion of Tenures.

7. *Section 6.*—Does the term "tenure" include "under-tenure," or is it intended that under-tenures shall be excluded from the benefits of these provisions? The provision in sub-section 2 as to diluvion is opposed to the common law of the country. The fact that a tenure-holder has received abatement for diluvion has always in these provinces been held to entitle his landlord to an increase of rent for alluvion. I am aware that increased rent for increased area is not treated as a ground of enhancement in the present Bill, and this is in accordance with the recommendation of the Commission. But this express provision as to diluvion is calculated to alter the well-known and settled law on the subject; and I know of no reason for the change. I think that Explanation 1 to section 7 of the Bill of the Commission, which embodied a judicial decision, ought not to have been omitted. I think further that Explanation 2, section 7 of the Bill of the Commission ought not to have been omitted from this context.

Risks of Collection.

8. *Section 7 (3) (c).*—"risks of collection." This term is new and indefinite, and will form a fresh element of litigation and judicial uncertainty.

Why should a Tenure-holder's rent be enhanced higher than he can enhance that of his Raiyats?

9. *Section 8.*—Under the provisions of this section the rent of a tenure-holder may be doubled. But the tenure-holder can enhance the rent of his raiyats to the extent merely of 50 per cent., and in some cases of 25 per cent. On what possible grounds ought a tenure-holder to pay an increase of 100 per cent., while he can himself obtain an increase of only 25 or at the most 50 per cent?

Tenure-holders should be allowed to contract.
Mistake of ten years' limit to enhancement.

10. *Section 10.*—I think tenure-holders may safely be left to regulate their own affairs by their own contracts. If there can be no enhancement by the Court for ten years after one contract, the tenure-holder will certainly never agree to contract for any increase during these ten years. The words "or by contract" should be struck out Then again why should a tenure-holder's rent be enhanceable after ten years, while he cannot enhance the rent of the raiyats under him for fifteen years? Section 11 omits to make permanent tenures expressly heritable; this omission should be rectified.

Mistakes committed in modernising the language of the Patni Regulation.

11. *Section 13.*—The provisions of this section ought to apply to all tenure-holders, and not to patnidars merely. I may here observe upon the fact of the draft of the old Patni Regulation being modernized in the present Bill. Having regard to the large number of judicial decisions by which the most important provisions of that Regulation have been interpreted and have acquired a settled meaning, it will probably be admitted that the difficulty of changing the phraseology without altering the law, or leaving loopholes for consequent litigation, must *primâ facie* be very great. So strongly was I impressed with the difficulty of successfully performing this task, that I left the language of the old Regulation unaltered in the Draft Bill which I prepared for the Commission. It is scarcely too much to say that the work of successfully altering the language of this old law could be

successfully performed only by a draftsman thoroughly familiar with the case-law and with the old Regulation itself. And I feel bound to say that, in my opinion, the alteration has not been successfully performed in the Bill. The result will be a serious amount of very expensive litigation in order to set at rest the doubts that will thus be created. I may point out that the old Regulation of 1819, though known as the *Patni Regulation*, really deals with a much wider class of tenures than mere patnis, namely, that large class designated as *tenures upon which the right of selling or bringing to sale for arrears of rent has been specially reserved by stipulations in the engagements interchanged on the creation of the tenure* I must on the present occasion content myself with this general observation; I have not leisure to examine and point out the whole of the errors and omissions which are to be found in this portion of the Bill.

Provisions as to written reasons for refusal to register transfer of tenure.

12. *Section 15* (*1*).—Add to the proviso the words "unless and until it is paid." The danger of this provision will be that whenever registration has been refused and steps are taken to enforce it, the defence (difficult to disprove) will be that some rent remained unpaid. As to sub-section (3), I doubt if these provisions as to delivering a statement in writing of the reasons for refusal and the penalty for failing to do so will ever have any effectual operation. The provisions of the present Rent Law providing penalties for the non-delivery of receipts have remained almost a dead letter.

13. *Section 16.*—I see no objection to these provisions; but what is to be the sanction, what will be the result, if the purchaser refuse or omit to pay the registration fee and the fee for service of notice?

14. *Section 18.*—No provision has apparently been made for the case mentioned in the *parenthesis*, *i e.*, the case of the transfer by sale in execution of a decree for arrears of rent or by summary sale. See clause (*b*) of section 48 of the Commission Bill. In the case provided for by the section of the Bill, I do not see why the landlord should be allowed to make the transferree liable without accepting the transfer. The provisions of sub-section 2 are, I, think, a useful addition to the existing law.

Provision of the Bill as to Registration of Tenures.

15. *Section 19* (*3*).—I think the provision as to damages for neglect or refusal to register contained in section 52 of the Commission Bill, ought to have been retained. I doubt the wisdom of the word "such order as in its opinion will meet the circumstances of the case" in sub-section (4). I apprehend rather curious instances of the exercise of the wide discretion conferred by these words. I do not see the expediency of the provision of section 20. In the case of a transfer, so long as there is no registration, the transferrer remains liable for the rent, but the landlord is in no worse position than he was before. In the case of a succession, I do not see how the person entitled to succeed can be made liable until he takes possession—See clause (*d*) of section 48 of the Commission Bill. The persons entitled to succeed may renounce. It will be remembered that a tenure cannot be relinquished by a person who has been let into or has taken possession. There are tenures in the country which have become so unprofitable that the tenure-holders would gladly relinquish them if they could. The effect of the section as it stands will be that an heir, who may now renounce, will be compelled to take over an unprofitable tenure. Section 20 does not provide for the case of a disputed succession, the litigation concerning which may extend over several years.

Landlord not bound to register transfer of share of tenure, or division of rent.

16. *Section 21.*—The words "any share thereof" are dangerous. According to the existing law, no landlord is bound to recognize the transfer of a share. The transferree may indeed be registered jointly with other persons interested, but there can be no registration of a transfer of a specific share. The provisions of section 48 of the Commission Bill, that a landlord shall not be bound to give effect to a division of the rent, ought not to have been omitted from the Bill. There is no provision expressly declaring the effect of a transfer upon the liability for rent, and the exact point of time from which the change of liability is to take effect. Section 48 of the Commission Bill contains specific provisions on these points. The want of them in the Bill will assuredly cause litigation.

Anomalous position of a Raiyat holding at Fixed Rates.

17. *Section 23.*—I doubt if the provisions of this section will work successfully. The raiyat holding at fixed rates will be partly a tenure-holder and partly an occupancy-raiyat. He will have the rights of a tenure-holder with respect to the transfer of, and succession to, his holding; and as the result, the landlord will have no right of pre-emption. Then as *transfer* includes *gift* (section 3 (10), he will not be fettered by the provisions of section 35. His rent may, however, be realized by distraint. Presumably it is intended that he shall be an occupancy-raiyat as regards all other incidents; and, therefore, his sub-tenants will not be raiyats, but under-raiyats. I am afraid that from this admixture of relations there will arise much uncertainty and consequent litigation.

No Settled Raiyats in Government estates.

18. *Section 25.*—The term "village" is defined in section 27, and may include lands held by Government. The term "estate" is defined in section 3, and, as already pointed out, will not include certain lands held by Government; but with reference to the words "held as a raiyat," it follows from sub-section 3 of section 5 that in certain Government estates there can be no

settled raiyats. This provision in sub-section 2 is no doubt necessary to cover the time between the introduction of the Bill and the passing of the Act; but nevertheless I am afraid that when its object and meaning are understood, it will induce a large amount of perjury.

Injustice of the presumption that every Raiyat has held his land for twelve years.

19. *Section 26* (2).—I cannot conceive anything more dangerous than the presumption here proposed to be created—namely, that when it is proved or admitted that a person holds land as a raiyat, it shall, as between him and his landlord, be presumed that he has held such land or part of it for twelve years. It proceeds upon the assumption that the zemindar is in a better position to prove that a raiyat has *not* held land than the raiyat himself to prove that he has held it. I doubt the truth of the facts upon which this assumption proceeds in the case of any land, and in the case of an auction-purchaser the assumption is without foundation. In view of its effect upon this latter class, this presumption must depreciate the value of property brought to sale under the Revenue Law, or in the execution of decrees of the Civil Courts. Then, again, take the case of co-sharers who are on unfriendly terms. A batwara or partition takes place, let us say, between *A* and *B*. A raiyat who holds land in *A's* portion of the original estates for twelve years becomes a settled raiyat and entitled to a right of occupancy in any land which he may acquire in *B's* portion and hold for any time however short. How is it more easy for *B* to disprove the fact of the raiyat's holding lands for twelve years in *A's* share, of whose accounts and whose affairs *B* has no knowledge, than for the raiyat to prove the fact of his having held such land for the full period of twelve years? The use to which in a case like this the provisions of the proposed law will be put is very obvious to persons who have practical experience of the country. The effects of the proposed provisions as to the settled raiyat in some of the large zemindaris will be astounding. Take the case of a zemindari partitioned thirty years ago, the shares of which have since passed into the hands of purchasers for valuable consideration. A raiyat holds two cottahs of land in one of these shares. It is not the interest of his landlord to contest the question whether he has or has not held for twelve years. He therefore becomes a settled raiyat. He now takes fifty bighas within the share of a wholly different landlord, who has no connection with, and no knowledge of, the share in which the raiyat has held the two cottahs, the facts of holding which is concealed by him until he gets into possession of the larger area. He may be let into possession of this larger area by an agreement under the provisions of section 56; but the moment he is in, he discloses the fact of his previous possession of a couple of cottahs of land in a place perhaps 20 miles distant; and under the proposed Bill he at once acquires a right of occupancy in the larger area, together with all the advantages of this possession—nay further, the law will not permit him to contract so as to escape perpetrating this injustice upon the landlord. Even where there has been no possession of any other land, what a temptation is offered to prove by bazar witnesses or friendly neighbours the possession of a cottah or two, and how easy will be the proof when facilitated by the presumption of sub-section (2). Then consider those cases in which a zemindari, like the Bardwan zemindari, has been let out in *patni*. The zemindar has become a mere annuitant; the real benefical interest is in the *patnidars*; but any raiyat by holding or pretending to hold a few cottahs of land under one *patnidar* and concealing this fact may acquire a right of occupancy in any quantity of land within another *patni*. I am afraid that the effect of section 26 (2) taken with section 25 (1) will be in a very short time to transfer the real ownership of the land from the zemindars to the raiyats.

Injustice of the proposed provisions as to the Settled Raiyat.

The Law of Inheritance applied to the Settled Raiyat.

20. Then the effect of sub-section 4 will be that a person who to-day takes fifty bighas of land as a non-occupancy raiyat under the provisions of section 56, and to-morrow inherits under the Muhammadan Law a fractional share of a single cottah, will at once be converted into an occupancy-raiyat of the larger area, and the parties may not avoid this result by contract; and it will be remembered that this result will take place, although the raiyat may be a collateral heir very distantly related to the late owner of the single cottah. Further, the effect of section 29 (1) will be that a man who holds a cottah of land and has ten sons is able to create ten settled raiyats, every one of whom will at once acquire a right of occupancy in any land of which he can obtain possession in any *patni taluk* or share of an estate which constitutes, or within the last thirty years has constituted, a portion of an estate as large as an English county. The inevitable result of these provisions will be to transfer the proprietorship of the land from the ancient zemindars, or those who have become *bonâ fide* purchasers of their rights for valuable consideration at Revenue sales, to an ignorant peasantry, unskilled in agriculture, constitutionally indolent, and wanting in thrift, abstinence, and every quality which has made peasant proprietorship succeed in those countries in which it has succeeded. If it be the intention of the Government to carry out this policy, results and consequences being disregarded,[1] it might be carried out by a much simpler and more direct method than

Fatal consequences likely to ensue.

[1] The *Statement of Objects and Reasons* contains the following passage:—"That the power of transferring and sub-letting which the Bill recognizes may in time lead to a state of things, in which the great bulk of the actual cultivators would be not occupancy-raiyats, but under-raiyats, with but little protection from the law, is indeed within the range of possibility; but if such a state of things should ever arise, we may rest assured that the Government of the day will know how to deal with it." See the same observation repeated in Council—*Supplement to the Gazette of India* of 3rd March 1883, page 291. I deprecate legislation in this spirit of "*Aprés moi le déluge.*"

that proposed by the Bill, which will, I am afraid, create a vast amount of chicanery, perjury, litigation, and exacerbation of feeling between classes, while bringing about a similar result in a more indirect manner, and by a mere tedious process. With reference to sub-section (7), it should surely be made a condition precedent that all back rents be paid up.

21. *Section 29.*—This is a change in the existing law as contained in clause (*a*) Example 4, section 19 of the Commission Bill.

Right of Occupancy in khamar land.

22. *Section 30.*—Is it intended that a right of occupancy in *khamar* land may be acquired in those cases in which such land is not held under a lease for a term of years or under a lease from year to year? If this is intended, I think it desirable that it should be said so in so many words. There has been considerable doubt about the meaning of the law as at present worded.

Cutting down Trees.

23. *Section 31, Clause (a).*—Evidence of local custom is, as a general rule, not forthcoming. I would leave this matter of cutting down trees to be settled by agreement between the parties, merely providing that trees not planted by the raiyat shall not be cut down by him without the consent of the landlord. Under the provisions of section 210 (*b*) the parties will be unable to make their own agreement about the matter. Under the provisions of The Irish Land Act a tenant can cut timber planted and registered by himself or his predecessor in title.

Ejectment for non-payment of rent taken away in the case of Occupancy Raiyats.

Clause (d).—It would appear that an occupancy-raiyat cannot be ejected for non-payment of rent. This is not enacted in so many words in the present Bill, but it follows by necessary implication from its provisions (see section 58 which allows a non-occupancy raiyat to be ejected for non-payment of arrears of rent, and section 178, which provides for the sale in execution of a transferable holding). I think the landlord should have the option of ejecting an occupancy-raiyat or bringing his holding to sale in execution. There are parts of the country where an occupancy holding, if offered for sale, will fetch little or nothing; and arrears will be irrecoverable unless ejectment is allowed, the apprehension of which is cogent to compel payment.

Effect of Occupancy Holdings being made transferable without restriction.

Clause (f).—I think the occupancy holding ought to be made transferable. In so saying I merely repeat the views expressed by me many years ago. I consider, however, that one limit ought to be put upon the right of transfer, *viz.*, that the right of occupancy shall continue to exist only when the transferree is a *boná fide* cultivator. I entertain a very strong idea that the benefits included in a right of occupancy should be limited to the actual cultivators of the soil. In so far as they are so limited, anything that is taken from the proprietary right of the zemindar is given as the reward of honest labour. Having considered the whole subject for many years, I cannot see the expediency or policy of taking away any portion of the zemindars' proprietary right in order to confer it upon another class, which consists of mere receivers of rent, and does not create capital by the application of labour to the soil. There is no evidence to show and no reason to expect that any class other than the class of actual cultivators will make a more beneficial use of the proprietary interest than these zemindars have hitherto done. It is supposed that the class of actual cultivators will be sufficiently protected from rackrenting by land jobbers, if limits are placed upon enhancement. But a little reflection will show that rent may be raised in two ways, either by increasing the annual amount payable, or by taking a fine or *salami* upon the creation of a tenancy. Such fine or *salami* is merely a payment of rent in advance. When restrictions are put upon increasing the amount annually payable, if the amount so limited is less than a competition rent, it follows that the tenant has a beneficial interest equivalent to the difference between the rent actually paid by him and the competition rent. This beneficial interest will find a ready market. There can be no doubt that since Act X of 1859 was passed, this interest has become a saleable commodity, and I have known it to sell from seven to twenty times the annual rent paid. In Ireland it is well known that tenant-right in the North has been sold for as much as thirty times the annual rent (see *Landholding*, p. 287). Now, if the occupancy-right is transferable to the members of every class of the community, the competition of capital is at once introduced. The improvidence and thriftlessness of the *raiyat* class are undoubted. Secured in their position, they will indulge their national indolence, and nothing will be laid up for the future. In years of drought and scarcity they will borrow. Their holdings will be mortgaged, and high interest will swell the incumbrances until a sale becomes inevitable. A large number of holdings will thus come into the market. The *mahajan* and the prosperous pleader will successfully compete with the landlord, and, having purchased the occupancy-right, they will virtually secure a competition rent by exacting a fine or *salami* from every tenant whom they will admit to possession. In the face of this custom of *salami*, which is a custom of the country and in accord with the ideas of the people, a provision like that contained in section 42 of the present Bill will be absolutely nugatory, and the speculative purchaser will find a hundred ways of evading the restrictive provisions of the law, while the raiyat whom the legislature desires to protect will aid and abet him in avoiding these provisions. If the purchasing class be limited to actual cultivators, we shall at once get rid of the risk of a competition rent being indirectly introduced amongst a mere agricultural community, the pernicious

effects of which have been remarkably illustrated in other countries; and, by encouraging the actual cultivator to buy, we shall give some stimulus to that thrift, the absence of which is at present such a remarkable feature in his character.

24. *Section 31, Clause (g).*—I am strongly opposed to any direct legislative recognition of sub-letting. Sub-letting creates middlemen, and middlemen are the curse of a purely agricultural community. The Bill, we are told, aims at the creation of peasant proprietors; but in those countries in which peasant proprietorship has failed, there has been no greater cause of failure than sub-letting.

Danger of Legislative recognition of Sub-letting.

Clause (h).—I think it deserves serious consideration whether a right of occupancy should be heritable by collaterals or by heirs other than those in the direct line of descent. Those arguments which have been advanced with remarkable ability against wealth passing to distant relations may be justly considered in connection with the subject now in hand. Then, again, there should be a distinct provision that a holding shall descend entire, and that the only mode of partition between heirs shall be by selling the holding and dividing the sale proceeds. It is idle to attempt by legislation to create anything in the nature of peasant proprietorship and so secure the well-being of the agricultural class, if continued sub-division of land is allowed, the inevitable result of which must be to create a pauper population, each family being in possession of a plot of land barely sufficient for its maintenance during the best years, while, in years of deficient crops and famine, starvation or Government relief are the only alternatives.

Danger of sub-division by Inheritance.

25. *Section 32.*—I think the zemindar ought to have a right of pre-emption in the following two cases also—*first*, in the case of a bequest to a person other than an heir, or, according to my view, other than an heir in the direct descending line; *secondly*, in the case of a gift to a person other than such heir. Having regard to the ways and devices of the people of this country, it is futile to give the zemindar a right of pre-emption in the case of transfer for a consideration, while the same right is denied in the case of a gift. The only result that will ensue will be that the transaction will be embodied in the form of a gift while the money will be paid in secret, and each of the parties to the transaction will be afforded a facility of cheating the other.

Zemindar's right of Pre-emption incomplete.

Sub-Section 5.—If the raiyat having sold his occupancy-right goes away and quits the village, there will then be an abandonment case; and if the transferree fails to maintain his ground against the landlord, the transferrer will return and make his possession good.

Sub-Section 6.—How are the Assessors to be remunerated? It is scarcely to be expected that they will give their services for nothing. If they ostensibly do so, it requires but little experience of the country to understand how their remuneration will be secured at the expense of their impartiality.

26. *Section 34.*—I see no objection to the provisions of this section, which substitute the landlord for the mortgagee upon foreclosure.

Section 35.—I do not see the use of serving notice of the registration upon the landlord unless his right of pre-emption is extended to the case of gift. The meaning of the provision in sub-section 4, which is not very clear, appears to be that a Muhammadan may make a gift according to the Muhammadan law without a registered instrument. If this is what is really intended, I think the exception is an unfortunate one.

27. *Section 36, Clause (c).*—"authorized in writing"—Presumably the authority must be given before the transaction. The result will be that for a sufficient consideration a written authority will be ante-dated. If this provision be retained, the writing should be registered.

28. *Section 37.*—I feel bound to say that I consider the provisions of this section to be wholly inexpedient. They will assuredly give rise to an immense amount of litigation. At whose instance is the registration to be effected? Within what time after the sub-letting of more than half must the application for registration be made? Suppose that half is sub-let in 1884, that the application for registration is made in 1885, and the occupancy-raiyat proves that in 1885 less than half is sub-let, what will be the result? The probable effect of the provisions of this section is well discussed in a paper which has been sent to me called "Notes on the revised Tenancy Bill, 1884, by the East Benga Landholders' Association." *First*—the converted occupancy-raiyat will not be liable to distraint. *Secondly*, he can be ejected only upon the ground that he has broken a conditionl consistent with the provisions of the Act, and on breach of which he is by contract liable to be ejected. In ninety-nine cases out of a hundred there will be no contract, and therefore no liability to ejectment. *Thirdly*, he can transfer his interest without the restrictions as to pre-emption, &c., proposed by section 32. Against these advantages may be set the disadvantage of being liable to enhancement to the extent of double his previous rent, while he can enhance his own tenants merely to the extent of Rs. 25, or in some cases 50 per cent. In all probability this latter disadvantage, if the tenant fairly considers his position, will go to balance

Inexpediency of the provisions as to converting into Tenure-holders Occupancy-raiyats who sub-let half their holdings.

the three advantages just mentioned. The tenant himself will thus scarcely move in the matter of registration. Then can the landlord compel him to register as a tenure-holder? If not, will it be for the interests of the sub-tenants to do so? No doubt they will occupy a better position when converted into occupancy-raiyats than they have as non-occupancy-raiyats even under the provisions of Chapter VI of the Bill But without the pressure of circumstances they will not move for the mere purpose of gaining a prospective advantage.

The Actual Cultivator should be protected whether he holds under a Zemindar or a Middleman.

29. It appears to me that if we are to legislate in the true interests of the agricultural population, the best mode of dealing with this question is to determine the size of a holding, the actual cultivation of which is sufficient to maintain an average family in comfort, to maintain the right of the original tenant in a holding of this size, and to give a similar right to the sub-tenants of the remaining portions of the original holding. By this course, the position of the actual cultivator of the soil will be uniformly secured. I can see no reason why the proprietary interest of a zemindar should be injuriously affected by legislation for the benefit of a middleman, while the corresponding interest of the same middleman is protected to the detriment of the actual cultivator of the soil under him. On what principle can it be contended that the position of a Rungpore jotedar who holds one thousand bighas of land, fifty or a hundred of which he cultivates himself, while he sub-lets the remaining nine hundred, should be protected as against the zemindar, whilst the tenants of the nine hundred bighas, who are the actual cultivators of the soil, and who are as much deserving of legislative care and protection as the jotedar himself, are placed more at his mercy than he is left as regards the zemindar? If in the interests of the cultivator of the soil it is desirable that the ancient land-marks of property should be altered in these Provinces, let the actual cultivator be equally protected in whatever position he may be found, whether as the tenant of a zemindar or of a middleman. Under the latter, indeed, he stands in greater need of protection, for the middleman is a smaller, and therefore a more grasping and tyrannical landlord. I am further of opinion that no raiyat ought to be allowed to acquire a right of occupancy in more land than is sufficient for the maintenance in comfort of himself and his family. When he, obtains more than this, he sub-lets the surplus and becomes a middleman in respect of this surplus. It is impossible to argue that he is a better landlord than the zemindar, or that the community at large are benefited by the transfer to him of a portion of the zemindar's proprietary right. When I speak of the actual cultivator of the soil, I take it for granted that proper provisions will be made for *purda-nashins* and persons disabled by old age or other accidental cause from conducting the work of cultivation with their own hands—provisions in fact similar to those contained in the proviso to section 38. As to clause (*a*) of this proviso, what is temporary absence? Does it include the case of a Cuttack raiyat who serves as a chaprasi in Calcutta long enough to earn a Government pension?

Inexpediency of the Enhancement Provisions of the Bill.

30. *Section 41.*—The provisions of this section do not recommend themselves to me. According to the proposed provisions of the Bill, rent can be enhanced in one of two ways only, either by a registered contract under section 41, or by a suit under section 43 and the following sections. Any enhancement by a registered contract can in no case exceed 25 per cent., and, unless the term of the contract be for at least fifteen years, the enhancement cannot be for more than 12½ per cent. An enhancement by suit may in certain cases be to the extent of 50 per cent. The necessary result of these provisions will be that the zemindar will have a direct interest in litigating rather than in making an amicable settlement. The provisions of the Bill, therefore, encourage instead of discouraging litigation. This result has been seen and fairly commented upon by the East Bengal Landholders' Association in the paper to which I have already referred. Then again, in the case of enhancement by registered contract, no distinction is made between the different grounds of enhancement. In the case of enhancement by suit, such a distinction is made. The extent of the enhancement on the ground of prevailing rates is fifty per cent., while in the case of enhancement on the ground of rise in price it is twenty-five per cent. I cannot understand any reason for making this distinction in the one case rather than in the other. I think enhancement by registered contract ought in all cases to be allowable to the same extent as enhancement by suit. Where the parties agree amicably, the expense of litigation and the exasperation of feeling created thereby are avoided.

Discretion entrusted to officer registering contracts of enhancement inexpedient and dangerous.

31. *Section 41 (2).*—I think the remarks of the East Bengal Landholders' Association upon these provisions are deserving of consideration. It is in my opinion inexpedient and inadvisable that the power contemplated by this section should be entrusted to the registering officer. Is he to certify that the contract is according to the provisions of the Act? Will his certificate be conclusive, or may the whole question be re-opened as a basis of further future litigation? What guarantee is there that he will read or be able to understand the provisions of this complicated enactment? How is his decision, if patently wrong, to be reviewed or set right? The check and supervision contemplated by these provisions will be unsatisfactory and irregular in its action.

32. *Section 42.*—The words "previously held at a money rent" are very indefinite. Do they mean at any time previously, however remote? There ought to be some limit in point of time.

33. *Section 43 (a).*—The substitution of "occupancy-raiyats" for "raiyats of the same class" makes this ground of enhancement more definite, but at the same time it cuts down the general words of the previous law and excludes considerations which the Courts were before bound to deal with. The substitution of "staple food crops" for "stable crops" in clause (*b*) does not recommend itself to me. At page 11 of the paper of the East Bengal Landholders' Association already referred to, there are objections stated to this change of phraseology which are, I think, entitled to consideration. According to the common law of the country, the crops which land was capable of producing have always been an element in fixing the rent. Lord Cornwallis expressly contemplated the raising of rents by inducing the raiyats to cultivate the *more valuable articles of produce* (see *Landholding*, p. 540). Some of the most valuable crops can be grown only in particular localities, or upon high ground not subject to inundation. The higher rents which the landlord received for these more valuable lands were a set-off against the lower rents paid for lands capable of producing one crop only during the year, or subject to inundation. No arguments have been advanced to explain the grounds upon which crops other than food crops are in future to be excluded from consideration in calculating enhanced rent. I am therefore unable to form any opinion as to the value of the reasons which have led to the change. But the change itself appears to me unnecessary and unfair to landlords.

Restriction of Staple Crops to Food crops inexpedient.

34. The ground of enhancement on account of rise in prices, as stated in the Bill which I drafted for the Commission, contained the following words: "from causes not merely temporary or casual," and I think they ought not to have been omitted.

35. The two cases provided for in clauses (*c*) and (*d*), namely, the case of an improvement effected by the landlord, and the case of fluvial action, are a substitution for the old ground of enhancement, that the productive powers of the land have increased otherwise than by the agency, or at the expense of the raiyat. Now, it is manifest that the general language of the old ground of enhancement included cases other than the two cases which now find a place in the Bill; and this being so, the landlord's right to enhance has been seriously cut down. I cannot approve of the change; and I think here also the objections raised by the East Bengal Landholders' Association, at page 12 of their paper, are entitled to a hearing. I think the term "fluvial action" will be found in practice to be so vague as to create much litigation. If a river changes its course and flows 30 miles off, so as gradually to render lands, which were low and subject to inundation, high and capable of bearing the more valuable crops, is this the result of fluvial action? Here the lands may not produce a greater quantity of the former crops—indeed they may no longer be fit to produce those particular crops at all; but they may have become fit to produce other and more remunerative crops.

Right to enhance on account of Increase in the Productive Powers of the soil cut down in the Bill.

36. *Section 44 (a).*—I think the limit of 50 per cent. put upon enhancement, on the ground that the rent previously paid was below the prevailing rent, is too low. It inflicts a direct punishment upon indulgent landlords, who have not raised their raiyats' rents in past years. If the prevailing rate be Rs. 2 per bigha, the landlord, who has been satisfied to receive Re. 1 per bigha from his tenants, will be precluded from obtaining more than one rupee eight annas in future, while the more exacting landlord, who has already raised his rents up to one rupee eight annas or more, will be able to exact the full prevailing rate. I may refer to what has occurred in Ireland to show what will be the probable consequence of this legislation (see *Landholding*, pp. 313-314). At page 13 of the paper of the East Bengal Landholders' Association there will be found an illustration which fairly shows how these provisions will work. See also the remarks at page 12 of the same paper. One result will be that in those parts of the country in which during recent years the raiyats have successfully combined to resist the payment of a reasonable increase, the Bill in its present form will reward instead of punishing this combined resistance. As to clause (*d*), what if the land, the rent of which is sought to be enhanced, be improved land and the prevailing rate be the rate for improved lands? See the criticism at page 14 of the East Bengal Landholders' Association's paper.

Limit of enhancement to Prevailing Rate too low.

37. *Section 45 (a).*—The words "during such other quinquennial period as it may appear equitable and practicable to take for comparison" do not recommend themselves to me. Taken literally they involve an examination of all antecedent quinquennial periods in order to discover which of them should be considered, and they in consequence open up rather a wide field of enquiry. I prefer the words of the original Bill—"at the time when the rent was fixed or at any subsequent time."

Section 45 (b).—The limit of four annas in the rupee, or 25 per cent. upon enhancement on the ground of rise of prices, is, I think, too low. A successful suit will scarcely repay the landlord the expenses incurred in litigation; and a landlord, who is met by determined resistance on the part of the whole body of his tenants, and has, in consequence, to take them all into Court, will, upon the chances of the entire litigation, be undoubtedly a loser. I know of a remarkable instance in which European capital was spent upon enhancement litigation, and although the enhancement obtained was much

Enhancement of twenty-five per cent. on the ground of rise of prices too low.

higher than 25 per cent. on the old rent, the general result was disastrous loss. Then, if we look at the enhancement in Government estates, a notable instance of which is pending before a Bench of the High Court as I write, we shall see that the limit which the Legislature proposes to provide as fair and equitable for the zemindars has been exceeded by the Government in its capacity of landlord. The additional check of the proportion rule, proposed by clause (*g*), will be found wholly unnecessary in practice, if the 25 per cent. limit is retained.

Enhancement on account of Landlords' Improvements.

38. *Section 46.*—The permanence of the increase of the productive powers of land is an element which ought not to be left out of consideration. The provision contained in clause (*c*), allowing the Court to reconsider its decision, will be a fruitful source of uncertainty and consequent litigation. Finality in the settlement of rent is beyond all things desirable and necessary, and under this provision there will be no finality.

39. *Section 47.*—I think the restriction in clause (*b*) ought to be omitted, that contained in clause (*c*), namely, that the landlord shall not get more than half of the value of the net increase in the produce, being quite sufficient for all equitable purposes.

General provision as to enhancement being fair and equitable.

40. *Section 48* is another of those vague and indefinite provisions which abound in the Bill, and which are sure to lead to protracted discussion and litigation, where speedy finality is especially desirable. The imagination of a Bengali pleader will invent a thousand reasons why any enhancement is unfair or inequitable. As urged by the East Bengal Landholders' Association, the application of these general provisions to cases of enhancement up to the prevailing rate and on the ground of the landlords' improvement, is *primâ facie* unfair.

Tenants should be allowed to contract for payment of increased rent when Landlord makes improvements.

41. *Section 49* cannot justly be applied to a case of enhancement on the ground of landlords' improvements. No limit of enhancement has been expressly provided for this ground of enhancement; but, none the less, I think it extremely unlikely that any landlord will invest capital in improvements upon the chance of the precarious return which is likely to be possible under the provisions of the Bill. In this, beyond all other cases, it might seem that the landlord and his tenant ought to be left free to contract—that it should be open to the landlord to say to his tenants—"Give me such an increase of rent, and I will construct such an embankment, or carry out such irrigation works, or other improvements." The provisions of section 41 are, however, a bar to any contract for the payment of more than 12½ or 25 per cent. increase on the previous rent, and in the majority of cases this return will be insufficient to induce the investment by landlords of capital in the improvement of the soil.

Successive Enhancement Suits.

42. *Section 50.*—I would substitute *ten* for *fifteen* years. Moreover, a previous suit should not be a bar to a subsequent enhancement suit, unless there had been a final decision upon the question of enhancement. The dismissal of a suit on some technical ground is no reason for prohibiting a second suit within the time limited.

Abatement of rent.

43. *Section 51, Clause* (*a*).—I prefer the language of the old law, *viz.*, that the productive powers of the land have decreased from some cause beyond the *raiyat's* control. Here, as in other portions of the Bill, I think it is inadvisable without good reason to alter the old and accepted phraseology.

Clause (*b*).—In accordance with what I have already said, I would not limit the crops to staple *food* crops.

Preparation of Price-Lists.

44. *Section 52.*—I presume these lists are to be prepared annually, though the section does not say so in express terms. As to *sub-section* (2), I doubt the wisdom of any attempt to prepare Price-Lists for past times. It is said that materials for such Price-Lists exist in the statements of prices published regularly by the Bengal Government during the past twelve years. Those who know the manner in which, and the agency by which, this information has been collected, will scarcely suggest with seriousness that it should be accepted as the basis of Price-Lists, which are proposed to be made conclusive. As to *sub-section* (4), I think Price-Lists should not be made conclusive: they should not be presumptive evidence only. With reference to *sub-section* (5), fifteen days is much too short a time. It should be a month at least.

45. *Section 53* (4).—If clauses (*a*) and (*b*) become repugnant *inter se*, which shall prevail? As to (*b*), why has the period of *ten* years been chosen? An enhancement once made is to hold good for fifteen years, and in calculating enhancement on the ground of rise of prices (section 45) (*a*), a period of five years is taken. These various periods do not appear to consist with any settled principle.

46. *Section 57.*—I am unable to see the justice of the restriction proposed to be placed upon the enhancement of the rent of a non-occupancy raiyat. Since the time of the Permanent Settlement, the zemindars have enjoyed the unrestricted right of letting, in any manner they pleased, lands not in the possession of the protected classes of raiyats. These protected classes now aggregate 90 per cent., or according to the lowest calculation 70 per cent. of the raiyats. This section and section 42, which prohibits a zemindar from taking from a new tenant a higher rent than that paid by a previous holder, are serious encroachments upon the right which the zemindars have enjoyed for nearly a century—encroachments, for making which I consider that no case has been established. I have shown elsewhere (see *Landholding*, p. 517 to 523) that the Legislature in 1793, while reserving to itself the right to protect the raiyats when necessary, deliberately left to the zemindars the power of letting the remaining lands of their estates in whatever manner they might think proper; and that this right has been enjoyed from 1793 down to the present day.[1] It was deliberately saved and left untouched by the Legislature in 1859 (see section 7 of Act X of 1859), and again in 1869 (see section 7 of Act VIII (B.C.) of 1869). If further proof of the zemindars' right is wanting, it will be found in the cases given in the *Appendix* to this Minute, many of which show that the zemindars exercised, and had the authority of the Courts for exercising, the power of dealing as they pleased with lands relinquished or never occupied by raiyats of the protected class. If it be true, then, that the right of letting the remaining lands in any manner they pleased was conferred upon the zemindars in 1793, and has been exercised and enjoyed ever since for a period of ninety years—before that right can be taken away a strong case for taking it away ought to be shown, and I am of opinion that no such case has been shown or established. If the real proprietary interest in 90 per cent., or even 70 per cent., of the land has been transferred to their tenants, there is very little left to give landholders an interest in the management of their property, and if this little that is left is also taken away, zemindars will be converted into mere annuitants saddled with onerous duties connected with property, in the management of which it will be impossible for them to take any real interest; and the result must be injurious to the best interests of the country.

Unfairness of restricting Enhancement of Rent of Non-Occupancy Raiyat.

47. *Section 58.*—Reading this section with section 98 there can be no ejectment except after suit and decree; and reading clause (*a*) with the other portions of the Bill, no raiyat other than a non-occupancy raiyat or an under-raiyat is subject to ejectment. It follows from clause (*c*) that a non-occupancy raiyat admitted to possession verbally or by a written unregistered lease can never be ejected as long as he pays a fair and equitable rent determined by the Court; and the consequence of this and other provisions of the Bill will be that all the land in the country will, in a very few years, pass into the possession of occupancy raiyats and Middlemen; and the Zemindars having no remnant of property left will have no interest in their estates.

Under the provisions of the Bill all the land in the country will pass into the hands of Occupancy-Raiyats and Middlemen; and Zemindars will have no interest in their property.

48. *Section 60 (1).*—When the agreement is tendered to the raiyat out of Court, he will deny the tender, and when it is served through the Court, he will deny the service, and the experience of enhancement notices shows how extremely difficult it is for the landlord to prove tender or service. The result will be that ejectment suits will rarely, if ever, prove successful.

Ejectment will practically cease.

49. *Section 60 (9).*—The enhancement of the rent of a non-occupancy *raiyat* being limited to eight annas in the rupee or fifty per cent., he is at once placed in the position of an occupancy-raiyat if he agrees to pay the enhancement so fixed.

50. *Section 62.*—It is impossible to think that the effect of this provision upon some of the *raiyats* in Bengal has been seriously considered, more especially as the Bill contains no saving of existing contracts. Some of the Rungpore jotedars, who have been decided to be raiyats, now receive from their under-raiyats rent four-fold, or many more times greater than the rent which they pay to their landlords. It can scarcely be intended to destroy at once the relations between these parties, and to place the under-tenants of the jotedars who are the actual cultivators of the soil in the position of under-raiyats. No information has been given as to the *data* upon which 50 per cent, and 25 per cent. have been calculated, and like many similar figures inserted in the Bill they seem to have been assumed upon purely conjectural grounds. I think it is a very dangerous experiment to legislate in this way without some exact information as to what the effect will be upon the classes concerned.

Limit upon Rent exigible from Under-Raiyats.

51. *Section 63.*—Three months' notice is quite sufficient.

[1] In 1815 the Government of India wrote thus to the Court of Directors: "In like manner the zemindar in this country, in holding his estate subject to certain restrictions with respect to the rights of the *resident raiyats*, does not the less enjoy the power of managing those lands on which no resident raiyats are established, in any mode he may judge proper .... of providing for the cultivation of waste lands; of improving the general condition of the estate; and finally of enjoying the surplus revenue, whatever it may be, after paying the regulated assessment to Government." [Para. 11 of Revenue Letter from Bengal, dated 7th October 1815—I *Revenue Selections*, p. 295.]

52. *Section 64 (2).*—I think the following words of the old law have been injudiciously omitted :—"unless it be proved that such tenure or holding was created or such rent fixed at some later period." The expediency of the proviso will altogether depend upon the provisions made for registration and the nature of the enquiries required before registration. Unless and until these are known, it is premature to pronounce any opinion upon the proviso. As to *sub-section 5*, what is the meaning of the words "determinable at the will of the landlord," and what tenancy allowed by the Bill is contemplated by these words?

Twenty years' Presumption taken away in the case of registered tenancies.

53. *Section 65.*—These provisions are not as clear as they might be. As to the rent, I take it that it is meant to reproduce the provisions of the latter portion of Art. 42 of the Digest, *viz.*, that in case of dispute, the rent previously paid by the raiyat shall be deemed to be fair and equitable. If no rent has been paid during the last preceding agricultural year, which is the case very often, how can the tenant in the words of the section be presumed to hold at that rent?

Presumption that tenant holds at rent previously paid.

54. *Section 66.*—It is a well known custom of the country, especially in the case of tenures, for the title-deeds to contain an express stipulation that there shall be no increase or decrease of rent for alluvion and diluvion. In the case of tenures section 217 will probably save the custom; and as section 210, clause (*f*), prohibits any contract for the non-reduction of rent on account of the diminution of the area of a holding only, it will probably follow that there may be such a contract in respect of a tenure. All this, however, has to be evolved from an examination of the details of the present Bill, and doubtless it will be finally settled by litigation only. I think that it would have been much better to state it in express language, as was done in the Commission Bill. Then in the case of holdings (as already pointed out, the definition of "holding" does not limit the term to raiyati holdings), section 210, clause (*f*), prohibits a contract, and the effect of this prohibition read with section 217 will probably be to destroy the custom also. I cannot see the benefit of this legislation in the case of large holdings like the *jotedari* holdings of Rungpore. Further when there is a stipulation in a lease or vernacular pottah that there is to be no increase or decrease of rent for alluvion or diluvion, will the stipulation as to diluvion become null and void as against the landlord, whilst the stipulation as to increased rent not being demandable for alluvion is maintained to his prejudice? On this point also, I think, the observations made by the East Bengal Landholders' Association at page 16 of their paper are entitled to consideration. In *sub-section* (2) there is one principle for assessing rent upon land gained by alluvion, while *sub-section* (3) prescribes a different principle for abatement of rent in the case of diluvion. In many parts of Bengal tenures and holdings in the course of years are wholly diluviated and re-formed again. Consider the effect of these provisions upon a holding or tenure which has undergone this process. The old rate of rent will entirely disappear, and the new rent will be a rent calculated under *sub-section* (2) upon a wholly different principle. Then there is another case which does not appear to have been contemplated, that is, the case of a tenure or holding which for a time wholly disappears. If neither custom nor contract is to prevent the raiyat from claiming abatement to the full extent of his rent, and if in consequence he pays no rent while the holding is submerged, can he have any claim to the possession of the same holding when it is reformed?

Alteration of Rent upon alteration of Area. Defects in the proposed provisions of the Bill.

55. *Section 67 (3).*—How is the Local Government to be compelled to take these matters into consideration, and what will be the consequence if they are not considered?

56. *Section 68 (2).*—Is it intended that the Local Government is to have the power conferred by the proviso, generally, or in particular local areas only? There may be parts of the country where payment of rent by postal order may be possible or successful, whilst in other parts it would be neither.

57. *Section 70.*—The following very important words in section 57 of the Commission Bill have been omitted, *viz.*, "or money recoverable as rent." Under section 47 of the Cess Act, IX (B.C.) of 1880, landlords are entitled to recover cesses as rent. Is it intended that the tenants who pay these cesses are not to have the benefit of the provisions of the Bill as to receipts and accounts?

Receipts, &c., should be demandable for Cess paid by tenants.

58. *Section 72.*—The forms of receipt are very elaborate, and the cost of maintaining these receipts and accounts will be no unimportant item in collection charges. When to this is added the penalty provided by *sub-section* (3), the observation naturally occurs that a degree of care in the management of their concerns is exacted from landlords, and their affairs are subjected to a degree of scrutiny, which will make their position onerous as compared with the position of merchants or other members of the community. It is impossible to avoid reflecting that the imposition of the duties contemplated by the Bill can be justified only on the supposition of substantial benefits being granted or maintained; and if these benefits are wanting, the justification for the imposition of onerous duties

Bill increases and enforces Zemindars' duties, while it impairs their privileges.

fails. When we say that property has its duties as well as its rights, we imply that rights and duties are correlative; and that legislation which destroys or impairs the rights, while it increases or enforces the duties, must be obnoxious to unfavourable criticism.

Provisions as to Deposit of Rent are too wide.

59. *Section 73.*—The provisions of this section have been so enlarged that on reading them the idea at once suggests itself that it would have been a much simpler method of effectuating the intention of the Legislature to declare that every tenant may, whenever he pleases, deposit any um as rent instead of tendering it to his landlord. Clause (*a*) allows the tenant to deposit when he has tendered *money*, that is any sum of money on account of rent. The Bill of the Commission provided, and I think very properly provided, that a deposit could be made only when the full amount of rent due to date together with interest to date, had been tendered to the landlord. It is only on the supposition that the whole rent due to date has been deposited that the shorter period of six months' limitation can fairly be prescribed for a suit for further arrears claimed. If a tenant owes one hundred rupees as rent, and deposits ten rupees only, why should the landlord have only six months instead of three years to sue for the remaining ninety rupees? Then, under the provisions of the new Bill, the tender may apparently be made *anywhere*, the old law being that the tender must have been made at the Mal Cutchery or other place where the rent was payable. The importance of this provision is well understood by persons who have practical experience of the subject in hand. Clause (*b*) allows the tenant to deposit his rent when he has *reason to believe* that, owing to a dispute or ill-feeling, his landlord will be unwilling to receive it and grant a receipt for it. Then the officer who is vested with the power to receive these deposits has under section 74 (2) the power to examine the intending depositor in order to discover the ground or the reason of his belief. The application of these provisions to cases in which all the raiyats on an estate have combined against their landlord will necessitate the employment of a considerable agency, or (what is more likely) these elaborate provisions will remain a dead letter. Surely it would be much better, as I have already said, to allow the tenants to deposit their rent whenever they chose to do so. Then an application for permission to deposit may apparently be made at any time, even after a tender. The Bill of the Commission limited a certain time for each case, and I think the omission of this limit has been a mistake. The East Bengal Landholders' Association have pointed out that the limitation of six months for the recovery of arrears of rent from the *date of deposit* will involve hardship. The six months' time should run from date of *service of notice* upon the landlord. I feel constrained to say that the provisions of the Commission Bill on the subject of Deposit of Rent were in every way preferable to those of the present Bill.

60. *Section 75 (1).*—The notification should take the form of a list of the depositing tenants and the sums deposited by them. The section as it stands may seem to mean that there is to be a separate notification for each deposit, which will entail unnecessary labour and expense.

61. *Section 76 (1).*—These provisions appear to me to be too wide, and I think that they have been unwisely substituted for the specified cases set out in section 61 of the Commission Bill. Here, as in other portions of the Bill, the details suggested by practical experience have been discarded for general language pregnant with litigation.

62. *Section 77 (2).*—I do not understand the force of the words "this right shall be without prejudice to the landlord's charge under sub-section (1)."

Grant of extension of time to Raiyat about to be ejected.

63. *Section 78 (3).*—When may the Court exercise this power of extending the period of fifteen days—at the time of making the decree or at any subsequent period? I should be prepared to substitute one month for fifteen days; but I am opposed to allowing the Courts a discretion to extend the time for an unlimited period.

Provisions as to interest unfavourable to Zemindars.

64. *Section 79.*—Why should interest be allowed only from the expiration of the agricultural year and not from the dates on which the unpaid instalments of rent become payable? I think the last sentence of section 56 of the Commission Bill has been unwisely discarded. Interest ought to be made payable in every case in which the tenant was able to pay his rent and did not do so.

Appraisement or Division of Crops.

65. *Section 81.*—The provisions here contained are no doubt much briefer than those of section 84 of the Commission Bill, but I think that, in the case of officers new to the subject who have to administer the law, this brevity will be found to have been purchased at the cost or risk of error. The provisions of the Commission Bill were designedly amplified that those who ran might read. What is the "proper time" referred to in clause (*a*), and who is to fix it?

Assessors to appraise or divide the crops.

66. *Section 82.*—How are these Assessors to be paid, and from what classes are they to be taken? I apprehend that this provision as to assessors will completely fail.

Sub-section 5—"enforceable as a decree." By what Court or authority?

67. *Section 83.*—I think the provisions of this section are fair and reasonable, and the same remark applies to section 84 (2), which is new.

Possession of the crop.

68. *Section 85.*—Why have the other provisions of section 71 of the Commission Bill been omitted? Is it fair to retain those provisions only which impose penalties or disabilities upon the landlord class, while those provisions which declare their rights and privileges are omitted?

Omission of declaration of Zemindars' rights.

69. *Section 87.*—The term "letting-value" has been borrowed from The Irish Land Act of 1870, by which improvements are defined to be, amongst other things, any executed work which adds to the *letting-value* of the holding. But what will be the use of letting-value as a test in a country in which competition rent does not exist, or if it ever existed, will, as is proposed, be effectually done away with by this Bill? All these provisions as to improvements may no doubt look very well upon paper, but persons who have had practical experience of these Provinces know very well that there has as yet arisen no effective demand for any such legislation.

Provisions as to improvements not required in these Provinces.

70. *Section 89 (2).*—Where the occupancy raiyat and the landlord wish to make the same improvement, it is here provided that the occupancy-raiyat shall have the prior right to make it. The reason for this provision is given in paragraph 88 of the *Statement of Objects and Reasons* annexed to the original Bill in the following words:—

Occupancy-Raiyat declared to have the larger share in the proprietary right.

"The principle on which the sections of the Bill relating to this subject proceed is, that that party to a tenancy whose interest in the land preponderates should have the preferential right to improve and take the full benefits of his improvements."

The result is a legislative declaration that the occupancy-raiyat has the preponderating interest in the land, or the larger share in what is really the proprietary right.

71. *Section 90.*—Under these provisions a non-occupancy raiyat, a tenant, it may be, for a year only, is entitled to erect a suitable dwelling-house for himself and his family, and, under sub-section (2), he may call upon his landlord to make any other improvement that he considers desirable. The Bill in no way limits the size of the holdings to which these provisions are applicable, and it follows that an occupant of a single cottah may erect thereupon what he considers to be a suitable house. Then again as the singular includes the plural, the ten sons of an occupancy-raiyat may erect ten suitable houses for their ten families; and if these families multiply in the same proportion, the holding may be converted into a *basti* or village without the zemindar's permission and even against his will. Surely if these provisions are at all to be adopted, the application of them ought to be limited to holdings of a sufficient size to support an ordinary family in average comfort.

Improvements by Non-Occupancy Raiyats. Result of the provisions of the Bill as to the erection of Dwelling-Houses.

72. *Section 91.*—The provision for the registration of landlords' improvements is also borrowed from The Irish Land Act, which provides for the registration, by landlords and tenants in the Landed Estates Court, of improvements made by them respectively. I am afraid that this register, if it ever be established in these Provinces, will remain blank or nearly so. Zemindars are little likely to invest their capital in improvements upon the chance of obtaining the return afforded by the enhancement provisions of the Bill.

Registration of Landlords' Improvements.

73. *Section 93.*—If I understand the provisions of the Bill rightly, it is only a non-occupancy raiyat who can be ejected, and therefore it is only a non-occupancy raiyat who can make a claim under this section to compensation for improvements. The only improvements which he can make in accordance with the Act are the erection of a suitable dwelling-house, or some other improvement, which under section 90 (2) he has undertaken, because his landlord refused to carry it out. Who is the *predecessor in interest* of a non-occupancy raiyat? I am unable to discover from the provisions of the Bill. If these words be retained, it may be well to consider the difficulties that arose upon the construction of the term "predecessors in title" in The Irish Act of 1870 (see *Landholding*, page 317).

Compensation for Raiyats' Improvements.

74. *Section 93 (2).*—The effect of this restriction upon ejectment must be that landlords will, in very few instances, be able to evict non-occupancy raiyats. The provision that the raiyat is not to be evicted until the amount of compensation is paid is also borrowed from The Irish Land Act (see *Landholding*, page 307). But an examination of that Act will show that the class of tenants to which this particular provision applies in that country is altogether different from the non-occupancy raiyats of the Tenancy Bill. Then in Ireland the *unreasonable conduct* of the tenant is to be taken into consideration. Such a provision is wholly omitted from the Tenancy Bill, which is to be applicable to a

Hardships of the Provisions that a Non-Occupancy Raiyat may not be evicted until Compensation for Improvements has been paid to him.

country where unreasonable conduct on the part of agricultural tenants is certainly not less common than in Ireland. I think it will not be found that in any other country in the world, in which a tenant is allowed compensation for improvements, the landlord's power of ejectment is clogged with the provision that he cannot evict the tenant, though entitled so to do, until the amount of compensation has been actually paid. In Prussia a tenant is entitled to compensation only for improvements made with the sanction of his landlord (*Landholding*, page 57). In France, in the absence of an agreement, the tenant is not entitled to compensation for improvements (*idem*, page 65). In Wurtemburg a tenant may claim compensation for improvements by which the letting-value of the property is increased, but if the parties cannot agree to the amount, the tenant must bring his action against his late landlord (*idem*, page 74). In Baden, in the absence of any agreement to the contrary, the improvements made by a tenant become the landlord's property without compensation (*idem*, page 78). In Saxe-Coburg Gotha, improvements are matter of contract (*idem*, page 87). In Belgium the tenant is entitled to compensation for unexhausted improvements only when made with the consent of his landlord (*idem*, page 92). In Sweden, improvements are generally made by the tenant without the landlord's assistance, and yet the tenant has no definite legal right to compensation (*idem*, page 111). In Geneva without an agreement there is no right to compensation (*idem* page 112). In Austria the law recognizes the tenant's right to compensation which must, however, be enforced by a claim made within six months after the termination of the tenancy (*idem*, page 117). In Lombardy, improvements made by a tenant without the landlord's consent do not entitle him to compensation (*idem*, page 120). In Southern Italy, the tenant has no legal right to compensation for improvements not specified in the lease (*idem*, page 125). In Greece, if the tenant makes improvements in the absence of any express stipulation, the landlord will have a legal right to them on assuming possession of the holding (*idem*, page 144). In Spain, the tenant is entitled to retain possession until he has received compensation, but only in the case of improvements made with the consent of the landlord (*idem*, page 155). In Portugal a similar rule obtains (*idem*, page 164). In the Province of Constantinople the landlord, upon taking possession, may appropriate all improvements, and the tenants cannot enforce any claim to compensation (*idem*, page 218). In the United States of America, in the case of agricultural improvements made by a tenant without any special agreement with his landlord, there is no right to compensation (*idem*, page 379). It will thus appear that the provision with which sub-section (2) proposes to clog the landlord's right of eviction in the case of a non-occupancy raiyat finds no parallel in any other country in the world. This and other provisions of the Bill have clearly the object of rendering it almost impossible for a zemindar to re-enter upon land to the possession of which he has once admitted any *raiyat;* and thus it is supposed that the acquisition of the right of occupancy in the *remaining lands* will be facilitated. The only possible loophole for avoiding this result which is offered to the zemindar is by litigation, intricate, tedious, and expensive, in which if he succeeds, it will be at a cost greater than the benefit thereby obtained. Surely it would be far better for the interest of all concerned to carry out the intended policy by provisions going directly to this end rather than encourage litigation, which must do incalculable mischief and which can benefit only legal practitioners and the court-fee revenue. As to *sub-section* (5)—who will pay the Assessors, and what will be the natural result if they are not properly remunerated for their services?

Provisions as to Compensation for Improvements in other Countries.

75.—*Section 94.*—These provisions are far too elaborate to be of useful practical application in the Lower Provinces. In a flat country, where there is an alluvial soil, those works by which agriculture is facilitated and improved in other countries are unnecessary and are never undertaken. In Behar, and perhaps in some other places, works of irrigation are of very great importance, but such work in order to be really useful must be carried out on a scale and at a cost wholly beyond the ability of individual raiyats. The proposed provisions of the Bill, if called into operation at all, will be utilized only for the purposes of idle and harassing litigation.

Provisions as to Compensation for Improvements unsuited to the country.

76. *Section 95.*—A raiyat, that is *any* raiyat, whether an occupancy or a non-occupancy raiyat, may surrender his right and interest in his holding. It follows, therefore, that an occupancy raiyat may retain the land, subject to a possible enhancement of 25 or 50 per cent. every fifteen years, although the increasing beneficial interest to him may be much greater: but if anything occurs to make the land unprofitable, he may return it upon the hands of his landlord. It will be borne in mind that the interest of the occupancy-raiyat is converted by the Bill into a transferable holding, from which he cannot be ejected. According to the custom of the country such an interest cannot be relinquished. It is taken for better for worse. *Qui sentit commodum sentire debet et onus* is natural equity. Why should a tenant who is made more than half proprietor be allowed to enjoy all the advantage of this position and impose all the disadvantage of his larger share upon the co-proprietor of the smaller interest. I may here observe that the Bill makes no provision for a case in which a town suddenly springs up and agricultural land is required for building sites. If the raiyat converts his agricultural land into building sites, his landlord may sue to eject him

Provisions as to Surrender of Holdings unfair in view of the other changes made by the Bill.

No provision for the growth of a Town.

under the provisions of section 31 (*d*); and, if he succeed in so ejecting him, may enjoy the full benefit of the new value added to the soil. If the ejectment suit fail, this whole value will go to the raiyat. Then again the raiyat, in order to avoid eviction, may refuse to give the land, may oppose the march of progress and withstand the requirements of advancing society?

Notice of Surrender.

77.—The three months' notice in *sub-section* (2) should be three months before the end of the year. I may observe that three months' notice is usually made by the Bill sufficient for the raiyat to give to his landlord, while six months' time is required when the landlord is to give notice to the raiyat. I do not understand the grounds of the provisions contained in clauses (*a*) and (*b*) of sub-section 3.

Abandonment.

78. *Section 96.*—The objections to this section advanced by the East Bengal Landholders' Association, at page 7 of their paper, are entitled to consideration. As to sub-section (3), what is the ground upon which a raiyat will be entitled to institute a suit?

Holdings not to be divisible.

79. *Section 97.*—The language of this section does not clearly bring out the essential point with which the landlords are concerned, namely, that there should be no division of rent without the consent of the landlord.

Is it intended that Landlords should have the power to measure Lakheraj lands.

80. *Section 99.*—I presume that this section, as drafted in the Bill, is intended to allow the measurement of *lakheraj* lands; but the use of the word "landlord," having regard to the definition of the term in section 3, will at once raise the question, whether any land can be measured other than land held by tenants under the landlord? If it be intended to give zemindars and tenure-holders authority to measure *lakheraj* lands for which they do not receive rent, the question will be raised in many instances whether such land is comprised in their estate or tenure? In the case of *lakheraj* alleged to have been created before the Permanent Settlement, and, therefore, not comprised in the estate for which the revenue is payable, the zemindar will have no right to measure until he has disproved the allegation of *lakheraj*. The use of the words "estate of tenure" precludes, I presume, an occupancy-raiyat from measuring the land in his holding, especially if he have under raiyats and they object. If this view be correct, an occupancy-raiyat will have one more inducement to convert himself into a tenure-holder (See ante, § 28). The provision in sub-section (2) as to "the written permission of the Collector" is, I think, a very useless one. The discretion intended to be conferred cannot be properly exercised without making enquiries, which will occupy considerable time. An enquiry will seldom or never be made; and the permission when accorded will be given at haphazard. I may observe that the important words of the old law, which preclude a landlord from making a measurement, when restrained by express agreement with the occupants of the land, have been omitted, no reason being given for their omission. With respect to *sub-section* (2), clause (*a*), the words "vary from year to year" will often be inapplicable to existing facts. The area may remain unaltered for one year or several years, and then there may come successive years of alteration. In few instances does the alteration take place uniformly from year to year.

Collector's written permission to measure oftener than once in ten years.

Standard of Measurement in local area.

81. *Section 101* (*3*).—What is a local area? Taken literally, it might include an entire Province, which can scarcely have been intended. I think the provisions of clause (*b*) of section 76 of the Commission Bill, as to the determination of the standard pole and the appellate tribunal, have been unwisely omitted.

Appointment of Co-owner as Manager.

82. *Section 105.*—I do not approve of the provision which allows one co-owner to be appointed manager. The only case in which such an appointment should be made is when the other co-owners consent.

Remuneration of Managers.

83. *Section 107.*—Provision ought to be made for remuneration partly by fixed salary and partly by percentage.

Section 109.—I think the rules defining the powers and duties of Managers would much more properly be framed by the Board of Revenue than by the High Court.

Section 110.— (*2*), *cl.* (*b*).—"calculated"—in whose opinion?

Application by Proprietor or Tenure-holder to have Record of Rights made.

84. *Section 112.*—It is not quite clear whether it is intended that an application may be made by a proprietor or a tenure-holder *otherwise than when an order has been made by the Local Government under section 110.* This is a point upon which no doubt should be left. The provisions of this section will be advantageous to auction-purchasers: but in every case in which they will be applied they will yield a large crop of litigation.

Inexpedient to transfer to Revenue authorities Original Jurisdiction in certain matters.

85. *Section 114.*—There are several of the matters specified in section 111, the power of dealing with which cannot be transferred to the Revenue authorities without taking away from the Civil Courts of First Instance a jurisdiction which can more properly be exercised by them. I do not think that any subsequent appeal to the Special Judge, or second appeal to the High Court, will ever set right errors committed in the Court of First Instance by Revenue Officers, who have not judicial habits or training. I have seen a good deal of the work done by Revenue Officers, more especially before the transfer of rent suits to the Civil Courts by Act VIII (B.C.) of 1869; and, as the result of my experience, I consider these officers much less competent than Munsifs. There is at present no judicial work in the country worse done than that of uncovenanted officers in their capacity of Deputy Magistrates.

Local jurisdiction of Special Judges.

86. *Section 115.*—Some provision seems necessary for appointing the local limits of jurisdiction of the Special Judges.

Settlement of Rents by Revenue Officers.

87. *Section 118.*—I understand "settling rents" to include enhancement of rents, where enhancement is allowed by the Bill.

Sub-section (5).—By what Court or authority may this decree be executed? May it be executed by the Revenue officer, if there is no appeal?—and if so, by what provisions shall the execution be governed?

Sub-section (6).—I think it very undesirable that the High Court upon an appeal as to questions of law only should have to deal with questions of fact.

Prices of Staple Crops.

88. *Section 125.*—Here also, I think, the average prices ought to be those of "staple crops" not of "staple *food* crops." The limit of enhancement, four annas in the rupee, contained in the proviso is too low.

Recovery of settlement expenses.

89. *Section 133.*—"the proportion of those expenses so to be defrayed by any person shall be recoverable from him as if it were an arrear of land revenue due by him," *i.e.*, recoverable under the Certificate provisions of the The Public Demands Act VII (B.C.) of 1880. Why not say this in so many words? See Section 7 (9) of this Act.

Record of Khamar land.

90. *Section 136.*—I am afraid that the provisions of this section will be used by raiyats to harass their landlords. I may observe that the Bill speaks only of a *proprietor's* private lands, but where the zemindar has virtually become an annuitant, and the real proprietary interest has passed to a tenure-holder, as in the case of *Patni* tenures, the khamar land belongs to the tenure-holder. This is a fact which should not be lost sight of.

What tribunal can best try whether land is khamar.

91. *Section 137.*—I think the Revenue officers are not the tribunals best fitted to try in the first instance, whether land is a proprietor's private land. The questions raised in a case of this kind are those which a Civil Court is most competent to deal with, inasmuch as they will depend upon evidence of particular facts.

Custom and presumption as to khamar.

92. *Section 138* (*1*), *Clause* (*b*).—I am afraid that there is no such thing as "village custom" to regulate what is *khamar* land in these provinces.

Sub-Section (*2*).—I think the presumption at the end of this section is not fair—namely, that the Court shall presume that land is not a proprietor's private land until the contrary is shown. I do not see why everything should be presumed against the zemindar.

Provisions of the Bill as to Distraint deserve a fair trial.

93.—I think that the provisions of Chapter XIII as to *Distraint* are deserving of a fair trial. They in reality offer to landlords a summary remedy for the recovery of a year's rent; and as they may be put in force before the crop is cut or is ready for cutting, they ought to afford a useful remedy in those cases in which raiyats conspire to refuse payment of rent even at the previous rates.

Application for Distraint should be allowed on small Court-fee stamp.

94.—The application for distraint under section 139 ought to be upon a reduced Court-fee stamp in order to make these new provisions of the law really practicable in aid of the zemindars. Where the raiyats in a body withhold their rents and the resources of the landlord are in consequence crippled, the imposition of a high institution-fee prevents him from utilising the provisions of any procedure for the recovery of his rents.

Verification of application.

95. *Section 140* (*2*).—The second clause of the sub-section is unnecessary, regard being had to the form of verification in the Code of Civil Procedure, and the definition of *giving false evi-*

dence in section 191 of the Penal Code. Similar words have been for this reason omitted from the present Code of Civil Procedure.

95. *Section 143* (*3*).—" outer door of the house " assumes that the houses in this part of the country have doors; but very many of the houses in the Bengal districts have no doors. For " the outer door of the house " I would substitute " some conspicuous part of the homestead."

Section 154 (*3*).—" afford full protection"—against whom? Take a Backergunge case in which the fourteen degrees (see Digest, page 2, *note*) of interest in the soil are complete. Will a receipt granted by the *zemindar* at the top to the *karshadar* at the bottom afford full protection against all the intermediate holders? If this is intended, it should be made more clear.

Receipt for Rent paid by under-raiyat upon distraint.

96. *Section 159.*—The Supreme and not the Local Government should be vested with the power of approval mentioned in this section, and having regard to the provisions of section 163; it should be provided that the rules must be consistent with the Act.

Rules modifying the application of the Code of Civil Procedure to Rent Suits.

97. *Section 163.*—The provisions of the Code of Civil Procedure relating to *interrogatories* and *discovery* are not generally necessary for the trial of rent-suits. Nevertheless, I think there ought to be a provison similar to that contained in the proviso to section 165 of the Commission Bill, which allowed the District Jude, upon application, to direct that any particular suit shall be governed by all the provisions of the Code of Civil Procedure. The provisions of Code as to *affidavits* continue to be applicable to the trial of rent-suits under the provisions of the present Bill. It was before considered that they should not be applicable (see Supplement to the *Gazette of India*, dated 3rd March 1883, page 303). No reasons have been given for the change.

Provisions as to Interrogatories and Discovery, though not generally applicable, may be necessary in particular cases.

Clause (*r*).—It would seem that some such words as " unless the Court otherwise think fit " should be inserted in this clause. There may be cases in which it will be very desirable that the evidence of particular witnesses should be recorded in full.

Record of Evidence.

98. *Section 164.*—The provisions of sub-section (1) are in principle good, but I am afraid that in practice they will have little efficacy. Once they are known, the defendant will plead that he has actually paid the amount to the third party.

Payment into Court of rent admitted to be due to a third party.

99. *Section 165.*—These provisions appear reasonable enough; but the very fact of having to undergo the expense of defending a suit will occasionally make it difficult for a poor cultivator to pay in the amount admitted. No doubt the provisions of the following section as to payment by instalments to a certain extent mitigate possible hardship.

Payment into Court of admitted portion of claim.

100. *Section 168, Clause* (*a*).—I think decrees of Subordinate Judges in appeal may properly be made final. As to the second paragraph of clause (*b*), the question most commonly raised it as to the existence of the relation of landlord and tenant between the parties. It has been decided that no appeal lies where this question has been determined. It may be a matter of consideration whether an appeal ought not to be allowed in this particular case. As to the *proviso*, it is no doubt intended that the provisions of section 670 of The Code of Civil Procedure shall also apply to these cases.

Appeal and Revision.

101. *Section 170.*—The plaint should state the fact of the landlord having requested the tenant to remedy the damage or breach, giving sufficient detail as to time and place. I do not approve of *sub-section* (3), which allows the Court to extend for an unlimited period the time for payment of damages in lieu of forfeiture. Finality in this kind of litigation is especially desirable; and under this provision finality will be difficult of attainment.

Plaint in Ejectment Suit on the ground of Forfeiture.

102. *Section 171, Clause* (*c*).—I think it will be found that there is no local usage as to cultivating or preparing the land for a crop after the commencement of ejectment proceedings.

Local usage.

103. *Section 172* (*1*).—These provisions, as to the Court determining all matters in dispute between the parties, are much too wide; and will, I am afraid, lead to protracted litigation, when the parties are at feud. Then consider the effect of Explanation II to section 13 of *The Code of Civil Procedure* upon claims which might have been, but were not, brought forward.

Section 173.—I see no objection to the provisions of this section. But when the Court grants this form of relief, will the tenant be bound to hold the land and pay the rent; and if so, for what term?

The terms "under-tenure" and "holding" used in a sense different from that hitherto accepted.

104. *Section 176, Clause (a)* speaks of an "under-tenure;" and clause (*d*) speaks of a right-of-occupancy within a holding. I have elsewhere pointed out that this phraseology is contrary to popular and received ideas. Does clause (*e*) apply to a right to hold for ever?

Is a Prescriptive Easement an incumbrance?

105. *Section 177, Clause (a).*—Is an easement, acquired by twenty years' prescription, protected from avoidance by sale? In other words, is the prescription good against the landlord as well as against the tenant?

106. *Section 178.*—For "*the* holding" in line six read "*such* holding." It is no doubt intended that the holding to be sold and the holding in respect of which the decree for rent was made shall be the same.

Period for avoiding Incumbrances.

107. *Section 184.*—It is quite possible for a purchaser to have had notice of the incumbrance a year before the sale, in which case under the literal provisions of this section it would be impossible for him to take steps to avoid it. The period of one year should run from the time after sale when he had *knowledge or means of knowledge* of the incumbrance.

Sub-Section (3).—Service will be denied, and the same difficulty that has been experienced in respect of enhancement notices will destroy the value of this provision.

By whom may payment be made into Court to stay Sale of Holding?

108. *Section 187 (2).*—By whom may the amount of the decree be paid into Court—by the judgment-debtor only, or by any third person also? I think the provisions of section 205 of the Commission Bill which dealt with this question, and which are founded upon the result of actual decisions, ought not to have been put aside.

Provisions of the Bill as to protection of Under-tenure-holders incomplete.

109. *Section 188.*—The provisions of section 205 of the Commission Bill in respect of the privileges conferred upon under-tenure-holders by sections 138 and 139 of the same Bill for the protection of their under-tenures have not been effectually reproduced in the present Bill. For example, under-tenure-holders have not, under the present Bill, power to lodge money antecedently to meet arrears. I know of no reason why this portion of the law should be altered to the prejudice of these persons.

Judgment-debtors not to bid for their Holdings.

110. *Section 190 (2).*—What is the sanction by which it is intended to enforce this prohibition against judgment-debtors purchasing their holdings; and how is it proposed to prevent *benami* purchases?

Section 191.—This is, in part, a repetition of the provisions already contained in section 163, clause (*a*).

Incumbrances created before the Act.

111. *Section 192.*—I think this is a very dangerous provision. It suggests the manufacture of incumbrances which will be concocted, antedated, and registered under this section.

Object of notifying Incumbrances to landlord.

112. *Section 193.*—What is the object of notifying the incumbrance to the landlord? What action can he take upon its being so notified?

Serious defects in reproducing the law as to the Summary Sale of tenures.

113. *Section 194.*—As already pointed out, the language of this section limits to *Patni* tenures only the procedure of the old Regulation which, according to its provisions, was applicable to a much wider class of tenures, namely, tenures upon which the right of selling or bringing to sale for an arrear of rent has been specially reserved by stipulation in the engagements interchanged on the creation of the tenure (clause 1, section 8, Regulation VIII of 1819.) This error is not remedied by the provisions of section 209, which allows an extension of the Summary Sale provisions to other tenures registered under a law to be passed hereafter. Until that law shall have been passed, the right to bring to Summary Sale tenures other than *patni* tenures included in the larger class just mentioned will remain suspended, to the serious prejudice of the landlords.

Other defects in the reproduction of the Summary Sale Law.

114. *Section 195.*—I do not think that the use of the word 'notice' in this section is an improvement on the language of the old law, which speaks of a copy of extract of such part of the notice as applies to the individual case

Section 196.—I think the matter of the Explanation to section 184 of the Commission Bill has been unwisely omitted. That explanation was to the effect that service on the

defaulter personally is not sufficient. This is the result of decided cases and should be embodied in the existing law.

115. *Section 198.*—The provisions of section 137 of the Commission Bill have not been accurately reproduced. The old law has been altered in such a way as to create an opening for litigation.

Opening for litigation afforded by altering language of the old law.

Sub-Section 5.—This does not govern the case provided for by clause (*v*), section 137 of the Commission Bill, *viz.*, the case of omitting to apply for a summary investigation which is not *ejusdem generis* with the cases provided for by sub-sections (3) and (4).

116. *Section 202* (*2*).—The result of a Summary Sale will differ from the result of an Execution Sale, so far as regards registered and notified incumbrances. The East Bengal Landholders' Association have urged that this distinction will be productive of confusion and consequently of litigation, and I think their observation merits consideration.

Different effect of Summary and Execution Sales.

117. *Section 203.*—The provisions of clauses (*b*) and (*c*) of section 143 of the Commission Bill have been omitted from the present Bill to the prejudice of the parties concerned. This remark applies more especially to that provision which obliges the proprietor to furnish to the purchaser access to any papers connected with the tenure purchased, that may be forthcoming in the proprietor's *kachahri*.

Omission of important provisions of the old law.

118. *Section 204.*—As pointed out in section 109, the provisions of sub-section (2) of section 138 of the Commission Bill as to lodging money antecedently to meet arrears of rent have not been reproduced; and the same remark applies to so much of the provisions of clause (*a*), section 139, as provide that a deposit may be carried to the account of the tenant, so as to be in satisfaction of any claim of rent that may then be pending, or that may thereafter be brought against him.

119. *Section 205* (*2*).—These provisions do not satisfactorily reproduce clause (*c*) of section 136 of the Commission Bill, which empowers the Court to *indemnify* the purchaser against all loss at the charge of the proprietor, or person at whose instance the sale is made.

Provision as to indemnification of purchaser, when sale set aside.

120. *Section 207, Clause* (*b*).—The proviso in section 145 (2) of the Commission Bill as to arrears of previous years has been inadvisedly omitted. It has hitherto been the law, and it should be made clear, that arrears of rent of previous years are not recoverable by Summary Sale.

Arrears of previous years not to be recoverable by Summary Sale.

125. *Section 210.*—I cannot approve of these general provisions by which landlords and tenants are debarred from adjusting their mutual relations by contract. The reasons for these provisions are contained in paragraph 33 of the *Statement of Objects and Reasons* and repeated in paragraph 85 of the despatch of the Government of India, No. 6 of the 21st March 1882, in the following words:—"Such is the power of the zemindars, so numerous and effective are the means possessed by most of them for inducing the raiyats to accept agreements, which, if history, custom, and expediency be regarded, are wrongful and contrary to good policy, that to uphold contracts in contravention of the main purpose of the Bill would be in our belief to condemn it to defeat and failure. It is absolutely necessary that such contract should be disallowed, and in this conclusion we have the support not only of the Bengal Government, but also of the unanimous opinions of the Bengal Officers." Whatever truth these observations may have with reference to Behar, I deny that they are generally accurate as regards Eastern Bengal. In that portion of the country the raiyats are, according to my experience, very competent to protect their own interests in matters of contract, and the isolated instances of over-reaching *pattas* or *kabuliyats*, which have been or can be produced, do not afford sufficient evidence to justify these disabling provisions of the Bill, by which the whole agricultural population is to be declared incompetent to contract with their landlords. It would be equally reasonable to say that, because there are annually in any country a certain number of cases in which contracts or wills are found to have been made under undue influence, the entire community should be disabled from making contracts or wills.

Provisions of the Bill, which forbid contracts between Landlords and Tenants, inexpedient.

120. In one of the speeches made in Council upon the introduction of the Bill there is the following passage[1]:—"I am aware that the rise of the jute industry has poured considerable wealth into these districts" (Backergunge, and some of the adjoining districts). "But when this wealth accrued, what was the first use to which it was turned? The cultivators knew well enough that the acquisition of a proprietary right in the soil was essential to their permanent welfare, and accordingly we find that the first use to which they turned their newly-acquired wealth was to take every opportunity of acquiring such

Arguments for disability contradicted by admitted facts.

[1] See *Supplement to the Gazette of India*, of the 21st April 1883, page 890.

right. The statistics of registration show that in the three years, 1877-78, 1878-79, and 1879-80, no less than 342,596 perpetual leases were executed in Bengal, by far the greater portion of which were executed in the districts of Jessore, Backergunge, Fureedpore, Noakhali, and Chittagong." There is no suggestion that the persons who obtained these leases were unable to protect their own interests or were over-reached or duped in the matter of these contracts. They are, and are referred to as, indications of healthy progress and prosperity: and they furnish a powerful argument against legislative interference with persons who, at least in those parts of the country, are able and willing to manage their own affairs. It is a curious comment upon nearly a century's British Administration of these Provinces that while, in 1793, contracts between zemindars and raiyats were considered to be the great panacea for all evils and all difficulties arising out of the relations of landlord and tenant,[1] we are now in the year 1884 proposing to go into the opposite extreme and prohibit landlords and tenants from adjusting their own relations by mutual agreement between themselves. One necessary result of this provision will be to force the parties concerned into Court upon every occasion upon which any question concerned with the mutual relations of the immense agricultural population of these Provinces has to be adjusted. The enormous amount of litigation which will thus be engendered cannot but be productive of the worst consequences, affecting the harmony of society and the morality of the community, and must seriously tax the resources of the State to find suitable agency for its disposal.

May a Zemindar make a grant of Rent-free land?

121. *Section 211.*—Is it intended that a landlord may make a grant of *lakheraj* or *rent-free* land? Section 226 would appear to suppose that he may; but the point is one upon which no doubt should be left. Such a grant should of course be good only as against him and those claiming through him, and should be voidable upon a sale for arrears of Government revenue.

Reclamation Contracts.

122. *Section 212.*—What is the meaning of the words "contract for the reclamation of waste land?" Are they to be strictly limited to *reclamation*, or do they include a *tenancy*, such as that created by a *jangulburi* lease upon the basis of reclamation and investment of labour and capital by the lessee?

Local custom as to homesteads.

123. *Section 216.*—The provision as to local custom looks very well upon paper in an Act of the Legislature, but my experience shows that evidence of such customs is never forthcoming.

Provisions as to Limitation.

124. *Section 219* implies that the whole of the Limitation Act with the exception of sections 7, 8, and 9 is to apply to suits under the Bill; but why should sections 10 and 11 and Part IV of the Act be applicable to such suits? Section 94 of the Commission Bill which embodies an important principle (the result of litigation finally dealt with by the Privy Council) has, I think, been inadvisably omitted.

Constructive Offences connected with distraint.

125. *Section 220* (1).—I do not see the utility of the fiction in criminal law here proposed to be created. It is slightly incongruous that resistance to distraint, or forcibly or clandestinely removing distraint property, should be deemed to be criminal trespass. Why not make these acts substantive offences punishable with specific punishments?

Evidence of Agency.

126. *Section 221* 2).—This provision as to agents being empowered by written authority will be productive of litigation and injustice. The written authority will be denied and suppressed. Surely it ought to be sufficient to show that the agent acted as such with the knowledge of his landlord.

Exemption of Government from the twenty years' Presumption.

127. *Section 225.*—I do not see why the Government should here retain for itself a special privilege which is not allowed to private landlords.

I proceed to examine the principles of the Measure, an opportunity of expressing my opinion upon which has not before been offered me.

128. Having examined the sections of the Bill in detail, I now proceed to consider some of the principles which have been accepted and adopted in determining the main lines of the proposed enactment, which is at present before the Legislative Council. Since I closed my connection with the Rent Commission in June 1880, no opportunity has been offered me of expressing my views upon the general principles of this very important measure. As my judgment and opinion were well known to be opposed to the extreme views pressed upon the members of the Rent Commission, and which failed to convince the majority of them, but were subsequently adopted by the Lieutenant-Governor of Bengal and the Supreme Government, I assumed that Government did not wish to hear further criticism from me of the principles which have been adopted as the main lines of the present Tenancy Bill; and I, therefore, abstained from volunteering

[1] I have so fully shown this elsewhere (see *Landholding*, pages 482, 494, 503, 504, 582 *note*. and 590), that I abstain from increasing the length of this Minute by reproducing the facts and arguments.

any opinion. In letter No. 785 of the 5th May last, from the Secretary to the Government of India in the Legislative Department, it is now said that the Government of India will be glad to receive any remarks which the Judges may think fit to offer on the provisions of the Bill as amended by the Select Committee. I understand from this that it is now intended to offer me, in common with the other Judges of the High Court, an opportunity of placing our views upon record; and I think it due to myself, to the interest which I have taken in the whole subject for the last four-and-twenty years, and to the share which I took in preparing the original Bill, to express my sentiments without reserve on the present occasion.

Infringement of Proprietary interest by taking from the Zemindars the right of letting as they please lands not in the possession of Occupancy-Raiyats.

129. One of the most serious infringements of proprietary interest proposed by the Bill is the taking away from the zemindars the right of letting in any manner they please lands not in the possession of occupancy-raiyats or other protected classes of tenants. Throughout the whole of the discussions upon the Bill, it has been assumed that from 70 to 90 per cent. of the land in these Provinces is already in the possession of occupancy or other protected raiyats, and the Bill now professedly proposes to create, or facilitate the immediate creation of the occupancy right in the remaining lands, either directly or by indirect means, which must in a short time bring about this result. In the despatch of the 21st March 1882 from the Government of India to Her Majesty's Secretary of State, the arguments in support of this change are given in the following language, which I quote *in extenso* :—

"52. The Famine Commissioners observe in their report [1] :—'One of the most prevalent forms of oppression on the part of the landlords is their habit of breaking up the holdings of their tenants, and compelling them to change the fields they cultivate, with a view to the destruction of occupancy rights, or rendering them indistinct where they exist, and preventing the accrual in the case of tenants-at-will.' We have reason to believe that practices of this kind do, in fact, prevail in many parts of India. In the North-Western Provinces during the year 1878-79 the increase in the number of notices of ejectment was marked in every division and in every district, and the Board of Revenue [2] observed that the proprietary classes had exhibited a very general anxiety to prevent tenants and lessees from acquiring occupancy rights. In the following year the Commissioner of Allahabad reported, [3] 'as the twelfth year of occupation approaches, notices are invariably served.' 'Landlords,' said the Board, 'are, naturally enough, anxious to prevent the growth of occupancy tenures, and the Local Rent Act virtually points out to them the easiest way of effecting this object, *viz.*, by ejecting tenants-at-will before the twelve years' occupation, which creates a right of occupancy, is completed.' The efforts of the proprietors to extinguish occupancy rights have been frequently noticed in reports from the Central Provinces. In 1874-75 the Deputy Commissioner of Jabalpur had 'seen many instances where the *malguzars* are carefully causing their tenants to give up the land they have held for eleven years in order to prevent their acquiring occupancy rights.' The Deputy Commissioner of Seoni stated that the absolute occupancy and Act X occupancy-holders were being slowly but surely ousted by the *malguzars*. In 1875-76 systematic attempts to prevent tenants from acquring rights under Act X appear to have occurred in the Jabalpur District. In 1877-78 the Chief Commissioner wrote [4] :—'There is no doubt a general cause at work which is calculated to produce a gradual increase in the number of suits for ejectment, *viz.*, the desire of *malguzars* to prevent the accrual of occupancy rights which leads them, as the end of the twelve years period since the settlement approaches, to take more and more active steps to eject those tenants who would otherwise, by continued occupation, pass out of the class of mere tenants-at-will.' The Deputy Commissioner of Saugor, in 1878-79, speaking of occupancy tenants and occupancy rights, said [5] :—'There is a strong animus against these tenants among all the *malguzars* of this district, and (as in other districts) they use their best efforts to oust every tenant who has succeeded in acquiring these rights, and do their best to prevent any such further acquisition, by applying to the Court to issue notices of ejectment on all tenants who have held for nearly the prescribed time.' In the report however, for the year 1879-80, the Chief Commissioner observed :—'The eventual result of a twelve years occupancy rule, or an occupancy rule laying down any fixed period for the accrual of occupancy right, must ordinarily be to cause a disturbance of possession in order to check the growth of a class of privileged raiyats. Any such rule is disastrous to the well-being of the cultivating class wherever there is a struggle for land. In these provinces, in most districts, there is no such struggle, and as a fact the occupancy right is allowed to accrue in a large number of cases."

"53. In Behar it is said that not one quarter per cent. of the raiyats hold pottahs; and 'an examination of the *jamabandi* papers (rent-rolls) of Behar estates has shown that while 60 per cent. of the present raiyats have held some land in the villages in which they reside for more than twelve years, less than one per cent. of them hold at present the same area of land which they held twelve years ago. Inasmuch as these raiyats hold no *pottahs* or other documents showing which are the particular fields which they have held for more than twelve years, and which fields were subsequently acquired, it is doubtful whether any of them could, under the existing law, prove their occupancy rights even where these rights exist beyond all doubt.' The Collector of Patna reports that whenever the zemindar has felt himself strong enough to break occupancy holdings, he has done so, and that the landlords are very active in shifting the tenants from time to time to prevent the acquisition of occupancy rights. The zemindars of Shahabad, at a meeting held on 30th October 1880 at Arrah, deprecated the concession to resident raiyats of rights of occupancy of lands held by them for three years. 'At present,' the zemindars said, 'land-owners prevent the growth of occupancy rights by granting leases for five years only, or by changing the lands, or by managing so that a raiyat shall never hold at the same rent for twelve years. In practice, the last expedient is found sufficient, as the Courts find claims to occupancy rights not proved, unless the raiyats can show that he held the same land for twelve years by proving that he paid the same rent. Under the proposed law, the zemindars would not suffer raiyats to remain for three years.' 'Interchange of lands,' observes the Officiating Collector of Saran, Mr. McDonnell, 'between raiyats in a zemindari occasionally occurs, but it is the rare exception, not the rule. Manipulation by the *patwaris* of the village *jamabandis* to prevent identification of the plot held this year with the same plot held five years ago, is of usual occurrence to prevent proof of continuous holding, and to furnish evidence of the contrary, as well as of a change in the rates.' The Maharaja of Darbhanga informed Mr. Reynolds that his present practice was to give leases for ten years, and if the raiyat showed himself a good tenant, to renew his lease, and allow him to acquire a right of

[5] Annual Report, page 20.

occupancy, but that if the term were reduced to three years, he would be obliged to eject all his tenants at the end of two years, so as to bar the acquisition of the right."

"54. In Bengal Proper, the Commissioner of the Chittagong Division states that most landlords have been taking precautions against allowing their raiyats to obtain occupancy rights. A petition from the cultivators of the Attia Sub-division of the Mymensingh District alleges that the zemindars are busy sending their dependents and club-men about from village to village to take leases for limited periods from raiyats likely to be entitled to rights of occupancy under the provisions of the draft Bill of the Rent Commission. The Collector of Purneah asserts that it is the practice in many districts to take *kabuliyats* from raiyats for fixed terms, which are renewed or not at the pleasure of the landlord, and that, in this way, the accrual of the right of occupancy has been prevented. The Collector of Dacca reports:—'At present, as long as they (the raiyats) pay their rent, they are not in much danger of having their tenancy interferred with, unless the landlord is anxious to prevent their acquiring a right of occupancy.' The Collector of Faridpur has heard that a large landlord of that district has issued, in anticipation of the enactment of the Bill of the Commission, hundreds of temporary leases for the purpose of preventing the acquisition of rights of occupancy under the new law. Your Lordship will have noticed that the Pubna disturbances originated in a case in which the landlord had attempted to obtain agreements from the tenants, admitting that he might eject them on displeasure. Mr. Wace, the Officiating Collector of Birbhum, is of opinion that the tendency of the Bill of the Commission would be to foster the execution of formal leases and to make the insertion of a clause barring the growth of a right of occupancy even more common than it now is. 'There are doubtless many raiyats,' say Mr. Reynolds, 'who have been induced to execute contracts which specify no term of years, but which provide that the right of occupancy shall not accrue and that the lands shall be surrendered to the zemindar on his demand.' The Commissioner of Chota Nagpur refers to the disturbance of rights by extraneous and unauthorised action on the part of the land-owners and to attempts made to deprive the tenant of the privileges which are admittedly vested in raiyats who have held land for twelve years. Mr. Nolan, a Collector who is said by the Lieutenant-Governor to know both Bengal and Behar, believes that occupancy rights are being very rapidly extinguished, especially in Eastern Bengal. Mr. O'Kinealy remarks that twice in the course of the last 70 years have great attempts been made to treat the raiyats of Bengal as tenants-at-will and to reduce them to the position of the *paikasht* raiyats of the North-Western Provinces—*first*, after 1812,[1] when the zemindars, admitting they could not eject, sought to attain their object by claiming a right to enhance at discretion; and *secondly*, at the present time, when, though unable to enhance at discretion, they are seeking the same end by dispossession after notice Mr. Reynolds holds that it is now the avowed object of the zemindars to restrict and destroy the right of occupancy."

"55 Plainly an Act intended to affirm the then existing occupancy rights of the great mass of the settled cultivators is being deliberately defeated in practice; partly by the assumption, now usually impossible to controvert by judicial proof that such rights did not exist antecedently to that Act, but were meant to accrue under its provisions, and partly by legal or illegal measures taken by the zemindars under colour of the law and in consequence of that assumption to prevent the accrual of such rights. Whether the fields be changed or evidence be manufactured in the zemindari accounts, or written renunciations of permanent right be extorted from the ignorance or weakness of the peasantry, the object is one which is opposed to public policy. Even if no more decisive step were advisable, it would, we think, be imperatively necessary to provide that shifting occupancy within the same village or estate shall count as continuous occupancy; and to declare, as is proposed in the Bill of the Lieutenant-Governor, that no contract shall in any case debar a raiyat from acquiring the occupancy right. But such provisions would have wide consequences. If the estimate of the Behar Committee may be generally accepted, they would affect not less than 60 per cent. of the raiyats in Behar; nor can it be doubted that the avoidance of past contracts debarring the acquisition of the right would have, in Bengal Proper, an extensive operation. In these circumstances, as a change involving very far-reaching effects seems inevitable, we think that a complete remedy is more expedient than any partial reform, which, however unavoidable, would have to encounter equally strong opposition."

Examination of the Arguments advanced in support of this portion of the Measure.

130. Now let us examine these arguments, and while doing so let us have clearly before our minds the proposition to be proved. We have first an extract from a report of the Famine Commissioners unsupported by exact evidence, and having a general applicability to the whole of India. We have, then some observations of the Board of Revenue of the North-Western Provinces founded upon facts which have occurred, not in the Lower Provinces, in respect of which the proposition is to be proved, but in the North-Western Provinces, for which we are not about to legislate. Then follows some evidence derived from facts which are said to have occurred in the Central Provinces, and especially in the Districts of Jubbulpore and Saugor. If the proposition which is advanced had to be proved—if the issue which is raised had to be determined—in a Court of Justice, proceeding upon accurate principles and logical inferences, the first observation that would here be made is, that evidence obtained from the North-Western Provinces and from the Central Provinces is irrelevant to prove a proposition which concerns, and for the purpose in hand must be proved to be true as regards, Behar and Bengal. In paragraph 53 we have a statement as to Behar. It is *said* that an examination of the Rent Rolls of Behar estates has shown that while 60 per cent. of the present raiyats have held some land in the villages in which they reside for more than twelve years, less than one per cent. of them hold at present the same area of land which they held twelve years ago. Who are the responsible officers who have found leisure to examine all the Rent Rolls of the Behar estates for twelve years—where is their report—Where are their figures and calculations? Do not the pressure of population on the soil and the operation of the laws of inheritance furnish other explanations of these varying areas besides that suggested as the only possible explanation, namely, the conduct of the zemindars? Then it is declared to be doubtful whether the raiyats could, under the existing law, prove their occupancy rights even where those rights exist beyond all doubt. Now, clearly an assertion of this kind has not much value as an argument. If it could be shown that the raiyats had attempted to prove their occupancy rights and had failed altogether or in the majority of instances, this would no doubt be good evidence as regards Behar. But

[1] The effects of the legislation of 1812 will be found described in *Landholding*, pages 615—620, 646—664, and 670—678. Let the candid reader say whether a different view is not the reasonable one.

a mere assertion that it is doubtful whether, under the existing law, they could succeed in proving them possesses, in a controversy of the present kind and in the absence of facts, little value as evidence in support of the conclusion to be established. Then it is stated that the Collector of Patna reports that whenever a zemindar has felt himself strong enough to break occupancy holdings, he has done so. This allegation also is unsupported by facts or evidence. It is further asserted upon the same authority and without further evidence that landlords are very active in shifting the tenants from time to time to prevent the acquisition of occupancy rights. Reference is then made to what occurred at a meeting of the zemindars at Arrah on the 30th October 1880, on which occasion they said that the landholders prevent the growth of occupancy rights by granting leases for five years only or by changing the lands or by managing, so that a raiyat shall never hold at the same rent for twelve years. Now this is an admission of an intention on the part of the Behar zemindars—not to destroy the occupancy right where already existing or acquired—but to prevent its acquisition where it does not exist and has not been acquired. What, then, is the charge which this admission proves against the zemindars of Behar? It is a charge of having done that which the law has allowed and still allows them to do. Section 7 of Act X of 1859 (to which corresponds section 7 of Act VIII (B.C.) of 1869) provides that nothing in the preceding section (that is, the section which provides for the acquisition of a right of occupancy by cultivating or holding land for twelve years) shall be held to affect the terms of any written contract for the cultivation of land entered into between a landholder and a raiyat, when it contains any express stipulation contrary thereto. It will thus appear that the zemindars were left by the Legislature at liberty to take their own measures in order to prevent the acquisition of the occupancy right in lands in which no such right had previously existed. I am unable to see the *gravamen* of the charge brought against the Behar zemindars. They have done that which the law allowed them to do, and the doing of which was deliberately contemplated by the Legislature. Then it is said that the Maharajah of Durbhanga informed Mr. Reynolds that his practice was to give ten years' leases, and if the raiyat showed himself a good tenant, to renew the lease, and allow him to acquire a right of occupancy. Surely this course, sanctioned as it is by the Legislature, is merely the action of a prudent landlord.

That they have done what the law allowed them to do made a charge against the Behar Zemindars.

131. In paragraph 54 we are told that the Commissioner of Chittagong states that most landlords have taken precautions against allowing their raiyats to obtain occupancy rights. There is further evidence to the same effect—evidence to show—not that the zemindars have violated the law by *destroying* the occupancy right where it exists or has been acquired—but that they have done what the law allows, *viz.*, taken steps to *prevent its acquisition*, when they believed this course to be for their own interest. Then comes the conclusion in paragraph 55 in the following words :—"Plainly an Act, intended to affirm the then existing occupancy rights of the great mass of the settled cultivators, is being deliberately defeated in practice; partly by the assumption, now usually impossible to controvert by judicial proof, that such rights did not exist antecedently to that Act, but were meant to accrue under its provisions; and partly by legal or illegal measures taken by the zemindars under colour of the law and in consequence of that assumption to prevent the acrual of such rights." I think that any candid, unbiassed, and intelligent person who will examine the arguments advanced and the facts relied upon in support of the conclusion which I have just stated, will unhesitatingly admit that, assuming the facts to be correct, the arguments based thereupon do not prove the conclusion. We have evidence that the zemindars have taken the steps allowed and contemplated by the Legislature to prevent the accrual of the occupancy right in land in which no such right existed or had been acquired; but there is no evidence, nothing but mere assertion, that they have destroyed that right where it existed or had been acquired. This being so, it is impossible to say that the Act is being deliberately *defeated* in practice.

Conclusion that the Zemindars have defeated the provisions of the Act of 1859 as to the Occupancy Right, not supprted by the evidence.

132. The conclusion just stated is presented in still stronger language in the subsequent paragraphs of the despatch. It is said in paragraph 59 :—"We entirely concur in the opinion of the Lieutenant-Governor that the substantive law touching the occupancy right must be amended so as to prevent the old and unquestioned privileges of the raiyats remaining in jeopardy and being in many cases broken down." This assumes that it has been proved that the old and unquestioned privileges of the raiyats have in many cases been broken down; but as a matter of fact this has not been proved. I think there must be great danger in legislating upon the basis of data which have been assumed rather than proved: certainly the substantial rights of land-owners, many of whom are purchasers for valuable considerations upon the faith of the Government Sale Law, ought not to be destroyed without clear proof that they have abused their powers to the injury of the community.

Danger of legislating upon data which are assumed rather than proved.

133. In paragraph 60 of the same despatch there is the following passage :—"It is thus concluded that in the matter of rent-rates and protection from arbitrary eviction, all raiyats were on a par." I beg leave to challenge the accuracy of this conclusion. In the course of the discussions

Conclusion that all Raiyats on a par as regards Rent-Rates and protection from arbitrary Eviction contrary to fact.

which have taken place since the Rent Commission of 1879 began their labours, the equal position of all raiyats has been attempted to be proved by arguments of two kinds:—*First*, it was said that any period of residence, however short, and any occupation of land, however brief, were sufficient to create a *khudkasht* raiyat, and thus every person who entered upon possession of land in a village and made his residence there, became at once a *khudkasht* raiyat; *secondly*, it was said in a more general and sweeping manner that the position of all *raiyats* was equal. I will attempt once more to disprove both these allegations.

Error of supposing that any residence and occupation of land created a Khudkasht Raiyat.

184. *First*, as to the assertion that any period of residence, however short, and any occupation of land, however brief, were sufficient to create a *khudkasht* raiyat, let me quote some opinions which must be allowed to possess more or less authority. Mr. Justice Campbell said in the Great Rent Case:—

"At the time of the passing of Act X of 1859 the state of things was this:—The tenures and rents of the raiyats were still for the most part regulated by the old customs of former times, but two things specially required legal definition: —*First*, there was doubt as to the mode or *prescription* by which a *khudkasht* or occupancy tenure was acquired, and which tenures were of this character. It was not certain whether mere settlement in the village on the ordinary terms without limitation of tenure gave such a right, or what length of prescription established that right."

Mr. Justice Steer said in the same case:—

"That a right of occupancy was acquired by anything short of an occupation from a period prior to the Permanent Settlement—an occupation which entitled the raiyat to be called a *khudkasht* raiyat—has always been, I think, a matter of doubt. . . . .

"What raiyats were entitled under the old laws to be called *khudkasht* raiyats, and what raiyats were entitled to be considered as raiyats who had acquired a prescriptive right of occupancy, are subjects which, I think, have never been cleared up, either by the express authority of law, or by the authority of any judicial ruling. Are *khudkasht* raiyats then, as spoken of in the Regulations, those, and exclusively those, who were *khudkasht* at the time of the Permanent Settlement; or does the term *khudkasht* embrace also those raiyats who, since the time of the Permanent Settlement, had, by a long residence in the village in which they held and cultivated land, acquired a prescriptive right of occupancy? These were, I think, even up to the passing of Act X, moot questions, and are so still.

"While no doubt exists as to the right of those raiyats who, from generation to generation, have cultivated the lands of the village in which they reside for a period antecedent to the Permanent Settlement, and who without any doubt are entitled to be called and classed with *khudkasht* raiyats, the greatest doubt exists as to whether any other class or description of raiyats are entitled to be called *khudkasht* raiyats. If any raiyat, whose tenure came into existence since the Permanent Settlement, can by any means be called a *khudkasht* raiyat at all, it certainly is not the raiyat who simply lives in the village and cultivates the land of the village. To be a *khudkasht* raiyat at all implies that the raiyat must not only be a cultivator of lands belonging to the village in which he resides, but he must be an hereditary husbandman. A *khudkasht* right is not acquired in a day, but is transmitted; and it has never, so far as my knowledge extends, been laid down what exact length of holding gives a title to a tenant to consider himself a *khudkasht* raiyat.

"Certainly, the old Regulations seem to point to other than those undoubted *khudkasht* raiyats whom the Permanent Settlement found upon the land; but what length of holding constituted a right by prescription has never been definitely or inflexibly laid down. If decisions are to be found in which a prescriptive right was deemed established by an occupation short of the Permanent Settlement, there are, on the other hand, plenty of decisions to show that length of occupancy was not deemed to entitle the tenant to be considered anything better than a tenant-at-will. If any other but the ancient raiyat, occupying from generation to generation, had the right of occupancy, no others had it; and therefore in a vast majority of cases Act X by the twelve-year rule of occupancy has created rights which never existed before."

Mr. Justice Trevor said in the same case:—

"At the time of the Decennial Settlement, the raiyats were in Bengal, as in other parts of India, divided into *khudkasht* or resident, and *paikasht* or non-resident. It has indeed been contended before us that time is of the essence of a *khudkasht* tenure; that a raiyat simply residing in a village, in which his land is, is not a *khudkasht* raiyat; and that, in order to constitute a *khudkasht* raiyat under the Regulations, he must be a resident-hereditary raiyat; and that if he has not succeeded by right of heirship, he does not fall within that class of tenants. But it appears to me that, whether we look to the etymology of the word or to the thing itself, there is no reasonable ground for question. *Khudkasht* raiyats are simply cultivators of the lands of their own village, who, after being once admitted into the village, have a right of occupancy so long as they pay the customary rents, and therefore with a tendency to become hereditary, and with an interest in the produce of the soil over and above the *mere wages of labour and the profits of stock;* in other words, above the cost of production.

"These tenants seem at the settlement, practically and legally, though not by express statute, to have been divided into two classes, the *khudkasht kadimi*, and the simple *khudkasht*, or those who had been in possession of the land for more than twelve years before the settlement, and those whose possession did not run back so long. Both by the Hindu and Muhammadan law, as well as by the legal practice of the country, *twelve years had been considered sufficient to establish a right by negative prescription*, that is, by the absence of any claim on the part of other persons during that period; and hence the doctrine which has obtained that *khudkasht* raiyats in possession twelve years before the settlement were, under no circumstances, not even on a sale for arrears of revenue, liable either to enhancement of rent, or eviction from their holding, so long as they paid the rents which they had all along paid," . . . . "But when Regulation XI of 1822 was passed, the use in section 32 of that law of the terms *khudkasht kadimi* raiyat, or resident and hereditary raiyat with a prescriptive right of occupancy, to designate the cultivator, who would not be liable to eviction on a sale for arrears of revenue, gave rise to the doctrine that *khudkasht* raiyats who had their origin subsequent to the settlement were liable to eviction, though, if not evicted, they, under section 33, could only be called upon to pay rents determined according to the law and usage of the country; and also, *that the possession of all raiyats whose title commenced subsequent to the settlement was simply a permissive one;* that is, one retained with the consent of the landlord. Again, by Act XII of 1841 and Act I of 1845 (which repealed the former) a purchaser acquired his estate free of all encumbrances which had been imposed on it after the time of the settlement; and he is entitled, after notice given under section 10 of Regulation V of 1812, to enhance at discretion—anything in the Regulations to the contrary notwithstanding—the rents of all under-tenures in the said estate,

and to *eject all under-tenants with certain exceptions, amongst which are khudkasht kadimi, but not simple khudkasht raiyats.* It follows that these laws *distinctly gave the purchaser the power to eject a khudkasht raiyat whose tenure was created after the Permanent Settlement, and, if not ejected, they are liable to be assessed at the discretion of the landlord.* This word 'discretion' entirely annihilated the rights of the *khudkasht* tenants created subsequent to the settlement in estates sold under these laws. It reduced them from tenants with rights of occupancy, so long as they paid the established rate of the pargana, or the rate which similar lands paid in the places adjacent, into mere tenants at the will of the zemindar, who might in any year eject them, and place in their stead any tenant competing for the land. It is, in short, introducing into this country competition in the place of customary rents."

Sir Barnes Peacock gave the following opinion :—

"I do not believe that, even before the Permanent Settlement, every cultivator who resided in the village in which his lands were situate, whether let into possession for a term or only as a tenant-at-will, or to hold from year to year, necessarily became a *khudkasht* raiyat. The definition of *khudkasht* in Wilson's Glossary (287) is, a 'cultivator of his own hereditary land.' The words *khud*, self or own, and *kasht*, to sow, show that the term has reference to some proprietary rights, rather than to the fact of residence in the village. In column 267 of the same Glossary, tit "*khudkasht*," the definition is a 'resident cultivator—one cultivating his own hereditary lands, either under a zemindar or a co-parcener, in a village.' In Bengal, one class of them holding their lands at fixed rates by hereditary right sometimes sublet them, except the part about their dwelling, in which they continue to reside, and although ceasing to cultivate and engaged in trade or business, they retain their designation of *khudkasht*. The term is also applied in the North-Western Provinces to lands which the proprietor, or the payer of the Government revenue, cultivates himself."

"A *khudkasht* raiyat probably derived his title by descent from or succession to one of the old village community, or some person who in ancient times had acquired a proprietary right in the land under the old Hindu or Muhammadan law by reason of his having reclaimed it. Menu says—'Sages pronounce cultivated land to be the property of him who cut away the wood, or who cleared and tilled it,'—(Chapter IX, paragraph 44). So property in waste land was, according to the Muhammadan law, established by reclaiming it with the permission of the Imam according to Aboo Hanifa, and by the mere act of reclaiming it according to Aboo Yusaf and Muhammad (*see* Baillie on the Land-tax of India, Chapter VI, paragraph 42). But, however this may be, it is clear that since Regulation II of 1793, *by which the right of property was declared to be vested in the landholders, i.e.*, in the zemindars and independent talukdars, property in land which formed part of a permanently-settled estate could not be acquired by reclaiming it from waste. How then could it be acquired except by contract or adverse possession, or by prescription going back as far as to the time of the Permanent Settlement? I am of opinion that neither a right of proprietorship nor a right of occupancy could have been acquired by any other means in a permanently-settled estate."

"The Directions to Revenue Officers, paragraph 130, show that the right depends upon *prescription*. It is there said—'It is impossible to lay down any fixed rule defining what classes of cultivators are to be considered entitled to hold at fixed rates. They are known in different parts of the country by different names, as *chapperbund khudkasht kadimi, maurossi hukdar, &c.*, all of which terms imply attachment to the soil or *prescriptive* right. Those who have no such right are commonly called *kutcha assamis* or *paikashts*. It has sometimes been supposed that all raiyats resident in the village (*khudkasht*) are of the former class, and that those who reside in another village (*paikasht*) have no rights. But there are frequent exceptions to this rule. Many cultivators residing in the village are mere tenants-at-will, whilst those residing in neighbouring villages may have marked and recognised rights. *Prescription* is the best rule to follow."

"I am clearly of opinion that a raiyat who, after the date of the Permanent Settlement, and specially after Regulation V of 1812, was let into possession by a zemindar to hold as tenant for a fixed term, or at will or from year to year, or without defining the period during which his tenancy was to continue, did not before Act X of 1859, merely by reason of an occupation for twelve years, become a *khudkasht* raiyat.[1]"

Mr. Shore (afterwards Lord Teignmouth) considered that the rights of the raiyats depended upon long occupancy, and Mr. Harington in his Analysis quotes him on several occasions. The following are a few brief passages :—"It is understood that the raiyats by *long occupancy* acquire a right of possession in the soil, and are not subject to be removed." . . . . . "To require that the pattas should be given for a definite time, as proposed by some of the Collectors, would diminish the force of that *prescription* which has established a right of occupancy in favour of the raiyats." . . . . . "On the whole, therefore, I do not think the raiyats can claim any right of alienating the lands rented by them by sale or other mode of transfer, nor any right of holding them at a fixed rent except in the particular instances of *khudkasht* raiyats, who, *from prescription*, have a privilege of keeping possession as long as they pay the rent stipulated for by them.[2]" The opinion of the Legislature may be inferred from Act XII of 1841, section 27, which speaks of "*khudkasht* or *kadimi* raiyats having rights of occupancy at fixed rents or at rents assessable according to fixed rules under the Regulations in force." Section 16 of Act VIII (B.C.) of 1865 speaks of *khudkasht* raiyats or resident and hereditary cultivators. In 1820 Sir Edward Colebrooke pointed it out as one of the errors of the Permanent Settlement that the peasantry had been sacrified by one sweeping enactment which left the zemindar to make his settlement with them on such terms as he might choose to require. In the rules for the management of Khas Mehals, dated 19th November 1850, there is the following direction :—"The claims of *khudkasht* and *kadimi raiyats* should be carefully respected. Should cultivators of this class be found holding lands at lower rates than other raiyats occupying lands of a similar description, their rents should not be raised without considering their right to continued occupation at the rent heretofore paid. Some of these *raiyats*, being the descendants of those who originally broke up the land, have held at a jama now paid since twelve years previous to the decennial settlement. They have a lien on the soil beyond wages of labour and profits of stock. *By prescription, they have a proprietary interest.*" Again in the same Rules we have the following passage :—"Should an arrear remain due at the close of the year, if the defaulter be a mere *raiyat* having no transferable interest in the soil, he may be summarily ousted, and his lands given to another."

[1] B. L. R. Sup. Vol. F. B., pp. 318—320.

[2] Harington's Analysis.

I think the above opinions, which can be multiplied, if necessary, altogether disprove the idea that any period of residence, however short, and any occupation of land, however brief, were sufficient to create a *khudkasht* raiyat. There are innumerable passages in the Regulations, in the Minutes and other State Papers of the early part of the present century and in other contemporaneous documents, which couple the idea of prescription with the acquisition of the *khudkasht* right. The truth of the case then appears to be this:—Where the village community existed, any member of that community who possessed a proprietary interest in the land belonging to the village and cultivated a portion of it, was a *khudkasht raiyat;* where the proprietorship of the land had passed from the village community to individual owners, under whom the occupants of the soil held the position of tenants, those *raiyats* who resided in and held land belonging to the village in the early days of our rule were *khudkasht raiyats;* and this is also true of raiyats belonging to villages in Bengal, where there is nothing to show that the ownership of the village community ever existed. At the time of the Permanent Settlement, there was an abundance of land and a paucity of raiyats, and no doubt, new raiyats were readily admitted to residence in the village and occupation of land; in other words, were allowed to become *khudkasht* without much question or difficulty. As population increased and the area of the cultivated land became fully occupied, new raiyats were not so easily or readily admitted to a position which, as time passed on, became more valuable. The progress of the country and the effect of our legislation had the gradual effect of rendering the *status* of a *khudkasht* a valuable right. In all countries where the origin of rights is doubtful, prescription has come in to remove the doubt and confirm rights after the lapse of time; and thus the period of prescription, from which the right is to be inferred, has come to be regarded as the origin of the right itself. In these Provinces from analogy to the period of limitation for immovable property, twelve years came to be regarded as the period of time sufficient or necessary to create the *khudkasht* right. There is, however, no authority for saying that this right has, according to the custom of the country, accrued immediately upon residence in, and occupation of, land belonging to the village.

135. Then, as to the second and more general allegation, that all raiyats were on a par in the matter of rent rates and protection from arbitrary eviction, I think there is overwhelming evidence to show that this was not so. Lord William Bentinck in 1832 said :—

All Raiyats not on a par. Different Classes of Raiyats and difference between Old and New Raiyats.

"I am of opinion that throughout the country there are three descriptions of raiyats. The first class, I consider, as being to all intents and purposes proprietors of the lands which they cultivate; the *second* as having been originally tenants-at-will, but acquiring in course of time a *prescriptive right of occupancy* at fixed rates; and the *third*, as mere contract cultivators. The result of the investigation instituted by my orders into the privileges of the different kinds of cultivators and other matters connected with the fiscal administration of the country was, as stated by the Sadr Board, that in most zemindari estates composed of single villages the raiyats are mere tenants-at-will, but that in some of the large *zemindari* estate there are hereditary raiyats in villages who seem to be connected with the land and the parties to whom they paid rent, as individuals in *pattidari* estates (where there was no superior zemindar) were with the Government, before the enactment of the British Regulations. In a Resolution of Government, dated 1st August 1822, it was observed that where the raiyats may be merely contract cultivators, holding from year to year, without any permanent obligation or tie, His Lordship in Council would not be disposed to introduce any change, for the system which attaches to the land various permanent interests independent of any contract between the parties, though it cannot without cruel injustice be destroyed, is not one desirable to establish. Entertaining this conviction, I need hardly add that I entirely differ from the proposition laid down in the Note recorded by Mr. R. M. Bird on the Rights of Resident Raiyats, namely, that all resident cultivators are entitled to have their rent fixed, without reference to the term of their residence, for I am of opinion that it should always be borne in mind that, though there may be cultivators who have proprietary right or rights of occupancy, *it does not follow that all cultivators have such rights* . . . . The greatest care should be taken to discriminate between the different classes . . . . of cultivators, and to avoid confounding the mere agricultural labourer or individual who, having settled in the village as a stranger many years ago, has ever since continued to cultivate at the discretion of zemindar with the hereditary raiyats whose ancestors perhaps first broke up the soil and paid the revenue or rent of the land direct to the servants of the State.[1]"

In one of the Rules for Settlements laid down by Lord William Bentinck's Minute of 1832, there is a direction that no new rights should be created, and all cultivators who hold as tenants-at-will should make their own bargains. At page 197 of Volume II of the Thomason Despatches, it is said that it is quite a mistake to suppose that every *asami*, who takes land in a village, should join the community on the same footing as his neighbour. Lord William Bentinck again said, in the Minute already referred to, that where no rights have attached to the cultivators and they have been considered as tenants-at-will, neither justice nor policy requires that Government should interfere with them or their superior landlords.

If further evidence be wanting, it will be found in the cases contained in the *Appendix* to this Minute. Let me quote one. In No. 34 the Sadr Díwáni Adálat said :—

"The essential characteristic of the tenure of a *khudkasht raiyat* is *the right of prescriptive occupancy.* In this case the raiyat, it has been found, has no such right, and necessarily he is simply a raiyat whose occupancy arises from the discretion of the zemindar." And again: "The will and interest of the zemindar are intended by the law to be the measure and regulator of the rent to be demanded from raiyats whose occupancy is limited and temporary."

136. In paragraph 62 of the same despatch the Government of India say :—"We prefer

[1] I take the liberty of referring to the further evidence and arguments which will be found in *Landholding*, pages 525, 537—538, 555, 560, 566 and 665, 706, 725, 726—729; and as to Government having deliberately propounded and acted upon contrary views in its own *khas* mehals, pages 776 and 779.

simply to take the land as the basis of the occupancy-right, and to declare that all raiyats holding or cultivating *raiyati* land shall have a right of occupancy therein. The occupancy-right would then attach to all *raiyati* land without exception, that is to say, to all land that is not *khamar* or private land." The despatch, at the same time, proposes to restore the great body of the raiyats in Bengal to the position which they held under the ancient land law and custom of the country. To annex the right of occupancy to the land in whatever hands it may be, would introduce a principle wholly new and altogether at variance with the common law of the country; and would, most certainly, not be a restoration of anything that is discoverable in its ancient institutions. As I have elsewhere fully discussed the whole question, I shall not pursue the matter further on the present occasion. I shall merely say that I entirely agree with the view which has been taken by the Secretary of State as to the propriety and policy of this proposal in the despatch of 17th August 1882. The Secretary of State there says that he is not satisfied that a measure is advisable which appeared to him to make so great and so entirely novel a departure from the ancient custom and the existing law of Bengal.

Proposal of the Government of India to annex the Occupancy-Right to the land itself.

This proposal rightly disapproved by the Secretary of State for India.

137. The despatch of the Secretary of State then proceeds as follows :—

Principle proposed to be substituted by Secretary of State for India.

"Your proposal, in the first place, annuls the distinction, deeply rooted in the feelings and customs of the people, not only in Bengal but in most parts of India, between the resident or permanent and the non-resident or temporary cultivator. This, when your avowed intention is to restore to the raiyats their original position and rights, appears to me anomalous and undesirable. In the next place, it abandons a principle on which the statute law has been based for nearly a quarter of a century, and which was adopted in 1859 by the Legislature on rational and intelligible grounds. And thirdly, the present papers show that the failure of the law of 1859 has arisen from an error, not in the principle itself, but in the provisions for its application. The provision that accrual of the occupancy-right depends on proof, not of the raiyat's having been a cultivator for twelve years, but of his having held the same land continuously for that period, has enabled the landlord to prevent the tenant from acquiring the right, either by shifting his fields within the twelve years, by inducing him to enter into a written contract barring the right, or merely by destroying his evidence of continuous possession. This error it appears to me may be guarded against without abandoning the principle.

"I would therefore suggest for your consideration whether, in place of adopting the principle you recommend as the basis of the proposed legislation, it would not be desirable to introduce into the Bill provisions somewhat to the effect that every resident raiyat shall have a right of occupancy in the land which he occupies and pays rent for, and that a resident raiyat shall be one who or whose ancestor has occupied any land in the village or estate for twelve years.

"You will observe, that the object aimed at is that a raiyat shall be deemed to have an occupancy-right in all the land which he holds in a village or estate, if he has occupied for twelve years any land whatever in such village or estate. It will be necessary in actual legislation to provide that this right is not forfeited by any sub-division of estates or alteration of village boundaries.

"These provisions will, you remark,[1] have practically almost as wide an effect as your own proposals. They will, at the same time, avoid the abandonment of a principle which is, with reason, strongly insisted upon by the zemindars, and to which I attach much importance."

There was a difference of opinion between the Government of India and the Bengal Government as to the principle upon which the right of occupancy ought in future to be based. The Bengal Government would take the *status* of the tenant as the basis upon which the recognition of the occupancy-right should be effected. The Government of India, on the other hand (*see* paragraph 84 of the despatch of 21st March 1882), desired to take a classification of the lands as the basis of recognition and would make that recognition general in order that it might be perfectly secure. Between these conflicting views the Secretary of State inclined to accept the *status* of the tenant as the proper basis of recognition.

Difference of opinion between the Government of India and the Bengal Government.

138. To this view I beg to express my assent. I entertain no doubt that, as a general principle, the *status* of the raiyat is the proper basis of recognition of the occupancy-right. I think that the whole of the past history of the country, as well as the peculiar features which characterize the social life of the inhabitants of these provinces, altogether support the idea of personal *status*. The Secretary of State, however, while accepting the principle of personal *status*, suggests a provision that every resident-raiyat shall have a right of occupancy in the land which he occupies and pays rent for, and that a resident-raiyat shall be one who or whose ancestor has occupied any land in a village or estate for twelve years. The exact meaning of this language is not altogether clear. It is intended that the resident raiyat, as here defined, shall have a right of occupancy in the land which he occupies and pays rent for at the time when the the Bill becomes law, or is it the intention that he shall have a right of occupancy in all land which, at any time after the Bill becomes law, shall come into his possession, the effect of the latter intention being to give him a right of occupancy in any additional land which he may acquire, by renting it, by inheritance, by gift, or by purchase. If the latter intention is contemplated, I think that what is proposed is not in accordance with the common law or custom of the country, under which, both before and since the Perma-

Proposal of the Secretary of State to make the Status of the Raiyat the basis of recognition of the occupancy-right sound in principle.

The intended application of this principle not quite clear.

[1] Paragraph 107.

nent Settlement, the zemindars have always enjoyed the right of letting land not in the occupation of the protected classes of raiyats, in any manner which they considered best for their own interest. At the same time, in order to avoid the mischief of the existence of which in Behar there is some evidence, it might be reasonable to allow the raiyats in that province a right of occupancy in a quantity of land equal to the average quantity held by them during the previous twelve years, the condition of continuing to hold the *same land* being dispensed with in their case as a reasonable remedy for the mischief which is said to have existed in that part of the country.

Let Behar raiyats have a right of occupancy in a quantity of land equal to their average holding of the previous twelve years.

139. There is a further suggestion which may be made, and that is, to limit the quantity of land in which a right of occupancy can be acquired to a holding of sufficient size to maintain an average family in average comfort. I press it for consideration whether this latter suggestion does not, for all parts of the country, confer all that may be reasonably demanded in the interest of the cultivator of the soil. I cannot see, and I have never heard any argument advanced to prove, how the community at large can be benefited by allowing a raiyat to acquire a quasi-propietary right in land which he cannot himself cultivate and which he must necessarily sublet. I entertain a strong opinion that the substitution of petty landlords of this class for the larger landlords who now exist can do no possible good, and will, in all probability, do much harm. If the acquisition of a right of occupancy by prescription were limited to holdings of a sufficient size to maintain an average family in comfort, the zemindars should be allowed to grant, on such terms as might be agreed upon, the same right in similar holdings. The Agricultural class would thus be incited to thrift in order to obtain this right. This incitement will be wanting if a quasi-proprietary interest is given without labour or exertion or provident care being devoted to its acquisition.

Proposal to limit the right of occupancy to a holding of sufficient size to maintain an average family in average comfort.

Zemindars should be allowed to grant occupancy-right in similar holdings.

140. Then it appears to me that the principle propounded by the Secretary of State has been altogether neutralized by the other provisions which have been inserted in the Bill. I refer to the presumption in section 26 (2), that when it is proved or admitted that a person holds land as a raiyat, it shall, as between him and his landlord, be presumed that he has for twelve years held the land or some part of it as a raiyat. The provisions of section 27 defining a village or estate will also, as I have already pointed out, be productive of most serious consequences. Then the provisions of the Bill altogether ignore the idea of residence, and I can scarcely think that this was intended by the Secretary of State.

Principle sanctioned by Secretary of State neutralized by other provisions of Bill.

141. In considering the zemindar's rights, the despatch of the Government of India contains the following passage:—"Practically, they did enhance the rents, though they had no legal claim to raise them with any direct reference to the increasing value of the produce." Upon this proposition thus introduced without comment, and without proof, an important train of reasoning and an ultimate conclusion of serious consequence depend. Now, here again I venture to question the accuracy of the proposition which forms the major premiss of the whole of the subsequent reasoning. I have shown, upon evidence which I think it is impossible to controvert, that the zemindars have legally exercised the right of enhancement ever since the time of the Permanent Settlement; and that the right to enhance, with reference to the increase in the value of the produce, was not, as it is termed in paragraph 105 of the despatch, a novel right which they never had before 1859, but was recognized as belonging to them, and was claimed and exercised by Government itself in its capacity of zemindar (see *Landholding*, pages 533 to 556). Let any unprejudiced individual read the evidence and form his own conclusion. In addition to that evidence, further proof will be found in the cases contained in the *Appendix* to this Minute. In case No. 13, the Sadr Díwání Adálat spoke of the zemindar as being entitled to demand an increase of rent in proportion to the *ascertained assets:* and the ascertained assets necessarily included the value of the produce. In case No. 20, we have enhancement at the improved pargana rate, the increase being 166 per cent., and the Sadr Díwání Adálat spoke of the local rent of land *progressively increasing*. Abundant evidence to the same effect will be found in the other cases and in the old reports. Upon a fair review of the whole evidence, there can be no reasonable doubt that the right to enhance rents on the ground of the increase of the value of produce, or in other words, on the ground of increase in prices, has been admitted to exist in, and has been exercised by, the zemindars from the time of the Permanent Settlement down to 1859 and to the present day. It may be observed that the application by the Government itself[1] of the principle of rent taught by English Political Economists, into which the element of price of produce necessarily enters, supplies a strong argument to show that the Government itself considered that rise of price was a legal ground of enhancement.

Assumption that Zemindars had no legal right to enhance on ground of increased value of produce not based on fact.

[1] See *Landholding*, page 555, where Government made an exception in favour of the *khudkasht* and *kadimi raiyats*, allowing them something beyond *wages of labour and profits of stock;* and pages 675-676, where Lord William Bentinck, in 1832, spoke of *the increased rent, which would have accrued naturally from increased produce, enhanced prices, and the re-claiming of waste lands.*

142. The enhancement provisions of the Bill will leave the zemindars very little chance of increasing the annuities which will in future be derived from their estates. As I have already said, the possible advantages to be derived from successful enhancement litigation will in few (if any) instances afford a sufficient return for the expense that will have to be incurred, and enhancement without expensive litigation will be improbable, regard being had to those provisions of the Bill which almost force the parties into Court for the settlement of all questions which may arise as to the payment of higher rent. I am of opinion that the limit of enhancement, contained in the Commission Bill, namely, that the new rent shall not be more than double the old rent, taken with the provision as to progressive increase where a sudden raising of rent would involve hardship, was fair to both parties. Looking at the matter from the zemindar's point of view, we must remember that in many parts of Bengal the raiyats have successfully resisted even reasonable enhancement, and have for many years been appropriating the whole of the increased profit, a portion of which even the principle of the present Bill admits to have justly belonged to the zemindars. The combined effect of the enhancement provisions of the Bill, and those other provisions which facilitate the rapid acquisition of a right of occupancy in the remaining lands, will be that the zemindars will be converted into mere annuitants, and cannot be expected to take any interest in the management of their estates, while the real beneficial ownership will be transferred to middlemen who will have a direct interest in raising rents, inasmuch as the provisions of the Bill will have no practical effect in preventing the enjoyment by them of the whole of the increase.

Successful litigation, without which enhancement will not be possible, will not afford a sufficient return for the expense incurred.

Effect of the Bill will be to convert the zemindars into mere annuitants, and take away all their interest in the management of their estates.

143. One of the professed objects of the Bill is to create peasant-proprietors. This object postulates that the agricultural class in these provinces possess habits and feelings which will ensure the success of this system. Whether this can be safely postulated or not is an exceedingly doubtful question. Mr. Longfield entertained a strong idea that peasant-proprietorship could never flourish in Ireland. Mr. Sackville West, in his report on the tenure of land in France, expressed his opinion that the Irish and French systems were originally almost identical, and that, in consequence of the peculiar proclivities of the people, what caused in the one country discontent and agrarian outrage has in the other country been productive of social order and general contentment. At page 158 of the Parliamentary Blue Book on Land Tenures, it is observed that it would be erroneous to suppose that a system of husbandry, such as exists in Belgium, could be applied with advantage to other countries indiscriminately; that in order to meet with success, it must have been developed naturally by the force of circumstances and events, and must, moreover, be in harmony with the customs and institutions of the inhabitants, and adapted to the climate and general capabilities of the soil. It has been repeatedly said that the great danger of peasant-proprietorship in Ireland is that the peasant, as soon as he found himself a proprietor, would prefer the *role* of proprietor to that of peasant-cultivator and would sublet his land, thus introducing again the worst evils of the cottier system. Let any one who has had experience of the great agricultural community in these provinces give his candid opinion as to whether this danger is not especially to be apprehended in this country, in which the great ambition of every child of the soil is to have some one subordinate to him, some one over whom he may be *malik* or superior.

Bill will not effectuate intention of creating Peasant-Proprietors.

144. But even supposing for argument's sake that the raiyat possesses every single qualification which is necessary to ensure the success of peasant-proprietorship, there are two principles inherent in the law and custom of this country, and permitted by the Bill, which must prove fatal to the hope of this success. I refer to *sub-division* and *sub-letting*. Sub-division is necessary result of the law of inheritance both of the Hindus and of the Muhammadans, under which every child is entitled to a share of his father's holding; and although the landlord cannot be compelled to apportion the rent, the sharers, as between themselves, have a legal right to a partition of the land itself. Then *sub-letting* is sanctioned by the express terms of the Bill, which, in my opinion, contains no provisions that will have any practical effect in discouraging or stopping the practice. The provisions of section 62, which restrict the landlord of an under-raiyat from recovering anything in excess of 25 per cent. or, in case of a registered lease, 50 per cent. more rent than he himself pays, will be nugatory in practice. Either a *salami* or foregift will be taken in advance, or the under-raiyat, whom it is designed to protect, will, for obvious reasons, not avail himself of the protection offered him. In the case of numerous gradations or degrees of sub-letting, such as exist in the Backergunge District, the provision will be impossible of application.

Sub-division and Sub-letting, permitted by the Bill, fatal to any hope of successful Peasant-Proprietorship.

145. Then, the Bill, instead of suppressing, creates middlemen. Every raiyat, who has more land than he can himself cultivate, will become a middleman. The *Patni* system, the registration of tenures under Act XI of 1859, and the direct encouragement given by Government to the creation of intermediate tenures, have already had a most mischievous operation in creating middlemen in these provinces. But the mischief which has hitherto ensued will be nothing to what will follow if this Bill becomes law,

Bill will do mischief by increasing the class of Middlemen.

The creation of large taluks possesses a certain advantage in breaking up property into estates of convenient size for good management; and so long as sub-infeudation proceeds no further than this, no great evil is caused. But when petty middlemen come into existence—men who can only make their occupation profitable by exacting from their tenants all that remains above the poorest and barest sustenance—the system becomes fatal to the best interests of the agricultural community. In order to illustrate this observation, I may refer to the *gabelloto* system in Sicily (see *Landholding*, page 138), the cottier system in Ireland (*Ditto*, pages 269—270), and the system of *ejarah* and *dar-ejarah* in Behar (*Ditto*, pages 616 to 620). The middlemen who will be created by the Bill will be of that petty class which the experience of other countries has proved to be most baneful. I entirely concur in the following remarks of the late Babu Kristodas Pal in his recorded dissent from the Bill:—"The middleman of course gains much more than what he has under the existing law, but the *bonâ fide* cultivator, in whose behalf the greatest anxiety was evinced in the Committee, will, I fear, be practically worse off than he is at present."

Provisions of the Bill not sufficiently modulated to suit the different requirements of different parts of the country.

146. I think the Bill partakes too much of the nature of the "Chancellor's shoe," and that sufficient account is not taken of the great difference between different parts of the large territory to which its provisions are intended to apply. More especially, I fear that the Bengal provinces will in many things be sacrificed to the feeling of sympathy that has been created for the raiyats of Behar. The Devon Commission wisely observed, when speaking of Ireland, that substantial and permanent relief could only be hoped for from a combination of measures adapting themselves to the varying circumstances under which the owners and occupiers of land are placed in different parts of the country. And the Duke of Richmond's commission, quoting this observation with approval, added that the very nature of the soil and the geographical attributes of the country vary so much that remedies, which would serve in one locality, might be inapplicable or of little value elsewhere. This latter remark is especially true when applied to Behar and Bengal.

The Bill is hard towards the zemindars.

147. I think the Bill is hard upon the zemindars, more especially upon the Bengal zemindars. Every point of conflict between their interests and those of the raiyats is ruled against them and in favour of their tenants. They are now declared to have the smaller share in the proprietary right in all their lands—as well in the lands which were in the occupation of raiyats at the time of the Permanent Settlement, as in those lands which were then waste but have since been reclaimed and brought under cultivation. Lord Hastings in 1822 said that the whole foundation of our Bengal Revenue Code rested on the recognition of private property in the soil; and that it might be assumed that the sadr malguzar, if admitted to engage as proprietor, was intended to be vested, subject to the payment of Government revenue, with the *absolute property of all land in which no other individual possessed a fixed and permanent interest*; that lands occupied by contract cultivators, accounting for their rents immediately to the sadr malguzar, were thus to be regarded as his full property, subject to the stipulations of the contract, and that it was doubtless intended to recognize the full property of the zemindars in unclaimed waste land lying within the limits of their estates. Lord Cornwallis in 1793 observed that the waste lands far exceeded what sufficed for pasturing cattle, but that it was the expectation of bringing them under cultivation and of reaping the profit of them, that had induced many zemindars to agree to the revenue then assessed upon their lands. And it will be borne in mind that Lord Cornwallis elsewhere declared the reclamation of waste land to be a legitimate means of increasing the zemindar's profits, in a passage which has been often quoted:—"The rents of an estate can only be raised by inducing the raiyats to cultivate the more valuable articles of produce, and to clear the extensive tracts of waste land which are to be found in almost every zemindari in Bengal." When we remember that many of the present zemindars are purchasers for valuable consideration at Revenue Sales, it becomes a matter of grave consideration whether the right of letting the remaining lands in any manner they pleased, expressly conferred at the time of the Permanent Settlement and exercised ever since, can now be taken away without compensating those whose interests must suffer. It has been said that one of the objects of the present Bill is to restore the ancient law and custom of the country. How is it possible to contend that the ancient law of the country, which conferred upon the zemindars the absolute proprietorship of lands that were waste at the time of the Permanent Settlement, is restored by now making over the larger share of the proprietary interest in those lands to their tenants who have since been let into possession?

Full proprietary right of the zemindars in land waste at the time of the "Permanent Settlement.

Design of Codifying the whole Law of Landlord and Tenant abandoned in the present Bill.

148. By the Bill which I prepared for the Commission it was proposed to codify the whole law of Landlord and Tenant in these Provinces. This part of the project has been abandoned in the present Bill, and the reasons given for abandoning it will be found in paragraph 10 of the *Statement of Objects and Reasons*. I regret exceedingly the decision which has been arrived at on this point. It appears to me that if there is any portion of the law of India, the codification of which is eminently desirable and urgent, it is the law of Landlord and Tenant within the provinces subject to the Lieutenant-Governor of

Bengal. That law affects the great majority of the community, the large mass of the population being agriculturists. Cases governed by that law form the largest class of suits which come before the Courts. Complaints have been made of late years that Codes have been prepared which the country does not require and will not require for many years to come. But a Code of the law of Landlord and Tenant is required and has been required for many years. It is of the very first importance that the people should be able to learn and know their rights as affected or settled by this law. The knowledge of these rights would do much to prevent disputes, which are more frequent and more prone to arise when men are mutually ignorant of what they can properly claim and legally enforce. In the despatch of the Government of India of the 10th May 1877, the following remarks were made with reference to the subject of Codification in India:—

"We feel, on the contrary, that the reduction, to a clear, compact, and scientific form of the branches of our Substantive Law which are still uncodified would be a work of the utmost utility, not only to the Judges and the legal profession, but also to the people and the Government. It would save labour and thus facilitate the despatch of business and cheapen the cost of litigation: it would tend to keep our untrained Judges from error: it would settle disputed questions on which our Superior Courts are unable to agree: it would (as Your Lordship has observed in the despatch under reply) preclude the introduction of technicalities and doctrines unsuited to this country: it would, perhaps, enable us to make some urgently-needed social reforms without the risk of exciting popular opposition; and it would assuredly diffuse among the people of India a more accurate knowledge of their rights and duties than they will ever attain if their law is left in its present state, that is to say, partially codified, but the bulk ascertainable only from English text-books written solely with reference to the system of English law, and from a crowd of decisions, often obscure and sometimes contradictory, to be found in the English and Indian Law Reports. . . . . We should of course be influenced more by the actual wants of the country than by any love for logical arrangement, legal symmetry, or scientific completeness."

149. It appears to me that if these principles are to be adhered to, if due regard is to be paid to the actual wants of the country, there is no more pressing subject for Codification than the law of Landlord and Tenant in the provinces which constitute the Bengal Lieutenant-Governorship. Personally, I see no difficulty in carrying on the work of Codification along with the consideration of important substantive amendments of particular portions of the existing law. I think the policy and propriety of these amendments will be more fully apprehended and more correctly estimated by those who have to consider them, if they have first obtained that complete acquaintance with the whole subject which is or ought to be indispensable to undertaking the task of Codification. Then, again, the work of Codification, if entered upon at some future time, will cause a reopening of cardinal questions, a fresh unsettling of ideas, and a fresh disturbance of rights, which cannot fail to bring about pernicious consequences. Amongst the subjects included in the Commission Bill and omitted from the Bill now before the Legislature are the following:—The use of land, not forming part of an agricultural holding, for building purposes; the principle of merger; apportionment of rent; the right of co-sharers to sue for and recover separate shares of the rent; the right of co-sharers to measure or enhance; the duty of a landlord to put his tenant in possession; the incompetency of any person to grant a lease for a term exceeding his own interest; and the provisions of the previous law as to suits against an agent for money, or accounts, or papers. All these portions of the law are called into daily operation throughout the country; but although their principles have been generally well settled by judicial decision, the errors committed by the parties themselves, and occasionally by the inferior Courts, show that the law as settled is not known or understood by the community. If Codification is the true remedy for mischiefs that arise from want of knowledge of the law, surely, that remedy ought to be applied here.

Impolicy of reopening the whole question by future Codification.

150. One of the questions upon which the Judges of the High Court are asked their opinion is:—What modifications is it desirable to make, whether by rules or otherwise, in The Code of Civil Procedure with a view to expedite the trial of Rent Suits? It is further inquired whether it is desirable that landlords should be empowered to institute, by means of a single plaint, suits for arrears against a number of raiyats holding independently of each other. Upon this point, after five years' further experience, I adhere to what is said in paragraph 174 of the Report of the Rent Law Commission, which embodies the views then entertained by me and accepted by my colleagues without dissent. It is there said that any attempt to abridge judicial inquiry by arbitrary and abnormal presumptions in favour of either party which, by precluding the production of evidence, may enable Judges to arrive at rapid conclusions, is retrogressive and unsafe; that in order that justice may be done, truth must be elucidated, and the elucidation of truth, especially in this country, requires time and patience; and there is, in consequence, extreme danger in summary methods of proceeding. It was further pointed out that the history of the judicial administration of this country for the last half century has been a continuous record of the abandonment of a system of procedure under which rights were hastily and perfunctorily adjudicated upon, the person defeated and dissatisfied being forced to resort to a regular suit in order to find a remedy for the wrong caused by an irregular proceeding; and with this result that he was too often saddled with the burden of proof, which should have been laid upon his opponent—his chance of ultimate success being thus unfairly diminished.

Can the trial of Rent-suits be expedited by modifications of the existing Procedure?

151. I think that increased facility should be afforded to landlords for the realization of their rents, more especially when those rents are contumaciously withheld. But I believe that this facility can be afforded, not by any abbreviated form of procedure, but by supplying a sufficient staff of judicial officers, who may, with all possible despatch, hear and dispose of the cases brought into Court. I think zemindars have a right to ask for this facility, more especially as the Court-fee stamp upon Rent suits has been quadrupled since 1869. Before that year Rent suits were tried in the Revenue Courts and the institution fee for these suits was one-fourth of the fee required for suits instituted in the ordinary Civil Courts. If the Court-fee is retained at its present high rate, there ought to be a staff of judicial officers capable of disposing of every Rent suit within a month of its institution; and an appeal, when preferred, ought not to take more than another month for its disposal. This would be quite possible with the Small Cause Court Procedure contained in the Commission Bill, if the judicial agency were made sufficiently strong. Then as to the question of Court-fees. When the whole of the raiyats on an estate conspire together to refuse payment of their rents even at the old rate, a large amount of capital is necessary in order to enable the landlord to bring suits against them all individually, and, when decrees have been passed, to obtain satisfaction by successful execution. I think that the Court-fee upon the institution of Rent suits generally ought to be reduced; or that the Local Government should have power to direct a special exemption in the case of landlords forced to sue their tenants *en masse*.

Increased Facility for Realization of Rent should be afforded to Landlords—How it is possible to effect this.

152. As to the question of including a number of raiyats, holding independently of each other in a single case, I have expressed my opinion on several occasions. I do not see how this course is possible as regards suits for arrears of rent. The extent of land held or denied to be held; the rent or the rate of rent; the amount payable, and the amount paid or alleged to have been paid, differ as regards each individual raiyat. There is therefore no question common to all the defendants which can be tried in a case of this nature, and to join a large number of raiyats as dependants in a single case would only lead to confusion, which would retard, instead of accelerating, the decision of their cases. Where the main question at issue is common to a large number of raiyats, for example, where the question is one of enhancement on the ground that the rents previously paid are below the prevailing rate, or on the ground of increase in price, I think that provision may well be made for including a number of raiyats as co-defendants in a single case, and I have elsewhere shown that this practice is not unknown in the Court of Chancery in England. As to the question whether any provision can safely be enacted restricting the right to claim a re-trial when a decree has been given *ex parte*, I entirely concur in the answer which has already been given by the Judges in the Registrar's letter No. 1986 of the 8th August last. I am also of opinion that it would be exceedingly dangerous to enact that a tenant in a suit for arrears should not be allowed to appeal from a decree passed against him except on depositing the amount of the decree.

Feasibility of joining a number of raiyats as co-defendants in a single case.

Proposed restrictions on right to claim a new trial when decree made *ex parte* and on right of appeal.

153. I may here conveniently deal with certain points which are proposed for consideration in letter No. 784 of the 5th of May last, from the Secretary to the Government of India, Legislative Department, to the Secretary to the Government of Bengal. It is asked whether, with reference especially to landlords' improvements, it is desirable to empower Revenue Officers to arrange for the cutting of irrigation channels, the distribution of water, and the payment of compensation. In Behar such powers might perhaps be conferred upon Revenue Officers with advantage; and if under the provisions of the new Bill zemindars are inclined to invest their money in improvements of this kind, I think it imperatively necessary that a reasonable interest on their outlay should be secured to them under the authority of Government.

Should Revenue Officers be empowered to make irrigation channels.

154. As to the question whether the Summary Sale Procedure can be applied to those dependent taluqs, the revenue of which was settled direct with Government, though the holders pay it through the zemindar who is responsible for its realization, I think the question possesses no real importance, having regard to the number of cases which it affects or is likely to affect. In the whole course of my experience, I have had only one case concerned with a taluk of this class. The amount of revenue is generally so small, as compared with the profits, that, except under the most abnormal circumstances, the property is not likely to be jeopardized by withholding the revenue payable thereupon. As to whether the same procedure should be applied to the recovery of arrears of Road Cess and Public Works Cess from rent-free tenure-holders, I think that it should not. I apprehend that it would open a door to fraudulent attempts to destroy these tenures.

Application of Summary Sale Procedure to Taluks paying revenue to Government through zemindars.

And to the recovery of road-cess, &c., from the holders of Lakhiraj tenures.

155. As to whether provisions are required in the Bill with respect to tenants of homestead or *bastu* land which does not form part of an occupancy holding, I still entertain the opinion

Bastu land not forming part of a holding.

which I expressed when a member of the Rent Commission—that this is a proper subject for legislation. I have since met many instances of hardship resulting from the want of equitable provisions upon this subject. I think the provisions of the Bill as to *utbandi* and *hal-hasili* lands should be extended to lands held upon similar conditions, and this can be done by an *ejusdem generis* clause without any specification which it might be inexpedient to attempt. A similar clause may be used for the purpose of exempting from preemption transferable occupancy-rights such as those in *guzashta* and *gora* holdings.

Utbandi, Hal-hasili, and similar lands.

156. With reference to the Price Lists which have been published within the last twelve years I have already expressed my opinion. I think that any attempt to rectify them now would be futile. I entirely approve of the omission from the Bill of the section which limited money rents to a maximum of one-fifth of the gross produce. Any such provision could be just only where the legislature had a clean sheet of paper to write upon. In a country in which inequalities have come into existence as the natural consequence of different circumstances and different rates of progress in different parts of the country, the introduction of a uniform rule of this kind would have most mischievous effects. In some parts of the country rents would have to be lowered to the new standard, whilst elsewhere enhancement, beyond the natural outcome of gradual prosperity, would be attempted, and the result would be a vast mass of injurious litigation.

Price Lists.

General limit for Money Rents properly omitted from the Bill.

157. In conclusion I still adhere, after five years' further experience, to the views which I entertained and expressed when I was a member of the Rent Commission, as to the safe and prudent lines of legislation. I think we ought not to interfere with existing rights which have been the creation of our own administration operating upon the natural progress of the country. I think that no case has been made out for disturbing the land-marks of property It must be borne in mind, as I have more than once pointed out, that a large proportion of the present proprietors are *boná fide* purchasers for valuable consideration, men who have paid their money for property sold at Revenue Sales and in execution of the decrees of the Civil Courts upon the faith of the existing state of things and the rights created by our laws and by our own action or inaction. I am quite prepared to admit, as I have already admitted, that if it is necessary in the interests of the whole community that existing rights, even though acquired in the manner just stated, should be interfered with, the Legislature has full power to interfere, and such interference may be the imperative duty of an enlightened Government. But before such interference can be justified, a strong case for its expediency, or necessity, must be made out, and I am of opinion that such a case has not been established in the present instance. In my view, legislation ought to accept as its proper basis the existing state of things, and whilst putting down oppression and injustice with a strong hand, should respect those rights which we ourselves have created in landed property in these Provinces. I quite assent to what was said by Sir Ashley Eden that he would like to see the Bengal raiyats as a class secure in the enjoyment of rights which they held under the ancient land law and custom of the country. This is, I think, a safe and sound basis for legislation; but I feel constrained to express a strong opinion that the Bill in its present form covers much wider ground, and will, in consequence, be fraught with exceeding mischief. It alters in very essential particulars the rights of all persons having any interest in land; and the re-adjustment of those rights upon the basis of the Bill will be affected only after an enormous amount of litigation extending over many years of the future. The Bill is exceedingly complicated in its details, and here again we find the elements of litigation; and, in consequence of the parties concerned being debarred from settling by mutual agreement many of the questions which are sure to arise between them, they will be forced into Court, inasmuch as no other mode of settling their differences is left open to them. In expressing those opinions which have been suggested by practical knowledge of the subject and matured by experience and some study of other systems, I am *nullius addictus jurare in verba magistri*. I entertain a strong feeling that the whole question should be dealt with upon its own merits, in the light of the past social history, and with a single view to the future welfare of the millions whose interests are concerned, and I deprecate any legislation conducted in the spirit of English party politics, or upon the basis of an economy which has no existence in India.

My personal views as to the course which Legislation ought to take.

APPENDIX.

CASES IN THE ZILLAH COURTS.

1. In *Radha Charan Das, &c.*, v. *Bungshi Mohun Sirkar* (decided by the Judge of Rungpore on the 26th June 1846) certain *paikasth raiyats* had instituted a suit against their under-tenants in order to obtain an increase of rent after issue of the notification prescribed by section 9 of Regulation V of 1812. It was held that the plaintiffs were not competent to exercise the right of landholders in issuing a notice under that section.

2. The case of *Nand Kissore Das* v. *Busch and Bonnevie* (decided by the Judge of Rungpore on the 5th December 1846) was a suit by farmers for *enhanced rent founded on a measurement* and *jamabandi*.

3. The case of *Furruck Mahomed Sirkar* v. *Busch and Bonnevie* (decided by the Judge of Rungpore on the 11th December 1846) was a suit by certain *kutkinadars* for the recovery of enhanced rent *assessed on measurement*. The defendant objected that he was a *khudkasht raiyat* not liable to increased rent, and that the rates of assessment and the length of the measuring rod were not given in the plaint. The case was remanded for a re-trial.

4. In *Sheodyal Rai* v. *Mussamat Rajbunshi Koer, &c.* (decided by the Judge of Sarun on the 28th May 1846) the plaintiffs sued for alleged arrears of rent. It was held that their claim was clearly an attempt on the part of farmers to enhance the rents of the tenantry by the imposition of illegal cesses; and that farmers had no power to enhance rents in excess of previous existing engagements *without a general measurement* or except upon proof of collusion.

5. *Jaijeet Singh* v. *Nasib Mahto* (decided by the Judge of Sarun on the 30th July 1846) was a suit by a farmer for enhanced rent after "notices to the tenantry to come forward and engage for their lands." These notices were a "general call," which was held insufficient. It was observed that zemindars and farmers in prosecuting for enhanced rent must show that the amount demanded in the notification is conformable to the pargana rates; and the provisions of section 7, Regulation IV of 1794, and sections 7, 9, and 10 of Regulation V of 1812 were referred to.

6. In *Jaijeet Singh* v. *Badhur Bhuggut* (decided by the Judge of Sarun on the 30th July 1846) it was held that plaintiff had failed to prove his legal right to enhanced rent either by the defendant's *voluntary contract*, or by a comparison with the *established pargana* rates.

7. *Dena* v. *Lallit Ram* (decided by the Judge of Sarun on the 11th December 1846) was a suit to reverse a summary award for rent. The Judge said:—"No written engagements exist, therefore defendant was bound to conform to the rules of Regulation V of 1812 both in assessing and demanding payment of his rent. This he has failed to do. No formal notice was served at the season of cultivation, notifying the specific rent to be paid by the tenant for the ensuing year: nor is it shown that the amount demanded was conformable to the pargana rates."

8. *Dindiyal Singh, &c.* v. *Rajha Misser* (decided by the Judge of Shahabad on the 26th October 1846) was a suit for rent. Both parties disputed the rate. The Judge said:—"Neither parties have any documentary nor oral evidence to prove what is the actual rate per bigha on which this cultivation is held; and the only course left for Munsiff to pursue was to ascertain the rates paid for lands in the surrounding villages, and then strike and apply an average."

9. In *Bakir Ali, &c.* v. *Shuffee Alnissa, &c.* (decided by the Judge of Chittagong on the 1st July 1847) plaintiffs sued to enhance the *rent of a taluk*. A rent of Rs 72 odd had been assessed upon 4 druns odd at the time of the decennial settlement; and the question was whether the plaintiffs were entitled to additional rent for some 12 kanees of land found by measurement in excess of the 4 druns upon which the rent of Rs. 72 was originally assessed. It was held that as these surplus lands had never been assessed the defendant was liable to pay rent for them.

10. In *Mahomed Ruffic* v. *Golam Hossein* (decided by the Judge of Chittagong on the 6th July 1847) defendant set up, but failed to prove, a fixed jama of Rs. 11-11; and it was held that he was liable to pay rent for 9 kanees odd at the local rate of Re. 1-12 per kanee; that he must enter into an engagement to pay rent at that rate within a month or give up the land.

11. In *Stewart, &c.* v. *Raj Mohun Rai* (decided by the Judge of Dacca on the 20th April 1847) the Appellate Court directed the *pargana rate of rent* to be ascertained by a local Amin, and it was ascertained accordingly.

12 In *Jai Narain Mitter* v. *Asimuddin Khalasi* (decided by the Judge of Jessore) the Munsiff dismissed a suit for rent because the defendant had sold the land. The Judge held that since the landlord had not sanctioned the sale, and the land in the *jote* of a cultivating *raiyat* is not transferable by sale according to construction No. 702 of the 6th July 1832, the *raiyat* must be answerable for the usual rent, until he may give up the land to the landlord.

N.B.—Many of the reported enhancement cases proceed on the ground of more land being discovered by measurement to be under cultivation. The rates seem to have been taken as discoverable in the neighbourhood, and an Amin was usually sent to discover them.

CASES IN THE SADR DIWANI ADALAT.

13. In *Banchanand* v. *Hargopal Bhaduri, &c.* (1 S. D. A. Rep. 145) the Sadr Diwani Adalat in 1806 (present J. H. Harington and J. Fombelle) "entertained no doubt of the lands being held by the respondent at a variable rent or of their being of that description of tenures on which the zemindar is entitled to demand an *increase of rent in proportion to the ascertained assets*; and as there did not appear to be in the Pargana any settled rates of rent for similar tenures according to which the proper rent could be adjusted, it was determined that *the rent* demandable from the respondents *should be settled by an actual survey and measurement* to be made at the expense of the appellant, unless the parties should come to an adjustment between themselves. In the event of no adjustment being made by them, it was directed that the Zillah Judge should cause a *measurement of the lands and estimate of their produce* to be taken, and after deducting from the produce ten per cent. as the customary profit of the talukdars, together with the actual charges of collection, should fix the residue as the annual rent demandable by the appellant for future years."

14. In *Hari Mohun Thakur* v. *Ramnarain Deo* (1 S. D. A. Rep. 255) "the plaintiff stated" (in 1808) "that, *according to the actual survey and measurement*, the rent payable on the lands tenanted by the defendant for the year 1811, at the rate of similar tenures in the pargana, was 1,326 rupees."

15. In *Gopi Mohun Thakur* v. *Radha Mohun Ghose* (2 S. D. A. Rep. 17) the plaintiffs sued in 1805 to obtain a measurement and allotment of the rent of a certain mauzah which was held as a dependent taluk. The Provincial Courts were of opinion that the rent of dependent talukdars ought not to be ascertained by the pargana rates which were applicable to common tenants; but that under the spirit of section 10, Regulation I of 1793, it was to be estimated by adding to the proportionate amount of public revenue assessable on the mehal held by the talukdar a ten per cent. allowance as the *malikanah* of the zemindar. The Sadr Diwani Adalat in 1812 reversed this decision, observing that the principle here laid down was applicable only to independent proprietors of estates; and, referring to the previous case of *Banchanand* v. *Hargopal*, followed the rule there prescribed by which the rent demandable from a dependent talukdar was directed to be fixed on a *measurement of the lands and estimate of their produce* by deducting from the produce ten per cent. as the profit of the talukdars, together with the actual charges of collection, the residue to form the rent demandable by the zemindar. Section 8 of Regulation V of 1812 was referred to as containing the same rule.

16. In *Gopi Mohun Thakur* v. *Ram Tonu Bose* (2 S. D. A. 19) the Sadr Diwani Adalat directed that the respondent's "jama should be adjusted on a *measurement* and adjustment in conformity with the principle laid down in section 8 of Regulation V of 1812."

17. In *Ramkanth Dutt* v. *Radhakanth Dutt* (2 S. D. A. 55) the plaintiffs sued to recover possession of a taluk, alleging that the zemindar had attached it, and sent a *Sazawal to measure and re-assess it*; that the *Sazawal* made the mufassil collections (*i.e.* the collections of rent from the cultivators) in 1210 B. S; and in the following year offered them a lease at an enhanced rent; that they refused this lease, considering the demand excessive, and were in consequence ejected. They admitted that the defendant had the right of annual re-adjustment of the rent at the pargana rate, but objected to the amount demanded and the *data* on which it was calculated. Defendant maintained that this amount had been fixed after a survey and careful ascertainment of what was usual in the pargana. The Zillah Judge had sent an Amin to re-measure the whole land, as well as to examine the mufassil papers, and what evidence he could procure on the spot with a view to ascertain the *sirikh* or rate per *kanee* current in the pargana. The Sadr Diwani Adalat adopted the rates of a previous settlement, which had been acknowledged "agreeably to the statement of the Collector" by the plaintiffs and had been paid for four years.

18. In *Khaja Arratoon* v. *Durga Pershad Bhattacharjya* (3 S. D. A. 34) the plaintiffs sued for Rs. 2,682, rent in respect of lands which they had recovered by a decree of the Sadr Diwani Adalat from the zemindars of Sundeep. They alleged that these zemindars, while in possession, had, for the purpose of defrauding them, let out lands at a low rent, and that at the settlement of the pargana the farmers, colluding with the *zemindars' gomashthas* and with the *amins*, had caused them to make an improper *measurement* and *assessment*, and had so acquired lands at low rents. They further alleged that on discovering this they issued notices to the tenants to appear, and pay rents according to the rules and measurement of the pargana, but the defendants did not appear. The defendants set up a *Mukurrari Jangalburi* lease granted by the zemindars of Sundeep, and pleaded that the plaintiffs had no right to enhance the rent paid by them for 28 years and assessed before the decennial settlement, or to *measure* the land which had already been formerly subjected to *measurement*. The Sadr Diwani Adalat decided that, although the meaning of the patta was not clear, yet regard being had to section 8 of Regulation VIII of 1793, the defendants ought to have paid an increase of rent in proportion to the quantity of land brought into cultivation, and, if at the time of measurement they possessed any land for which rent had not been paid for 23 years, they ought to have paid the rent of such lands to the plaintiffs according to the pargana rates.

19. In *Fiazudin* v. *Rai Chundra Rai* (5 S D. A. 46) the plaintiff sued in 1820 to enhance the rent of a tenure. The defendants pleaded, but failed to prove, a *mukurrari* holding. The defendants were declared liable to pay rent on their tenure at the rate of the pargana; and the Judge was directed to *settle the amount* with reference to the local enquiry already made, or the result of a *fresh investigation and measurement*, which he was authorized to make."

20. In *Mussammat Deb Rani* v. *Ram Narain Nag* (5 S. D. A. 102) the plaintiff sued in 1819 to assess "at the improved pargana rate" certain lands which formed part of a *patni* tenure which he had purchased. He alleged that according to survey the proper pargana rent on these lands was Rs. 367½. A *measurement* was made by an Amin and afterwards by a Munsiff, both of whom reported the quantity of land to be 197 bighas 2 biswas, *liable by the pargana rates* to the rent of Rs. 424 odd. The defendants contended that they held only 129 bighas at a rent of Rs. 89 odd according to the *survey and jamabandi* of 1190 B. S. (1783) made by the officers of Government, and that no talukdar or zemindar could enhance the rents of the under-tenants of land in the 24-Parganas settled on the occasion of the public survey and measurement. The Sadr Diwani Adalat said—"We are of opinion that the respondent is entitled to enhanced rent on the tenure of appellants according to the current local rate. By section 57, Regulation VIII of 1793, a zemindar may levy increased rent at such rate, except on the tenures declared exempt from increase. Appellants have filed papers purporting to show particulars of the admeasurement and *jamabandi* of 1190. The lands are there stated to be 125 bighas 1 biswa assessed with the rent of Rs. 86 odd, that is something less than 12 annas per bigha. From the inquiries of the Amin and Munsiff it appears that according to the rates now current in the vicinage the proper rent of 197 bighas 2 biswas would be about Rs. 400. This gives an average of more than two rupees per *bigha* (or an increase of 166 per cent.). It is evident therefore that since the year 1190 until now *the local rent of land has been progressively increasing*. Appellants admit the tenure of 129 bighas 2 biswas of mal land, but have failed to establish any right to hold the same on any invariable jama. Amending, therefore, the decree of the Court of Appeal, we award to the respondent the right to levy from these lands rent at the customary rate. Let the respondent proceed under Regulation V of 1812 to assess the proper rent on the same and any other *mal* lands held by the appellants, which he may consider liable."

21. In *Durga Persad* v. *Clementi* (6 S. D. A. Rep. 218) the holder of a *mukarrari* tenure had absconded and the *then* proprietor gave the land to a new tenant at the old rent. It was held (1837) that a subsequent purchaser, at a sale for arrears of revenue, of the estate in which the tenure was included was entitled to enhance. "The respondent," it was said, "is entitled to rent according to the pargana rates, and as these are ascertainable from the records of the Collector's office, copies of which have been filed, I would give judgment accordingly, taking these rates as the basis of the calculation of the rent to be annually paid by the defendant."

22. In *Sobhnath Misser, &c.* v. *Geinda Lal, &c.* (7 S. D. A. Rep. 182) it was held that the enhancement notice required by section 9, Regulation V of 1812 must specify the rent to which the parties served with it are to be made liable, and must intimate how the landholder has acquired the right of enhancing the rent.

23. In *Maharaja Kishen Kishore Manik* v. *Rajchunder Dhur, &c.* (7 S. D. A. Rep. 311) the plaintiff's title to assess the defendant's taluk at the pargana rates was held to be unquestionable; and the enhancement notice was held not to be bad because it did not specify the quantity of land in the possession of the tenants or the names of the parties in possession, it being sufficient to specify the names recorded in the *zemindari sarishta* or office.

24. In *Ganga Persad Ghose* v. *Ram Fotdar, &c.* (7 S. D. A. Rep. 314) the plaintiff claimed, under clause 8, section 15, Regulation VII of 1799, damages against the *raiyats* for opposing him and preventing him from *measuring* his estate. Under the head of damages he included the excess of rent that he would have been entitled to had the *measurement and consequent assessment* been effected. The Sadr Diwani Adalat held that he was entitled to damages, and directed the deputation of an *amin* to ascertain the rents of the estate in order to assess the damages.

25. The case of *Mulvi Abdula* v. *Ramzi Dye* (7 S. D. A. Rep. 370) was a suit to recover possession brought by the transferree of a raiyat's holding who had been ousted. The Sadr Diwani Adalat declined to pronounce any decision upon the general question of a raiyat's right to sell his holding; but finding that transfers by the raiyats had been sanctioned in the particular property by the landlords, who were *mutawallies*, decided that if the present *mutawalli* considered the particular transaction illegal, he should have taken his legal remedy by an action at law instead of ousting the plaintiff.

26. In *Mirtanjai Mukherji* v. *Maniek Chandra Das* (7 S. D. A. Rep. 506) the plaintiff, alleging himself to be the twelve-anna proprietor of a certain *hawala*, sued to enhance the rent of his *nim-hawaladars* on the ground that the ten-anna sharers of the taluk, under which he held his *hawala*, had by a decree of Court enhanced his rent. The Principal Sadr Amin held that the subordinate tenants were liable to enhancement in the same proportion as their superior tenure-holders. The *Sadr Diwani Adalat* set aside this decision, holding

that he ought to have enquired into the rates paid in the pargana by *nim-hawaladars* to *hawaladars* and have decided accordingly, awarding rent at these rates. The case was therefore remanded that this might be done.

27. In *Darpanarain Rai* v. *Srimunt Rai, &c.* (S. D. A. Decisions for 1849, p. 188) it was held that a raiyat, who had paid an uniform rent for more than twelve years as for a certain supposed quantity of land, was not thereby debarred from claiming a *measurement* of the land actually in his occupation, and reduction of his rent upon the *pargana* rates according to the result of such measurement.

28. *French* v. *Kissen Kumar Khan, &c.* (S. D. A. Decisions for 1849, p. 459) was a suit by a *dar-patnidar* to enhance the rent of a *miraadar* holding directly under him. A *dar-miraadar* and *se-miraadar* were joined in the suit unnecessarily, as the Sadr Diwani Adalat thought.

29. *Jai Narain Bose* v. *Madhub Chandra Sikdar* (S. D. A. Decisions for 1849, p. 764) was remanded to try whether the raiyat's tenure in dispute had been acquired before the permanent settlement by the party then in possession on a recognition of his being a resident cultivator or raiyat with hereditary rights of occupancy at a fixed rent, and also whether the permanent settlement formed for the 24-Parganas district was granted on the basis of the *pattadari* or *jamabandi* engagements that had been previously concluded with such raiyats by the Government being maintained inviolate.

30. In *Harnath Rai* v. *Gauri Persad Bhattacharjya* (S. D. A. Rep. for 1856, p. 611) a suit for enhancement was dismissed, the tenure being found to be a *mukarrari* one, which had existed twelve years before the permanent settlement. Former decrees between other parties were here admitted as evidence of the nature of the tenure.

31. In *Digamber Mitter* v. *Ram Sundar Mitter* (S. D. A. Rep. for 1856, p. 617) it was held by four Judges out of the five that the law of limitation did not apply to claims for enhancement of rent by a landlord against a tenant, when the latter holds no lease determining the rate of rent payable by him and did not come within the exceptions of the Sale Law, Act I of 1845, *first*, because the claim to assess is a constantly recurring cause of action; *secondly*, because the possession of the tenant under the circumstances is not *adverse* to the landlord, but only *permissive*. See also *Digamber Mitter* v. *Harinarain Chakravarti*, S. D. A. Rep. for 1860, p. 118

32. In *Hurdeb Pridhan* v. *Ram Kumar Mustaufi* (S. D. A. Rep. for 1856, p. 771) the plaintiff sought to enhance, and the defendant unsuccessfully set up a *mukarrari* title alleged to have been in existence twelve years before the permanent settlement. See also *Ram Ruttun Rai* v. *Tripura Sundari Dasi*, S. D. A. Rep. for 1859, p. 465.

33. In the matter of *petition* No. 740 of 1856 (S. D. A. Rep. for 1857, p. 214) it was said that *khudkasht raiyats* are by no means exempted by law from suits for enhancement; that it may at any time become a question whether or not land held by them is fairly assessed.

34. In *Jainarain Bose* v. *Massamat Radhamoni* (S. D. A. Rep. for 1859, p. 628) the Sadr Diwani Adalat said:—"The Zillah Judge has clearly held that the tenure of the raiyat was not any one of the special classes, which it was the purpose of section 26 of Act I of 1845 to protect from discretionary enhancement. Not being a *khudkasht raiyat*, what is the status of the present defendant? The essential characteristic of the tenure of a *khudkasht raiyat* is the right of *prescriptive occupancy*. But in this case the *raiyat*, it has been found, has no such right; and necessarily he is simply a *raiyat* whose occupancy arises *from the discretion of the zemindar*. For the purpose of the present contest we have no intermediate class of raiyats between *khudkasht* or old resident *raiyats* and *raiyats* who hold their lands from year to year; and to all who are not *khudkasht raiyats* Act I of 1845 applies one rule. Clearly, therefore, section 26 of Act I of 1845 empowers the *zemindar*, plaintiff in this action, to enhance at discretion the rent payable by the *raiyats*, defendant, anything in the existing Regulations to the contrary notwithstanding; and it appears to us that as the defendant in his appeal to the Judge failed to establish his title to the possession of any tenure which should exempt him from the operation of this rule, it was not competent to the Judge to set aside the finding of the Principal Sadr Amin as to the rates or *quantum* of rent payable by the raiyat. The Judge has observed that the zemindar in conformity with clause 2, section 60 of Regulation VIII of 1793, section 9 of Regulation V of 1812, and other enactments bearing on the question, can enhance only according to the *general rates of the pargana*; but the first law here quoted, *viz.*, clause 2, section 60 of Regulation VIII of 1793, refers to the assessment of *khudkasht raiyats'* lands and (whatever construction should be given to it when a question arises) is not applicable to the present suit; and undoubtedly, considering the limited interest possessed by the *raiyat* defendant now before us, the rules as to rates laid down in Regulation V of 1812 are modified by section 26 of Act I of 1845. It seems to us to be the object of this enactment to enable zemindars *to revise at their discretion the assessment of the lands occupied by raiyats*, who have not a permanent right of occupancy; that in this sense it distinguishes between *raiyats*, who have and those who have not a right of prescriptive occupancy; and that *the will and interest of the zemindar are intended by the law to be the measure and regulator of the rent to be demanded from raiyats, whose occupancy is limited and temporary*.

35. In *Raja Prasannonath Rai* v. *Bungshibudhun Das* (S. D. A. Rep. for 1857, p. 973) it was laid down that it is *erroneous to suppose that the right to enhance rents is confined to auction-purchasers* and others, named in sections 9 and 11 of Regulation V of 1812; that these sections only lay down rules in which the mode of enhancement is pointed out, and for extending it to other parties than those already enjoying it, but that *all landholders possess the right*.

36. In *Rani Oojulla Kumari* v. *Birjo Mohan Hajra* (S. D. A. Rep. for 1857, p. 1268) it was pointed out that it was not for the landlord plaintiff to show that the tenant defendant's lands were liable to enhancement, but for the tenant to show that his lands were not liable to enhancement. See to the same effect *Radhika Chaudhrain* v. *Bholanath Ghose*, S. D. A. Rep. for 1859, p. 677, and cases there cited.

37. In *Ruttun Kishore Rai* v. *Khaja Abdul Gani* (S. D. A. Rep. for 1857, p. 1413) a majority of the Court held that a tenure was liable to enhancement, which, though in existence at the time when the permanent settlement was made, had not been held at a fixed rent for twelve years before such settlement. The tenure here was a *hawala* in Backergunge.

38. In *Ram Kanhye Chaudhri* v. *Ajudhiaram Dutt, &c.* (S. D. A. Rep. for 1858, p. 653) it was laid down that the mere fact of the defendant being a *kadimi raiyat*, who had held for more than fifty years, or the fact of his being allowed to hold at a certain rate for a series of years without any written engagement, could not bar the zemindar's right to enhance.

39. *In the matter of the petition of Mukdun Bibi* (S. D. A. Rep for 1858, p. 1013) a District Judge was held to be in error in ruling that only auction-purchasers could apply the provisions of Regulation V of 1812 to claims for enhancement of rents. To the same effect is *Rani Mohamya Dasi* v. *Nilmani Jugi*, S. D. A. Rep. for 1858, p. 1800.

40. In *Sreemunt Addy Photedar* v. *Ram Tonu Karmokar* (S. D. A. Rep. for 1859, p. 930) the holder of a shop was held not to be in the position of a *khudkasht raiyat*, but to be subject to enhancement at the pleasure of the owner and liable to ejectment if he failed to pay the enhanced rent demanded.

41. In *Jogendro Chandra Rai* v. *Tarachand Khan*, &c. (S. D. A. Rep. for 1859, p. 1303) it was held that under section 9, Regulation VII of 1822, it was quite competent to a zemindar, notwithstanding his acceptance of a settlement from Government, to maintain a suit to set aside the rates entered in the settlement *jamabandi*; and that, to entitle him to succeed in such a suit, it was only necessary for him to show that the rates therein entered are not the *pargana* rates which lands of the particular nature and in the particular situation ordinarily bear. Where such a suit was brought ten years after the acceptance of the settlement rates it was held that it lay on the plaintiff to show that, since the settlement, circumstances had occurred which had attended to raise the value of the raiyats' lands, and consequently to entitle him to an increased share of the surplus profits of those lands, or, in other words, to an enhanced rent.

42. In *Guru Charan Dass* v. *Mudu Kushai* (S. D. A. Rep. for 1859, p. 1243) it was decided that the purchaser of a dependent *taluk* under Act VIII of 1835 was not entitled to raise the rents of tenants with fixed rights acquired by grant, prescription, or otherwise; but the defendant in that particular case, having failed to prove a *mukarrari* interest set up by him, was held to be a tenant without any rights other than those of occupancy and to be therefore liable to have his rents raised according to the capabilities of the land.

43. The case of *Lalla Sheo Lal* v. *Nobodip Chandra Sirkar, &c.* (S. D. A. Rep. for 1860, p. 10) was remanded to try whether defendant was entitled to exemption from enhancement, because his *jama* was fixed under a lease of the period of the decennial settlement held continuously since then at uniform rates, so as to be covered by the term *khudkasht* or *kadimi* in clause 3 of section 26 of Act I of 1845.

No. 1906T—R., dated Darjeeling, the 15th September 1884.

From—A. P. MACDONNELL, Esq., C.S., Secretary to the Government of Bengal, Revenue Department,

To—The Secretary to the Government of India, Legislative Department.

Introductory remarks.—The Bengal Tenancy Bill, as revised by the Select Committee, was forwarded, under cover of your letter No. 784 of 4th May last, to the Bengal Government, for an expression of its own views on the subject, and of the views of those officers whom the Lieutenant-Governor might desire to consult. The revised Bill, with the Select Committee's Report and the minutes of the dissentient members, had been previously published in the *Gazette of India*; and, with the view to giving the Bill the utmost publicity, the Lieutenant-Governor, in anticipation of formal sanction, had the Bill republished in the *Calcutta* and *Vernacular Gazettes* on the dates stated in the margin, while translations were at the same time made freely available to the public at a nominal price.

Calcutta Gazette, 2nd, 9th, and 16th April 1884.
Bengali Gazette, 29th April, 6th, and 13th May 1884.
Behar Gazette, 6th, 13th, and 20th May 1884.
Urya Gazette, 8th and 15th May 1884.

2. On receipt of your letter under reply, no time was lost in communicating its contents to the Board of Revenue, to the Commissioners of Divisions, to District Officers, and to Judicial Officers of all grades, whose general experience or special acquaintance with rent litigation rendered their advice valuable. Copies of your letter were also sent to the various public Associations which have, from time to time, addressed the Government on the Rent Question. This action was followed by the issue of a circular letter (a copy of which is herewith forwarded for the information of the Government of India) in which the Lieutenant-Governor sought to lighten the labour of all officers consulted by bringing to their notice the chief points for enquiry and report. Thus no effort has been spared by this Government to give the fullest publicity to the revised Bill, and to secure the fullest examination of its provisions.

3. **Method of enquiry.**—The discussion of the Bill by Executive officers was carried through by a system of divisional conferences. It seemed to the Lieutenant-Governor to be desirable that, at the stage the rent controversy had then reached, the enquiry should be limited as far as possible to practical considerations, to the exclusion of abstract or theoretic speculations. He therefore directed that district officers, having made necessary enquiries on obscure points, and having consulted all interested in the subject or willing to give advice, should meet their Commissioners and discuss with them the clauses of the Bill in the light of actual facts prevailing in each district. No doubt all officers the last year, when the Bill, as introduced into Council, was referred to them for opinion, expressed their views with reference to local facts; but on this occasion the Lieutenant-Governor believed that each officer's opinion, when exposed to the criticism of other officers cognizant of the facts or of similar facts, would assume due proportions, while many of the advantages of a Commission of Enquiry would be attained without the dangers which a Commission in the present state of agrarian feeling in these Provinces would unquestionably produce. The result has justified the Lieutenant-Governor's hopes, for some of the reports now submitted exhibit a knowledge of the country, a grasp of the

many complications of this large measure, and an impartial sympathy with all classes, which challenge the highest praise. It is a pleasure to the Lieutenant-Governor to feel that there are but few points in these reports on which he finds himself not in accord with the views of the majority. Where he does differ, he has felt himself bound to justify his opinion in the fullest manner.

The duties of judicial officers did not permit of their attending the conferences. They accordingly have submitted separate reports, many of which are distinguished by ability and value. Some private gentlemen interested in land, and some Landholders' Associations, have also contributed criticisms which are worthy of consideration. The Bengal and Behar Landholders' Association, though asked to advise, have not yet favoured the Government with their views, owing, the Lieutenant-Governor understands, to the interruption in the Association's arrangements consequent on the lamented death of their Secretary, the Hon'ble Rai Kristo Das Pal Bahadur. The Association promise, however, to forward an expression of their views at a later date.

4. Thus to the already imposing mass of evidence on this subject, a large addition has been made, which should, in the opinion of the Bengal Government, render the early decision of the question a matter of ease, as it is a matter of the utmost consequence to the peace and prosperity of these Provinces. The new evidence, however, possesses features of interest which are all its own. In the first place it is interesting as impartially reflecting every shade of opinion in the controversy. In the next place, it is remarkable for the proof it affords (if, indeed, any was wanting) of the necessity, not only for legislation on the Tenancy question, but for legislation in the general direction of this Bill. Even those officers who are in principle most opposed to the Bill admit, by their comments, the necessity for improvement in the existing law. On matters of detail, there is of course much difference of opinion, and on some points of principle further reflexion and enquiry have modified previous views. All this was what was expected: unanimity was neither possible nor indeed desirable. But through all these varieties of opinion, the Lieutenant-Governor on most points perceives a general under-current of agreement as to what ought to be done, though the way to do it is not always clear. It will be his endeavour in the following observations to indicate the direction in which agreement lies and the best way to give effect to it where desirable. The result will, the Lieutenant-Governor believes, prove that the main principles of this measure have passed successfully through a trying ordeal, while many modifications suggested thereby are in the direction of the results for which this Government has consistently contended.

5. **Applicability of the Bill to Government Estates.**—There is one other point on which the Lieutenant-Governor would touch in these preliminary remarks. It has been made a subject of reproach against the Bengal Government, both in the Press and on public platforms in this country and in England, that while forward to recognize tenant-right in settled estates, it was unwilling to recognize it in its own property, the khas mehals. This Government has accordingly been upbraided with inconsistency; and a settlement case which, though carried out seven years ago, has recently come on appeal before the High Court, has been used to charge it with disingenuousness. The reproach is as unmerited as the charge is baseless. The Bill lends no countenance to the reproach, and, by repealing the special procedure of Act VIII (B. C.) of 1879, plainly refutes it; while the liberal policy which this Government has inaugurated in all its dealings with ryots, and in all questions connected with land—a policy which, in harmony with that recently enunciated by the Government of India in regard to Land Revenue Settlements, has to some extent, anticipated the Bill—should have saved it from the charge. If the cases to which reference is made teach any moral, it is this: that there is an urgent necessity for a revision of the Tenancy Law throughout these Provinces. For, if despite checks and counter-checks, large enhancements, promoted by men who had nothing to gain thereby, were decreed by the courts and upheld on appeal, what, it may be asked, is not possible where the stimulus of self-interest has full play, and where the adjudication of the courts is not

awaited? There is no doubt—indeed the reports now submitted prove—that there are officers who take far more extreme views of the zemindari rights of Government than the Government itself does; still all that the the present Government of Bengal could, by executive action, do, has been done to soften the rigour of the present procedure in every portion of these Provinces where re-settlements are in progress. And nowhere has leniency been more conspicuously shown than in the Midnapore estates (which it is a mistake to think belong to Government), where for about forty years the ryots had held their lands without any enhancement; and where, during the litigation with some 2,654 ryots, collection of the enhanced rent from 88,538, who did not litigate, was postponed; where, after the Government had been successful in the litigation, remissions, amounting to over two-and-a-half lakhs of rupees, were allowed; where since the conclusion of the settlement, the number of holdings sold up for arrears of rent has averaged no more than ·03 per cent. per annum on the total number of holdings; and where special arrangements were made to receive and treat with leniency the representations of all who felt aggrieved. It is as reasonable to blame this Government for the evil results of the existing law as it would be to blame Wilberforce or Clarkson for the evils of slavery. The Government is doing its best to remedy the evils which it recognizes.

6. With these remarks I am now to discuss the Bill, chapter by chapter, postponing, as in my letter of 27th September 1883, minute points of detail and verbal criticisms for those communications which the Lieutenant-Governor trusts to make from time to time, as during last session, to the Select Committee. I am also to add here that such of the points raised in the second and fourth paragraphs of your letter under reply, as may not be noticed in their proper connection, will be discussed when the Lieutenant-Governor has concluded his comments upon the Bill.

CHAPTER I.

7. Definition of "estate."—Exception has been taken to the definition of "estate"* in section 3 as not including Government khas mehals. The objection is groundless, as already stated; but it may be desirable here, with the object of obviating further misapprehensions, to state precisely how the matter stands. Under the provisions of section 6, Act VII (B.C.) of 1876, the Collector of every district is bound to maintain registers of revenue-paying and revenue-free lands. One of those registers exhibits the "estates," borne on the revenue-roll of the district. Now the revenue-roll of every district consists of two departments—the fixed and the fluctuating. The fixed department deals with "estates" the revenue of which is settled permanently or for a term of years with proprietors or farmers; the fluctuating department treats of Government "estates" the rents of which are collected direct from the tenants. Thus every estate or khas mehal of which Government is the proprietor is borne on the revenue-roll of some district, and as a consequence is inscribed in the register to which section 3 (1) alludes. If Government be not the "proprietor" of the khas mehal; in other words, if the land be such a tenure as is referred to in the proviso to section 3 of the Bill, and held under some owner of an "estate," it will still be included in that "estate," and thus object to the provisions of the Bill. There can therefore be no doubt whatever that "estate," as therein defined, does include Government khas mehals, and that the substantive provisions of the Bill will be as largely enjoyed by the ryots on Government estates as by those in ordinary zemindaris. The statements to the contrary effect, which have from time to time been made by the opponents of the Bill, are entirely without foundation. If the Bill, as drafted, afforded any foundation for them, the Government of Bengal would be the first to demand that the Bill should be so modified as to include Government estates. The only advantage the Government retains over the ordinary zemindar under the Bill is the certificate procedure. In paragraph 28 of my letter of 27th September 1883, the reasons are given which justify that advantage.

* "Estate" means land included under one entry in any of the general registers of revenue-paying lands and revenue-free lands prepared and maintained, under the law for the time being in force, by the Collector of a district.

8. Definitions of "rent" and "holding."—Rent is defined in the Bill to mean "whatever is payable or deliverable in money or kind by a tenant to his landlord on account of the use or occupation of land held by the tenant." To that definition it has been objected that it may be held to include cesses (which are prohibited by section 85), if such cesses are willingly paid by the ryot, as, to avoid an increase of the rental for land, they often are. But it seems to the Lieutenant-Governor that any payment which is prohibited by the Bill cannot be a legal payment; and as "rent" must be a legal payment, it necessarily excludes all cesses not recognized by law. It is a matter of drafting, and if the definition would be made clear, as by the insertion of the word "legally" before the word "payable," the Lieutenant-Governor would have no objection.

A point is raised by Mr. Dampier, late member of the Board of Revenue, in connection with the definition of "holding,"* which may here be made the subject of some explanation. A ryot is let into possession of a plot of land in 1880, and afterwards in 1884 is let into possession of another plot on the same conditions. As both plots are held on the same conditions, do they, asks Mr. Dampier, form one holding? To Mr. Dampier's question the answer would seem to be that as the lands are not held on the *same*, but on *similar* conditions, they do not necessarily form part of an entire holding. Whether in point of fact the new and the old land should be regarded as amalgamated, depends on the arrangement made by the ryot with his landlord. It is true that in common phraseology all the land a tenant holds is called his holding; but cases constantly occur in which the parcels of land making up the holding are held by distinct titles and on separate terms. The Lieutenant-Governor, then, thinks that ordinarily the question of one or two holdings should be a matter of contract between the landlord and tenant; but the ryot should, apart from any contract on the point with the landlord, have the option of amalgamating the new land with the old, or holding it apart. The latter point is important in the deltaic districts, where settled ryots may take fresh land by the year, relinquishing at the year's end if they find the cultivation unremunerative. If every new plot of land taken up in this way within the village or estate for temporary cultivation were regarded as an addition to the "holding," the settled ryot of these deltaic districts might often suffer, while the landlord, too, might be put to trouble. Instead of a simplification and a benefit, the settled *status* might then prove a difficulty and a loss.

* *Section 3 (7).*—Holding means a parcel or parcels of land held by a tenant of a landlord under one lease or one set of conditions.

9. In concluding his remarks on this chapter, the Lieutenant-Governor would call attention to the words "held immediately from a proprietor," in section 194, as they seem to him to exclude *durputnis* and similar under-tenures from the operation of Chapter XVI. In accordance with section 16, Regulation VIII, 1819, and Act VIII (B.C.) of 1865, tenures (other than *patnis*) transferable by the title-deeds or established usages of the country are saleable, after decree, in the same way as *patni* taluks. The object of the present Bill is not to alter the existing law in regard to such tenures; but the Lieutenant-Governor fears that the words quoted from section 194 may, if no further explanation be given, have the effect of neutralizing the definition in section 3 (16).† The question is one of mere drafting, and needs only that attention should be called to it.

† *Section 3 (16).*—"Patni tenure" means a tenure of the kind described in Schedule II annexed to this Act, and includes the darputni and other similar tenures referred to in that schedule.

CHAPTER II.

10. Definition of "tenureholder."—The definition of "tenureholder"‡ in the Bill has been objected to because of the too great prominence given to the conception that the tenureholder is primarily a rent-collector. It has been urged by the Legal Remembrancer that the tenureholder "has undoubtedly ac-

‡ *Section 5 (1).*—"Tenureholder" means primarily a person who has acquired from a proprietor or from another tenureholder the right to collect rents, and includes also the successors in interest of person who have acquired such a right and the persons who are to be deemed tenureholders under section 37.

quired a right to the land itself subject to the right of the cultivator," and accordingly Mr. Garrett, to give effect to that view, would define the tenureholder as "a person who has acquired land by grant of purchase, primarily with the object of subletting it to others," &c. Mr. Garrett's way of looking at the matter is supported by the Burdwan Conference and by the general consideration that tenures, in districts with an abundance of waste land, were not created on the basis of an existing rent-roll. It is, however, probably true at the present day, that in most districts there is but little surplus land, and that where tenures are created at all they are tenures in regard to land under cultivation and not in regard to waste land. It would, in the Lieutenant-Governor's opinion, be less true to the fact to say that a tenureholder in the present day acquires land to bring it under cultivation than that he acquires a right to collect rents from lands already under cultivation. While, therefore, the Lieutenant-Governor does not question Mr. Garrett's view that, subject to the cultivator's interest, the tenureholder does acquire a right to the soil of his tenure, he must express his belief that the definition of the Bill is more in harmony with facts than the proposed emendation. It is, moreover, to be observed that settling ryots is the ordinary method of reclaiming waste land, and from this point of view the Lieutenant-Governor has no objection to Mr. Wilson's proposed addition "or to bring land under cultivation by establishing tenants upon it."

11. Definition of "raiyat." Objections.—There is, however, one point on which the definition of tenureholder is clearly defective. It does not provide for those tenureholders who derive title from persons who are themselves neither tenureholders nor proprietors, as defined in the Bill. On this point also the definition of "raiyat"* is by common consent defective. A "proprietor" is defined to be a person or a number of persons† owning an "estate," while an "estate" means land covered by one entry in the register of revenue-paying or revenue-free lands. Thus a "proprietor" is a registered revenue-paying owner of land or a registered lakhirajdar. A tenureholder, as defined in section 5 (1), on the other hand, derives his title either from a proprietor or another tenureholder. But there are many owners of land in these Provinces who sublet, yet are neither "proprietors" nor "tenureholders" as defined in the Bill. There are, for instance, the dependent talukdars referred to in paragraph 92 (5) of the Select Committee's Report, not a numerous class, it is true, but still existing in some districts. There are petty lakhirajdars and the aymadars referred to by the Burdwan Conference—a far more numerous class—whose names appear at present in no registers of revenue-free property. Possibly there are the ryots on churs, which have not come within the operations of the *dearah* survey, though the Lieutenant-Governor is not prepared to say that they are so clearly outside the definition as the others are. As the Bill stands, no tenureholder and no cultivator holding land under these possesses the *status* which it is intended to confer. It would seem therefore that the definitions of both tenureholder and raiyat need correction with reference to the preceding considerations. The correction suggested by the Presidency Conference would meet the difficulty were those owners of lakhiraj holdings, to whom the proviso in section 3, Regulation II, 1819, refers, liable to be registered; but in the Lieutenant-Governor's opinion it is doubtful if such liability attaches to them. Possibly an adaptation of the suggestion of the Bhagulpore Conference might suit—"or under a holder of revenue-free lands not coming within the definition of estate; or under a holder of lands that are rent-free."

* *Section 5* (2).—"Raiyat" means primarily a person who has acquired land for the purpose of cultivating it by himself or by members of his family, or by hired servants, or with the aid of partners.

† Having regard to section 2 (3) of the General Clauses Act (I of 1868), the words "number of persons" might be omitted. If retained, they should also be inserted in the definition of "tenant."

12. Its applicability to the deltaic districts.—There are two other points in connection with the definition of ryot—one raised by the Presidency Conference, the other by the Commissioner of Chittagong—which deserve notice. The Presidency Conference, in order to bring private thatching-grass lands and the like within the definition, would insert the words "gathering the

produce" after the words "cultivating it," and this notwithstanding the provisions of section 225 (Rights of Pasturage, &c.). It seems to the Lieutenant-Governor that the questions dealt with by section 225 would come more naturally under Chapter IX (miscellaneous provisions regarding rent). In connection with that chapter, he will propose that section 225 be inserted after section 88 (produce rents), and that some modifications be introduced into it which will meet the object which the Presidency Conference has in view. The point raised by the Commissioner of Chittagong needs more detailed notice. In the Chittagong Division there is still a good deal of waste land and much room for the expansion of cultivation. The supply of land is larger than the demand for it, and accordingly there are fluctuations in the area under tillage varying with the state of the rice market. The same description is applicable to other tracts of country in Bengal, as instanced by the report of Mr. H. Reily, the Manager of the Chanchal Wards' Estates in Maldah, in the Government estate of Jeypur in Bogra, and elsewhere. If in such localities there is a prospect of a dear market, more land is cultivated; if the market promises to be cheap, cultivation is contracted. But as in a favourable year a ryot may thus sublet more than half his holding, the fear is that by the operation of section 37 ("the convertible tenureholder") he would be converted into a tenureholder. A tenureholder might find himself deserted by his ryots the following year of cheap prices, and he might have all the land on his hands again.

If, as seems probable, section 37 be not retained in the Bill—a point which will be discussed later on—the difficulty which Mr. Lowis foresees will of course disappear; the person on whom falls the risk of cultivation will remain the "raiyat," not the nomad who is here this year and away the next. But if it be resolved to maintain section 37, then, in the Lieutenant-Governor's opinion, the only way to provide for the peculiar circumstances of the Chittagong Division and other portions of the country to which the conception of the "convertible tenureholder" may be deemed inapplicable, would be to invest the local Government with the power of suspending the operation of the section in these localities. The necessity for such a suspensory power must of course tell against the retention of section 37; but it seems clear that the adoption of Mr. Lowis' proposal (*i.e.*, the addition of the words "or by means of inferior cultivators holding by the year or at fluctuation rates") would frustrate the object of the section all over Bengal.

13. Apart from the reference to section 37, which will be dealt with in its proper connection, the Lieutenant-Governor has no criticism to offer on clause 4 of the section.* He must, however, deprecate the suggestion of the Legal Remembrancer that sub-clause (*c*) should be placed before sub-clause (*a*), the object of the suggestion presumably being to direct the court's attention more to the origin of the tenancy than to existing custom. The Lieutenant-Governor is clearly of the opinion that, where a custom is well established, it should rule the character of the tenancy. Where a custom is not well established, there only should the courts have recourse to the always debateable ground of the origin and nature of the right.

* In determining whether a tenant is a tenureholder or a raiyat, the Court shall have regard to—

(*a*) local custom;
(*b*) the provisions of section 37 with respect to raiyats who sublet more than half their holdings; and
(*c*) the nature of the right of tenancy as originally acquired, that is to say, whether it was a right to collect rents or a right to cultivate land.

14. Presumption of status of tenureholder from area of holding.—Coming now to clause (5) of the section,† it will be noticed that the proposal has called forth various expressions of opinion. The Commissioner of Chittagong thinks that 100 bighas (33 acres) is too high a limit, and would reduce it to 50. The Presidency Conference accept the clause as it stands; the Dacca Conference and Mr. Dampier, who even favour a reduction of the area, would change the presumption into an absolute rule, in which case Mr. Dutt, Collector of Backergunge, hereby meeting several objections, would allow a fee to be levied on the creation of the tenure. The Bhagulpore Conference would support the Bill if

† Where the area of a holding exceeds 100 standard bighas, and the whole or part of it is sublet, the tenant shall be presumed to be a tenureholder until the contrary is shewn.

the greater part of the holding were sublet; while the Patna and Burdwan Conferences oppose the presumption, the former alleging it to be contrary to fact,* the latter because it deprives the zemindar of the *bonus* said to be usually taken on creation of tenures. Judicial officers' opinions are less divergent, the majority agreeing in considering the presumption fair and in accordance with existing facts. This is the view which the Lieutenant-Governor himself entertains and supports, although no doubt some weight is lent to the more absolute proposal by the adhesion it has received not only in these reports, but also in the Rent Commission's Bill. In this connection the attention of the Government of India is requested to Mr. Dampier's remarks, and to the observations made on the subject at page 19 of the Report on Sir Ashley Eden's Bill.

* On this point the Lieutenant-Governor, doubting the correctness of the Conference's view, has called for further information.

CHAPTER III.

15. Status, rights and liabilities of tenureholders.—This chapter has met with general approval, though some officers object on the point of the limitation on enhancements. This result must be pronounced very satisfactory having regard to the fact that in previous drafts on this part of the subject success was not thought to have been achieved. The officers most competent to advise on the subject of tenures are those acquainted with the deltaic districts of the Chittagong and Dacca Divisions, and it is from them that the chapter has received the greatest approval. The remarks of Mr. Lowis, Commissioner of Chittagong, and of Mr. Romesh Chunder Dutt, Officiating Collector of Backergunge, are especially valuable, and to them the Lieutenant-Governor would invite particular attention.

16. Discussion of the 20 years' presumption in relation both to tenureholders and to raiyats.—The first noticeable point in connection with the chapter is the question of the 20 years' presumption afforded by the existing law, in the case of tenures as well as of occupancy holdings. As the arguments for and against the 20 years' presumption are practically the same, whether applied to tenures or to occupancy rights, it may be convenient to discuss the point once for all, and, as a whole, in this connection.

In the first place, then, the Lieutenant-Governor calls special attention to the enormous preponderance of evidence in favour of retaining the presumption as it now exists. The Patna, Burdwan, Presidency, Dacca and Orissa Conferences are unanimously against any change. The Bhagulpore Conference (by a majority) and Mr. Lowis would allow a sufficient time for registration, and then annul the presumption. The Rajshahye Conference alone would give the ryot two years in which to *sue* for the establishment of the presumption or forfeit his privilege—a proposition which the Lieutenant-Governor would absolutely reject as affecting a right which the ryots have enjoyed under the present law since 1859, and as tending to extreme litigation. Of the judicial officers, a very few would annul the presumption altogether, a larger proportion would modify it, while a still greater number would retain it unchanged. Thus the Lieutenant-Governor feels himself fully justified in saying that the weight of authority is against any alteration. Those who would abolish the presumption proceed altogether upon speculative reasons; those who would modify it say nothing to discredit the opinion of the Subordinate Judge of Burdwan (himself for modification) that it "has worked remarkably well without placing the zemindárs under any serious disadvantage." Those, lastly, who would make no change can point to many benefits conferred on the country by this presumption, and to the frustration by means of it of many attempts to fraudulently destroy old established rights.

On the merits of the question, I am to say that the only arguments urged against the presumption which do not elude one's grasp are that it is an

infringement of the Permanent Settlement, and that it does injury to auction-purchasers. Apart altogether from the debateable ground of ryots' rights under that Settlement, the argument in fact involves the absurdity that no rules of procedure are to be laid down with a view to shorten litigation in disputes between landlord and tenant. No regard is to be had by the courts to the proverbial carelessness of most ryots in preserving receipts* or to the ease with which zemindars can refute the presumption if falsely raised! The argument based on injury to auction-purchasers is hardly more substantial. Throughout these discussions the Lieutenant-Governor has sought in vain for any authenticated instances of such injury. Vague theoretic denunciations take the place of fact, and even these papers furnish instances on this point of many who come to curse remaining to bless. The same result emerges from an examination of the statistical information available on the point. The published reports of the Board of Revenue show that (taking an average over five years) out of 147,942 estates in these Provinces, paying a revenue of over three-and-three-quarter crores of rupees, only 647 estates, chargeable with a revenue of little more than a lakh-and-a-quarter of rupees, have been sold yearly for arrears. It is impossible to maintain that when sales are few—the estates sold being at the same time so small—that this 20 years' presumption does, in point of fact, work any practical hardship.

* On this point see the report (paragraph 46) of Mr. Reily, Manager of the Chanchal Ward's Estates.

On the evidence before him, therefore, Mr. Rivers Thompson feels that he might, with the weight of authority, argument and fact in his favour, ask for the retention of the presumption contained in the existing law as regards occupancy rights as well as tenures. But on a full review of the Bill as a whole, he abstains from taking up that position. Recognising the sincerity of the zemindars' objections to the presumption, and the insistance with which they have urged their views, he is willing to make a concession to their wishes, provided that the interests of the ryots shall not, in the long run, suffer from the change in what is to them a most valuable provision. Considering that the proposals he will, in the sequel, make in connection with occupancy rights and fair rents, will secure the interests of the ryots, the Lieutenant-Governor is willing to modify the 20 years' presumption and make it run, in all future cases, from 20 years before the passing of the Bill.

17. Limitations on enhancement of tenureholders' rents. Risks of collection.—The next question for discussion is the limitations on enhancements of rent of tenures, the main points being whether in enhancement suits any allowance should be made to the tenureholder for the *risks* of collection; whether the limits of double the former rent in section 8† and of immunity from enhancement in section 10‡ are fair; and whether a *bonus*, if paid on the creation of the tenure, should be taken into consideration in a suit to enhance the tenure's rent. To the first point objection was taken in the dissent of the late Rai Kristo Das Pal, on the ground that it was objectionable in itself, and an unnecessary innovation on the existing law. The hon'ble gentleman's objection has not been supported by those officers who have noticed the point; but Mr. Rivers Thompson must say that he admits its force. Where facts do not show existing law to be defective and unsuited to the circumstances of the time, the Lieutenant-Governor holds by existing law. In the provisions of section 8, Regulation V of 1812, on which this portion of the Bill seems founded, the *risks* of collection are not taken into account. It is not shown that any difficulties have resulted from this particular omission in that law. Risks of collection would in any case be very difficult to estimate as apart from costs, and it may be doubted whether it is wise, without clear necessity, to launch the courts on a sea of speculation with no certain course to steer by. The Lieutenant-Governor would therefore support the proposal

† Where the rent of a tenureholder is liable to enhancement, the enhanced rent fixed under the last foregoing section shall not be more than double the rent previously payable.

‡ When the rent of a tenureholder has been enhanced by the Court or by contract, it shall not be again enhanced by the Court during the ten years next following the date on which it has been so enhanced.

to eliminate the *risk* of collection as a distinct factor in the question to be considered under section 7, clause 3(*c*).

"Bonus" paid on creation of tenure to be a factor in enhancement suits.—Next, as to the third point—taken by Mr. Dampier and the Subordinate Judge of Tipperah—that in enhancement suits the *bonus* paid on creation of the tenure shall also be taken into account. The point is a legitimate one, and the Lieutenant-Governor would accept the suggestion to add the words "or any *bonus* paid by tenureholders on creation of tenures" at the end of clause 3(*a*), section 7.

Necessity for same period of immunity from enhancement of rent in case of tenures as of occupancy holdings.—Coming now to the question of the limitations in sections 8 and 10, the Lieutenant-Governor agrees with those who think that there should not be one rule for occupancy ryots and another for tenureholders. *First*, as regards section 10, the main point to look to is the tenureholder's capacity to pay, and his right, if he increased his burden, to pass on a reasonable portion of it to his ryot. But if the tenureholder's rent is enhanceable three times in 30 years, while the ryot's rent is enhanceable only twice in the same period, there would be ground for the complaint either that an injustice have been done to the tenureholder, or that he had some reason for treating the ryot unjustly. Therefore the Lieutenant-Governor is of the opinion that, whatever period of immunity from enhancement you allow the ryot (and he has no doubt that the ryot should have at least 15 years), that same period should the tenureholder also enjoy. If rents are to be increased, there is an advantage in general contemporaneous adjustments.

Limitation of enhancement to double the former rent: Exceptions.—Then, as regards section 8, the Lieutenant-Governor, agreeing with the Presidency Conference and the Collector of Backergunge, is of the opinion that some amendment must be introduced. In cases of recent reclamation, where land is let at an initial peppercorn rent, the limit of double rent would be unjust to the landlord; in other cases it would tend to injustice to the tenant. The Lieutenant-Governor is aware that section 212 saves contracts for the reclamation of waste lands; but he is not quite satisfied with the wisdom of such a provision which, in point of fact, excludes all such contracts from the provisions of this Bill. Agreeing with those who hold that the substantive law should meet all cases, where this can be done, the Lieutenant-Governor would cut out section 212, and provide for such cases in this place and also under Chapter V, by substituting for section 8 the section in the margin, which he has adapted from the excellent report of Mr. Dutt, Officiating Collector of Backergunge. It will be seen from the observations I am to make under section 45, withdrawing the limitations on the enhancements by suit of ryots' rent, that a tenureholder will always be able to raise his ryots' rents in due proportion to the increase which he himself may have to pay.

"Where the rent of a tenureholder is liable to enhancement, the enhanced rent, fixed under the last foregoing section, shall not be more than double the rent previously payable.

"Provided that when waste land has been let at a low rent for the purpose of reclamation, the limit of enhancement fixed by this section shall not apply, and the court may order such enhancement as it may think proper, after taking into consideration the cost of reclamation, the profits on that outlay, and all other facts connected with the case."

18. Simplified procedure for registration of transfers.—The only other point on the subject of tenures which the Lieutenant-Governor desires to notice is registration, and in regard to it he invites the attention of the Government of India to the following remarks made by the Collector of Backergunge:—

"The provisions made in sections 16 and 17 for the registration of transfers by sale in execution of decrees are simple and workable; but the provisions made in sections 15, 18, 19, 21, and 22, for the registration of voluntary sales, are exceedingly complex and impracticable. * * * When it is remembered that the landlord in this district means very often an illiterate *hooladar* or *miras karshadar*, or is represented by a gomasta on R 3 a month, that

forgery is one of the commonest crimes in the district—the utter impracticability of the complex provisions stated above will be abundantly manifest.

"I had this matter thoroughly discussed in the meeting* which was convened in Burrisal for considering the Bill. The meeting agreed with me in thinking that a simpler and more practicable procedure should be laid down for the registration of private sales of tenures. The simplest possible procedure is this: Parties transferring tenures generally register the deeds-of-sale, and this may now be made compulsory under the provisions of this Bill. Registrars will in such cases take an additional fee of two per cent. on the annual rent of the land, and also the sum of one rupee for service of notice on the landlord. These sums he will remit to the Collector, with an intimation of the contents of the document. The Collector will transmit the fee to the landlord, and also serve notice on him to show cause within a month why the sale should not be declared valid. In case there is no objection raised, the sale will be declared valid (after the expiry of the month). In case objection is raised by the landlord, the Collector will refer the matter to the civil court, which will then proceed under section 19 of the Bill. This procedure will require only an additional register being opened in the Collector's office, and will avoid much litigation, fraud, and forgery. The opening of registers by *hoaladars* and *kaem karshadars* will not be required, nor will they be fined for not doing what it is impossible for them to do."

* Of zemindars, tenureholders, &c.

This procedure is accepted by the Lieutenant-Governor as at once simple and effective as far as transfers by sale are concerned, while, as far as transfers by succession are concerned, the point will be met by the plan to be described in the next succeeding paragraph. Mr. Rivers Thompson therefore commends the procedure to the favourable consideration of the Government of India. He will also recommend a similar procedure in connection with the pre-emption clauses of Chapter V.

19. Registration of tenures for rent-suit purposes.—I am here to take the opportunity of making some observations on the general subject of the registration of tenures raised in paragraph 14 of my letter of 27th September 1883. It will be remembered that one of the proposals made by the Lieutenant-Governor for facilitating the recovery of arrears of rent was the extension to tenures of the law for the sale of *patni taluks*, or of a modification of that law. Before any such extension could take place, it was, however, deemed essential that the tenures to be brought under the operation of summary procedure should be registered. Accordingly the attention of executive officers was called to the point in paragraph 28 of my circular letter of the 24th of May last to Commissioners. The call has not elicited as full an expression of opinion as the Lieutenant-Governor had expected, many officers who have noticed the point, dwelling more on the difficulties in the way of such registration than on the means of surmounting them or on the advantages of such a record. The question has again received the Lieutenant-Governor's careful attention, and he is satisfied, not only in the interests of the landlords, but of the general administration, that an effort should be made to register tenures. One of the most persistently-urged claims of the zemindars is that they should be given a summary means of recovering arrears of rent. There are, as the Government of India know, insuperable objections in the way of recognizing that claim in respect to occupancy holdings; but in respect to tenures the case is quite different. The number of tenures in Bengal is estimated to be very considerably in excess of one million. From this it will be apparent that if by any administrative arrangements these tenures could be made amenable to a summary procedure for arrears of rent, a most valuable boon would be at once conferred on zemindars.

That boon can only be conferred if these tenures are registered. The Government could not possibly agree to bring any holding under a summary sale procedure unless its character was first determined by registration. But it is said you can never hope to register such a vast number of titles; you have no means of making your will effective. The Lieutenant-Governor admits that at present this is true, though if it be to the superior landlord's interest to have tenures registered, as it undoubtedly would be under the right of summary sale for the recovery of rent, the objection loses force. But at present no doubt in the case of proprietary interests, not to speak of the subordinate interests of

tenureholders, the means for maintaining a correct registry are defective, although the initial registration of estates has been on the whole successfully effected. There is one, and only one, effective means of compelling registration, and that is refusing to any proprietor (or tenureholder) the right to sue for rent unless his name be registered under the law provided for the purpose. That means is simple, and it would be effective.

In regard to the registration of proprietary titles under Bengal Act VII, 1876, the Lieutenant-Governor has now under consideration the amendment of the Act in the direction indicated. By enacting that law we have proclaimed the necessity for maintaining a proper and correct register of titles to land, and it would be inconsistent to stop short of giving effect to our declaration. The Lieutenant-Governor would make registration as cheap and convenient as possible; but he would insist upon it. He sees no more hardship in refusing an unregistered proprietor liberty to sue for rent than refusing him liberty to sue on unstamped paper. If this principle is affirmed, the registration of all tenures becomes a matter of easy accomplishment. Moreover, if, as will be proposed later on, the landlords' power of bringing tenures after registration to summary sale be recognized, his self-interest will furnish a most efficient means of procuring such registration. Further, the registration of tenures may become a method of enforcing the maintenance of a correct and full registry of proprietary rights. A tenureholder would be (in the Lieutenant-Governor's plan) prohibited from suing for arrears of rent, unless his superior landlord's name, as well as his own, were registered. The tenureholder would thus have the most powerful motive for informing the Collector of any default on the superior landlord's part. The Collector would then enforce registration as under the provisions of the existing law which is now inoperative, because there is no one to move the Collector to put it in force. As a reward to the informing tenureholder, permission to him to go on with his suit might be endorsed by the Collector on his plaint. Thus, the ends of the Registration Law would be secured, and no obstruction offered to the assertion of private rights by those who were not themselves to blame.

In course of time this system would become a self-acting harmonious one. No tenures would be created unless by registered proprietors, and it would probably be a stipulation in the deed that the registration shall be maintained. At all events, if it be not adopted, or if some system of the sort be not adopted, it will not be possible to afford to zemindars in regard to tenures that summary procedure which, under proper precautions, this Government is willing to grant. I am to revert to the subject in connection with Chapter XIV of the Bill.

CHAPTER IV.

20. **Status of ryots holding at fixed rates.**—This chapter, apart from the question of the 20 years' presumption already dealt with, has elicited but few comments. A minority of the Burdwan Conference, a majority of the Patna Conference, and Mr. Dampier see no reason for distinguishing old-established ryots with fixed rates from occupancy ryots at variable rates. The reasons given, however, are inconclusive. The silence of the great majority must be taken for approval, and the Lieutenant-Governor himself does not think that any alteration in the chapter is necessary or desirable. He therefore approves of it as it stands.

CHAPTER V.

21. This chapter has been most thoroughly discussed, and it has received the earnest consideration of the Lieutenant-Governor in all its details and bearings. I am now to state the final conclusion to which Mr. Rivers Thompson has come on a review of the entire evidence on the subject of the settled ryot, his *status*, rights, and liabilities.

22. Definition of the settled ryot.—The Lieutenant-Governor at the outset fully admits that the majority of the officers consulted disapprove of the definition of the settled ryot as given in the Bill.* A very small and uninfluential minority are in favour of adhering to the declaration based on Act X of 1859; but it is generally perceived that this would be an improper limitation, and the proposal which finds favour is the elimination of the word "estate" from the definition. This proposal is, in point of fact, a reversion to the definition in section 19 of Sir Ashley Eden's Bill, *minus* the very noteworthy explanation to that section, by which a ryot became "settled" after three years' residence, and *minus* the alternative two-mile radius limit.

*1. Every person who for a period of twelve years, whether wholly or partly before or after the commencement of this Act, has continuously held as a raiyat land situate in any village or estate, whether under a lease or otherwise, shall be deemed to have become, on the expiration of that period a settled raiyat of that village or estate.

2. If, in any proceeding under this Act, it is proved or admitted that a person holds land as raiyat, it shall as between him and the landlord under whom he holds the land, be presumed for the purposes of this section, until the contrary is proved or admitted, that he has for twelve years held the land or some part of it as a raiyat.

3. A person shall be deemed for the purposes of this section to have held land continuously in a village or estate, notwithstanding that the particular land held by him has been different at different times.

4. A person shall be deemed, for the purposes of this section, to have held as a raiyat any land as a raiyat by a person whose heir he is.

5. Land held by two or more co-sharers as a raiyati holding shall be deemed, for the purposes of this section, to have been held as a raiyat by each such co-sharer.

6. A person shall continue to be a settled raiyat of a village or estate as long as he holds any land as a raiyat in that village or estate, and for one year thereafter.

7. If a raiyat recovers possession of land under section 96, he shall be deemed to have continued to be a settled raiyat notwithstanding his having been out of possession more than a year.

In regard to the definition of the settled ryot, the Lieutenant-Governor regrets to find himself at variance with the majority of his officers. This is the only point in connection with this Bill on which the difference between them is irreconcileable, and therefore Mr. Rivers Thompson deems it the more necessary to set forth plainly the grounds of difference, and the reasons why he adheres to the definition in the Bill. It might, indeed, be possible to avoid a conflict of opinion by an appeal to authority. Her Majesty's Secretary of State in the 11th paragraph of his despatch† of the 17th August 1882 has already suggested, as a proper definition of the resident ryot, that he "shall be one who, or whose ancestor, has occupied any land in the village *or estate* for 12 years." That is substantially the definition of the Bill, and an appeal to this authority, if pressed, should go far to decide the question. Mr. Rivers Thompson, however, does not desire that the question should be disposed of otherwise than on a full consideration of its merits.

† Correspondence between Government of India and Secretary of State, p. 55.

Discussing the question on its merits, then, the Lieutenant-Governor presumes that no one will question the position that at the time of the Permanent Settlement resident ryots, if given new lands in their village held them subject to the pergunnah rate, and on the same certain tenure as the old. This right of fixity of tenure at fair rates became obscured between 1793 and 1859, owing to causes which, during this controversy, have been too often discussed to need relation here. The right, however, lived as well in popular tradition as in the conscience of the Government, and at last an effort was made in 1859 to give it vitality and effect. The intention of the Legislature* then was that a resident ryot, to establish rights of occupancy in any land in the village, should merely have to prove the occupation of *some* such land for 12 years. It is well known, however, that judicial interpretation thwarted that intention, the proof of *status* being thereby made difficult where it should have been made easy. This error has had injurious results not only in these Provinces but elsewhere, and it is now generally agreed that it should be corrected. The only difference between the Lieutenant-Governor and his officers is the extent to which the correction should go. The majority of officers think it only necessary to place the ryot in the position in which the Act of 1859 had intended to place him. The Lieutenant-Governor having over his officers in this matter the advantage of a wider sweep of view, thinks that we cannot ignore the

* *See* despatch from Secretary of State, dated 17th August 1882, paragraph 10.

progress of events during the last 25 years. He does not agree in thinking that you can put back the hand on the dial.

All—a very few dissentients excepted—agree in accepting the mouzah or village as an integral portion of the definition of the settled ryot. The majority of officers consulted would accept it as the envelope of his rights, giving those rights free scope within it, but not letting them go beyond it. The Lieutenant-Governor, on the other hand, would, if the "estate" were larger than the village, give the settled ryots' rights the same scope within the "estate" that his opponents would within the village. In other words while the majority of officers would allow the settled ryot to hold *ab initio* on an occupancy title any land of which he gets possession in the village in which he lives, the Lieutenant-Governor would, in addition, give him the same right in the "estate" if the "estate" be larger than the village. Thus, the difference between the Lieutenant-Governor and his officers is one of degree, and not one of essence.

The objections raised to the wider definition which the Secretary of State has suggested, and to which the Lieutenant-Governor holds, may be summed up in the statement that it is unfair to give a man occupancy rights in one village of an estate because he happens to be settled ryot of another. Because a man is a settled ryot in village A of an estate, why, asks a Collector of pronounced views, should he "taint," by the occupancy right, land in village B of the same estate?

To this question an answer has already been given in my letter of 27th September 1883. I am now to answer it again; but before doing so I would point to a grave inconsistency in the position of those who would eliminate the "estate" from the definition. The sole ground of their opposition is the alleged injustice which would be done to the landlord. It would, they admit, be injustice to the ryot not to give him the privilege of fixity of tenure in his native village, but to extend it further would be, they say, unjust to the zemindar. But it is notorious that the village may, and often does, comprise portions of more than one "estate." In Behar, where an assured tenure is even more needed by the ryot than in Bengal, this state of things is very common. The question then occurs—with what consistency can a privilege be refused to a ryot in the "estate" on which he lives, and under a landlord to whom he owes fealty, yet be granted to him in an "estate" in which he does not live, and under a landlord to whom he is a stranger? Is not this swallowing the camel and straining at the gnat?

But the question is not to be decided by a detection of inconsistency in the views of men who are not usually inconsistent. When a body of men, whose judgment ordinarily there is good reason to trust, are found to be supporting an apparently illogical position, it is necessary to examine well the foundations of a contrary belief that there should be no betrayal into hasty judgment by any argumentative victory. This is the spirit which animates the Lieutenant-Governor in opposing the views of the majority of his officers. He does not oppose them hastily, or in any depreciatory spirit; he opposes them on the higher ground which, as head of the administration, it is his province to take.

The Lieutenant-Governor's substantial reasons for adhering to the Bill as it stands are, first, that under the circumstances of the time as large a basis as is consistent with the rights of the landlords should be given to the occupancy right; second, that the injury to landlords' rights from the proposed definition is mostly imaginary. In my letter of the 27th September 1883, the first point was dwelt upon at length, and with the object of recalling the argument on which he would lay stress the Lieutenant-Governor would request a reference to the 11th paragraph of that letter. Here, however, allusion may be made to the statistics therein cited from the Report of the Famine Commission to prove that over nine-tenths of the peasantry of Bengal were so poor that in their case

any abuse of this privilege was not a practical question. These figures borrow singular corroboration from some of the reports now submitted. Attention is specially invited to the reports of Mr. Reily, Manager of the Chanchal Ward's Estates, and of Mr. Hennessey, a zemindar of the Bhagulpore district. Mr. Reily states that out of 29,335 ryots in the Chanchal Estate, 17,023 hold less than 5 bighas, and 10,603 less than 20 bighas* of land each. It seems obvious that the definition could not work any harm in Chanchal; for a man with even a six-acre holding is not likely to be the sort of "land-grabber" whom zemindars have any reason to fear. A similar conclusion is enforced by Mr. Hennessey's figures, which show that out of 9,885 ryots, 8,369 pay a yearly rent of R10 and less, while 1,020 pay no higher rent than R20. In other words, while 95 per cent. of his ryots can barely keep body and soul together, Mr. Hennessey fears from them encroachments on his proprietary rights, and claims that the law shall discourage their endeavours to raise themselves from the miserable serfdom of being tenants-at-will!

* The bigha here is about one-third of an acre.

The fact is that the zemindars on this, as on several other portions of the Bill, are fighting a shadow. As the Lieutenant-Governor has already stated, the settled ryot of a village usually holds no more than a few acres of land. He is far too poor to maintain two homesteads. He can never cultivate far from his home. The village in Bengal, owing to various disintegratiug influences, is far smaller now than it was a century ago. Then, a large margin of uncleared waste afforded ample scope for enterprising ryots. Now, the settled ryot finds in his village small scope for enlarging his holding or improving his condition. He does not often find it in adjacent villages either; but should he come to terms with his landlord for vacant land in a neighbouring village (and it is only with the knowledge and consent of the landlord that the ryot could acquire a new holding), it is surely a monstrous proposition to maintain that there should be no stability in the contract. The Lieutenant-Governor asserts that it is essential to the public interest that there should be stability in the contract. Stability of that sort is no larger development of the old customary law of the country than the circumstances of the times require. As the Famine Commission say:† "It is desirable for all parties that measures should be framed to secure the consolidation of occupancy rights, the enlargement of the numbers of those who hold under secure tenures, and the widening the limits of that security." To these principles Sir Ashley Eden sought to give effect by creating a settled *status* after three years' residence. Mr. Rivers Thompson, anxious to break with the past as little as possible, prefers to allow the landlord four times that period within which to know his tenant. The landlord surely ought to know his ryot well in twelve years. When he knows him, when once the accrual of the settled *status* has put the seal of the landlord's approval upon the connection, from thenceforward the Lieutenant-Governor would not allow the ryot to be treated as a nomad in any portion of the landlord's estate. From the standpoint of public policy, as well as of consistent legislation, this is essential.

† Report, Part II, Chapter iii, paragraph 25.

Should the "estate" be limited as to extent, or period of creation? — The Government of India, in paragraph 8 of your letter under reply, ask whether, with reference to unusually large estates, any exception might be made to the general rule the Lieutenant-Governor has now approved of, and whether any modification is desirable in section 27(*b*). On the first point I am to say that the Lieutenant-Governor, having regard to the condition of the ryot and the perfect freedom of the landlord to give or withhold the land, is satisfied that abuse of the rule is not a practical danger to fear. He therefore would admit of no exception to its simplicity; but to save disputes, he is willing that the limits of the "estate" should be taken as at the time of the introduction of the Bill into the Legislative Council.

In conclusion, the Lieutenant-Governor desires me to say, with reference to the presumption raised in the 2nd clause of section 26, that, as it is no more than a recognition of facts which generally prevail, it receives his cordial support. The suggestion that has been made in places, that a three or six years' occupancy should be proved before the presumption is recognized, would only introduce complications and litigation.

23. Acquisition of occupancy right by landlord.—Passing on now to sections 28,* and 29†, a minute, though not unimportant, criticism on the former is that it should be made to cover a purchase by a co-sharer as well as by a 16-anna landlord. It might probably be so held by the courts, but, as the doubt has been started, it is well to remove it. As the Lieutenant-Governor understands the section, it means that if a landlord buys or otherwise comes into possession of an occupancy right, the right shall be *de facto* extinguished. The land, however, continues portion of the *ryotti* stock of the country, and the under-ryots, if any, in it become elevated to the non-occupancy *status*. If this view of the section be correct, the Lieutenant-Governor approves of it. He is opposed to the opinion of those who would allow the purchasing landlord the discretion of keeping the occupancy right alive, for that would be tantamount to the extension of subletting in a very objectionable form.

* "If the landlord of a raiyat having a right of occupancy acquires, by purchase or otherwise, the interest of the raiyat, the occupancy right shall cease to exist; but nothing in this section shall prejudicially affect the rights of any third person."

† "Any person holding land as a raiyat shall not be prevented from acquiring an occupancy right in the land by reason only that he is jointly interested in the land as proprietor or tenure-holder."

Acquisition of occupancy right by joint- roprietor or farmer.—The provisions of section 29 are not so clear; and, though supported by some officers as in accordance with actual facts, are opposed by others as an injurious innovation. If the provision of section 29 (1) were restricted to proprietors, and not extended also to tenureholders, the Lieutenant-Governor would see but little to object to. If each of several proprietors, by mutual consent, cultivates specific land in a joint estate, it would be a hardship in case of a partition that such land held for years, and possibly improved by one co-sharer, should lapse from his possession on a division of the estate, or on sale. Where, however, a person is let by the proprietor into possession of land under certain specific conditions, non-performance of which will void the contract, it seems to the Lieutenant-Governor objectionable to provide that, during the continuance of the contract, the lessee may fortify himself against the lessor by acquiring rights which ought not to be separate from the larger title conferred by contract upon him. It is to the public interest that the privileges conferred by section 29 be restricted as much as possible, for it obviously opens a door to the extension of the objectionable *khurfa* system. The Lieutenant-Governor would therefore strike out "or tenure" holder at the end of section 29 (1).

Mr. Rivers Thompson agrees with the Patna Conference in the desirability of making it perfectly clear that a temporary landlord shall not be permitted, by any species of occupation during the currency of his lease, to acquire occupancy rights; and he also thinks it necessary to provide that, if an occupancy ryot buys a share in an estate, he shall not lose his occupancy right in the land, unless, on a partition of the estate, that land fall to his share. In this case the Lieutenant-Governor would not have the anomaly of an independent proprietor holding an occupancy right as against himself. He would then have the occupancy right extinguished, and the land converted into *khamar*, in which occupancy rights may grow if not barred by the landlord. If, in a partition, the land do not fall to the ryot's share, he should, as in the last preceding paragraph, retain his occupancy right in it as against his co-proprietors.

24. Incidents of the occupancy right.—I am now to discuss the important questions connected with the incidents of the occupancy right.* The first incident specified in clause (*a*) of section 31 may be passed over briefly, the only noteworthy criticism passed on it being that in portions of the country occupancy ryots have already the right to fell timber. If a local custom to that effect be well established, that custom will, the Lieutenant-Governor presumes, continue to rule the question. If there be no well established custom, the clause seems to be in accordance with the general interests of the country. The Lieutenant-Governor will also make no lengthened comments on incident (*b*). The reports strengthen his previous conviction† that, as a general rule, it is the ryot, not the landlord, who improves. When the landlord does improve, either directly or through the Government, under the Drainage Acts the ryot bears the costs, and is often afterwards saddled with an increase of rent. The Lieutenant-Governor must therefore support clause (*b*) of the section.

To clauses (*c*) and (*e*) no objection has been taken by any one, and in themselves they are unobjectionable; but in regard to clause (*d*) a very important proposal is made by the Patna Conference, which the Lieutenant-Governor is willing to accept. Where an occupancy ryot uses his land improperly, or breaks a condition of his lease consistent with this Act, he is liable to eviction as the Bill now stands. But the rigour of section 31 on this point is softened by the provisions of section 170, which grant the ryot a relief against forfeiture on payment of damages. It may however, happen that the ryot may not be able to pay damages, and the question thus raised is—shall he be evicted or shall his interest be sold, and the damages made good to the landlord from the sale proceeds, the balance, if any, going to the ryot? In the opinion of the Patna Conference the latter course should be adopted, and they accordingly suggest that, for the words "except in execution of a decree for ejectment passed," be substituted the words "but his interest in the holding may be sold." This modification of the section seems to the Lieutenant-Governor perfectly just and reasonable, contributing to the advantage of both landlord and ryot alike, while conferring the additional public benefit of keeping alive the occupancy right. He therefore desires to give the proposal his entire support.

* *Section 31.*—"Where a raiyat has a right of occupancy in respect of any land, the following provisions shall apply, namely:—

"(*a*.) He may use the land in any manner which does not render it unfit for the purposes of the tenancy, but shall not be entitled to cut down trees in contravention of any local custom.

"(*b*.) He may make improvements on the land as by this Act provided.

"(*c*.) He shall pay rent at fair and equitable rates.

"(*d*.) He shall not be ejected by his landlord from the land, except in execution of a decree for ejectment passed on the ground—

"(*i*) that he has used the land in a manner which renders it unfit for the purposes of the tenancy, or

"(*ii*) that he has broken a condition consistent with the provisions of this Act, and on breach of which he is, under the terms of a contract between himself and his landlord, liable to be ejected.

"(*e*.) He may surrender his holding in accordance with this Act.

"(*f*.) His right of occupancy in the land shall, subject to the rights reserved to the landlord by this Act, be capable of being transferred and bequeathed by will in the same manner and to the same extent as other immoveable property.

"(*g*.) He may, subject to the provisions of this Act, sublet his land or any part thereof.

"(*h*.) His right of occupancy in the land shall, if he dies intestate in respect of it, descend in the same manner as any other immoveable property; provided that in any case in which, under the law of inheritance to which he is subject, his other property goes to the Crown, his right of occupancy shall be extinguished."

† *See* on this point the protest recorded by the Patna Conference against the statement made in the late Rai Kristo Das Pal's dissent that it is the landlord who improves. See also the similar remarks of the Collector of Backergunge.

25. Transferability of occupancy rights. Unobjectionable in execution of decree for arrears of rent.—The great question of the free transferability of occupancy rights has attracted the widest public attention; and in approaching the consideration of it here, the Lieutenant-Governor proposes to discuss with it the question of pre-emption. Both questions are intimately connected, and it will be convenient to deal with them together. It is also to be understood that the following remarks apply only to transfers by private sale or for debt. The Lieutenant-Governor, and nearly all his officers, accept the decision that occupancy rights throughout these Provinces shall be saleable for their own arrears of rent, the occupancy ryot being no longer liable to ejectment for such arrears.

History of the proposal to make occupancy rights transferable.—It will be in the remembrance of the Government of India that, in my letter of 27th September 1883, Mr. Rivers Thompson, on a review of the evidence then available, pronounced in favour of a general recognition of the right to transfer, subject to the landlord's privilege of pre-emption. Since then a large mass of statistics, to which I am presently to refer, has been collected from all the civil courts and registration offices throughout the Province; while important contributions to our information on the subject have been made by judicial and executive officers of every grade in the service, as well as by private gentlemen interested in land. On the value of this mass of evidence the Government of India will form their own estimate, but I am to say that, in the opinion of the Lieutenant-Governor, this evidence, while indicating the necessity for caution in dealing with the Province of Behar, vindicates in all other respects the general correctness of the view which he has already expressed upon this subject. This view is that if by any limitation or legal provision the limitation of the occupancy right to actual cultivators could be secured, most, if not all, of the objections to free transfers would be removed.

It is within the knowledge of the Government of India that in an early stage of the discussion on the amendment of the Bengal Tenancy Law, the proposal to make occupancy rights freely transferable was considered by the Behar Rent Committee and negatived. The opinion of the majority of that Committee, however, was that if occupancy right could not be safely rendered transferable by sale or purchase, occupancy ryots should, at all events, have the power of subletting their holdings. The necessity under the circumstances of the time of conferring on the ryot some legal power of turning his interest in his holding to more use than is safe under the existing law was recognized, and the method of subletting seemed to the Committee least likely to result in injury to the ryot through his improvidence.

That, however, was not the view which commended itself to the Rent Commission, who, on this point, adopted the arguments urged by Mr. Justice Field in the appendix to his Digest. Subletting, in the Commission's opinion, was as far as the expropriation of the owner went, an effective substitute for sale, while by depressing the industry of the actual cultivator of the soil and by depriving him of all motive for thrift, it produced grave evils from which free sale was held to be free. The Commission accordingly in section 20 of their Draft Bill recognized sale by private contract and in execution of a decree for arrear of rent, while by prohibiting mortgages and consequently sales in execution of decrees for debt, they aimed a blow at the money-lender and at the system of subletting—a system which the Behar Committee would have recognized.

The Commission's proposals were not accepted in their entirety by Sir Ashley Eden, who held (reasonably as Mr. Rivers Thompson thinks) that mortgages were often better for the raiyat than sale, and who thought that, in view of the provisions of section 19, clause (3) of his Bill which gave the landlord a veto on the sale if the purchaser were not resident in the vendor's village, the fullest freedom of transfer might be allowed. Sir Ashley Eden's views, as embodied in sections 19-21 of his Bill, were not adopted by the Government of India without change; the change being in one way opposed to, and in another way in favour of, the ryots' interests. The change was opposed to the ryots' interests, inasmuch as under Sir Ashley Eden's Bill transferability among the resident ryots of a "village" was altogether free. It was subject to no veto, and to no right of pre-emption on the landlord's part. On the other hand, the change was in favour of the ryots' interests, in so far as by removing the restrictions of place and class of purchasers, it opened a wider market for the sale of the occupancy right. It must be added, however, that, in the opinion of many competent judges, the benefits of the wider market were neutralized by the very complex pre-emption provisions of the Bill, as introduced in Council in March 1883.

Such was the state of this question when Mr. Rivers Thompson was called on to deal with it last year. He approved of the recognition of free sale in

Bengal, and he also accepted the principle as regards Behar, though not so unreservedly. He admitted that the intrusion of the money-lender was undesirable; but he believed that such intrusion was not always a practical danger, as the British Indian Association itself had admitted, while it might, when dangerous, be guarded against, or its effects minimized. Granting this to be possible, the Lieutenant-Governor was satisfied that the recognition of the right of transfer would create a direct interest in the improvement of the soil, would stimulate cultivation, would tend to establish a substantial peasant proprietary, would give a valid security for the realization of the landlord's rent, and, by increasing the marketable value of the land, would lower the rate of interest when the raiyat had to borrow.

Objection to the provisions of the Bill on the subject of transferability of occupancy rights.—But, as I have stated, this adhesion on the Lieutenant-Governor's part to the principle of free sale was not an unqualified adhesion. It was conditional on the acceptance of certain safeguards. Admitting as a theoretical proposition that the free right of transfer was desirable, Mr. Rivers Thompson was careful to make such recommendations as on the evidence then before him seemed necessary to safeguard the gift from proving a fatal one to the raiyat or a hurtful one to the zemindar. The chief, if indeed not the only, evil to be feared from the unrestricted right of transfer was the expropriation of the raiyat by the money-lender. As remedies, the "convertible tenureholder" (section 37 of the Bill) was created, and the pre-emption sections (32-36) were reproduced in, it was thought, a simpler and more workable form. These supposed safeguards have now been subjected to searching criticisms, which the Lieutenant-Governor must admit they have not satisfactorily withstood.

26. During the last few months, various representations deserving of all respect have reached the Lieutenant-Governor as to the danger of recognizing in the Bill the free sale of occupancy rights. Far better, it was said, not to interfere in a matter where mistaken interference might produce disastrous consequences of great magnitude. Better, it was said, to allow things to take their course, and permit custom to mature and crystallize. Certain inconveniences might possibly be felt from the uncertainty as to title, but in time these would wear off, and perhaps facilitate legislation; meanwhile it was better to bear those ills we have than to incur the risks of greater evil.

On the other hand, very weighty arguments were pressed to the opposite effect. It was urged that the free sale of occupancy rights was an established and growing fact all over Bengal; that while it had nowhere produced any evil consequence (the case of the Sonthal-Pergunnahs cited on the other side not having been yet admitted to be a case in point by this Government), agricultural prosperity had invariably attended its establishment, and lagged behind where it was still unacknowledged. Finally it was urged that things had now reached that pass that action was necessary in order to quiet titles and give formal sanction to a custom which had done nothing but good throughout the more advanced districts of Bengal Proper.

General character of local opinions on the subject of transferability of occupancy rights.—In the papers now submitted to the Government of India, the same conflict of argument and feeling is apparent. There is the absence of objection to complete freedom of transfer on the part of officers in the advanced metropolitan and in the Eastern deltaic divisions. There is hesitancy in Northern Bengal, where, however, the prevalence of the custom of unrestricted sale is admitted, but doubts are entertained as to the effect of its formal recognition by the law. Lastly, there is open hostility to the proposal on the part of Behar executive officers. They fear that the provisions of the Bill may deprive raiyats of their land; in fact may bring about in the Patna Division all the evils which the Bombay survey and settlement system is popularly, even if ignorantly, credited with having caused in the Deccan. On the other hand, the judicial officers in the Patna Division are disposed to recognize transferability if it could be restricted to actual cultivators of the soil—a result towards which no practical solution has hitherto been suggested.

27. The Lieutenant-Governor need hardly say that he has weighed these conflicting views with all the care and attention which the gravity of the case demands. He has sought, not unsuccessfully, for evidence on every point of importance; and he has been ready to consider all proposals which, by way of reasonable adjustment, seemed calculated to preserve to each party their substantial rights while admitting of mutual concession. It will be in the recollection of the Government of India that in the earlier stages of these discussions the landlords denied that free sale did exist in any portion of these Provinces. The correctness of that assertion was challenged in my letter of the 27th September last, and statistics adduced from the records of the Civil Courts and the registration offices to establish that, as a matter of fact, occupancy rights were sold more or less freely in every district in Bengal. Those statistics exposed the fallacy of the objections that had been raised regarding the existence and prevalence of the custom of free sale; but their significance was questioned by the landlords on one material point. It was said that the sales exhibited in them were dependent on the landlord's consent. This was a new contention, and, if it were true, then obviously free sale was not prevalent in Bengal in the sense this Government had assumed. Further enquiries were therefore necessary. These enquiries have now been made, and, as the Government of India will perceive from the papers submitted, they have resulted in establishing, beyond further dispute, the position for which the Lieutenant-Governor has contended. It can no longer be doubted that wherever throughout these Provinces the custom of free sale is well established, there occupancy rights are bought and sold without interference on the part of the zemindar. The utmost extent to which interference proceeds is the levy of a fee when the purchaser's name is registered (which it often is not) in the landlord's *sherista*.

But in addition to solving the doubts which had been raised on this point of the landlord's consent to transfers—a point which had an essential bearing on the subject of pre-emption—the Lieutenant-Governor also thought it right to obtain, for the information of the Government of India and the public, as full and precise information as the purpose required, of the extent and progress in recent years of transfers of *ryotti* holdings, whether by private sale or in execution of decrees throughout these Provinces. The statistics thus collected will be found as appendices to this letter. They furnish all the information on the subject that it is within the reach of this Government to procure.

Statistical evidence as to prevalence of transferability of occupancy rights.—With Appendices I and III—transfers of holdings at fixed rates—the Lieutenant-Governor is not on this occasion concerned. No doubt as to the transferability of such holdings has, as far as he knows, been seriously suggested, and therefore the question does not come within the immediate scope of this discussion. It is with Appendices II and IV that we are chiefly concerned, and the latter of these statements is thus far significant that, while it shows a progressive increase in the number of transfers,* the price per holding is very low. At private sales, on the other hand, the price fetched is high as evidenced by Appendix II. No doubt one has to pay more for a clear title than for a doubtful one; but still it would seem that, as Mr. Reily, Manager of the Chanchal Ward's Estate, thinks, sales of occupancy rights anywhere except in the immediate neighbourhood of the holding itself, usually bring less than the market price. This fact may be turned to account with reference to Chapter XV of the Bill.

* This increase will be more marked if regard be had to the sale statistics published at page 373, Volume II of the Rent Commission's Report. These statistics show that in 1878-79 only 7,764 occupancy holdings were sold in court, while the number has now risen to 11,992.

Turning now to Appendix II, I am in the first place to call attention to the progressive and considerable increase in the number of transactions in every division in Bengal, to the considerable aggregate area annually transferred, to the high multiple of the annual rent for which the holding usually sells, and to the small number of purchasers recorded as money-lenders compared with the number recorded as ryots. In regard to the last point, it has been argued that no conclusion can be drawn regarding the profession of the purchasers, many mahajuns being raiyats, while most well-to-do raiyats lend money. There is no

doubt truth in this; the accuracy of the return is probably vitiated by cross-divisions of the sort. Still the main fact appears that transfers of occupancy holdings are chiefly made to cultivating raiyats. And as far as Bengal Proper is concerned, the great weight of evidence in the papers now submitted to the Government of India is to the same effect, that hitherto the operation of free sale has not been to throw into the hands of money-lenders, unconnected with cultivation, any disproportionate share of *ryotti* land.

28. Lieutenant-Governor's conclusion to recognize transferability of occupancy rights in Bengal Proper.—But although this has been the general and satisfactory effect of the operation of customary transfers, that effect is less marked in some divisions than in others. It is most marked in the Presidency, Rajshahye, Dacca, and Chittagong Divisions, where undoubtedly the position of a raiyat is better than elsewhere. In these Divisions the Lieutenant-Governor has no hesitation in saying that recognition of the free right of transfer, even if unaccompanied by restrictions, would be productive of good. He does not lose sight of the fact that officers connected with the Rajshahye Division think otherwise, and regard the recognition of free sale as likely to throw occupancy holdings into the money-lenders' hands. In those very localities, however, free sale is already established, and if the raiyats are so indebted that they are now the money-lenders' slaves in all but the name, the Lieutenant-Governor hardly thinks that the name will be changed by the operation of this Bill. In the sequel the Lieutenant-Governor will make certain proposals which will place in the landlord's own hands the power of preventing the money-lenders' intrusion.

In the Burdwan Division the statistics seem to indicate encroachments on the side of the mahajun; but the Lieutenant-Governor is willing to accept the assurance of the Burdwan Conference, and of all the judicial officers of that Division who were consulted, that no real danger to the raiyats is to be apprehended by the recognition of that which is, in point of fact, the established custom. The high value of the occupancy right and the general condition of the people support this view, which accordingly Mr. Rivers Thompson accepts, subject to limitations to be stated in the sequel.

29. Condition of transferability of occupancy rights in Behar.—Coming now to Behar (which term includes the Patna Division and the districts of Bhagulpore and Monghyr of the Bhagulpore Division), I am at once to say that the Lieutenant-Governor finds himself in the presence of a very different state of things from that prevailing in Bengal Proper. Whether the standard be the number of transactions effected or the area of land transferred, it must be confessed that free sale of occupancy rights has as yet not taken in Behar the root that it has taken in Bengal Proper. That free sale does exist in, and for many years has to some extent existed in, the Behar districts is true; and that the custom is increasing is undisputable. But it must not be overlooked that the number of transactions, which even now is small for such a population, has only risen to anything like an important figure within the last two years, when these Rent Bill discussions may conceivably have influenced the movement; while the total area of land transferred by private sale last year (17,255 standard bighas, or 5,752 acres, out of a cultivated area estimated at 13½ millions of acres) is so small as to afford significant proof that, having regard to the views expressed by the Famine Commission as quoted in the margin, free transfers have not become customary throughout the Province of Behar to such an extent as to justify recognition in the Bill. The preceding considerations as to the narrowness of any general custom of free sale in Behar seem also to gain additional support if we have regard to the average area of the holdings transferred. This is a point on which the statistics presented in paragraph 14 of my letter of 27th September last were unavoidably deficient, and on which the Lieutenant-Governor, at the

"Though, on the whole, we regard the general concession of the power of sale of these rights to be expedient and ultimately almost unavoidable, the immediate course to be followed by the Government must, no doubt, be, to a great extent, governed by local custom. Where the custom has grown up, and the tenants are in the habit of selling or mortgaging their rights in land, it should certainly be recognized by the law; but where it has not, it may be questioned whether the law should move in advance of the feelings and wishes of the people." (Part II, page 120.)

instance of the Select Committee, has now had careful enquiries made. It will be observed that in 1882 the average area of the holding was small in every district except Shahabad (where *guzastas* and occupancy rights are often confounded), and that in 1883 the average continues very low in the North Ganges districts. This fact suggests a doubt whether in the majority of cases the free sale now existing in Behar is transfers of entire holdings or only of parts of holdings. Possibly many of those transfers may not be transfers of entire holdings which the law proposes to recognize, but transfers of portions of holdings which, by section 97, the Bill prohibits. This doubt borrows confirmation from the Report of the Patna Conference (paragraph 15), which is decidedly opposed to the formal recognition by the law of the right of free transfer in that Division.

30. Lieutenant-Governor's conclusion to leave transferability of occupancy rights in Behar to custom.—In the face of these facts, and of this expression of local opinion, and having regard to the views expressed by the Famine Commission as quoted above, the Lieutenant-Governor no longer recommends the recognition in the Bill of the right of free transfer of occupancy rights in Behar. When recommending the recognition of free transfer in Behar last year, the Lieutenant-Governor, in order to check possible evil effects, proposed to make the operation of the provision "the subject of watchful supervision." A more full and thorough examination of the question has now satisfied Behar officers (whose opinions on most other essential portions of this Bill enquiry and examination have only tended to strengthen and confirm) that the recognition of the right of free transfer would be at best a measure of uncertain tendency, and, therefore, under the circumstances, not a wise measure to adopt. On the other hand, further enquiry has elicited the fact that the registration statistics, instead of being significant of a quickly extending custom as was thought last year, indicate that, although the custom obtains to a limited extent, it can by no means be said to affect largely the agrarian economy of the Province. This being so, the Lieutenant-Governor recommends that free transfers by private sale in Behar should not be recognized; but that the circumstances of that Province be, for the present, provided for by adding to section 217 a second illustration of the nature noted in the margin, and by excluding Behar from the operation of section 31 (*f*).

"The custom that occupancy rights are transferable by sale or bequest is not inconsistent with, and is not expressly, or by necessary implication, abolished by, this Act. That custom, therefore, wherever it exists, will not be affected by this Act."

31. Reservation of Power to extend transferability.—This Bill is not intended to apply *suo vigore* to Orissa or Chota Nagpore, or the scheduled districts (a fact which has been kept out of sight in the efforts made to excite the tea interests against it); but if the time comes for extending its provisions, or any portion of them, to those localities, and it be then found that the custom of free sale has not made more progress there than now appears to be the case, those regions may be appropriately treated, as, in the Lieutenant-Governor's opinion, Behar should be treated now. It is also a question whether power should be reserved for the Local Government to extend the provisions for free transfer to Behar, when the custom in that Province shall have further grown, or whether that power should be reserved to the Legislature. The latter course would save the Local Government from the pressure which might be brought to bear on it to recognize free sale. The point, however, is one on which the Lieutenant-Governor does not propose, in the present communication, to offer a decided opinion.

32. Limitation on transfers of occupancy rights in Bengal Proper. Substitute for pre-emption clauses of the Bill.— In now submitting to the Government of India the proposal as to the limitation which may be imposed on the free transfers of occupancy rights in Bengal Proper, I am to premise that on the evidence this limitation is in the nature of a concession to the zemindars, which they do not enjoy at present, and which is *pro tanto* calculated to diminish the value of existing occupancy rights. When, therefore, in the course of this letter, proposals are made to safeguard raiyats' interests where they are now insufficiently protected, the concessions made to the zemindars in the high-

ly important matter of transferability, as well as in the no less important matter of the 20 years' presumption, should not be lost sight of.

Mr. Rivers Thompson starts from the principle that if by any definition or legal provision the limitation of the occupancy right to the actual cultivators could be secured, the free right of transfer would by common consent be unobjectionable. This was the principle to which Sir Ashley Eden sought to give effect in section 21 of his Bill. Holding that no one ought to have a more lively interest in the raiyats' welfare than their landlord, and that none could have more local knowledge, Sir Ashley Eden proposed, as has been already stated, to utilize that interest and experience by giving the landlord a veto on sales to other than resident raiyats of the vendor's village. To that proposal there are two objections—one from each side. The objection from the landlord's point of view is that the right of veto does not enable him, if he so wishes, to exclude the *mahajun* resident in the vendor's village, while from the raiyat's point of view the fault is that the proposal narrows the market and consequently depreciates the price. It would seem, however, that both objections disappear if the raiyat's right to sell to any one be recognized subject to a veto on the landlord's part if the sale be made to a person who does not depend on agriculture as a raiyat for his chief means of subsistence and income. The wishes of the landlords in excluding money-lenders will thus be met, a larger market will be secured to the raiyat, and the pre-emption provisions of the Bill, to which most officers object, will be got rid of.

33. Objections to pre-emption clauses of the Bill.—The pre-emption clauses of the Bill meet, as the Government of India will observe, with no approval, and it is in the Lieutenant-Governor's opinion essential that they should be abandoned. The evidence submitted is conclusive on the point that as a general rule occupancy rights are now freely saleable in Bengal without any interference on the zemindar's part. To introduce the novel light of pre-emption therefore would very seriously depreciate the value of well-established occupancy interests. This seems to Mr. Rivers Thompson to be on the papers indisputable; while, even if that objection could be overcome, there is a consensus of opinion that the difficulties in working the procedure of the Bill as regards the pre-emption clauses are almost insuperable. As the Collector of Backergunge says, "a raiyat seldom sells his land except under sudden and pressing necessity. To give the landlord the right of pre-emption under such circumstances, and to compel the vendor to comply with the dilatory procedure laid down in section 32, would be virtually to stop the sale when the necessity is pressing."

Abandonment of pre-emption clauses of Bill recommended in cases of private transfers and gifts. Modification of the clauses in case of execution-sales.—The Lieutenant-Governor, accepting these views, recommends the abandonment of the pre-emption clauses of the Bill. He does this all the more willingly that he has no doubt the proposals, which he will now proceed to develop further, will give to the raiyat as large a market as seems necessary, will render needless the novel right of pre-emption in private transfers which the Maharajah of Durbhunga has declared to be a "phantom right," and Rai Kristo Das Pal to be "shadowy," which does not now exist, and which, if indroduced, would be cumbrous, if not unworkable. In place of such provisions, which all unite in condemning, the Lieutenant-Governor would substitute the simple provision, referred to in the preceding paragraph, which will effectively secure the position and prestige of the landlord, and make him, should he wish to exercise his power, the guardian of his raiyats' interests. In regard to sales in execution of decree, the landlord's right of pre-emption at the highest bid offered seems unobjectionable; an opportunity might be given him to exercise it by providing for the timely service of notice on him of the day fixed for the sale. In regard to gifts, the Lieutenant-Governor would remove the necessity for pre-emption by limiting gifts to the donor's family, and then giving no right of pre-emption at all.

Modus operandi of substitute for pre-emption clauses of the Bill.—The details of this plan the Lieutenant-Governor would work out in the same

way as in the case of tranfers of tenures. There need be no notice to the landlord of intention to sell, and consequently none of that initial delay which would in many cases frustrate the object of free transfer altogether. On registration of the deed-of-sale (to be made in all cases compulsory) the registering officer will recover a fee for service of notice of the sale on the landlord. The Lieutenant-Governor also would not object to the levy of a registration fee payable to the landlord. To the landlord would be given (say) a month to question the sale before the District Registrar or Collector (as execution of deeds is now challenged) on the ground that the transfer is of the kind prohibited by the Act. Should the landlords's objections seem valid to the Registrar, he will refer the parties to the Civil Court having jurisdiction, whose order may well be rendered final as the matter for decision is either a simple matter of fact, or of such inference as Civil Courts are already in the constant habit of dealing with. Should the objections seem to the Registrar untenable, he will overrule them, leaving the landlord, if he pleases, to his civil remedy as in the previous case. Such a plan as this seems to the Lieutenant-Governor calculated to secure most of the advantages of free sale with the minimum of risk. Parties will soon come to understand such a simple law, and if it be proposed to sell to a non-agriculturist, the landlord's previous consent will in all likelihood be applied for to avoid subsequent difficulty. At all events the plan departs no further from existing custom than the circumstances seem to require; it does away with the pre-emption sections, which by common consent are unworkable; and, under it, it will be the landlords' own fault if transfers are not restricted to the agricultural population, to which they are not unwilling to concede the right.

Such, then, is the scheme in regard to transferability which the Lieutenant-Governor commends to the consideration of the Governor-General in Council. Broadly speaking, the scheme consists of the recognition of transferability in Bengal Proper (but not in Behar) subject to the landlord's veto if the purchaser be of the objectionable class of money-lenders whom landlords desire to exclude from possessing land. To enable the landlord to exercise his veto, notice of the sale must be given him, and he may then, within a reasonable period, object to it on the ground of the purchaser being a person not relying on agriculture for his chief subsistence and income. If the objection seem to the Registrar untenable, the sale will be confirmed. If the objection be established, the sale will not be registered; but in this, as in the preceding case, the parties will be left to their civil remedy.

The scheme thus briefly summarized comes before the Government of India supported by the weight of evidence which accompanies these papers. It meets the noteworthy objections of the zemindars, and it enables us to dispense with those pre-emption clauses of the Bill which were not only cumbrous but novel, and calculated to depreciate the value of existing rights. It might be urged by those who advocate free sale in Behar that, as the plan now stated affords to the zemindars an effective means of preventing the intrusion of money-lenders, it might with safety be applied to that Province also. The idea is specious; but having regard to the fact that the subdivision of property in Behar has gone to very great lengths; that the process is still in active operation; that all landlords in Behar, except the largest, are needy; that mahajuns have money to lend; that the practice of private transfers, though existing for a long time, is still limited in character and extent; and, lastly, that, on full deliberation, local opinion is against the recognition of free transfer at present, Mr. Rivers Thompson finally adheres to the opinion already expressed on this point.

34. Subletting. The Convertible Tenureholder.—Restrictions on subletting next demand attention, and in this connection the Lieutenant-Governor thinks it convenient to discuss also the question of the under-raiyat (Chapter VII). Both provisions of the Bill, which are, after all, only phases of a single question, have engaged the Lieutenant-Governor's serious

attention, and he finds, with regret, that the method suggested by him for dealing with them has not been received with favour. There is a general agreement among the officers who have been consulted that section 37* is unworkable.

* If the portion of his holding sublet by an occupancy raiyat exceeds more than half his holding, he shall, on being registered in a public register as a tenureholder under any Act which may be passed for the registration of any tenureholder, be deemed to have become a tenureholder within the meaning of this Act.

The conception of the "convertible tenureholder" is not indeed open to many of the strictures passed upon it, and it will be observed that the Commissioner of Chittagong finds it not inappropriate to the circumstance of his Division. Still it must be admitted that as the Bill is drafted its efficacy entirely depended on registration. The Lieutenant-Governor quite accepted the necessity of not subjecting any tenure to the summary sale procedure unless previously registered. But he thought it possible that in each case the judicial proceedings might determine the character of the holding, and that, if it proved to be a tenure, it might then be registered and afterwards sold in execution of the decree. Conversion by registration and by decree of court as cases came up might, in his opinion, have proceeded simultaneously, pending that fuller knowledge of agricultural facts, and that more perfect basis for the operation of the section, which, in Behar at all events, the survey will secure. And if in districts where no survey is to be made immediately, co-operation of landlords and under-raiyats against the subletting occupancy raiyat did not in a self-acting way emerge from the Bill as it stands, it would probably have been secured by allowing the landlord to levy a fee on the conversion. The interest of the landlord in the success of the scheme would thus have been attained, while the under-raiyat would have gained, if not an occupancy right, at all events the non-occupancy *status*, possibly at a beneficial rent. Such considerations as these, coupled with the belief that if there be no such provision as section 37 in the Bill but little practical good can be obtained for the under-raiyat, predisposed the Lieutenant-Governor personally in favour of the provision. Besides, the question in its relation to subletting has not been as fully considered as the Lieutenant-Governor had expected. As, however, there is an agreement among the officers consulted against the retention of the section, and as the point is not of the first importance, the Lieutenant-Governor agrees to the omission of the section from the Bill. The presumption in section 3 (5) already dealt with may, perhaps, tend to the same end as section 37.

35. Checks on subleting. The under-raiyat.—If, then, section 37 goes out of the Bill, it seems to the Lieutenant-Governor that there is really nothing for it but to let the under-raiyat unprotected make the best fight he can, or to restore in his case the gross produce limit of section 119 of the original Bill. He believes that something should be done for the under-raiyat, and therefore he recommends the omission of section 62 (limiting the rent of the under-raiyat to 50 per cent. increase on the head rent if he hold under registered lease, and to 25 per cent. otherwise). The good that provision could do is very slight, for it can be easily evaded. There are large classes of occupancy raiyats, such as the *guzastadars* of Shahabad, holding at low fixed rates, who habitually sublet portions of their holdings at rents which are often double or treble the rents which they themselves pay. It profits the under-raiyat to cultivate even at such high rents; and any law which would run counter to an arrangement mutually beneficial to the lessor and lessee would be either evaded or would work injuriously to the interests of the community. This objection does not hold against the gross produce limitation, for it is wide enough to allow free play to the interests of all parties.

There is, then, no resource left but to let the under-raiyat alone, or to restore section 119 of the original Bill, limiting the rent to the value of five-sixteenths of the gross produce. Mr. Rivers Thompson does not abandon the hope that the gross produce limits on rents may be restored to this Bill. The circumstances under which he acquiesced in their removal will have changed, if the Lieutenant-Governor's new proposal is accepted to abandon the limitations which the Bill imposed on enhancements of rent owing to a rise in prices. Under that scheme gross produce limits need run no risk of

being worked up to in the case of occupancy rents, and made the measure of rent in practice. These are points which I am to discuss with fullness later on. Here I am very earnestly to press on the Government of India the revival of the gross produce limit of section 119 of the original Bill in case of the under-raiyat in substitution for section 62. Such a limit on *khurfa* rents would probably work itself in course of time into the mutual relations of the people. It is in accordance with their traditions. There will then be some resource left the under-raiyat; some practical standard to which he could appeal, and which the village punchayet's authority and sense of justice might in time enforce. At present there is practically none.

36. Enhancement by suit of the rents of occupancy raiyats.—Passing on now to enhancement of occupancy raiyats' rents, the Lieutenant-Governor thinks it convenient to deal with enhancement by suit (sections 44-50) before considering the question of enhancement by private agreement (section 41).

The law for the enhancement of occupancy rents by suit, now in force in these Provinces, is contained in section 18, Act VIII (B.C.) of 1869. Briefly stated the grounds of enhancement are (*a*) the prevailing rate; (*b*) a rise in prices; (*c*) increased productiveness of the soil not at the raiyat's expense; and (*d*) excess area. In these grounds of enhancement the Bill makes one (chiefly) formal and one substantial change.* The formal change is the transfer from the enhancement sections to a different connection (Chapter VIII, general provisions as to rent) of the last ground (*d*); and the substantial change is the limitation of the third ground (*c*) of enhancement to increased productiveness brought about by the landlord or by fluvial action. The Bill, indeed, greatly facilitates the operation of the third, and in a still more marked degree of the second, ground of enhancement; but in those grounds of enhancement themselves no further change has been made.

* *Section 43* (*a*)—That the rate of rent paid by the raiyat is below the prevailing rate payable by occupancy raiyats for land of a similar description and with similar advantages in the vicinity.

(*b*)—That there has been a rise in the average prices of staple food-crops in the locality or at the usual markets.

(*c*)—That the productive powers of the land held by the raiyat have been increased by an improvement effected by, or at the expense of, the landlord.

(*d*)—That the productive powers of the land held by the raiyat have been increased by fluvial action.

37. On the ground of excess area.—To the formal change—the transfer of point (*d*) above to a new connection—the Lieutenant-Governor makes no objection. He thinks, indeed, that it may serve to obviate some doubt and misapprehension as to the justice of assessing excess area. Mr. Rivers Thompson also takes no exception to the new garb which the provision assumes in section 66 of the Bill, although he notes that the Legal Remembrancer to this Government prefers the present hard-and-fast rule as calculated to prevent litigation. Only on one point would the Lieutenant-Governor wish for any change, namely, the clearer recognition of the tenant's reciprocal right to a reduction when the measurement shows him to be holding less land than the stated area of his holding.

38. On the ground of increased productiveness.—The Lieutenant-Governor also agrees in the more substantial change introduced into the third ground so far as it goes. The difficulty of proving an increase in the productiveness of the soil due to natural agency is admitted on all hands to have been insuperable, and this ground of enhancement has only been fruitful in disputes between landlord and tenant, without benefit to the landlord. The evidence in favour of the change in the law which the Bill proposes is thus conclusive. As the Eastern Bengal Landholders' Association say in their notes on the Bill, "enhancement on the ground of the increase of the productive powers of the land has always been found under the old and existing law to be the most unworkable of the provisions relating to enhancement."

39. On the ground of fluvial action. Objections.—But while the Lieutenant-Governor thus approves of the principle of exclusion adopted in the Bill, he fears that it will *pro tanto* be neutralized or vitiated by the recognition of enhancement on account of fluvial action. As far as Mr. Rivers Thompson

understands, this exception was made to provide for enhancement of rents in alluvial tracts which are fertilized by periodic deposits of silt brought down by the great rivers which water Bengal. It has, however, been pointed out that, as the clause stands, it would justify claims for enhancement over those vast areas which are not riparian or alluvial, but still are inundated in years of heavy rainfall, when rivers overflow their channels or burst through their embankments. In the Lieutenant-Governor's belief this was not the intention of the Select Committee in framing the clause; yet, as the provision stands, such inundations as those referred to, which only fertilize the land for one harvest at the expense of another, may be made the ground for claims to enhanced rent. In the Lieutenant-Governor's opinion such claims should certainly be inadmissible; and this consideration at once raises the question whether, in point of fact, it is either practicable or desirable that fluvial action should be retained at all as a ground of enhancement by suit in the Bill.

In his opinion, enhancement on the ground of fluvial action is not only impracticable, but also unnecessary. The land exposed to river action of the kind contemplated by the section must be either land which, though fully formed, is not above flood-level, or land in process of formation. If the latter, the idea embodied in section 213 (on which, however, the Lieutenant-Governor will afterwards have a few words to say) applies, and no suit for enhancement under this chapter would lie. The question would be one for private contract between landlord and tenant. If the lands be fully formed, though not above flood-level, their greater or less productiveness depends wholly on the character of the monsoon. If there be a good monsoon, there will be a good inundation, and a fertilizing deposit of silt. If the monsoon be bad, inundations are low; and the productiveness of these lands suffers. But it is obvious that no principle of permanent increase of rent can be fairly based on the continuance of good monsoons. Moreover, it is notorious that the increase of rents in chur or dearah lands keeps pace with their increased productiveness, and this practice will continue under section 213 of the Bill, or whatever similar provision may be retained in the Bill. When fully formed such lands pay adequate rents, while their productiveness becomes stationary. As far as rent-paying capacity goes, chur or dearah land thus becomes assimilated to the older formations, and if fluvial action be an inadmissible ground of enhancement in the one case, so should it be in the other. Fluvial action, while it remains a true and reasonable ground for increasing rent, is very fully recognized as such in section 213 of this Bill. Once the land is declared by the Collector to have ceased to be chur or dearah land, it will practically have ceased to derive from inundations increasing productiveness, or a greater capacity to pay rent. It should thenceforward be subjected to no other grounds of enhancement than apply to ordinary uplands. For these reasons I am to recommend that clause (*d*), section 43* and section 47† be omitted from the Bill. The Government of India will observe that the Commissioner of Chittagong and the Orissa Conference, who seem to have paid special attention to the point, agree with the Lieutenant-Governor, while the Patna Conference would greatly modify section 47.

* (*d*)—That the productive powers of the land held by the raiyat have been increased by fluvial action.

† Where an enhancement is claimed on the ground of an increase in productive powers due to fluvial action—

(*a*)—The Court shall not take into account any increase which is merely temporary or casual.

(*b*)—The enhanced rent shall not exceed the previous rent by more than four annas on the rupee.

(*c*)—The Court may enhance the rent to such an amount as it may deem fair and equitable, but not so as to give the landlord more than one-half of the value of the net increase in the produce of the land.

40. On the ground of "prevailing rate," Objections.—I now come to the subject of enhancement on the ground of the prevailing rate—in the Lieutenant-Governor's opinion the most objectionable provision of the Bill. In dealing in the sequel with the subject of the non-occupancy raiyat, I am to express Mr. Rivers Thompson's belief that, subject only to the gross produce limit on rents, if that be re-introduced into the Bill, as he trusts it may be, and subject to the stipulations to be made in connection with the settlement and Tables of Rates' Chapters, it is impracticable to save the *initial* rents of non-occupancy raiyats from the effects of free competition, except by provisions

of such delicate mechanism as to invite failure in practice. The Lieutenant-Governor has, therefore, on a very careful review of this part of the Bill, and the discussions which have passed on it, resolved to withdraw from the position he has hitherto maintained in regard to the *initial* rents of non-occupancy raiyats, and to look to other means for securing that equality of occupancy and non-occupany rates which is such a necessary safeguard to agricultural prosperity in Bengal. As an inevitable consequence of this decision, and subject to the gross produce limit noticed above, the check (section 42), if check it can be called, on the *initial* rate at which even the occupancy or settled raiyat is let into possession of fresh land must also be withdrawn. With non-occupancy raiyats (or for the matter of that, with occupancy raiyats) in the market, it would be clearly useless to provide that the settled raiyat "shall not be bound to pay for land any higher rent than that which was paid for it by the previous tenant." Apart from the possibility that a previous tenant may have been paying a rack-rent, to make such a provision as that effective, the non-occupancy raiyat must be prevented from bidding above the prescribed rate, and the landlord must be compelled to let the land at that rate to a settled raiyat, possibly chosen out of several competitors. Both propositions are utterly impracticable.

Necessity for protecting occupancy rates.—Appreciating, as the Government of India no doubt will do, the reluctance with which the Lieutenant-Governor has thus resolved to trust to indirect means for the important result of securing that equality of rates which he had desired to secure by direct means, they will the more clearly understand how vitally important is the principle that competition should not, by any provision of this Bill, be brought to bear on established occupancy rents. But competition will practically be brought to bear on occupancy rents by freeing the initial rent of fresh land from control, while the "prevailing rate" is retained as a ground of enhancement. If fixity of tenure be a necessity of agricultural progress, fair rents are no less so. But fixity of tenure is a conception incompatible with competition leading to rack-rent. If, therefore, the initial non-occupancy rent, and if occupancy rents for fresh lands, are to be competitive, as the Lieutenant-Governor, with the reservation mentioned, agrees to their being—if landlords are to have that power which in the Report of the Patna Conference (page 38) some of them declare they will exercise, of asking from the non-occupancy raiyat any rent they please,—it becomes absolutely essential that occupancy rents should be protected; otherwise this Bill will become an irresistible means for rack-renting—a contingency which, in those portions of the Province where rents are already too high, especially in Behar, cannot be regarded without apprehension. The "prevailing rate" deprives the occupancy raiyat of protection, and for this reason the Lieutenant-Governor—herein supported by a great weight of authority, judicial and executive—must respectfully press for the withdrawal of this ground of enhancement in the Bill.

In the early stages of this discussion, it was undoubtedly the fact that the question of "fair rents" did not attract as much attention as questions of fixity of tenure and methods of recovering rents. In truth it may be said that the interference of Government in the measure was accentuated by the tendency of the zemindar to destroy occupancy rights by "shifting" processes. When the question of fixity of tenure, as represented by the consolidation and extension of the occupancy right, had somewhat passed out of the dominion of the discussion into that of accepted necessity, it was recognized that fixity of tenure without fair rents would be valueless. Therefore the question of fair rents became at once prominent. When it was afterwards ascertained that Tables of Rates were not very practicable, and that the Select Committee, while rejecting the gross produce limit on rents, had also practically left non-occupancy rents to competition, the enormous importance of the "prevailing rate" ground of enhancement became at once apparent. It had, indeed, been previously known that, owing to the impracticability of enhancement on the rule of proportion, landlords were largely having recourse to the "prevailing rate." It was also known that this ground of enhancement was being abused. The "prevailing rate," however, was stated to have anti-

quity in its favour, though those conversant with its origin as a spurious substitute for the "pergunnah rate" in Regulation V, 1812, knew that to be an error. They knew, too, that the substitute had operated in exactly the contrary direction to that intended by its framer, Mr. Colebrooke. All this caused greater attention to be paid to this ground of enhancement, with the result that this Government on mature deliberation resolved to oppose its retention in the Bill. Further consideration of the question has only served to strengthen that resolve. There can, the Lieutenant-Governor believes, be no longer any doubt that the retention of the prevailing rate as a ground of enhancement is unjust and fraught with the utmost danger to occupancy raiyats, who form the vast mass of the peasantry in Bengal.

Weight of local opinion against "prevailing rate."—In paragraph 9 of my circular letter No. 3T—R of the 24th of May, the attention of officers, executive and judicial, and of public associations, was called to the question of the "prevailing rate." This invitation has elicited a weighty expression of well-informed opinion, judicial as well as executive, against the retention of this ground of enhancement in the Bill. The Conferences which support the retention of the rule are Burdwan, Rajshahye, Bhaugulpore and the Presidency. With reference to the first, it will be remarked from their 39th paragraph that they admit the non-existence of a "prevailing rate," but express belief that it would not be difficult to "ascertain a fair and generally existing *average* of rents for various classes of soil." On the other hand, in their 96th paragraph, they declare that it "would be impracticable to form Tables of Rates which would have any real value or represent actual facts." It is hardly necessary to point out that these two statements are contradictory, for the formation of a Table of Rates is nothing more than the establishment of fair averages for soil classes.

Then a majority of the Rajshahye Conference say that the abolition of the rate would be unjust to the zemindars, as the ground is "the only easy one to prove." They nowhere, however, assert that a prevailing rate exists, while, like the Burdwan Conference, they admit that, "excepting a few special localities under very different circumstances from the greater part of the country, no Table of Rates could be framed that would be of real use, and that ought to be used." Moreover, they add the significant remark: "The rates for the same qualities of land held by the same class vary in contiguous estates owing to the zemindar being rich and lenient [and the others being] poor and exacting or pressed by family marriages and law-suits." No stronger admission than this could, in the Lieutenant-Governor's opinion, be made of the non-existence of "prevailing" rates throughout the Rajshahye Division, while the provision in the Bill of an easily workable plan of enhancement removes the Rajshahye Conference's only argument in favour of retaining the Bill as it stands.

The fact is that the only definite statements in favour of this provision of the Bill are to be found in the reports of the Presidency and Bhagulpore Conferences. It is "the belief" of the Bhagulpore Conference that "a prevailing rate can generally be discovered in this part of the country, if not for a whole pergunnah, at least limited to villages or groups of villages in the same estate;" but that belief is unsupported by any fact, while it is admitted in the 13th paragraph of the same report that the retention of this provision of the Bill is calculated to injure the class of occupancy raiyats. The Presidency Conference assert that it is "the experience of all who have had to deal with settlements that such rates prevail over moderate areas." Yet that is a statement on which the zemindars themselves have not ventured, and which the Lieutenant-Governor must pronounce to be either incorrect or misleading. If by it is meant that settlement proceedings satisfactorily show prevailing rates to exist in zemindaris contiguous to the tracts under settlement, then it is incorrect. Settlement proceedings are notoriously untrustworthy on the point. If it means that such proceedings show prevailing rates as existing in the estates under settlement, it is misleading. In settlements, lands are classified and rates made—not always, as this Government has reason to know, with success. But it is an obvious fallacy to infer from the discovery of such factitious rates at a subsequent re-settlement

that prevailing rates exist where settlements have not already been made. It is not to be forgotten that the Commissioners and Collectors of the Presidency and Bhagulpore Divisions, where now the possibility of ascertaining a "prevailing rate" is asserted, reported in 1882, after special enquiries instituted in Wards' estates, that no trace of the Pergunnah Rate existed (Bengal Report, 1883, Volume II, Appendix iii).

In the presence of the evidence on the subject, the ground of the prevailing rate is, in the judgment of this Government, no longer defensible. The fact stands proved that if this ground of enhancement were ever legitimate, its legitimacy has passed away; while significant instances have been cited of its fraudulent use. The Eastern Bengal Landholders' Association aver that "what is deemed the prevailing rate in each particular locality is one of the most difficult of questions." The advocate of the rule do not contend—in the face of conclusive proof to the contrary it would be impossible for them to contend—that there is now-a-days a prevailing rate anywhere except in a few isolated tracts where the rate is overlaid and obscured by *abwabs* and cesses of various kinds. But they allege that, although there may not be one uniform rate for any class of land in a village, yet the rents generally payable for any class do approximate more or less to a certain standard. It is to be observed that by this an *average* rate is not meant: an uniform rate underlying the variations, and capable of recognition when the variations are eliminated, is what is stated to exist. Assuming for the moment this statement to be correct, the Lieutenant-Governor could never see what just or logical ground it furnished for enhancing one raiyat's rent up to the level of another's. Since the pergunnah rates which appealed to the rent-paying capacity of all raiyats, and consequently of each raiyat, were destroyed, since rents were increased by zemindars at discretion, and differentiated according to each raiyat's inability to resist, it is difficult to find the reason for making one man's rights the measure of another's. But the statement was never admitted by this Government to be correct. It has been disproved by the special enquiries instituted in 1882-83. If more proof be now wanted of the incorrectness of the statement, it is forthcoming in the ample evidence supplied by these reports of the impracticability of framing Tables of Rates without granting to the officers employed in framing them full powers of interference with existing rents. On this point the reports are accepted as conclusive by the Lieutenant-Governor against the practicability of framing Tables of Rates without seriously altering existing rents. So far they fully support the opinion expressed in Rai Kristo Das Pal's dissent. The inevitable conclusion, therefore, is that if it be impracticable without interference with existing facts, to *construct* a prevailing rate, it is clearly impossible to *discover* one.

To conclude it may be stated that the "prevailing rate" is condemned by the weight of authoritative opinion as illogical, unnecessary, and mischievous. It is illogical, for it regulates a raiyat's liability, not with reference to his own rights, but with reference to rights which it is not his business to maintain. It is unnecessary, for in the provisions for enhancement on the ground of landlord's improvements, rise in prices, and registered contracts, ample facilities are afforded for increase of rents. It is mischievous, for if ever there was any probable foundation for it in the survival of pergunnah rates, that foundation no longer exists; while without any such foundation the rule places the rights of the vast body of cultivators at the mercy (as the Legal Remembrancer says) of the "feeblest, the stupidest, and the most venal of the class."

41. Mr. Dampier's proposed substitute for the "prevailing rate."—In the paper on this question submitted by Mr. Dampier, that experienced officer seeks to reconcile the "prevailing rate" with equity by proposing an amended provision to the effect that rent shall be enchanceable, in the absence of special reasons, when the rent paid by the raiyat is unduly low with reference to the rates of rent which prevail in the *vicinity* as payable by occupancy raiyats for land of a similar description and similar advantages: provided that one recognized rate is established in the *estate* as the prevailing rate of such land. No doubt Mr. Dampier's proposal would avoid

some of the evils of the present law, and if the remarks which I am to make on the question of framing Tables of Rates, and the modifications I am to propose on the subject, induce the Government of India to retain Chapter XI in the Bill, the Lieutenant-Governor would be disposed to accept the amendment, provided (i) that for the word "vicinity," "village or estate" be substituted, and (ii) *that the "established rate" be that framed and promulgated by the Government under Chapter XI.* A prevailing rate thus established would have an approximate relation to the rent-paying capacity of each raiyat. That which is now miscalled the "prevailing rate" has none.

42. Enhancement on ground of rise in prices.—I am now to offer some remarks on clause (*b*) of section 43—enhancement in proportion to a rise in the average prices of staple food-crops in the locality. This ground of enhancement seems to the Lieutenant-Governor to be at the present time fair and legitimate, and he goes the length of saying affords ample compensation to zemindars for the withdrawal of other grounds. No doubt it may be worked with injustice to the raiyat, as Mr. Wilson, Collector of Midnapore, and Mr. Norman, Collector of Mozufferpore, point out; and a rise in prices owing to diminished production or crop failure would obviously be no just gound for an enhancement of rent. There is also need of better administrative arrangements than now exist to procure accurate price-lists. These, however, are difficulties which may be overcome by the courts in the one instance and by the Executive Government in the other; they are objections to the application of the principle, not to the principle itself.

43. Its principle considered.—To the principle itself, as far as Mr. Rivers Thompson has observed, no objection has been made, for the objection to the exclusion from the price-lists of staples other then food-crops is in reality a matter of detail. With that proposal I am subsequently to deal; here I am to discuss the question whether a scheme of rent enhancement may be unobjectionably based upon the market variations in the price of corn. The first point to consider is this. Can we count on such a normal increase in the price of corn as the scheme contemplates? If this question be judged by the past history of prices in Bengal, the answer must be in the affirmative. We have abundant evidence to prove that there has been a steady normal rise in the price of corn since the beginning of the century. The price of rice has doubled within that period, while the price of more valuable grain, such as wheat, has risen in greater proportion. Judged by the past range of prices, then, it would seem that the principle propounded in the Bill is fair to both landlord and raiyat.

But here the doubt occurs—can we judge of the future of prices by their past? Some political economists hold that, although the price of corn advances (normal permanent advance is what is here referred to) in the early period of a nation's growth, it at length reaches a point beyond which it exhibits no permanent tendency to further increase. Is this theory true, and if so, has the stationary stage been reached in Bengal? The most prominent advocate of this theory, as far as the Lieutenant-Governor knows, was that distinguished economist, the late Professor Cairnes,* unless, indeed, Adam Smith's view (contradicted, however, by Mr. J. S. Mill) as to the steadiness of the prices of corn, comparing century with century, be considered an equivalent. Professor Cairnes' explanation of the theory is that an advance in the price of staple food, after it attains a certain elevation, inevitably re-acts on population. Thus checking the demand, the re-action arrests the extension of cultivation, and, by consequence, the normal price.

* Leading principles of Political Economy, Chapter V.

Now, admitting the truth of the theory, a little consideration will show that the repressive influences on prices referred to are not now in operation in Bengal, and probably will not be, if they ever be, within any measurable period of time. Population in Bengal is, we know, increasing, and so is the demand for food. Even if the local demand were stagnant, which it is not, the foreign demand is daily growing, and foreign demand affects prices no less

than local demand. There are, therefore, none of the causes at work in Bengal, which, according to economists of Professor Cairnes' school, check the upward tendency of the price of corn. No doubt it is true that improvements in agriculture tend to increase production, and so to lower prices. But as Mr. J. S. Mill says: "In a society which is advancing in wealth, population generally increases faster than agricultural skill, and food consequently tends to become more costly.†" The relevancy of this observation to Bengal will be the more apparent if it be remembered that the time when agricultural improvements will increase production is still distant. Even if that time comes, the expansion of the export trade of the country will have increased the demand and so established an upward tendency in prices. For these reasons the Lieutenant-Governor thinks that there is no reason to expect any cessation of the increase of prices, and he therefore accepts the proposals of the Bill as founded on a sound and workable principle. Should his anticipations in this regard not be realized; in other words, should the price of corn cease to rise, enhancements on this ground will then come to an end, and landlords' rents become stereotyped at the highest point that the land can afford to pay.

† Political Economy, Book IV, Chapter II, Section 3.

44. Can it be in proportion to rise in price?—If, then, to the principle of enhancement of rents on the *ground* of a rise in price of staple food-grain no valid objection can be offered—are there objections to an enhancement in *proportion* to the rise? To this question I am to reply that there are very serious objections indeed, which are apparent throughout the reports, and which take the shape of an almost unanimous expression of opinion that before decreeing enhancement on account of a rise in prices, the courts should make allowance for an increase in the cost of production. In this view the Lieutenant-Governor fully concurs for reasons which I am now to state with some fulness, as special attention was directed to this point in the letter from the Government of India in May last.

Case of capitalists farming for profit.—The question is whether, in allowing an enhancement of rent on the ground of a rise in price, allowance should first be made for increased cost of production. This question naturally divides itself into two heads—(*a*) when cultivation is carried on for a profit; and (*b*) when it is carried on for subsistence. The first case is not a common one in Bengal; but there are doubtless some such cases, and it is therefore desirable to show briefly that before the landlord can secure an increase of rent the farmer will have secured full compensation for increased costs of production. It will be admitted that when production is carried on by capitalists farming for a profit, and not by ordinary raiyats farming for subsistence, rent does not enter into the costs of production. The price of corn is, however, determined by the cost of producing the most costly portion of the general crop, and hence it follows that the only connection that can be established (in the case of capitalist farming) between rent and the prices of corn, or between the increment of the one and of the other, is that rent must be so adjusted as to give farmers, taken as a class, the average profits which capital commands in other branches of industry. But what the profits of capital may be in the particular case depends on the "haggling of the market" between a landlord wanting all and a farmer wishing to keep all. The result will be a compromise in which competition among landlords, on the one hand, and among capitalists on the other, secure to farming of this sort a profit which necessarily includes a just allowance for increased costs of production from whatever cause arising. Hence it follows that you cannot legislate for the same percentage increase of rents as of prices, although you may accept the fact of a permanent increase in the price of corn as *primâ facie* establishing the justice of some increase of rent.

Case of tenant farming for subsistence.—Coming now to the case, which in these Provinces is by far the more general case, in which cultivation is carried on, not for a profit, but for subsistence, I am to observe that the preceding considerations do not apply. The distinctive difference between this case and the former one is that the raiyat is not in a position to "haggle"

with the landlord. Tradition, caste, and poverty bind him to the soil; while custom is the only influence which moderates the demand which the landlord in this matter practically a monopolist, can enforce. In other words, the rent which raiyats, cultivating for subsistence, can pay is governed, not by competition as expounded above, but by custom, or by a species of onesided struggle between the numbers who want land and the one who has land to give. In this case rent is undoubtedly an element in the cost of production; for the raiyat not having capital, and not working for profit, must labour on until he obtains from the land the price wherewith to pay for its use. Payment for the use of land, in other words rent, therefore forms an element in the cost of production. Thus, if prices were regulated by costs of production alone, the variations of prices would have some direct connection with variations of rent, though even in this case the connection would be indefinite and obscure, seeing that rent is not the most prominent factor in costs of production. But prices vary more owing to the operation of demand and supply than owing to the ultimate law of costs of production; and therefore in this, as well as in the preceding case of capitalist farming, it is impossible to lay down any law governing the variation of rent in relation to prices, and, least of all, a law of arithmetical proportion as the Bill does.

The matter may also be looked at in a less technical and more concrete way. Let us take a simple case which, however, is proved to be almost a typical case by the unerring certainty with which even a slight eccentricity of season—the commencement a few days later, or the cessation a few days earlier than usual, of the periodic rainfall—affects large classes of people throughout these Provinces. Let us suppose the case of a raiyat who cultivates a holding the produce of which suffices for his subsistence and ordinary wants and for the payment of his rent. He produces yearly $(a+b)$ maunds of rice, consumes a maunds and sells b maunds to pay his rent. In this case, as long as the land yields the requisite produce and the raiyat's wants do not grow, he can afford to pay an increase of rent proportionate to the increase in prices; and, as the Government of India say in their letter of the 4th of May, "the landlord would be protected from the loss now arising from the diminished purchasing power of silver in relation to grain," while "the standard of rent as expressed in grain would not vary." But the raiyat's wants do grow, while to meet them there cannot be an increase of produce except by such an increased application of capital and labour (giving proportionately less return) as we cannot hope for in the case of a raiyat cultivating for subsistence. In the case we are dealing with there is *ex concessis* scant capital, while in such a climate as that of India, where continuous labour is exhausting, industry is not increasingly applied unless stimulated by exceptional reward. If, then, a dead-level, or rather a descending scale of poverty, is not to be maintained, the a maunds must in course of time prove inadequate for the wants of the raiyat and his family; and as he and his family must live, the b maunds will be trenched upon. The landlord's rent must therefore suffer. In other words, in a case which every one with knowledge of these Provinces must admit to be, if not everywhere a typical, at all events a common one, rents cannot possibly rise in direct ratio to a rise in prices. This conclusion is the more inevitable if regard be had to the increasing cost of labour, live-stock and other necessaries of cultivation and of living, to which attention has been called in the reports, as well as to the necessity which exists in the lager portion of those Provinces for improvement in the ordinary raiyat's condition and standard of comfort. Failing to fully appreciate these circumstances, Mr. D'Oyly, Collector of Bhagulpore, has been led to think that a rise in price always allows for increased cost of production. This is true only when the ratio of increase in cost of production and of living does not exceed the ratio of increase in price.

Allowance to be made for increased cost of production.—Thus the conclusion to which the Lieutenant-Governor comes on this aspect of the question is similar to that deduced in the case of capitalist farmers. The conclusion is that, while a permanent increase in the price of corn may be regarded as presumably justifying an increase of rent, the latter cannot be in arithmetical proportion to the former. This conclusion is in entire harmony with the almost

unanimous opinion of local officers, that allowance should be made for increased costs of production. The Lieutenant-Governor need hardly observe that it also coincides with the existing law as declared in W. R., Vol. VII, page 94, where the well-known ruling in Thakurani Dassya's case is brought into harmony with the agricultural facts which surround us. The Bill recognizes in section 48 that no tenant should be called on to pay a rent which is "unfair or inequitable." By this the Lieutenant-Governor understands that the rent shall be such as a *solvent tenant can pay, and yet prosper*. Such a rent you cannot get without making full allowance for increased cost of production. In other words, you cannot safely decree an enhancement of rent because prices have risen. The rise in price may have brought little good to the raiyat, whose crops, owing to soil deterioration or inadequate moisture, may have failed over a series of years, or whose legitimate expenses in raising the crop may have risen more than prices have. The net result, then, is that, although as a working rule it may be fair to decree an enhancement of rent on the ground of a rise in price, you must allow the raiyat to prove the exception to the rule.

Having regard, then, to the preceding considerations, the question arises should the determination of a "fair and equitable" rent—in other words, the determination of the extent to which the rise in prices should be discounted with reference to increased costs of production—be left to the courts, as it is now both by the existing law and by section 48 of the Bill; or should some working rule be laid down for the court's guidance? On this point the reports are not precise; but some officers advocate an allowance for costs of production, ranging from one-third to one-half the percentage rise in prices. Mr. Boxwell, Collector of Gya, propounds a different and more ambitious scheme, whereby, in his opinion, the true rent which should be paid for land might be determined. As far, however, as the Lieutenant-Governor understands it, Mr. Boxwell's scheme seems totally impracticable, for, having as its basis the *point of fertility* at which the surplus produce is divided, it depends on the ascertainment of a fact which we know by common experience, as well as on the high authority of Professor Bonamy Price, to be unascertainable by any formula.* It is further imperfect because it omits to take account of the other factors, such as distance from markets, facilities for cultivation, foreign demand, which all combine to influence rents. On the whole, the Lieutenant-Governor is strongly of the opinion that a working rule should be laid down for the guidance of the courts upon this very difficult point. It will be remembered that the difficulty of ascertaining the net value of the produce; in other words, the difficulty of ascertaining the costs of production, was one of the chief causes why the existing law of enhancement has proved unworkable. It is clear now that before rent can be enhanced under this Bill, the increase in the costs of production must be discounted; and thus, if no working rule be laid down, the courts must attempt again a task which experience has shown they cannot accomplish.

* *Practical Political Economy, Chapter X.*

Measure of such allowance.—But although it would be impossible for the courts to determine in each case the exact increment in the costs of production, it would be a less difficult question to determine whether the increment had been greater or less, and approximately how much greater, or how much less, than the rise in price. Given a rise of 25 per cent in prices, the court might, with a probability of general correctness, say whether the increase in costs of production had been 12 per cent., or more or less. No doubt there still would be difficulty, but no difficulty comparable to that which now exists in connection with net values. This remaining difficulty would, however, be altogether overcome if a rule could be laid down fixing the percentage of increase of rent at a certain proportion of the increase in prices. Some officers propose to divide the rise in prices equally, giving one-half to the landlord as increased rent, and one-half to the raiyat as increased cost of production. Thus if prices rise 25 per cent. they would increase the rent 12½ per cent. and allow the other 12½ per cent. to go as an allowance for increase in costs of production. This is a proposal which the Lieutenant-Governor desires to bring prominently to the notice of the Government of India. If it be accepted, he would withdraw altogether the limitation on enhancements imposed in section 45 (*b*). He would allow the

landlords the full benefit of a rise in prices, subject to that deduction for increased costs of production, and to the ultimate produce limit to be referred to later on. To improving landlords the Lieutenant-Governor would allow a larger increase, as I am in the sequel to explain, for they should benefit by increased productiveness as well as by higher prices.

45. Should the rise in prices be calculated in staple food-grain crops alone?—Then it is to be considered whether the rise in prices should be calculated on staple food-crops alone, or whether any other crop, such as jute or sugarcane, should also be included as the basis of such calculation. It appears to the Lieutenant-Governor that no benefit would accrue to the landlords by widening the data of calculation, while great difficulty and uncertainty would be caused in framing tables of local prices. It is to be remembered that for many non-food crops, such as indigo and opium and ganja (reference to which is made in the Reports of the Patna and Rajshahye Conferences as possible staples for price-lists), there is no local market at all; while at the market in which they do sell their prices are very complex things indeed, including manufacturers' profits and interest on capital, besides being monopoly prices to boot. In the circular letter of 24th May, the Lieutenant-Governor desired information as to whether such a relation existed between any non-food crop and food-grains, that the area under one contracted while the area under the other expanded according to the less or greater demand. If such a relation existed, it might be inferred that the costs of production of both crops nearly approximated, and that the one was as suitable as the other as a basis for calculating rent enhancement. It now seems that such a relation exists to some extent only in the case of rice and jute; but the Dacca Conference would not, on that account, recognize jute as a staple, owing to the great fluctuations in its price. No doubt the price of jute does fluctuate greatly. A reference to the statement appended to my circular letter of 24th May will show this. But it will also show that over a series of years these fluctuations so far neutralize each other that on an average there is neither rise nor fall. To judge from that statement if jute were made a staple crop, we should have zemindars in a few years dissatisfied with a settlement for which they now clamour. In the Lieutenant-Governor's opinion staple food-grain forms the best index of the producer's permanent capacity to pay an increase of rent. This is the reason why he thinks that on this point the Bill needs no alteration. What we want to ascertain is the normal rise in prices. The commodity in which that normal rise is most clearly apparent through the fluctuations of the wholesale and retail market rates is the commodity most suitable for our purpose. That commodity is corn.

When entertaining these opinions, however, the Lieutenant-Governor has no desire to oppose the Government of India if it wishes that the courts trying rent-suits should have regard to other staples than food-grain brought to market as raw produce. He fears indeed that such price-lists would not be found valuable, while they might be often dangerous, and he is quite certain they would be very difficult to prepare. It need not have been added, had not misconceptions prevailed on the point, that the question of absolute value of produce is altogether foreign to the scheme embodied in these provisions. It is of course to be understood that it rests with the raiyat to grow what crop suits him best, without thereby subjecting himself to pay increased rent. For instance, if a raiyat in 1885, paying Rs. 5 for a bigha of rice land, grows jute or sugarcane on that land, in 1886 he does not, by reason of the change of crop, render himself liable to an increase of rent. But if he happen to be paying Rs. 5 per bigha for land in which jute or sugarcane grows, and the prices of staple food-crops rise 25 per cent., then the landlord of the sugarcane or jute field will, on the terms of the Bill as modified by the Lieutenant-Governor's proposals, be entitled to claim an enhanced rent of 12½ per cent. on Rs. 5, the rent of the field.

46. Authenticity of existing price-lists.—Next the question arises can the increase in prices, necessary for the decision of suits instituted during the next 15 years, be safely determined on the data now existing. Here it

must be admitted that general distrust in the accuracy of the published prices-current is expressed in the papers; while, owing to the non-preservation by most grain-dealers of a record of old prices, fears are entertained that it may not be possible to correct our published lists. This result does not surprise the Lieutenant-Governor. There is in Bengal no organization for collecting statistical information, and no agency to check or supervise the record of even such important information as the prices of staple food-grain. It is to be hoped that matters in this respect will improve in connection with the Agricultural Department, which will come into operation at the end of this year, and from the beginning of next year it is believed that the prices-current will no longer be open to animadversion. Every year of improved statistics that passes lessens danger to be apprehended from the existing price-lists.

47. Presumption as to their practical correctness.—With all this, however, the Lieutenant-Governor does not admit that the existing price-lists are, to any noticeable extent, untrustworthy evidence for the purpose in hand of the extent to which prices of staple food-crops have risen within the last 15 years. There is no reason to believe that false returns have been made. The source of error is chargeable rather to the ill-selection and confusion of figures than to the falsification of facts. The error seems to have been constant, for the system has been unchanged. To this view some support is lent by a comparison which can be instituted between the ratio of increase in the price of rice from 1869 to 1883, as exhibited in the published price-lists of the Pubna district, and as shown in the prices recorded in the books of a rice-exporting English firm at Serajgunge, the largest rice-mart in North Bengal. The figures which are reproduced as an appendix to this Report exhibit the noticeable fact that, although the individual prices differ for almost every month of the period, the ratios of increase or decrease between each quinquennial period closely approximate. The official returns show an increase of 21·5 per cent. during that period, while the merchants' figures show an increase of 23 per cent. Possibly this small difference may be explained by the fact that, while the official returns refer to the head-quarters of the district where trade is slack, the merchants' figures refer to prices at a mart where trade has always been large and brisk.

As it is the *ratio* of increase or decrease which the courts will want under this Bill, the facts referred to in the preceding paragraph seem to indicate that after all the existing data are not so unreliable for the purposes of the Bill as some suppose, and this the Government of India will observe is the opinion of many officers entitled to speak with authority on the point. The same fact—that it is the proportion of increase or decrease in price, not the absolute value that is required—would also seem to furnish an answer to those who think that as the raiyat sells his produce unhusked, what we have to look to is the price of paddy, not of cleaned rice. The Lieutenant-Governor believes it practically safe to assume that the proportion of increase or decrease in the price of paddy does not materially differ from the proportion based on the prices of rice. He would have less objection to provide in future for the exhibition in the prices-current of the prices of paddy as well as of rice had it not been that paddy is usually sold wholesale, and is therefore not always to be had in the smaller markets. Still in many places it is no doubt possible to show the prices of paddy as well as rice in the official lists, and if considered desirable this may be done.

48. Area and period for which price-lists should be prepared.—Next, the question arises for what area, and for what periods of the year, these authoritative price-lists should be prepared. The Officiating Commissioner of Chittagong remarks "that a general average of the prices prevailing at all seasons of the year in the subdivision is as useful for purposes of comparison with another general average of the same area prepared in the same way for any subsequent year as the most elaborate and carefully prepared statistics of market prices at harvest times only." Mr. Weekes, Collector of Purneah, in his dissent, appended to the Report of the Bhagulpore Conference, appears to share the same view.

The questions thus raised, whether the lists should be for large or small areas, and whether of prices prevailing at harvest times or the average of the entire year, depend greatly for their importance on the objects aimed at. If the object be to ascertain the gross produce limit on rents, no doubt the prices prevailing at harvest time should be taken. The raiyat has to part with his grain at harvest time to pay his rent, and obviously the amount of his rent should be measured by the value his produce then brings in. In dealing, however, with enhancements of rent on the ground of a rise in prices, the question is altogether different. In this latter case we have to deal no longer with absolute, but with relative prices, and here the Lieutenant-Governor is not disposed to differ from those who think that the all-the-year-round retail prices furnish as sure a basis for comparison as the presumed wholesale prices of the harvest month. Authorities seem to agree that, although the *varieties* of prices may be greater in retail than wholesale dealings, the *fluctuations* over a lengthened period are not greater in the retail than in the wholesale trade. Then as to area, the Lieutenant-Governor does not think that the percentage of rise or fall would be appreciably different, taken for a subdivision, from what it would be if taken for a thannah. There would indeed be an advantage in taking the prices at the larger station, as local disturbing causes would be eliminated, while a more careful record by better agency would be secured. On the whole, then, the Lientenant-Governor is not disposed to differ from the officers who would bid the courts have regard to the yearly average retail prices recorded at the chief mart of a subdivision as an indication of the extent to which rents may be enhanced. The ultimate gross produce check which, determined in one case in a village, will have been determined for many, would of course be based on the prices during these months, fixed under section 52 of the Bill by the Local Government as harvest months.

49. Enhancement on the ground of landlords' improvements.—It remains to offer some remarks on enhancement on the ground of landlords' improvements [sections 43 (*c*) and 46*], the chief points deserving notice here being the extent to which such enhancements should go, the time at which such enhancements should be decreed, and the measure of freedom to be accorded to landlord and raiyat to contract for such enhancement out of court. On the first point—the extent of such enhancement—the papers do not express any decided view; but, as far as the Lieutenant-Governor gathers, the weight of opinion is in favour of leaving the matter to the discretion of the courts. In this opinion Mr. Rivers Thompson does not entirely concur; he is willing to leave the courts a large discretion, but he would at the same time guide that discretion, and limit it by declaring that while the court should decree such an enhancement as shall be fair and equitable having regard to all the circumstances of the case, the enhanced rent shall never be more than double the former rent.

* Where an enhancement is claimed on the ground of landlord's improvement—

(*a*)—The court shall not grant an enhancement unless the improvement has been registered in accordance with the Act.

(*b*)—In determining the amount of enhancement the court shall have regard to—

(I) The increase in the productive power of the land caused, or likely to be caused, by the improvement;

(II) The cost of the improvement;

(III) The cost of the cultivation required for utilising the improvement: and

(IV) The existing rent and the ability of the land to bear a higher rent.

(*c*)—The court may make its decree conditional and subject to review and reconsideration in the event of the improvement not producing the estimated effect within a specified time.

Should it be decreed before improvement is effected?—Then as to the time at which such enhancement should be decreed, the Lieutenant-Governor understands from section 91 that the section is not meant to cover cases in which enhancement decrees are given before the work is actually completed. He has therefore no objection to offer to the section, although he observes that the Burdwan and Patna Conferences think that no increase of rent should be allowed before the effect of the improvement has reached the raiyat. There is, however, the point of contracts for improvements made out of court. In regard to them the question is, should such contracts be allowed before the improvement is completed? On this point the Lieutenant-Governor would say

that enhancement made conditional on improvements to be executed is not unlikely to cause dispute. The Government of India will remember that the point was raised in the Resolution which the Lieutenant-Governor recorded on the Report of the Court of Wards for 1882-83. In the views then expressed by the Lieutenant-Governor, the Government of India did not altogether concur, thinking that a liberty to contract for increase of rent, conditional on the completion of improvements, was calculated to make landlords improve. When recording his Resolution, the Lieutenant-Governor was not insensible to the importance of that consideration; but he had in mind actual cases, improvements which, while fully answering the expectations formed of them, had, by producing unforeseen effects, rendered barren the soil they had been devised to fertilize. In such a case as this (the hardship of which no doubt clause IV of section 46 would, to some extent, mitigate) an increase of rent would be impossible, and a previous contract to pay an increase could only lead to ill-feeling if not to litigation. It may, indeed, be argued that such cases are exceptional, and that in the long run more advantage accrues to the community by stimulating the spirit of improvement than by avoidance of all risk. Through the self-interest of individuals also the risk is minimized. If such be the judgment of His Excellency in Council on the considerations now submitted, the Lieutenant-Governor will respectfully defer to it. In this case, however, he would suggest that a provision be made whereby a raiyat, who has by anticipation contracted for an increased rent, may be relieved from his contract, or have it reasonably modified, if the anticipated effect be not at all or only partially produced. Secure in the contract the landlord or his agents may fail in their part of the bargain.

50. Enhancement by registered contract.—The provisions of the Bill on enhancements by suit being thus disposed of, I am to revert to section 41—enhancement by registered contract. To the principle embodied in that section the Lieutenant-Governor accords his fullest approval; but with the limit he is dissatisfied. Many of these limitations on rents, which the Presidency and Rajshahye Conferences think unfair to the landlord, the Lieutenant-Governor thinks dangerous to the raiyat. He cannot divest himself of the apprehension that not only will they be worked up to, but that in the near future they will become the ordinary measure of rent. This was the main reason why he accepted the abolition of the gross produce limit. Under the Bill as it then stood, there was the fear that other landlords, though more reticent, would be no less ready than the Behar landlord* to work ceaselessly up to it. If these fears were realized, it would be calamitous. The Province would be pauperized. Yet our only hope of their not being realized lies in the raiyats' independence, which all our experience teaches us to mistrust. Mr. Rivers Thompson dreads these wide margins to enhancements of rents, which over large areas are already too high. He dreads them more out of court than in court, notwithstanding the attractive guise of amicable settlements, for he knows from experience† that when scrutinized those "amicable settlements" too often stand forth in less pleasing colours.

* See paragraph 20 of the Lieutenant-Governor's letter of 27th September 1883.

† For cases in point see the Reports on the Mymensingh rent-disputes, recently submitted to the Government of India.

The fact is that the margins of enhancement given in sections 8, 41, and possibly in section 45 of the Bill, are excessive. Unless the Bill gives them a *quasi* title to do it, few landlords in these Provinces now-a-days would venture to ask for an enhancement of 25 per cent. on rents of old arable land every 15 years. Be it remembered that such enhancements would *quadruple* the rent in less than a century—a result which the Lieutenant-Governor cannot think has been sufficiently realized. It is a fact that, in Behar, rents are already too high. This point was well brought out by the Hon'ble Mr. Reynolds in his note on enhancement in Behar, printed in Appendix IV, Vol. I of Sir Ashley Eden's Report, 1881. Every Behar official and every impartial non-official in that Province will corroborate Mr. Reynolds' conclusions, and the Patna Conference only give expression to the general view by asking for the re-imposition of the one-fifth limit. The effect of the thikadari system in Behar has been to force up rents to such a pitch that they can no longer be paid even

in average years. The Court of Wards has had large experience in this matter, and it can affirm the fact that the rent-rolls of Behar estates, even more than those in Bengal, always show an unrealizable balance. That is a confession of excessive rentals. The provisions of this Bill will operate from those rents already too high, as from an assumed basis, towards still larger enhancements. They will operate with unfailing certainty too; and the Lieutenant-Governor cannot regard, without the gravest apprehension, the results which they will produce throughout Behar. He therefore, before it is too late, again appeals to the Government of India to impose an ultimate check on the enhancements of rent which this Bill will stimulate and compass. He earnestly advocates the re-introduction of the one-fifth limit taken in gross produce of staple food-crops. Under the scheme which the Lieutenant-Governor is now proposing that limit is free from the danger to which it was exposed under the original Bill. The removal of former arbitrary restrictions on enhancements on account of a rise in prices is a very important relaxation of the Bill's stringency in favour of the zemindars; the imposition of a maximum limit is only a reasonable safeguard in favour of the raiyats. It is a safeguard, too, which the Lieutenant-Governor would urge can be effectively applied.

The objections to the limitation have been summed up in the 10th paragraph of the letter from the Government of India in May last, and to those objections Mr. Rivers Thompson has again given most careful attention. The main objections are three—the alleged viciousness of the rule "because it leaves out of view the enormously important element of the costs of production;" "the notorious difficulty of ascertaining the average produce of different classes of land, or the produce of particular fields of which the rent was in question;" and, lastly, the danger that though "suitable in a particular locality and regarding particular crops, it might work inequitably as an uniform standard for all classes of crops and in all districts."

Now as against the proposals made in this letter, the Lieutenant-Governor submits that these objections have scant, if any, force. The first objection, it will be at once apparent, has no validity at all, because the question of cost of production under the scheme of enhancement now propounded is an antecedent to the application of the limit. It will have been decided before the limit is called into operation. This is so evident that further observations on the point are unnecessary. Then, as regards the second objection, the Lieutenant-Governor would remind the Government of India that we are not concerned with the accurate proportionment of revenue to produce, nor with investigations to be conducted in regard to every field, but with limitations to be applied in rare cases, and in those only aiming at approximate correctness. The Lieutenant-Governor does not propose that the gross produce limitation should be the result of experiments carried out by the officers of Government. He admits that experiments give varying results, incompatible with scientific precision. Admitting this, however, Mr. Rivers Thompson maintains that precision is altogether unnecessary; what we want can be obtained by an appeal to the common sense of a jury of men interested in agriculture—experts in the matter they are called on to deal with. The general experience in Bengal is that such a jury can estimate with a wonderful degree of accuracy what a bigha of a particular class of land should yield in average years. Such estimates are matters within their every-day experience. The business of their lives is made up of such calculations. Their shrewdness in regard to them is a matter of notoriety. The decision of the punchayet or jury would in fact give that result at which experiments conducted over a series of years would aim. A settlement officer may be deceived in his experiments, for he aims at precision, and people are not interested in helping him; but it seems to the Lieutenant-Governor unreasonable to maintain that, because experiments aiming at scientific accuracy and regarded by those whom they affect with distaste and suspicion, give unsatisfactory results, the opinion of cultivators in the matter of their daily business should not be approximately correct. Facts, in their nature fluctuating and uncertain, are, as all legal and commercial experience goes to show, a proper subject for reference to a punchayet and body of assessors. A similar conclusion is supported by the agricultural practice of other countries. Mr. Rivers Thompson ventures to say

that no intelligent farmer will be found in England, who cannot say, within a narrow margin, what his wheat field, taking one year with another, should yield with ordinarily careful husbandry. The Lieutenant-Governor's experience is that the Bengali or Behari raiyat is no less shrewd in his own way than the English farmer, and in connection with the chapter regarding Tables of Rates, instances of this shrewdness will be given. All that is here contended for is that this shrewdness should be utilized in settlement and enhancement suits as it is in appraisements under section 82 of the Bill. This latter section assumes the very capacity to estimate gross produce which, Mr. Rivers Thompson maintains, is available. It is hardly necessary to add that the method by which the provision might be worked would be simple. A punchayet or jury of arbitrators would be named by both sides, with possibly a revenue officer as foreman, and their opinion would be practically correct, as it would be undoubtedly satisfactory.

Finally there is the last objection that the limit, though fair for particular localities and particular crops, might not be so for other localities and other crops. As far as the Lieutenant-Governor can see, the limit will allow ample room for enhancement for generations in Bengal, while, if it be effective at an earlier period in Behar, the universal opinion of impartial observers is that its application will still allow a fair rent to the landlord, while its necessity to check excessive rents in that Province is almost imperative. At all events it is clear that without such an ultimate check serious difficulty will at no distant date arise in Behar. If uncontrolled by any check the principles of this Bill will in time lead to such progressive enhancements of rent that the people must resist or suffer. But the machinery of this Bill they cannot resist. It will be more inexorable than the economic law on which it is based. It is to save them from its rigour; in extreme cases, to allow them, if not to prosper, at all events to live, that the Lieutenant-Governor would impose an ultimate check on rents. Such a check will be the saving of a Province, which, with no light claim to protection, can ask it at the hands of Government.

But apart from the special claims of Behar, and having regard merely to the general aspect of the question, to the small area of waste land in the more settled districts at present, to the growth of population, to the fact that prices of rice have nearly doubled since the beginning of the century,* and to the slow movement of agricultural improvements, the Lieutenant-Governor thinks it most unwise to inculcate the idea that rents may be so largely increased as this Bill seems to contemplate. An enhancement of 12 per cent., or two annas in the rupee, every fifteen years is the utmost that he would encourage landlords to look to by amicable adjustments out of court in any portion of these Provinces. It will be too much in some portions, for it will double rents in ninety years. Therefore the Lieutenant-Governor is very strongly of the opinion that enhancement of rents by registered contract should not exceed two annas in the rupee, and that the term of such enhancement should in all cases be 15 years at least. In Behar he would gladly make it 30 years.

* See Mr. Finucane's report on tables of rates in Jessore. Bengal Report on the Tenancy Bill, 1883, page 590.

51. Reduction of rent.—To the 51st section† of the Bill the Lieutenant-Governor has three objections—*First*, the words "like calamity" unduly limit the application of clause (*a*); *second*, the section makes no provision for the exhaustion or failure of landlords' improvements on the supposed permanency or efficiency of which enhancements may have been decreed; *thirdly*, it takes no account of rents which may be in excess of the rate established under Chapter XI of the Bill if that chapter be maintained. In regard to the first point, there is a general agreement among the officers who have noticed it, that the expression "like calamity" would be strictly construed by the courts.

† An occupancy raiyat holding at a money rent may, notwithstanding any contract to the contrary, institute a suit for the reduction of his rent on the following grounds, and, except as hereinafter provided in the case of a diminution of the area of the holding, not otherwise, namely—

(*a*) on the ground that the soil of the holding has, without the fault of the raiyat, become permanently deteriorated by a deposit of sand or other like calamity; or

(*b*) on the ground that there has been a fall in the average prices of staple food-crops in the locality or at the usual markets.

2. In any suit instituted under this section the Court may direct such reduction of the rent as it thinks fair and equitable.

A strict construction of the phrase could not fail to be mischievous, for soil deteriorates and becomes incapable of paying rent from many other causes than those resembling a deposit of sand. The Subordinate Judge of Burdwan would retain the present law, by which a raiyat is entitled to claim a reduction in his rent if the productive powers of the land are diminished by any cause beyond his control, and it seems only reasonable that if the land, owing to a specific cause, is obviously incapable of yielding less than when the rent was fixed, a less rent should be declared payable.

The second objection has been brought to notice by the Patna Conference, and their argument has been enforced by an example which, though not fully illustrative of the dangers involved, is yet a lesson and a warning. The equity of the view taken by the Patna Conference seems to the Lieutenant-Governor to need no support here, and he therefore recommends that the section be expanded so as to provide for reduction of rents where an improvement on the basis of which enhanced rents have been decreed ceases, by the neglect of the landlord or from natural causes, to effect the object for which it was designed.

The third point would be only a practical question, if the Lieutenant-Governor's proposal to retain the Tables of Rates' Chapter in an altered form be approved. Rates framed under that procedure would be binding on the area operated upon, and as rates below the approved rate would be enhanceable up to it, it would of course, in justice, follow that rates above that level would be reduceable.

52. Commutation.—As the system of rents in kind holds in South Behar a more prominent position than in any other portions of these Provinces, the Patna Conference have properly paid special attention to the question. The solution they offer, however, appears to the Lieutenant-Governor to be the least satisfactory portion of what is undoubtedly a most able Report. The Conference think that, while in such districts as Shahabad where people wish to commute, their wishes should not be impeded, in other districts, where such a wish is not manifest, commutation should not be countenanced. But who is to be the interpreter of the people's wishes in this matter? The people themselves, or the District Collector? And if the Collector, is no account to be taken of his predelections on a question which divides men into hostile camps? The section gives the right to apply for commutation equally to landlord and tenant. Obviously the parties interested should make their own choice, and the Bill rightly enables them to do this.

Then as to the process of commutation, the Lieutenant-Governor finds a proposal, supported by the high authority of Messrs. Dampier and Reynolds, that the commuted rent should not exceed the rent of the road cess *jummabundi*, plus what rise in price might have occurred since the road cess assessments were last made. Barring the objection that it makes no allowance for costs of production, the proposal has an attractive air. These papers are now admissible in evidence against the landlords, and the Lieutenant-Governor sees no reason why they should not continue to be so, or why, if the raiyat wishes to abide by them, he should not be permitted to do so.

The last remark the Lieutenant-Governor would make on this subject is to express general approval of the proposal to add, after sub-clause (*b*) of clause 4, the provisions quoted in the margin, which are adapted from those made by the Patna Conference.

"Or during any shorter period for which returns may be available with such reduction as may seem reasonable in consideration of the tenants taking the whole risk of cultivation.

"(*c*.)—The expenditure of the landlord on water-rates or on the maintenance of village channels, under the system of rent in kind; and the arrangements made on commutation for continuing those charges."

CHAPTER VI.

53. The non-occupancy raiyat. The existing law.—I am now to pass on to Chapter VI—the non-occupancy raiyat—a chapter second in importance only to that which has been disposed of. The status of

the non-occupancy raiyat as ultimately defined by the Bill will, in the Lieutenant-Governor's opinion, largely affect the character of the measure, and he therefore deems it necessary to dwell upon the subject at some length. Under the existing law of landlord and tenant in Bengal, a raiyat not having a right of occupancy cannot, against the will of his landlord, retain possession of his holding. The raiyat may have been 11 years in occupation of the holding; he may have improved it and so raised its letting value; and he may be willing to pay a "fair and equitable" increase of rent. But, as the law at present stands, none of these considerations avail him. If the landlord be so disposed, he may confiscate the raiyat's outlay and deprive him of a possession which, as the statistics presented in the appendix to this letter show, would, in a few months, become a valuable property. This state of the law has, as might be excepted, led to gross abuse, especially in Behar, where it has been madeuseof to prevent the accrual of occupancy rights, and, owing to the ignorance of the people, to destroy rights which had actually accrued. The papers forwarded to the Government of India in connection with the "no rent" agitation in Mymensingh show that a similar and equally objectionable practice has long prevailed in that district, and the reports now submitted exhibit a most authoritative expression of opinion, judicial as well as executive, in favour of improving the *status* of the non-occupancy raiyat.

54. Previous proposals to improve the condition of non-occupancy raiyats.—This question of the non-occupancy raiyat's *status* was considered by the Rent Commission, who, by way of amending it, proposed that while landlords should be allowed to deal at discretion with raiyats of not longer than three years' standing, restrictions should be imposed on their power to eject all others. The restrictions imposed were the payment to the raiyat of a sum equal to a year's increased rent as compensation for disturbance, in addition to compensation for the improvements which he might have made in his holding. These provisions of compensation for improvement and disturbance were not reproduced in Sir Ashley Eden's Bill, which left the landlord unfettered in his dealings with non-occupancy raiyats in all respects except one. This was the limitation of the rent of the non-occupancy raiyat by a gross produce limit.

The Bill, as subsequently introduced into the Legislative Council, was in the nature of a reversion to the Rent Commission's proposals, with provisions for fixing a fair rent superadded. It was also stipulated that if the landlord refused to allow the raiyat to sit at the fair rent so fixed, the latter became entitled, on ejectment, to ten times the yearly increase of rent demanded as compensation for disturbance. Thus the pendulum had swung back beyond the point it had reached in the Commission's Bill, and perhaps it is only natural to find that it is not yet in equilibrium. In other words, the proposals of the original Bill have, in their turn, undergone a radical change at the hands of the Select Committee, the result being that the non-occupancy raiyat chapter, as it now stands, scarcely satisfies any one.

55. Local opinion on the subject.—The papers now submitted must, the Lieutenant-Governor believes, convince the Government of India of the absolute necessity of some improvement being effected in the *status* of the non-occupancy raiyat. These papers exhibit a preponderance of opinion—not of theorists but of practical men—in favour of recognizing *equality between occupancy and non-occupancy rates of rent*. That opinion has history, past and contemporaneous, in its favour, while the denial to the non-occupancy raiyat of customary rates will, if not compensated for in other ways, infallibly lead to far-reaching mischief. The Lieutenant-Governor holds it established that while pergunnah rates existed, no raiyat, be he *khudkast* or *paikast*, paid more than the current *nirik*, while it is manifest from these papers *passim* that, where raiyats are strong, non-occupancy raiyats even now not only pay no higher rates, but generally lower rates than occupancy raiyats do. It is therefore claimed that the recognition in the law of the principle of equality of rates is only an adherence to ancient custom and a perpetuation of existing facts. With this line of argument the Lieutenant-Governor is in entire sympathy. It was the

view he advocated in my letter of 27th September. It must be allowed, however, that it was easier to demonstrate the justice of the principle than to give it practical effect; and it must be admitted that this difficulty has not been abated by the reports now under notice, which, though abounding in evidence of the strong feeling entertained in favour of equality of rates, are deficient in practical suggestions to that end. One proposal would prevent the landlord from imposing on a new tenant more than 25 per cent. above the outgoing tenant's rent, herein forgetting that we have, in Bengal, no official records of holdings such as the putwaries in other parts of India maintain, and therefore no means of knowing what the out-going tenant's rent was. Besides, it must not be forgotten that as the new tenant would have no fixity of tenure, his rent would in turn merely form the base for a fresh advance. Another (more specious) proposal limits the non-occupancy raiyat's rent to the highest occupancy rate payable for similar land in the village. This proposal, besides being open to the objection just noticed, also assumes the existence of a prevailing rate which is non-existent; while if the highest rent payable by *any* occupancy raiyat be made the standard, an obvious door is thereby opened to injustice. Besides, the ordinary case of lump rents, that is, where there is no rate per bigha specified, would obscure or defeat the operation of the proposal. Finally, the effect of *salamis* or fines on entry has not been fully regarded, nor the consideration—in itself most important—that especially in a Province where there is no record of agricultural relations to which in disputed cases appeal might be made, an arrangement suggesting antagonism between landlord and raiyat in the early stages of their connection is to be strongly deprecated.

56. Present proposals. Freedom of contract.—On a full review of the question in its various connections, the Lieutenant-Governor is bound to confess that he sees nothing for it but to abandon all attempts at interfering with the *initial* rent at which land is to be left to non-occupancy raiyats, unless under the circumstances to which reference will be made under the chapters dealing with settlements and the preparation of Table of Rates. He also fears that if we cannot directly regulate the initial rent, neither can we directly control its increments. It is not an unusual practice to maintain on the rent-roll rates which are never collected, and a 2-anna increment to such an unrealizable rate would practically have the same effect as one of 8 annas or of any other figure. If, then, no generally applicable limitation is admissible on the landlord's discretion in re-letting lands (unless the extreme one-fith produce limit), is there to be no provision embodied in this Bill in the interest of the non-occupancy raiyat? A lease affords slight security, while such a lease as that contemplated in sections 58 (*c*) and 60 (7) would, by common consent, be injurious. It would tend to prevent the raiyat from acquiring the occupancy status. As Mr. Shore says: "To require that pottahs should be given for a definite time * * * would diminish the force of that prescription which established a right of occupancy in favour of the raiyats." The lease therefore will not do, while the idea of equalizing occupancy and non-occupancy rents by direct provisions is unworkable, unless by the procedure of Tables of Rates to which in its present form so great exception has been taken. Nothirg remains but a choice between abandoning what is by an overwhelming weight of evidence one of the chief objects to be aimed at in this measure, namely, improving the condition of the non-occupancy raiyat, *or having recourse to compensation for disturbance*, as recommended by the Patna Conference. There can, in Mr. Rivers Thompson's judgment, be no hesitation in choosing the latter alternative.

Minute of 18th June 1789, paragraph 432.

57. Compensation for disturbance. Fair Rent.—Then, as to the method of giving effect to compensation for disturbance, there can, in the Lieutenant-Governor's opinion, be as little doubt. The method was suggested in paragraph 24 of my letter of 27th September 1883, the words of which I am here to reproduce:—"As a landlord cannot eject a non-occupancy raiyat except in execution of decree, let the courts in ejectment suits have jurisdiction to fix a fair rent at which it shall be optional with the landlord to let the raiyat sit or not. If the landlord consents to the raiyat sitting at that

rent, and the raiyat agree, no difficulty arises. If the landlord abides by the court's orders and the raiyat demurs, let the raiyat be ejected without compensation. If the landlord refuses to let the willing raiyat sit at the rent declared fair by the court, then make the landlord pay the raiyat compensation for disturbance." To this the Lieutenant-Governor would now add that he thinks the compensation should be graduated according to the length of the raiyat's occupation. Three years' purchase of the "fair" rental might be fixed as the maximum compensation. Up to that limit one-fourth of the judicial rental might be awarded for each year of occupancy, unless in the judgment of the court a less compensation would meet the equity of the case. Looking to the average value of the occupancy right as shown in the statements exhibited in the Appendix, and having regard to the fact that in some portions of the Province valuable customary rights, possibly survivals of the pre-settlement tenant-right, are acquired by less than twelve years' occupancy,* one-fourth of the fair rental of the holding for each year of the tenancy up to a maximum of three times such rental does not seem an immoderate compensation to award to a raiyat who has possibly improved his holding, who is willing to pay a fair increase of rent, and who may be within a few months of acquiring the settled *status*.

* See the reports of the Subordinate Judges of Rungpore and Khulna, and of the Munsifs of Burisal and Atteah.

Finally, the Lieutenant-Governor would observe regarding the determination of "fair" rents, that as the courts should, in his opinion, under this chapter as under the last, be bound to have regard to a rise in price as the main factor in the question, the Lieutenant-Governor would desire no limit in the rents they might fix. They would fix a "fair and equitable" rate having regard to all the circumstances of the case, the capacity of the land and the condition of the raiyat. They should in this case, as in the case of the occupancy raiyat, fix such a rent as a solvent tenant can pay and yet prosper.

58. General remarks in support of preceding proposals.—In renewing this proposal of compensation for disturbance, the Lieutenant-Governor clearly sees that it may not do all that we want or wish. It will, it is true, protect raiyat A from having the initial competitive rent at which he was admitted in 1885 unduly raised against him in 1890, when the demand for land has increased. But it will not save raiyat B from admission in 1890 at a higher rent than was demanded from A in 1885, and so on—competitive rents continually spreading and rising, and the stock of land available for cultivation by occupancy raiyats being continually reduced. These are defects in the plan to which Mr. Rivers Thompson is alive; but, apart from a general system of Tables of Rates, they are not preventible. Under the settlement and Tables of Rates' Chapters, I am to make some further proposals in the interest of the non-occupancy raiyat; here I am to say that, though the Lieutenant-Governor's proposals are not a solution of all the non-occupany raiyat's difficulties, they will afford him undoubted relief. There is the hope that a strong occupancy title and customary rents preserved by the settled raiyat clause, and by the abolition of the "prevailing rate" ground of enhancement, may have some equalizing and moderating effect on non-occupancy rents.

The Lieutenant-Governor anticipates opposition to his proposals from those who fancy that to call any legislation novel is to condemn it, from those who would allow the landlord "at any rate to make what he can out of the non-occupancy raiyat," or from those who think efforts to retard the action of competition on land a futile strife with natural laws. On the last point, the Lieutenant-Governor would say that to talk of the action of Government in discouraging competition for land, as a setting aside of the laws of political economy, is, to use the words of Professor Cairnes on a similar subject, "just as reasonable as to talk of precautions against a hurricane or a high tide being a setting aside of the laws of physical nature." On the other points, the Lieutenant-Governor does not think the spirit of the objectors a proper one in which to approach this great subject. We must adapt our laws to the progress of the times; and if we fail to find a precedent for our proposals in the old laws of the country, we are still justified in making them if they suit the requirements

of the time and are not repugnant to popular feeling and belief. The objects which the Lieutenant-Governor has now in view are in harmony with the feelings of the vast mass of the inhabitants of these Provinces. These papers afford ample evidence of what was already a well-known fact, that capricious evictions of industrious tenants are looked on as acts of injustice and oppression. It is very true that all landlords do not evict. As a body, Bengal proprietors are not open to this reproach. In Bengal it is mainly the subordinate landlords, the middlemen, who evict or threaten to evict that they may rack-rent. To the larger body of zemindars in Bengal, then, if the past be an index to their future conduct, the Lieutenant-Governor's proposals will have but little application. It is different with regard to middlemen everywhere, and to some zemindars, mostly newly-enriched persons in Behar. It is their conduct which justifies the precautionary legislation on the point which the Lieutenant-Governor deems essential to the success of this measure.

Such, then, are the Lieutenant-Governor's proposals on this much debated question of the non-occupancy raiyat. They are, it will be observed, in the nature of a compromise between conflicting views, and they have not now been urged by this Government for the first time. They give to the landlords most of what they want in the shape of freedom of contract; they give to the raiyat something of what he is entitled to demand in the shape of protection against the abuse of that freedom. To say that such protection should not be afforded is to maintain that freedom shall be permitted to degenerate into license. As the Munsif of Baraset says, "it is surely no hardship on the zemindars if, while the rent of 90 per cent. of their raiyats is changed from an almost practically fixed to an easily enhanceable one, the rent of the remaining 10 per cent. be to some extent protected."

Finally, it will not be lost sight of that the acceptance of the Lieutenant-Governor's recommendations regarding the abolition of the "prevailing rate" as a ground of enhancement is an essential portion of his recommendations under this chapter. Both recommendations form parts of a connected whole, and should be accepted as a whole. In presence of the evidence now accumulated on the point, it is only on the principle of such a protection of the non-occupancy raiyat's position that Mr. Rivers Thompson could consent to the wide freedom of contract between the landlord and the non-occupancy raiyat, which he is prepared to accept. Even if the views now stated on the subject of enhancement of occupancy rents, and on the status of the non-occupancy raiyat, were not broadly based on justice and fair play, the Lieutenant-Governor thinks they might well claim some support from the concessions made to the zemindars on the subject of transferability, the 20 years' presumption, freedom of contract in respect to initial rents, the proposals he will make in regard to distraint, and other minor points.

59. Bastu lands. Existing law.—The preceding chapters of the Bill have been concerned with the raiyat's *status*; and as the tenure of homestead or *bastu* land is essentially connected with that *status*, the Lieutenant-Governor will introduce here the observations he has to offer on the *bastu* question.

The law regarding bastu in Bengal seems to be at present in an uncertain state, and legislation on the question is very desirable. It is, the Lieutenant-Governor understands, the law in Bengal that if a raiyat has an existing or inchoate occupancy right in a holding and erects a house upon it, he will hold the bastu by the same tenure as the holding. The *bastu* portion is not separable from the rest of the holding. It is also liable to enhancement of rent in the same way as the arable land.

The question, however, is not so clear where the *bastu* is held separately from the arable land, a circumstance of frequent occurrence, especially when, on partition of an estate, the raiyat's arable land falls to one shareholder and the *bastu* to another. In this case doubt seems to exist as to the *status* of the raiyat in regard to the *bastu*, and as to the procedure applicable to him. Does his *status* depend on the Rent Law and the consequent procedure, or does it depend on contract or custom enforceable by the procedure of the Courts of Small Causes?

In the paper contributed by the Munsif of Serajgunge, the various conflicting rulings on the point are brought together, and a reference to them is requested. The Lieutenant-Governor, however, does not entirely subscribe to the statement of the law as given by the Munsif, because some of the propositions laid down by him as to the effect of the decisions appear to be too broad. For instance, Mr. Rivers Thompson conceives that it is too wide a statement of the law to make that if a piece of land is given to a raiyat for the purpose of building a dwelling-house on it, the raiyat thereby acquires a permanent title. It seems clear, however, that judicial views upon the *bastu* question vary considerably. Apart from minor instances, this may be gathered from the apparent contradiction which exists between the important case reported at page 696, Indian Law Reports, 3 Cal., and the no less important one reported at page 960 in Vol. 8 of the same series. The law is thus uncertain; but the courts at present would seem desirous of giving weight to any circumstance from which they can reasonably presume an intention in the grantor to make a permanent grant. All this shows the unsatisfactory state of the law and the necessity that exists for a settled definition.

60. History of the question.—It will be in the remembrance of the Government of India that the Rent Law Commission's Bill dealt with *bastu*, or land used for building purposes, from two points of view. Regarding such land, in the first place, as an integral portion of an occupancy holding, and not distinguishing it from the arable land, their Bill provided for the erection, without the landlord's consent, of a brick-built dwelling-house and out-offices suitable for the raiyat and his family. Next, the Commission's Bill regarded the *bastu* as apart from the agricultural land of the village, and conferred a right of occupancy in such land if held for 12 years. Thus, in the former case, the occupancy raiyat's title in the *bastu* was merged in, and became inseparable from, his right in the entire holding, while in the latter case the capacity of the tenant to acquire by 12 years' possession a right of occupancy in the *bastu* as apart from his arable holding was recognized. These proposals were adopted in Sir Ashley Eden's Bill, and they were, as far as Mr. Rivers Thompson understands, followed in the Bill as originally introduced into Council in March 1883, with only such modifications as the conception of the "settled" raiyat necessitated.

61. Proposals of the Bill.—In the Bill now under notice, however, the provisious regarding bastu (section 216*) present a much less satisfactory aspect. Where the homestead is an integral portion of the holding, and held on the same occupancy title, there no doubt section 216, when read with sections 31 (*b*) and 87 (*f*), are no less protective of the raiyats' interests than the provisions of the former Bills. It might, indeed, be urged that the raiyat has less security against enhancement on homestead lands than could be wished; but looking to fixity of tenure alone, the protection given him would ordinarily be sufficient. When, however, the *bastu* is not comprised in the holding—a case which frequently occurs—then this Bill, by making no provision for the accrual of an occupancy title by prescription, does, compared with the other Bills, place the raiyat at a distinct disadvantage. On this point the present Bill fails to settle the law in accordance with the requirements of the country.

* When a raiyat holds his homestead otherwise than as a part of his holding as a raiyat, the incidents of his tenure of the homestead shall be regulated by local custom.

In the Lieutenant-Governor's opinion, custom alone cannot rule these cases where the bastu is not a portion of the arable holding. The reports now submitted afford convincing proof of how custom may be eluded or falsified, and of how threats† of eviction from the homestead are made the leverage for forcing up rents. The natural affection with which the people regard their homes compel them to agree to extortionate terms rather than abandon them. In many places this natural affection is recognized so far that a raiyat who loses his holding is permitted by the purchaser to retain the bastu subject to rent. That

† On this point reference is requested to paragraph 29 of Mr. Reily, the Chanchal Manager's Report, where the *modus operandi* in screwing up rents is given. Attention is also invited to paragraph 70 of the Report of the Patna Conference, as to the effect of a mere threat to enhance *bastu* rents in the Durbhunga estates.

custom speaks well for the mutual sympathy and forbearance of the people, and compares favourably with the state of the law which permits the instincts and affections of the raiyat to be misused to his detriment. If a landlord have a claim to enhance the rent of arable or bastu land, let him openly assert and vindicate it; but it will not do to let the devotion which every man feels for his fireside be played upon, as those papers show it has been, the raiyat's loss and to the landlord's illicit gain.

62. The Lieutenant-Governor's recommendations.—On a review of the facts, then, the Lieutenant-Governor would, in the interest of all parties, provide in the Bill as follows:—

(*a*).—When the bastu forms part of an occupancy holding, it shall be held as an integral portion of, and on the same terms as, the holding.

(*b*).—If the arable portion of the holding be surrendered with the landlord's consent, the occupancy right to survive in the bastu. (This to provide for the case of females, minors, &c., who are unable to cultivate, but wish to retain their homestead).

(*c*).—When bastu is held as portion of a non-occupancy holding, the occupancy title shall accrue in bastu under Chapter VI of the Bill as in the rest of the holding.

(*d*).—When bastu is held by a raiyat otherwise than as portion of an agricultural holding, an occupancy right in such bastu shall accrue to him as under clause (*c*); provided that where custom gives a stronger right or earlier fixity of tenure, custom shall govern the raiyat's interest in the bastu.

(*e*).—If by the established custom of the village no rent be payable for bastu, no rent shall be leviable under the Bill. If by village custom rent be payable, the rent shall be the established village rate for similar land used for similar purposes. If there be no established village rate for bastu land, the initial rent shall be fixed by agreement between the landlord and tenant.

(*f*).—If bastu rents be, by established village custom, not liable for enhancement, no enhancement shall be claimable under this Bill. If there be no such established custom, the rent of bastu land shall be enhanceable, as in the case of arable lands, in accordance with the provisions of the Bill.

The Government of India will observe in the papers a considerable body of opinion in favour of the view that the raiyat should be allowed a stronger right in his *bastu* than the Lieutenant-Governor has recommended. Thus the Dacca Conference would give a right of occupancy after three years' residence, while the Patna Conference would give every raiyat a right of occupancy at once in his *bastu*. The Lieutenant-Governor would not object to the Dacca proposal if it commended itself to the Government of India; but he regards the proposals he has now made as the *minimum* security that should be given.

There is also a considerable body of support accorded in the papers to the view either that *bastu* rents should not be enhanceable, or that they should be only enhanceable on the ground of landlords' improvements. The latter view would strongly commend itself to this Government if by *bastu* could be understood the mere site on which the raiyat's house stands. This is often the case, but more frequently the *bastu* includes the plot of land, the kitchen garden so to speak, adjoining the dwelling-house or *bari*. In regard to such plots, the Lieutenant-Governor is not prepared to advocate fixity of rate in addition to fixity of tenure.

CHAPTER VIII.

63. Instalments of rent.—As the question of the 20 years' presumption has been already discussed in paragraph 16 above, it is unnecessary to refer to the

matter here further than to say with reference to clause 3, section 64, that the Lieutenant-Governor, having regard to the rise and fall in prices, does not think a fixed proportion of the crop can be considered as equivalent to a fixed money rent or rate of money rent. The other points raised in the reports under this chapter may be dismissed with a brief notice.

The Collector of Midnapore, both in the Report of the Burdwan Conference and in the Note he has submitted to Government, raises the question whether it is desirable to legislate on the matter of instalments of rent at all. What Mr. Wilson says is substantially this—by fixing instalments of rent you break through old customs, and if you prevent harassment in some cases, you may prevent the exercise of indulgence in others. On the whole, you may not benefit the raiyats. On the other hand, it is to be observed the Bhaugulpore Conference regard section 67 as a most salutary provision calculated to keep the raiyat out of the money-lender's hands. In both views there is a large amount of reason, for certainly there is some danger in breaking in on old established custom, while there is good to be looked for in making the landlord's demand coincident with the raiyat's possession of money after each harvest. The problem is to avoid the danger while not forfeiting the good; and a way of solving that problem is suggested to the Lieutenant-Governor by the practice regarding the instalments of revenue. According to this, power should be taken in the Bill, not to fix instalments of rent, but to fix the dates when rent becomes realizable by suit. We shall thus prevent the harassment of monthly suits to which raiyats are now exposed; we shall not break abruptly with the past; and we shall leave the raiyats the choice of following the old custom or adopting the new. As few men pay their debts before they can help it, in a short time, the Lieutenant-Governor apprehends payments at the fixed dates will have superseded the present practice of monthly kists, which, moreover, is by no means an universal practice. Later on, I am to express the Lieutenant-Governor's cencurrence in the High Court's view that one of the most efficient means of facilitating the disposal of rent-suits is to strengthen the Courts that try them. The proposal now made would aid the Government in strengthening rent courts, as it would indicate the precise time when re-inforcements would be necessary, and when they might be withdrawn. It might also be found possible to re-adjust the land revenue kists in accordance with rent kists, whenever a necessity for such re-adjustment became apparent. Finally, with regard to section 69, the Lieutenant-Governor would say that while the first clause of the section is unfair to the landlord, the second may tell hardly on the raiyat. To obviate both objections, Mr. Rivers Thompson would provide that the payment should be credited to the oldest arrear not barred by limitation. He thus would not give the raiyat an option which in point of fact he never exercises.

64. Receipts and accounts.—The Judge of Shahabad suggests in connection with section 70 that, if books of receipt and account forms—foil and counterfoil—were kept on sale at munsifis, and all rent-receivers compelled to use them, much benefit would result. The Lieutenant-Governor quite agrees that much benefit would result, both in the way of preventing disputes and facilitating the disposal of them by the courts should they occur. He also sees no practical difficulty in giving effect to Mr. Tweedie's proposal. As long, however, as a landlord complies with the provisions of the law in regard to the form of the receipt, it would be an unusual stretch of legislative power to compel him to buy his zemindari stationery at a public office. The Lieutenant-Governor does not see his way to compel him to do this by any distinct injunction, but he believes the end may be secured if courts continue to attach greater credence to systematic accounts (which negative the presumption of easy falsification) than to accounts which do not negative the presumption. The Lieutenant-Governor also thinks that Mr. Tweedie's laudable object would be furthered by the omission of the word "substantially" from section 70 (4).* There is a clear necessity that no deviation should be allowed from the form of receipt prescribed by Government. I am to

* 4.—If a receipt does not contain *substantially* the particulars required by this section, it shall be presumed, until the contrary is shown, to be an acquittance in full of all demands for rent up to the rate on which the receipt was given.

attach to this Report an improved form of receipt, which seems to the Lieutenant-Governor to provide all the details that need be specified, and to be suitable to all portions of these Provinces. Exhibiting the particulars of the holding on its face and of payments on its reverse side, it may be used for a single payment or for several. If the raiyat could be brought to have the various payments entered up as they are from time to time made on one receipt, the necessity for statements of account would be diminished and the proceedings of the courts in cases of disputes would be simplified. Adherence to the form of receipt now recommended should be declared compulsory, a very large portion of the raiyats' difficulties being connected with receipts. He often either gets none at all, or a defective and obscure one. The trouble incurred in framing a proper form of receipt and enacting appropriate provisions to give effect to that form will have been wasted if every rent-receiver is to exercise his judgment as to what "substantially" conforms to the provisions of the Bill. There will be universal laxity which in time the courts will come to regard with leniency. Therefore the Lieutenant-Governor would strongly urge that the word "substantially" be removed from the section. If receivers have to give a receipt in the precise form they find in the law, it will probably come to pass that they will take to ready-made cheap-bound books. Should such a tendency become general, the Lieutenant-Governor would be ready to act on Mr. Tweedie's suggestion, and meet the demand in the way proposed.

65. Deposit of rent.—The chief objection made under this head is that the provisions of section 73 (*b*)* will practically free the tenant from the liability of paying rent at his landlord's cutcherry, and there appears to be some reason in the objection. The Lieutenant-Governor therefore regards with favour the Legal Remembrancer's suggestion that the privilege conferred by the words "has reason to believe" should be enjoyed only by a tenant from whom, on a former occasion, the landlord had refused to receive rent, or who had been denied a receipt. Mr. Garret says that such a modification would bring the clause within the ordinary law of tender. At all events the proposal seems a reasonable one, and has the Lieutenant-Governor's support.

* When a tenant bound to pay money on account of rent *has reason to believe*, owing to a dispute or ill-feeling, the person to whom his rent is payable will not be willing to receive it and grant a receipt for it.

66. Notification of receipt of deposit.—Attention is called by Mr. Dampier and Mr. Beames to the difficulty of complying with section 75 (notification of receipt of deposit to all parties interested). The Collector, says Mr. Beames, has no means of knowing the persons on whom he is to serve the notice; while, says Mr. Dampier, if a notification is stuck up in the Collector's office at other seasons than kist time, the parties interested will probably learn nothing of its contents. Mr. Beames' objection is a substantial one; but it will be met by adhering to the provision of the existing law [section 47, Act VIII (B.C.) of 1869], from which, indeed, there seems no reason to depart. Let the Collector serve notice on the parties in whose favour the deposit is made, and the difficulty is removed. Mr. Dampier's difficulty does not seem to the Lieutenant-Governor to make any alteration in the Bill necessary.

Proposals regarding pasturage, fisheries, and forest rights.—In paragraph 12 of this Report reference was made to the emendation which the Presidency Conference proposed to introduce into the definition of "raiyat" with the object of making it clear that "thatching grass" lands (*kharour*) are subject to the ordinary provisions of the Bill. As section 227 now stands, the provisions of the Act are applicable "as far as may be" only to *the recovery of arrears of rent* for pasturage, forest rights, rights over fisheries, and the like. That is to say, the Act applies to those matters only in a limited degree. Questions connected with enhancement of rent, reduction of rent, acquisition of status, &c., are altogether unprovided for. This, it seems to the Lieutenant-Governor, is not desirable. *Phulkur, bunkur, and julkur*, or forest rights, pasturage, and fisheries are now, and ever have been, dealt with as on the same footing as agricultural holdings. They are in the Select Committee's form of rent receipt and account considered as incidents of the holding. It seems

therefore that they should be dealt with in a fuller measure than in section 227, and in this view the Lieutenant-Governor proposes that the provision in this head should be inserted in Chapter VIII after produce rents, and that the full provisions of the Bill should be extended to such incidental tenancies "as far as may be."

On the remainder of this chapter the criticisms made touch no question of principle, but the Lieutenant-Governor desires to notice with approval the unanimous suggestion of the Patna Conference that the words "from the threshing floor" be inserted after "produce" in clause 3, section 83, and that the words "appraisement or" be omitted from the same clause.

CHAPTER IX.

67. Improvements.—This chapter has met with wide approval, although there are officers who think that it is unnecessary. As people, they say, have not improved the land in the past, neither will they in the future, while if you allow the raiyat to improve you break the bond which should bind him in dependence on the zemindar. On both points the Lieutenant-Governor differs. There has been a good deal in the way of improvement done by the raiyats in the past, and the future is one of promise. The other objection is not intelligible to the Lieutenant-Governor, unless, indeed, on the inadmissible assumption that an union between landlord and tenant cemented by poverty is preferable, in the public interest, to one founded upon mutual benefit.

The only points of importance raised on the first section of the chapter are—should landlords have, in the case of occupancy holdings, a prior right to improve, and should a non-occupancy raiyat be allowed to dig a well without his landlord's consent? The Lieutenant-Governor agrees with those who, in accordance with the Bill as it stands, support the occupancy raiyat's prior right on the first point, and on the latter point he concurs with those who are in favour of the wider liberty proposed for the non-occupancy raiyat. Mr. Rivers Thompson quite agrees in the view of the Patna Conference, that in these Provinces it is ordinarily the substantial raiyat who improves, not the landlord; and he considers it so desirable from the standpoint of general policy to encourage irrigation in the dryer parts of the Province, that no discouragement ought to be shown the raiyat in providing means to that end. In the opinion of the Patna Conference, every raiyat should have the right of building himself a well, and in this view the Lieutenant-Governor concurs, for it strikes him as peculiarly illogical and unreasonable to tie the raiyat's hands in his fight with famine, while we watch every change in the monsoon rains with undisguised anxiety. If the landlord has to pay compensation to an evicted raiyat, who has built a well, and so far insured his holding against drought, surely the landlord has his money's worth in the increased letting value of the land. There is a public gain, and there is no private loss. It is a fact that over large areas in these Provinces, dependent on artificial irrigation for a full crop, a remarkable decline in the number of improvements has taken place in recent times, except where the landlords have been driven by the baoli or metayer system to improve in self-defence. This fact the Lieutenant-Governor attributes to insecurity of title and liability to enhancement which prevails. The reclaiming cultivators of earlier times, who cleared the country from jungle and built the reservoirs and embankments which rendered cultivation possible, have been superseded by farmers holding under short leases whose interests are so little bound up with the land or the people that they do not even find it worth their while to maintain the works which they found in existence. The more secure the raiyat's title the greater his improvements. The free-holding brahmaturdars are the most improving cultivators.

68. Acquisition of irrigation channels for landlords.—Among the points on which the Government of India desire the opinion of this Government is "whether, with reference to landlords' improvements, it is desirable

to empower revenue officers to arrange for the cutting of irrigation channels, the distribution of water, and the payment of compensation; and if so, what form such provisions should take." The questions thus raised have been noticed more by the Patna than by any other Conference; but, as discussed at Patna even, the issue is not quite that raised by the Government of India. On the whole, the Lieutenant-Governor is clearly of the opinion that itis not desirable to load the Tenancy Bill either with such provisions as those referred to by the Government of India, or yet with the proposals made by Mr. Henry, the Officiating Collector of Chumparun. This, it will be observed, is also the opinion of Messrs. Burrows, Mylne, and Thomson of Behia, whose action regarding the extension of distributary channels, and experience in irrigation matters generally, is by far the most extensive of any landlord in Bengal. The questions raised by the Government of India and the Patna Conference fall more naturally and conveniently within the scope of an Irrigation Act; and as there is some probability of a revision of the irrigation law now in force in Bengal, the Lieutenant-Governor would prefer to postpone the questions for the present. The whole subject is one of extreme difficulty, and should be considered in the light of the experience gained in the Punjab, where, in connection with it, a large body of customary law seems to have spontaneously grown up. Should the Bengal Irrigation Act come under revision, he would be prepared to give to the proposal now made his best consideration.

69. Surrender and abandonment.—On the question of surrender the Legal Remembrancer would not raise any presumption, and the Judge of Shahabad strongly objects to "surrender" being presumed from the fact that the land has been let to another raiyat. Letting land to another raiyat over the head of the actual tenant is, Mr. Tweedie observes, a common method of ouster in his district, and, as is well known, in other districts too. No doubt the presumption raised in clause (*c*)* of section 95 was meant to tell in favour of the raiyat, and not against him. But as some officers fear that it may have the latter effect, the Lieutenant-Governor trusts that the matter will receive further consideration. It is desirable that there should be no room for misapprehension on the point. Finally, after the word "village" in the other clauses, the words "or estate" should be added. This is essential to preserve uniformity with section 26.

* (*c*) If the landlord himself, at any time during the agricultural year next following the surrender, lets to another tenant or cultivates the holding or any part thereof.

Coming now to abandonment, the Lieutenant-Governor must admit that the majority of officers have not taken the same view of the necessity of selling the occupancy right that he himself, Mr. Dampier, and Mr. Reynolds take. There is, however, considerable apprehension expressed as to the effect of the section as it stands on occupancy holdings, and a compromise is suggested in the shape of the submission of a written notice to the Collector for service in the usual way on the alleged absconder before the landlord re-enters. The Lieutenant-Governor would accept the system of notice before re-entry as the minimum security necessary upon the point.

Not to affect third parties.—In connection with the Surrender and Abandonment clauses, the Bill, in the Lieutenant-Governor's opinion, is defective in making no provision for the preservation of registered encumbrances. It is probable, in the Indigo districts, that when the Bill becomes law, indigo-planters will adopt the salutary policy of dealing directly with occupancy raiyats for land more largely than they have hitherto done. That policy would, if fully developed, enable planters to dispense with thikas, and the abolition of the thika system in connection with indigo-planting would no doubt be most beneficial to Behar. It would enable the planter to allow the raiyat a larger share in the profits of the industry than he now can afford to give him. Therefore anything in this Bill tending to impede direct relations between planter and raiyat is objectionable from the raiyat's standpoint, from the planter's standpoint, and from the standpoint of general policy. Some landlords may, no doubt, object to direct dealings between planter and raiyat. They do so now

when direct dealings are in their infancy, the result of many years of up-hill administrative action. They have so long intercepted by means of the thikadari system the profit which should of right go to the raiyat that they will not, without struggle, see the growth of a healthier order of things. No doubt that newer order will be in the end to their own benefit, directly tending as it must to the prosperity of their raiyats, and therefore to the security of their own rents. But all landlords are not far-seeing, and there is every reason to fear they will object to the loss of immediate profit to themselves, which such direct dealings between planter and raiyat import. It is notorious that this feeling on the landlord's part will work injustice to the planter if not provided against. If a planter subleases land from a raiyat, pays him a *bonus* down, and a fair rent, he would find himself, through the raiyat's weakness, or collusion between landlord and raiyat, deprived of his land and his money under the operation of these sections. This position of difficulty has been forcibly brought to notice by a gentleman of very wide planting experience in Behar, and is one which involves a tangible and real danger which should be guarded against. A provision that surrender or abandonment shall not affect registered encumbrances, for due consideration effected, seems all that is required to obviate the danger.

70. Measurements.—There is a general agreement that measurements should be made with the local pole, to be afterwards converted into English measure if necessary, and that, if a landlord wants to measure a rent-free holding within his property, he must content himself with measuring its external boundaries. In both of these views the Lieutenant-Governor concurs, provided that the measurement be made with a chain graduated in accordance with the local standard, and not with a pole, which is very liable to give wrong results. It is desirable that the people interested should be able to follow and verify the measurements. On the second point, it seems clear that any interference on the landlord's part in the internal arrangements of rent-free tenures is undesirable. Such interference is in no way necessary to the vindication of the landlord's rights, and might be perverted to the injury of the rent-free holder. In this connection the Lieutenant-Governor desires to call the attention of the Government of India to the case reported at 1. W. R. Civ. Rul. 124. There it seems decided that a lakhirajdar has the right to gradual accretions to his lakhiraj property, there being nothing in Regulation XI of 1825 to deprive him of such a right. Would that ruling apply to rent-free holdings (which are not always *lakhiraj*), and if so, will not the provisions of the Bill have the effect of modifying the existing law to the rent-free holder's detriment?

Finally, I am to suggest that, with a view to preserve uniformity with the enhancement provisions of the Bill, the term of *ten* years in section 99 (2)* be altered to *fifteen*, and that an additional sub-clause be added to provide for the annual measurements which occur under the *bauli* system.

* A landlord shall not, without the consent of the tenant, or the written permission of the Collector, be entitled to measure land more than once in ten years except in the following cases:—

71. Managers.—Some officers have inveighed against the provisions regarding the appointment of managers as an invasion of the rights of the zemindars; while the Eastern Bengal Landholders' Association say "they will deal a death-blow to the co-parcenary estates of the country." All this is unreasonable, having regard to the fact that the law has been substantially as in this Bill from times anterior to the Permanent Settlement. In the 22nd paragraph of the "Code of Regulations relative to the Decennial Settlement," provision is made for managers in joint-estates. The provision was re-enacted in section 22, Regulation V, 1812, and extended in Regulation V, 1827. It was only by Act XVI, 1874, that the procedure was impaired, and all that is now proposed to do is to give due effect to what has practically been the law of the country from the earliest days of systematized revenue administration. The Maharajah of Durbhunga, in his dissent, objects to the re-enactment of a law which "has solemnly been repealed as obsolete." The reply is a denial of the correctness of the Maharajah's statement. The Act of 1874 repealed the

Colebrooke's Supplement, page 313.

Regulation of 1827, not the Regulation of 1812. The latter is still in force, but in a fragmentary condition; and the proposal is to make it more fully operative in accordance with the requirements of the times. The Maharajah objects also to legislation on this point, because he has not been supplied with information as to the use made of the law in the past. It would have been impossible to meet such an unusual call without an interruption to ordinary work of the Civil Courts and delays to suitors which are not to be lightly incurred. Besides the information would be irrelevant. It must on consideration be obvious to the hon'ble gentleman that the law is likely to be of far more use in the future than in the past. In the absence of anything like a general law of primogeniture in Bengal, interests in landed property are increasingly subdivided. The original settlement-holder of 90 years ago is now represented by many co-sharers. While co-sharers were few, less recourse was doubtless had to this law, but with every year that passes the numbers increase, and consequently the chances of internal disputes.

The Lieutenant-Governor, however, is willing to admit that some limitation may be reasonably imposed on the liberty of co-sharers to put the court in motion. It may not be desirable that every petty sharer should have the power of annoying the great body of proprietors, and therefore he would be willing, if the zemindars wish it, to accept a proposal limiting the court's action under 102 (*b*) to cases in which, say, one-fourth of the interests concerned apply. The substantial provision he regards as a most salutary one.

CHAPTER X.

72. Record of rights and settlement of rents.—This chapter appears to the Burdwan Conference calculated to stir up litigation; but as far as the Lieutenant-Governor can perceive, it has been well received by the great majority of those consulted. For his own part the Lieutenant-Governor agrees with Mr. Dampier, late Senior Member of the Board of Revenue, in thinking it, on the whole, an excellent chapter, and he has no doubt whatever that it will be largely used and prove a boon to zemindars and raiyats alike. An important zemindar on whose estates a "no-rent" cry has recently been raised has already informed the Lieutenant-Governor that he is only awaiting the passing of the Act to move Government to apply the chapter in his property. If the Lieutenant-Governor has defects of principle to notice in the chapter, they consist in its failing to provide as far as may be that during the currency of the settlement no higher rate of rent than that fixed in the settlement proceedings shall be taken from an in-coming raiyat, and in its omission to provide for the settlement of non-occupancy rents. He will take an opportunity in Select Committee to move that the chapter be so amplified as to admit of additions being made with the object just stated.

Presumption as to undisputed entries.—Passing to matters of detail, the only point upon which the Lieutenant-Governor desires to remark here is the provision of section 116 (2)* that undisputed entries shall be presumed correct until the contrary is shown. That provision, if unmodified, will, Mr. Rivers Thompson fears, seriously impair the effect of the chapter. It is eminently desirable that the record should be made binding as early as possible; and although the Lieutenant-Governor quite admits the danger of making entries at once conclusive, which have been recorded *ex parte*, he thinks a date should be fixed after which they should be no longer open to question, provision being made for due service of notice on the parties concerned. If undisputed entries are not to become conclusive in this way, raiyats or landlords or both may keep away, thereby neutralizing the good effects of this chapter. On this point Mr. Dampier makes the suggestion that, if the record be not questioned within six months, it should be declared conclusive, subject, however, to a review of the order or declaration

* 1.—Every record made under this chapter shall distinguish between the disputed and the undisputed entries therein.
2.—Every undisputed entry in the record shall be presumed to be correct until the contrary is proved.

within a reasonable period. The Lieutenant-Governor would be disposed to accept that proposal. His object is to put an end to uncertainty by all means that are consistent with the necessity of letting the parties have ample notice of the facts recorded.

CHAPTER XI.

73. Tables of rates. Reasons for retaining Chapter XI in the Bill.—It has been already suggested that the Lieutenant-Governor, herein agreeing with Mr. Dampier, was personally disinclined to abandon this chapter of the Bill. He recognizes the full force of the fact that it has not been favourably received, and he admits that it would be impracticable to frame Tables of Rates in any district of Bengal or Behar without interference with actual rents. These facts afford in his belief strong reasons against the chapter as a procedure to put in force at the will of the Government; and the Lieutenant-Governor no longer desires that it shall be so enforceable. He thinks, however, that in many cases the chapter would be found a very valuable means of adjusting disputes between landlords and raiyats. It might be argued that all the chapter provides for in the altered garb the Lieutenant-Governor would have it assume, may be done under the provisions for the settlement of rents. The argument, however, is not true. There is a very clear distinction between both procedures, that under Chapter X being far more intricate, tedious, and expensive than that under Chapter XI, and leaving less, too, to the mutual understanding between the landlord and his tenants. If this chapter were modified so as to make its operation independent of Government initiation, it would be free from many of the objections that have been urged against it. The rate officer would, then, without involving the Government in the dispute, have the power of altering existing rates with binding effect on all concerned subject to enforcement on individuals by the Civil Courts. A Table of Rates formed for any particular area would have a tendency to spread, and fair rents, if fixed for one estate, might affect all the neighbourhood. The difficulty in equalizing occupancy and non-occupancy rents would then stand a better chance than now of solution, as I am to point out later on.

The Lieutenant-Governor understands the provisions contained in this chapter to be based upon the practical conclusion, drawn from the litigation of the last twenty years, that the fixing of fair rents is an intricate, economic problem which courts cannot deal with so satisfactorily as Executive Officers can. Still less can a number of courts, dealing with a number of individual cases, and unable in each case to travel beyond the evidence actually brought forward, be expected to solve that problem. This much every one who has had experience of enhancement suits under Act X of 1859 or Act VIII (B.C.) of 1869 will readily admit. It is, however, thought that this chapter is unworkable unless the fullest power be accorded the Rate officer to alter existing rents, raising those that are low, and lowering those that are high, and adapting the rates to the capacity of the raiyats individually, and as a body, to pay. No doubt if the chapter is to be workable, such powers must be taken, and there is as little doubt that zemindars are unwilling to confer on the Government such a wide discretion to interfere. Still the Lieutenant-Governor considers that instances may well occur in which zemindars would be glad to anticipate the necessity for action under Chapter X by invoking the good offices of Government with the object which this chapter has in view. Three notable instances of such invocation of Government aid have recently occurred. One of these will be found in Mr. Oldham's minute of dissent to the Report of the Rajshahye Conference. The particulars of the other two I am here to state for the information of the Government of India. They will illustrate both the way in which this chapter would be put in operation, and the excellent effects which it might produce. The operations in both cases were conducted by Mr. H. H. Risley, C.S., late Officiating Deputy Commissioner of Manbhoom, an officer in whose accuracy of observation and precision of statement the Lieutenant-Governor places trust.

Practical instances.—

"In May 1880," writes Mr. Risley, "when I was Sub-divisional Officer of Gobindpore in Manbhoom, a number of Sonthal raiyats of the Tundi estate came to me and asked me to settle a rent-dispute between them and their zemindar by measuring their villages and fixing fair rents. On enquiry it appeared that the dispute was of more than 20 years' standing; that it had led to numerous riots and several attempts at murder; and that a provisional settlement made on the spot in 1871 by Colonel Dalton, the Commissioner of Chota Nagpore, was about to expire. The villages concerned, 52 in number, scattered over an estate of 150 square miles, had never been measured; rent was assessed on a peculiar unit of area—the amount of land supposed to be capable of taking a maund of seed,—and most extensive and indefinite claims were put forward by the raiyats to hold land at privileged rates as the descendants of the first clearers. The zemindar was anxious to have the question finally settled, and expressed his readiness to agree to any reasonable proposals.

"After certain preliminary enquiries and experimental measurements (conducted with the assistance of assessors), in the course of which the raiyats took fright and addressed a petition direct to Government, the following table-of-rates was drawn up and accepted by the raiyats in conference with the Commissioner of the Division:—

	R	a.	p.	
"First class rice land	2	0	0	per standard bigha.
"Second ditto	1	8	0	ditto.
"Third ditto	1	0	0	ditto.

"High lands to be left unassessed during the currency of the settlement; *khundit*, or reclaimed land, to pay half-rates.

"If these rates resulted in raising the jumma of any village more than 100 per cent., then an all-round rate of 12 annas per bigha to be imposed. Settlement to be for 15 years.

"The settlement was completed by the middle of 1881, and has continued in force ever since. Rents are regularly paid, and the raiyats have remained perfectly quiet, although a most bitter quarrel between the zemindar and his eldest son, who holds some of the villages by way of maintenance, offered exceptional temptation to create a disturbance and upset the settlement. *The rates fixed for the 52 villages have been adopted not only in other villages of the same estate, but in neighbouring estates.* The settlement report was published in the *Calcutta Gazette* in October 1881, and the proceedings were then thought to have some bearing upon the table-of-rates procedure suggested by the Rent Commission.

"II.—Early in 1883, Messrs. Watson and Company took a lease for 21 years of the large estate of Burrabhoom in the south of Manbhoom, comprising 641 square miles of country. In respect of rent they found a state of things which can only be described as chaos. The estate had never been measured, rents were supposed to be assessed on the quantity of land that could be sowed with a maund of seed, but even for this there were no rates, and such a thing as a jummabundi was unknown. They at once proceeded to measure and to assess at the Tundi rates, the only available precedent. They settled some villages at these rates and got registered kabuliyats. Then a number of raiyats came to me and asked me, as Deputy Commissioner, to arbitrate between them and Messrs. Watson and Company, and fix fair rates. I went to Burrabhoom and met there Messrs. Watson and Company's head manager and sub-manager—gentlemen of large zemindari experience in Midnapore estates bordering on Burrabhoom—and about 400 leading raiyats of the Burrabhoom estate. A standard bigha was measured and flagged out, and the raiyats were asked to consider whether the Tundi rates were fair. After two days' consultation, in the course of which the raiyats showed a marvellous capacity for estimating the gross produce of a unit of area which was perfectly new to them, they said they thought the Tundi rates too high, but that they would accept the rates fixed by the Board for the estate of Dhalbhoom in Singbhoom. These rates they stated. The managers demurred to them as too low. Eventually, after several days of further discussion, an agreement was drawn up embodying the following rates, and was signed by all the raiyats present. I do not remember the exact number, but the original agreement was about five feet long, owing to the number of signatures, and took several hours to register. Similar agreements were executed afterwards by raiyats who did not attend on the first day. The rates were—

	R	a.	p.	
"First class rice land	1	0	0	per standard bigha.
"Second ditto	0	12	0	ditto.
"Third ditto	0	8	0	ditto.
"*Suna* high land	0	12	0	ditto.
"Taur high land	0	4	0	ditto.

"For rice land these are the Singbhoom rates raised 2 annas. *Khundit*, or reclaimed land, was to be held at a reduction of 6 annas in the rupee according to local custom. It was agreed by the Managers that no village jumma was to be raised above 100 per cent. on the previous jumma where this could be ascertained, except in cases where lands had been concealed.

"*The whole estate has been settled at these rates, which were also adopted in drawing up an elaborate compromise between Government, Messrs. Watson and Company, and the ghatwals, regarding lands held by them in excess of their service-tenures.* Messrs. Watson and Company have withdrawn a large number of applications for measurement under Act X, which they filed at starting; there has been no litigation and no disputes worth mentioning. The limit of 100 per cent. has been observed, and village jummas have been kept down by leaving high lands unassessed.

" *The rates noted above have been adopted in settling excess ghatwali lands in the neighbouring estates of Patkum and Manbhoom, and in several registered transactions in those estates.*

" The effect of the two settlements may be stated thus—

" I. The Tundi settlement provides a table-of-rates for—

" (a.) Estate or pergunnah Tundi	150	square miles.
" (b.) " " Nagar Kiari	47	"
" (c.) " " Pandra	239	"
TOTAL AREA AFFECTED	436	"

" II. The Burrabhoom settlement gives a table-of-rates for—

" (a.) Estate or pergunnah Burrabhoom	641	square miles.
" (b.) " " Manbhoom	258	"
" (c.) " " Patkum	299	"
TOTAL AREA AFFECTED	1,198	"

" Every village in Burrabhoom has already been settled at these rates. The settlements of excess ghatwali lands in Manbhoom and Patkum are now in progress. The effect of these will be to fix these rates in a number of villages pretty evenly distributed over the estates. No other rates exist, consequently no court or settlement officer could ignore these, and landlords of unsettled villages are bound to adopt them. *Each settled village is a centre from which the rates will spread.*

" Two objections will be taken to the attempt to make use of the above proceedings as an argument in favour of Chapter XI of the draft Bill. There may be more, but I will endeavour to answer these. It will be said (1) that the raiyats were so ignorant and simple that they were ready to agree to any proposal made by a Government officer; (2) that it is easy to fix rates when you have a *tabula rasa* to start with, but that such a *tabula rasa* exists nowhere out of Chota Nagpore.

" As to the first point, neither simplicity nor ignorance can be imputed to the Tundi Sonthals. Their villages are only some twenty miles from a railway station; they had fought their landlord successfully for years; they were thoroughly versed in the machinery of agitation by way of petitions; and they perfectly understood the effect of every proposal that was made. In Burrabhoom the representative men among the raiyats were not aborigines at all; they were Uriya Mahantis and Patnaiks, and the large majority of their followers were Kurmi Mahatos. No one, I imagine, will charge men of this type with ignorance of agricultural matters or excessive respect for authority. The leaders, at any rate, were prosperous headmen of villages, with experience of litigation and no lack of money.

" With regard to the second point, the state of things I found in existence was extremely confused; but I do not think it differed in essentials from that discovered by the special officers deputed to enquire into rates in Bengal and Behar. In every village there was a theoretical rate for the seed unit of area, but as every individual unit differed in size and component elements from every other, no general rate could have been evolved from the existing data. If the seed-units had been measured up and tables of rent compiled, I believe the results reduced to bighas would have been very similar to those brought out by Messrs. Finucane, Tobin and Macpherson. Indeed the published statistics attached to the Tundi report go far to prove the correctness of this surmises. The average size of the seed-unit in the 52 villages settled varied from 5 bighas to 34. Apply the customary rate to all the different average areas between these extremes, and you will have something very like the state of things ascertained elsewhere. Apply it to the actual units instead of the averages, and you will arrive at results even more confused.

" On the whole, then, it seems to me that actual experience justifies us in holding that the procedure of Chapter XI can be used to fix tables of *customary rents* over fairly large areas. The margin of profit left to the raiyat by a customary rent is sufficiently large to enable us to ignore minor differences of fertility, accessibility and the like within given classes of land which must be taken into account in fixing competitive rents. You could not fix competitive rents by the table-of-rates procedure, because the profit reserved on the best lands of a given class would be too small for the worst lands of that class, and *rice versâ*. Or, to put it in another way, competitive rents can only be fixed by competition; customary rents may be fixed, and have been successfully fixed, by authority."

The preceding extract, which the Lieutenant-Governor thinks both interesting and instructive, furnishes justification of his desire to retain the chapter in the Bill as a less drastic and expensive means of settling disputes than the procedure of Chapter X, to which either party may have recourse, but which the Government is not to set in motion *suo motu*. If the Lieutenant-Governor has so far carried the Government of India with him, all that need be done on this part of the question to give effect to the proposal is to introduce a slight modification into section 123. The section would then run: "The Local Government may, on the application of the landlord or of a majority of landlords or tenants, &c."

But if the chapter be thus retained, the Lieutenant Governor would stipulate that it should contain provisions for the settlement of non-occupancy

as well as occupancy rents. This he deems most necessary. He holds that, in any area in which a Table of Rates had been fixed, there would be no unfairness in providing that no higher rate than the standard rate should be taken from an in-coming non-occupancy raiyat. That would follow from the proposition, which is indeed merely an expression of the existing law, that from no raiyat shall more than a "fair and equitable" rent be taken. That proposal would, it is true, break in upon the freedom of contract for initial rent; but it would do so on clear, intelligible grounds. When in paragraph 40 above the Lieutenant-Governor agreed to the initial non-occupancy rent being left to contract, he stated his intention of stipulating for an exception in areas for which Tables of Rate might be framed.

An alternative and less satisfactory plan would be to provide that if a landlord admitted a non-occupancy raiyat at a rate higher than the standard, such raiyat should, *ipso facto*, acquire occupancy rights. The latter would of course be less effective than the former; but it would tend to do good (*a*) in keeping down the initial rent at which the non-occupancy raiyat is admitted to the land; (*b*) in removing the inducements to the landlord to seek out non-occupancy raiyats in preference to settled raiyats for holdings that fall in. The Lieutenant-Governor considers the alternative less satisfactory than the first proposal.

CHAPTER XII.

74. Record of khamar land.—This chapter has been the subject of much misconception. For instance, it has been said that, under its provisions, no landlord will be able to cultivate lands that raiyats surrender, or that may otherwise fall in. The chapter, it has been stated, strikes a fatal blow at anything like large farming by resident proprietors anxious to improve the agriculture of their estates. Moreover, it has been stated, in Rai Kristo Das Pal's dissent, that the definition of the Bill is narrower than the provisions of the Permanent Settlement Regulations relating to this point; while it altogether excludes waste lands, which, "it is notorious were given to the zemindar to enable him to recoup the loss which inevitably fell upon him under the crushing assessment of the Permanent Settlement."

From these statements the Lieutenant-Governor must dissent. There is no prohibition against landlords cultivating lands which, from whatever cause, may lapse into their hands. There is no injunction or obligation imposed on them by the Bill to let such lands to raiyats; they are perfectly free agents in the matter to let the lands to raiyats, or to cultivate them themselves as they please. What the Government say to landlords in this chapter is broadly this: "Your estates may be regarded as made up of two sorts of land *khamar* or demesne, and *ryotti* or communal land. The former comprises all the land which, according to the ancient custom of the country, or according to any local practice, has been recognized as private land, *plus* all the land which before the commencement of this Act you have given evidence of a wish to permanently cultivate yourself. You are not entitled as of right to the latter. But we recognize the logic of facts, and we desire to terminate this strife by a liberal concession to you. The communal or *ryotti* land will include the rest of your estate. You may bar the accrual of the occupancy *status* in your *khamar* or private land. In reference to it you are given the fullest freedom of contract. But in reference to *ryotti* land you may not bar the growth of tenant right, unless in accordance with the provisions of this Act. As regards all *ryotti* land which may have lapsed, you may hold and cultivate the same yourself as long as you wish, but if you do let it to tenants, you must allow those rights to accrue to your tenants (subject to the payment of a fair rent) which this Act guarantees; you must not deprive them of that security which, in the public interests, it is desirable they should have." Now, that is what the Bill practically says on this subject of *khamar* land, and it needs no great insight into this subject to see how very different it is from the version which the opponents of the Bill have given, and withal how consonant it is with public policy and fair dealing.

Objection is taken by the same authority to limiting the zemindar's vested and guaranteed rights by not declaring as khamar all the land that was waste at the time of the settlement. We have

* Fifth Report, page 18.

to two-thirds of these Provinces was waste at the time of the Settlement, so that, if the claim be allowed, we should have to deny any agrarian rights at all, except at the zemindar's sufferance, to some 30 millions of people! But the objection admits of ready disproof, without having recourse to the final one of public interest and policy. We have unquestionable evidence of what the Government of that time regarded as the khamar land referred to in the Regulations. This matter was dealt with in paragraph 8 of my letter of 27th September last. It was there stated on the authority of sections 37 and 39 of Regulation VIII, 1793, that under the Setttlement no land was regarded as *khamar* which was not such on the 12th August 1765, the date of the grant of the Dewanni, and that statement has remained unrefuted. It is clear from it that the land which was waste in 1793 was excluded from the definition of *khamar*. Moreover, I am now to invite a reference to Colebrooke's Supplement, page 315, which will show that *khamar*, as understood in the Rules for the Decennial Setttlement, meant "lands appropriated by the zemindars and talukdars of Bengal and Orissa to the subsistence of themselves and families." These words also make it clear that khamar was not waste. In Behar there was no *khamar*, malikana lands taking their place. This antiquarian information is, perhaps, at this stage of the discussion somewhat out of place; but the Lieutenant-Governor has not thought it right to let such statements, though contradicted before, pass unchallenged now.

As to the provisions of the chapter, the Lieutenant-Governor has no criticism to offer. They seem to him in all respects suitable.

CHAPTER XIII.

75. Distraint.—The papers no longer show any large section of opinion in favour of the total abolition of distraint, though it is to be noted that the majority of the Orissa Conference would abolish it in case of all saleable holdings and hold to the Bill in other cases. Some judicial officers would also be glad to see distraint put an end to, for, as the Subordinate Judge of Backergunge puts it, "distrained crops are partly spoilt and partly stolen;" but on the whole there is a feeling that distraint ought to be retrained in some shape or other. In Bengal it is clear that distraint is not usually had recourse to as a means of recovering rent, and there is reason to think that when used the object is as often to harass the raiyat as to recover arrears. Still the conclusion to be drawn from the evidence is that the abuse of the power to distrain is not a serious question in Bengal. Under such circumstances, it is natural to find that many officers are disposed to leave matters as they are. The Dacca Conference and the Chittagong Commissioner accept the Bill, which will not make much, if any, change in existing conditions in those parts of the country. The Orissa Conference are divided (apart from the abolitionist view of the majority) between leaving the law as it is, or accepting the draft Bill. Many Bengal officers are in favour of more stringent punishment in case of abuse if the law be left unaltered.

In Behar there is a dislike of the provisions of the Bill. The Patna Conference prefer the existing law, though partly for reasons based on a misapprehension of the provisions of the Bill, and partly on a fear which the Lieutenant-Governor cannot appreciate. It is not correct to say that the Bill makes the raiyat deposit before he can get a remedy, while the fear that a Civil Court officer would abuse his powers more than a landlord seems fanciful. The Bhagulpore Conference (now that transferability has not been accepted for Behar) recommend, at least so the Lieutenant-Governor understands them, the retention of the present procedure, modified only so far as that the landlord must serve on the court a duplicate of the distraint notice he is already bound to serve on the raiyat.

Recommendations regarding distraint.—To all these various views the Lieutenant-Governor has given careful attention. In Behar he is clearly of opinion that the law of distraint of crops, or, as the Behar Committee called it, *restraint* of crops, needs amendment. One of two courses is open. We may retain the existing law with sharper penalties against abuse of it, or we may proceed upon the basis of the Bill. If we adopt the latter course, then the Lieutenant-Governor would very strongly urge the substitution

of section 186 of the Bill as introduced in the Legislative Council for section 220 (2) of the present Bill. If we adopt the former course, then the retention of section 220 (1) as it stands with section 186 of the original Bill substituted for section 220 (2) (as in the previous case) is absolutely essential. Of these two courses the Lieutenant-Governor would prefer the first-mentioned course, because of the preference which local opinion gives to as large a measure of adherence as possible to the existing law, and because he believes that strict attention on the part of local officers to its provisions, safeguarded as they would be by the proposals now made, would preserve it from abuse. Whatever provisions should be introduced for Behar should also be extended to Bengal, and it should be made clear that an officer of the Civil Court deputed to sell or otherwise deal with distrained crops, shall be liable to punishment under section 166 of the Penal Code for any violation of the law of distraint to which he may have been in any way a party. At present it would appear that for a conviction under that section it is necessary to prove that the particular act was *prohibited*. It should be sufficient to show that it was not *authorized* by the law.

While thus expressing his preference for the maintenance of the existing law, fortified by stricter safeguards than at present against abuse, the Lieutenant-Governor would, however, add that he has no insuperable objection to the plan proposed in the Bill, modified as he has recommended it should be. Should the Government of India prefer the plan given in the Bill, the words "or about to become due" should be inserted after "due" in the first line of section 139, so as to make that section fit in with section 141. Then the scheme would provide for the cases of *churs* and *frontier lands*, to which allusion has been made as cultivated by nomads whose crops afford the only tangible security for their rents. In this connection also attention may be called to the proposal of the Munsif of Shadaram, that collective notices of distraint might be served when there are several defaulters. The proposal would save expense.

CHAPTER XIV.

76. Summary sale of registered tenures.—In paragraph 14 of my letter of 27th September 1883, the necessity for a registration of tenures, both with reference to this Tenancy Bill and to considerations of general policy, was represented to the Government of India, and in paragraph 19 above the same subject has been touched upon. The Lieutenant-Governor has not yet submitted his proposals in a definite shape for the approval of the Government of India; but the inclusion in the draft Bill of such a provision as section 209 gives him hope that approval will not be withheld when the proposals come under the consideration of His Excellency the Governor-General in Council. Should Mr. Rivers Thompson's expectations in this regard be verified, we may look forward to the registration within a moderate period of time between one and two millions of tenures, and it will then be possible to apply to these tenures, no doubt, at first tentatively and with prudence, that modification of the putni sale law procedure which the Bill enables the Local Government to introduce. We should begin by applying the summary procedure to permanent tenures held at fixed rates, and should experience justify expectation, the system would be afterwards extended. The result of a general application of the procedure to all tenures would be to give the zemindars, in regard to a very considerable proportion of their rent-payers, all they want, and in the way they want it, on the subject of a speedy procedure for realizing rent arrears. When, therefore, the proposals made in this Bill on the subject of realizing arrears are declared by Rai Kristo Das Pal to be "disappointing," and by the Maharajah of Durbhunga "to intensify their present difficulties and deprive them of the little relief they now enjoy," it seems to the Lieutenant-Governor that the effects of the proposals on the registration of tenures have not been duly appreciated.

Mr. Tweedie's Draft Procedure Code.—On the general subject of judicial procedure, the Lieutenant-Governor feels some diffidence in commenting upon the Bill. The question is one for the Legislative Department of the Government of India. He may, however, say that no officer has proposed a substitute for this chapter of the Bill except Mr. Tweedie, Judge of Shahabad,

who has developed into a draft Code the suggestions on the subject made in his report on the Bill. Mr. Tweedie's draft Procedure Code is herewith submitted for the consideration of the Government of India, and if the Lieutenant-Governor abstains in this place from expressing a decided opinion on its merits, he is free to acknowledge the industry and care which Mr. Tweedie has brought to bear upon the subject. No doubt the proposals will receive due attention in the Legislative Department.

General opinion regarding the Chapter.—Passing on to the provisions of the chapter, I am to say that they have been received with general approval by the officers consulted. There is agreement in the view that they will shorten and simplify procedure. Some appear to think that a modification in the High Court's rules (see Mr. Reily's observations quoted in Mr. Dutt's report) would also be desirable; but that does not seem to be the opinion of the Hon'ble Judges themselves. Probably the point may be again considered by them when the necessity for framing rules under the Bill arises.

Collective suits.—With regard to the question of collective suits, I am to state that if the High Court had not declared their disapproval of them, this Government, basing its opinion on the reports now submitted, would have done so. The only advantage to be got from collective suits disappears when the parties are brought to court. On this point the opinion of Colonel Samuels, who has had large experience of collective suits in Chota Nagpore, and who is besides an able judicial officer, is very valuable. There may be a saving in initial expenditure, but that saving can be secured, as the Hon'ble Judges of the High Court point out, by other means.

Written statements and notes of evidence.—The Government of India will observe that many judicial officers deprecate the exclusion of written statements [163 (*e*)], and think it unwise to dispense with notes of the evidence [163 (*f*)]. In these views this Government concurs. Experience shows that the mass of the peasantry do not state their case orally, either with fulness, or to the best advantage; while nothing simplifies the work of an appellate court more than a clear and perspicuous record.

Payment to a party.—Then, a very forcible objection has been taken to section 164. As the Judge of Shahabad, the Subordinate Judge of Nuddea, and others point out, the section does not provide for the common case of a plea of payment made to a third party; while by forcing the third party into court, the section may prejudice his interests. These objections are weighty, and, on the whole, the Lieutenant-Governor would be glad to see section 199 of the original Bill (which did not force the third party at once into court) restored with such amplifications as may be necessary to provide for payment made *bonâ fide* to a third party.

On the questions of strengthening the judicial staff, to which the Hon'ble Judges of the High Court have attached so much importance, the Lieutenant-Governor deems it unnecessary to say more here than that he admits the necessity of providing adequate and efficient tribunals for the speedy disposal of rent-suits. The question is one to be discussed separately, when the prospect of passing the Bill into law is assured. The Hon'ble Judges' proposals on the subject of reducing the fees leviable on rent-suits are deserving of all attention.

CHAPTERS XV AND XVI.

77. On these chapters the Lieutenant-Governor has no criticisms to offer beyond that which is stated in paragraph 9 of this letter, which are not concerned with matters of language and detail. The former he will reserve for consideration in the Select Committee; and as regards the latter he thinks that there is much to be said for the view that the language of the regulations, which have received judicial interpretation, should be adhered to as closely as possible.

CHAPTER XVII.

78. Contract and custom.—The Lieutenant-Governor has carefully

considered the various criticisms that have been made on section 210;* and while he thinks it desirable to modify it in some respects, he adheres to the view held by this Government that its main principles are not only justifiable but absolutely essential to the well-being of the peasantry of these provinces. To talk of the section being tantamount to keeping the people in leading strings, of its being a breach of Government guarantee and an infringement of a proprietary right, or of its being uncalled for by any established abuse of the landlord's greater power and longer purse, is to ignore alike the lessons of history and every-day experience, and to shut one's eyes to the evidence of patent facts. Such arguments lie badly in the mouths of those who deny—and as the Lieutenant-Governor admits to some extent rightly deny—the raiyat's capacity to deal on even terms with his mahajun. If one point more than another in connection with this Bill is placed beyond the reach of any doubt by accumulated and daily recurring experience, it is this: that the raiyat is not a free agent; that he is constantly compelled, in the most advanced as well as in the most backward districts, to sign away his rights in a manner which, had we not the documents before us, would have been incredible in sane people. In the face of such facts as these, not isolated facts, but general recurring facts, it is unreasonable to maintain that the raiyats are free agents. It is surely out of place to quote Lord Macaulay, as the Commissioner of Rajshahye does, in favour of freedom of contract, when every fact refutes the conditions which Lord Macaulay's argument pre-supposed. As far as freedom of contract can safely be given, the Bill gives it. It, in fact, gives a wide measure of freedom of contract, and the present recommendation of the Lieutenant-Governor would extend that freedom. The checks which the Bill imposes will be found no oppressive bond by fair-dealing zemindars. The Lieutenant-Governor doubts if they will feel their existence. Those who most oppose the checks are they who would have no line drawn between liberty and license.

* The provisions of this Act in respect of the following matters shall take effect notwithstanding any contract to the contrary :—

(a)—The acquisition of the status of a settled raiyat and of the occupancy right (sections 24, 25, and 26).

(b)—The incidents of the occupancy right specified in section 31.

(c)—The right of an occupancy raiyat to demand a deduction of rent under section 51.

(d)—The right of either landlord or tenant to demand a commutation of a produce rent under section 53.

(e)—The protection afforded by the Bill to a non-occupancy raiyat and an under-raiyat from ejectment except on specified grounds (sections 58, 59, 60, and 63).

(f)—The right of a tenant to a reduction of rent on account of the diminution of the area of his holding (section 66).

(g)—The right of the raiyat to make improvements and claim compensation for them (sections 88, 89, 90, and 93).

(h)—The protection afforded to all tenants against ejectment except in execution of a decree (section 98).

Passing to the provisions of the chapter, I am to observe that Mr. Dampier has brought to notice the fact that landlords occasionally desire to keep in their possession *ryotti* lands that fall into their hands for special and exceptional purposes, such as a model farm, or a pleasure-ground, or the like. It may not be convenient to them to put their intention at once in force, and meantime it would benefit them and their raiyats that the lands should not lie idle. But if let to a settled raiyat, the latter would acquire an occupancy title in them, while if let to a non-occupancy raiyat it is conceivable that a court might give him compensation for disturbance. Under such circumstances as these, and for valid reasons established to the Collector's satisfaction, Mr. Dampier would allow the parties to bar the accrual of occupancy rights in such exceptional lands. This proposal the Lieutenant-Governor would accept.

Chur and dearah lands.—The Lieutenant-Governor would also, subject to a proviso under section 210, deal with the case of *chur and dearah lands*, which, he ventures to think, are not very satisfactorily dealt with by being left under section 213* practically outside the Bill. Mr. Rivers Thompson does not surrender the view that occasionally *chur and dearah* lands do need exceptional treatment. But the laxity with which the terms *chur and dearah* are applied, sometimes being used in regard to formations of old date, may lead to litigation and dispute, if the subject is not dealt with more clearly than now as an integral

* Section 213.—Notwithstanding anything in this Act, a raiyat holding land of the kind known as chur or dearah, that is to say, land ordinarily liable to improvement or deterioration by fluvial action, shall not acquire a right of occupancy in the land until he has held the land for twelve continuous years, and until he acquires a right of occupancy in the land, shall be liable to pay such rent for his holding as may be agreed on between him and his landlord.

But the Court may, on the application of either the landlord or the tenant, declare that any land has ceased to be chur or dearah land within the meaning of this section, and thereupon all the provisions of this Act shall apply to the land.

part of the Bill. It is specially necessary to keep touch with existing facts as far as possible, and to avoid suggesting the idea that (consistently with the landlord's just rights) the occupancy status with its concomitant attributes may not be acquired in the future, as in the past and present, on accreted lands. The Lieutenant-Governor's proposal would, therefore, be to omit section 213 from the Bill altogether, and to give to raiyats the right of contracting themselves out of the occupancy or settled status in regard to *chur and dearah* lands so long as these do not come within the operations of the dearah survey, or so long as the Collector does not declare them to be fully formed. Thus, a workable rule will be laid down, landlords will be able to make their own terms for new lands, which within a short period of time may pass from a condition of sterility to one of fertility, and nothing will be done to distinguish unnecessarily accreted lands from the older formations.

79. Halhasili tenures.—The information regarding *halhasili* tenures supplied by the Bhagulpore Conference and by Mr. Reily, Manager of the Chanchal Estate, is full and satisfactory. From it the Lieutenant-Governor infers that the *halhasili* tenure is something like a survival of that land system stated by Mr. H. S. Maine† to be, at some period or other of their development, common to all countries inhabited by an Aryan race. It is very evident from the information now furnished that in Bengal these *halhasili* tenures are well advanced in the transition stage to ordinary ryotti holdings. They are not always distinguishable from occupancy holdings. Under these circumstances it seems to the Lieutenant-Governor desirable to avoid impeding the transition as much as possible. It is clearly not our object to stereotype the existing state of things. In regard to *halhasili* lands, therefore, the Lieutenant-Governor would let the ordinary provisions of the Bill apply, and would not mention the word *halhasili* at all. The difficulties which present themselves to Mr. Reily as regards the rights in relinquished lands would probably be met by the provisions of sections 95 and 96 of the Bill.

† Village Communities in the East and West, page 81.

80. Utbundi tenures.—The origin and growth of the *utbundi* system has not been traced by the Presidency Conference. It has, however, been described with adequate fulness in Mr. Cotton's memorandum on tenures submitted to the Select Committee, to which a reference is requested. It would seem to be of the same class of tenure as that just noticed, only that when the turning point was reached its further development was, so to speak, misdirected, while the *halhasili* tenure developed in the right direction. It is a tenancy from year to year and sometimes from season to season, the rent being regulated not as in the case of *halhasili* by a lump payment in money for the land cultivated but by the appraisement of the crop on the ground, and according to its character. So far it resembles the tenure by crop appraisement of the baoli system; but there is between them this marked difference, that while in the latter the land does not change hands from year to year, in the former, it may. The character and tendency of the *utbundi* system will be best appreciated from the following quotation from the Board of Revenue's Report on Estates under direct management in 1882-83:—

> Utbundi raiyats having no rights take no interest in the improvement of the lands temporarily held by them, and the prevalence of the utbundi system in this (Nuddea) district has resulted in the inferiority of the soil, and the consequent neglected state of such mehals under khas management. These raiyats only cultivate a portion of a mehal, without caring to bring the whole estate under cultivation. The greater portion of a mehal, therefore, remains uncultivated throughout the year, and is overgrown with weeds and bushes, and at last becomes wholly unfit for cultivation. The intention of the Government in bringing estates under khas collection, and in extending this system to all Government estates, is frustrated. The estates in this district, in which the utbundi system obtains, have lost much of their importance, and have not derived any of the benefits likely to accrue from khas management.
>
> Mr. Tayler (the Collector) suggests the necessity of converting these tenures into holdings at fixed low rates, observing thus:—
>
> "To bring such estates under cultivation, and to improve the soil, I would suggest that the mehals may be let out under the system of *jumma rates*. The fixity of low rates, lower than those obtained by the *utbundi system*, will no doubt induce cultivators to accept leases on such terms, and encourage them to improve the soil by bringing lands under cultivation, at least with a view to pay the rent assessed upon their holdings. The cultivators will then know that the lands are their own, and that they will not be ejected as tenants-at-will are. Their interest in the land will thus be increased, and it may be expected that they will spare no pains to improve the condition of their holdings.

"In the second place, the fixity of rates, even for a term of years, will contribute to the security of the rental. The whole area of the estates will be assessed at lower rates instead of only a portion at higher, and thereby the gross rental derived therefrom will, I trust, exceed, but never fall short of, the amount under the utbundi system. Then, when the whole mehal has been brought under cultivation and the raiyats have gained much by the settlement at low rates for a length of time, the mehal may be brought under settlement, and the low rates may be conveniently enhanced, and settlement at enhanced rates, which must be fair and equitable, and must be arrived at after consideration of the trouble and money spent by the raiyats to improve their holdings, will be gladly accepted. In this way the utbundi system now in vogue, which has materially affected the condition of the mehals, can, and ought to be, I think, discontinued. In some instances I have lately found that the mehals let out under the utbundi system are not properly looked after. They should be visited while the crops are on the ground, and the area under cultivation should be measured and assessed accordingly. This is, however, not always done in this district. Unless this practice is adhered to and strictly acted up to, there is every likelihood that the collecting agency will be deceived, and will have to be satisfied with whatever rent they can realize. I have impressed upon the sub-divisional officers the necessity and importance of introducing *jumma rates* in mehals in which the utbundi system obtains, but before the introduction of such a system can be given effect to, they have been directed to see that the officers on the Subordinate Executive Service placed under them assess the lands at the due time."

The facts disclosed by this description of the *utbundi* system do not dispose the Lieutenant-Governor to any special legislative measures towards its conservation. It would not be easy, as Mr. Reily of Chanchal, with a good deal of personal experience of the subject explains, to indicate the precise nature of the legislation requisite to meet such cases; though he rightly deprecates the proposal so to exclude these systems from the Bill as they now are excluded by section 214.* It is, Mr. Rivers Thompson understands, a fact that occupancy rights may now be acquired in *utbundi* lands,* and he thinks that the acquisition of such rights is a thing to be encouraged in the interests of all concerned. The result of this enquiry, then, is to confirm the Lieutenant-Governor in the opinion expressed at the end of the 8th paragraph of my letter of 27th September 1883. He would willingly treat *utbundi* as he recommends that *halhasili* lands should be treated.

* *Section 214.*—Nothing in this Act shall affect the conditions, customary or otherwise, under which land is held on in either of the systems known as the "utbundi" system and the "halhasili" system.

* See 20 W. R. 329.

On the remaining provisions of the Bill the Lieutenant-Governor has no remarks to make in this place. It will be remembered that the questions of homesteads, penalties for illegal distraint, rights of pasturage, and the saving of special enactments have already been discussed in other connections.

81. Summary sale of dependent taluks and rent-free tenures.—I am now to turn to your letter of the 5th May, and, as promised in the 6th paragraph of this Report, to offer some observations on the points raised in the second and fourth paragraphs. On the first, fourth, and seventh points raised in paragraph 2, no further observations are here necessary, as they have been sufficiently discussed in paragraphs 68, 60, and 46 of this Report. In regard to the second and third points, *viz.*, the applicability of the summary sale procedure to certain dependent taluks, and for the recovery of Road Cess arrears from rent-free tenureholders, the Lieutenant-Governor desires to give a decided answer in the negative. There is no evidence to show that the existing state of things has caused any appreciable difficulty, while it is very likely indeed that the summary procedure would be taken advantage of to the great detriment of the proprietors of old and valuable tenures.

82. Chittagong tenures. Guzasta and Gora holdings.—On the fifth point the Lieutenant-Governor's views will have been gathered from what has been said under *utbundi*. He would strike out section 214 altogether. In regard to Chittagong no saving need be made, the proposals made in this letter meeting the requirements of the Division.

Finally, the question regarding the exemption of *guzasta* and *gora* holdings (the latter being of no great prevalence or importance) from the pre-emption clauses of the Bill loses much of its significance if the proposals made by the Lieutenant-Governor in regard to the sales of occupancy rights be accepted. Occupancy rights in Behar will continue, as now, to be saleable wherever such a custom prevails. No question of pre-emption will therefore arise. Elsewhere in Bengal the Lieutenant-Governor would allow the veto on purchases by persons not dependent on agriculture for their chief means of livelihood to operate in case of all transferable holdings not regarded as tenures by statute or by established custom.

83. Sufficiency of revenue establishments for the purposes of the Bill.—In respect to the points raised in your fourth paragraph, I am to observe that undoubtedly the revenue establishments in these Provinces would have to be considerably strengthened if raiyats and zemindars were at once to have recourse to all those provisions of the Bill which depend on the Collector and his subordinates for their execution. But the Lieutenant-Governor believes that nothing of the sort need be apprehended. In Behar no doubt, where survey and settlement operations will be set on foot very soon after the enactment of the Bill, special establishments will be necessary; but in the rest of these Provinces it may be accepted that the passing of the Bill will create no revolution and but little perceptible change at first. As time goes on, and knowledge of the law extends to the masses, its effects will become apparent; but they will become apparent gradually, and without any disruption of existing relations. The fear that the Bill will "plunge the country into a flood of litigation" is not one that will survive the controversy that gave it birth, for the Bill rather establishes tendencies than introduces change. Therefore it may be assumed, as in other cases, that the knowledge that the law is there will stimulate mutual concession and agreement; there will be no sudden call on the executive.

But, taking things at their worst, the Lieutenant-Governor does not see that, outside Behar, any excessive strengthening of establishments beyond the Registration establishments would be necessary to cope with the work indicated in the fourth paragraph of your letter under reply. The record of rights, settlement of rents, and registration of khamar land in Behar will no doubt need special establishments, as will the enforcement of the former provisions in isolated estates in Bengal. But these are the only provisions of the Bill that suggest at present any anxiety on the score of the sufficiency of the executive staff. The Lieutenant Governor cannot believe that it will be necessary to engage in a futile search for a "prevailing rate." Price-lists are now prepared, and all that is required is more care and supervision. Rent deposits are now received, and should go on as usual under the control of the civil courts. Appraisement by special officers will be needed only in a small corner of the Province, and not always there. The registration of landlords' improvements is a thing of the future; permission to measure holdings is granted daily by the civil courts, and should continue to be granted by those authorities. Apart, therefore, from the operations to be undertaken in Behar and in some isolated estates in Bengal under Chapter X, the only matter of any urgency in connection with an increase of the Executive services lies in the Registration Department. That matter will receive the Lieutenant-Governor's early attention, while the measures connected with operations under Chapter X of the Bill in Behar will form the subject of a separate communication to be submitted at an early date to the Government of India.

84. Summary of recommendations.—Before bringing these observations to an end, the Lieutenant-Governor thinks it may be convenient here to sum up briefly the chief proposals he has made in modification of the Bill in its present form. For the reasons, then, which have been stated at full in the preceding pages, Mr. Rivers Thompson proposes—

I.—To modify the presumption as to fixity of rent by requiring proof of such fixity in all future cases from 20 years before the passing of the Bill.

II.—To abandon the proposal to convert into a tenureholder a raiyat who sublets more than half his holding. (The Lieutenant-Governor would maintain section 209, which provides that, on the registration of tenures under any law for the time being in force, the summary sale procedure of the Bill for recovery of arrears of rent shall apply to such tenures.)

III.—To recognize the right of free transfer of occupancy holdings among the agricultural population in Bengal Proper; but in Behar to leave matters to be regulated by custom as at present.

IV.—To omit the pre-emption clauses of the Bill, and to substitute for them a system of compulsory registration accompanied by notice of the transfer to the landlord.

V.—To give to landlords in Bengal Proper a veto on transfers if the purchaser be a person who does not derive his chief subsistence and income from agriculture.

VI.—To recognize the principle that, in the absence of reason to the contrary, the courts shall regard a rise in the price of staple food-grain as entitling the landlord to an enhancement of rent.

VII.—To fix the percentage by which the enhanced rent shall exceed the former rent at a definite proportion (one-half is suggested for consideration) of the percentage by which the enhanced prices exceed the former prices, the other portion going as an allowance for increased cost of production.

VIII.—To assign to enhancements on the ground of landlords' improvements a maximum limit of double the former rent.

IX.—To abandon the provision for enhancement on the ground of a "prevailing rate," experience having shown that no such rate exists, and that the position assigned to it in the present law has led to the construction of collusive and fictitious rates for the purpose of forcing up rents.

X.—To abandon fluvial action as a ground of enhancement of rent, but to recognize freedom of contract between landlord and raiyat in regard to new alluvium.

XI.—To withdraw the arbitrary limitations on enhancements by suit on account of a rise in prices, and to allow contracts for enhancement of rent out of court up to a maximun limit of 2 annas in the rupee (12½ per cent. of the former rent, and for a minimum period of 15 years.

XII —To withdraw all restrictions on freedom of contract in respect of the *initial* rent of all land which may lapse to the landlord from whatever cause.

XIII.—To re-introduce the provision that the rent of the occupancy or non-occupancy raiyat shall not exceed one-fifth of the value of the gross produce calculated in staple food-grains.

XIV.—To give the non-occupancy raiyat a right to claim compensation for disturbance up to one-fourth of a fair rental for each year of the tenancy.

XV.—To withdraw all restrictions on freedom of contract with under-raiyats, subject only to the provision that the under-raiyat's rent shall not exceed the value of five-sixteenths (31¼ per cent.) of the gross produce calculated in staple food-grain.

XVI.—To strengthen the customary rights of raiyats in *Bastu* land by providing that rights of occupancy shall accrue under the Bill in all such lands.

XVII.—To make action under the chapter for preparing Tables of Rates dependent on the application of either party, and not as in the Bill, on the discretion of the Local Government.

XVIII.—To retain the present law of distraint with sharper penalties for abuse of it.

XIX.—To omit the section regarding *utbundi* and *halhasili* lands, to regard both classes as subject to the ordinary incidents of *ryotti* land.

This concludes the observations which Mr. Rivers Thompson has, on this occasion, to offer on what is undoubtedly the most important subject, which has, since the days of the Permanent Settlement, engaged the atttention of Her Majesty's Government in India. The Lieutenant-Governor ought, perhaps, to apologize for the length to which his remarks have run; but he was anxious on this the last opportunity which may be afforded him before the final consideration of the Bill, to explain with necessary fulness the motives which actuate him in supporting this measure, and to defend its main principles from the misconceptions to which they have been exposed. It was also his wish to record, with due advertence to the opinions of his officers, and with such argument as the time at his disposal permitted, the reasons on which, in the interests committed to his charge, he bases claims for modifications in some of the provisions of the Bill. He now respectfully confides the question to the Government of India, in the assurance that the result of their counsels will be the enactment of a Tenancy Law in Bengal, which will restore peace where unrest now prevails, and ensure the growth of prosperity and contentment among all classes of the agricultural community throughout these Provinces.

APPENDIX I.

Statement showing the number, value, and area of Ryoti Holdings held at fixed rates transferred by Registered Deeds-of-Sale in each Registration District of the Lower Provinces of the Bengal Presidency for the years 1881-82, 1882-83, and 1883-84.

Circular No. 3T.—R, dated Darjeeling, the 24th May 1884.

From—A. P. MACDONNELL, Esq., Offg. Secy. to the Govt. of Bengal, Revenue Department,

To—All Commissioners of Divisions.

Your attention has already been invited to the Tenancy Bill as revised by the Select Committee of the Legislative Council of the Governor-General; to the report of the Select Committee upon the Bill, with the dissents from that Report which were published in the *Calcutta Gazette* of the 2nd of April and subsequent dates; and to the important letter of the Government of India, No. 784, dated 5th May, which appeared in the *Gazette of India* of the 10th instant. The Lieutenant-Governor again requests your most careful attention to these documents, especially to the letter of the 5th May, in which His Excellency the Governor-General in Council subjects several provisions of the Bill to examination, pointing out, in regard to some, the necessity that exists for a further discussion of their tendency and usefulness, and in regard to others the desirability of collecting more complete information. All those points, as well as other matters to be brought to your notice in the course of this letter, should now, without any loss of time, receive careful consideration from yourself, from the District Officers subordinate to you, and from such public bodies and individuals interested in the measure as may be willing and able to give assistance and advice. It will be found that on a few points local enquiries will be necessary in order to clear away the remnants of those difficulties which, at the outset, beset this question of the amendment of the Rent Law in Bengal. Those points have been generally indicated by the Government of India in their letter, and in the sequel I am to touch upon them also. Before doing so, however, I am to say, with reference to procedure, that when the matters on which further enquiry is needed shall have been duly investigated, and when your District Officers, having taken such advice as may be necessary, or may be tendered by persons interested in the measure, shall have formed their conclusions on the matters referred for their opinion, then it is the Lieutenant-Governor's wish that you should hold a conference of all your Collectors and such other officers as you may desire to consult, that you should thoroughly discuss the matters referred to you in personal communication with them, and draw up a report embodying the general opinion of the conference. From this intercommunication of ideas, the Lieutenant-Governor anticipates not only much benefit as far as the consideration of the question itself is concerned, but also a great lightening of the work of Government in reviewing the reports to be submitted. Many views, to which officers reporting separately on the Bill might be inclined to attach undue importance, assume their proper position when examined in the light of the larger experience which many men can bring to bear upon the opinions of one. If, indeed, there be marked differences of opinion, the dissentient officers should note briefly their views, but there should be no unnecessary delay in this respect, for it is expected that your report should reach this office certainly not later than the 14th August. The time allowed by the Government of India for this further discussion of the Tenancy Bill is not long, and therefore should be turned to the best account.

2. The procedure which the Lieutenant-Governor has now indicated seems to him to hold out most promise of successful results; and therefore he desires that it may be followed. In any case where a Collector of a district is unable for any reason to attend the conference, he should submit a report, which should be embodied in the General Report of the Conference, as far as the views expressed in it will permit. Mr. Rivers Thompson does not lose sight of the fact that this call comes upon District Officers at a very inconvenient time of the year, when they are busy preparing their Annual Reports. The call, which the Lieutenant-Governor trusts may be the last he will have to make in connection with the Tenancy Bill, must, however, be met; and in order to enable you to meet it, he, as a special exception, postpones the date of the submission of the Annual Reports for one month, if such an extension be necessary in consequence of the orders now issued. It is presumed that in the case of your Collectors, whose reports are due by 1st June, no extension will be needed; but, where needed, you may grant it.

Having thus sketched out the plan of enquiry and consultation which seems to the Lieutenant-Governor to offer the greatest promise of satisfactory results within the time at the disposal of the Government, I am now to direct your attention to the principal points which are to form the subject of enquiry and report. In doing this, it will be convenient to follow the order of the revised Bill, reserving for subsequent comment those large administrative questions which the Government of India raise in the initial paragraphs of their letter under notice.

3. *Chapter I.*—On this chapter the Government of India, following the Report of the Select Committee, make no remarks. No points occur to the Lieutenant-Governor to which your attention need be drawn. Should, however, any considerations of importance, which have not been provided for, occur to you in connection with this chapter, you are at liberty to bring them to notice.

4. *Chapter II.*—The provisions of this chapter exercise a very important influence on the character of the Bill, and therefore demand your special attention. It is highly desirable that a forecast should, as far as possible, be made of their probable effect by ascertaining how far similar arrangements already exist in the agrarian economy of the various districts, what the general effect of such arrangements has been, and, where no such arrangements exist, what the effect of introducing them would probably be. The chief points to which your attention should be directed are (*a*) whether the definition of raiyat in section 5(3) covers all classes of raiyats, those holding under unregistered lakhirajdars as well as under the holders of revenue-paying lands; (*b*) whether the presumption in section 5 (5) is, with reference to existing practice, a fair presumption, and, if not fair, what presumption of the sort would be fair; (*c*) whether the conversion of the subletting occupancy raiyat into a tenure-holder (section 37) is a workable provision, and also likely to secure the objects for which it was devised. In regard to the first and second points, the Lieutenant-Governor deems it unnecessary to do more here than to bring them prominently to your notice; but in regard to the third point (*c*), which may, with advantage, be once for all discussed in this connection, a few further remarks are desirable, because the excision of this provision would naturally exercise an important influence on some other provisions contained in the Bill. In proposing in my letter No. 972 of 27th September (paragraph 7) that an occupancy raiyat who sublets half his holding should be converted into a tenure-holder, the Lieutenant-Governor had in view the twofold object of discouraging the purchase of occupancy holdings by money-lenders or speculators; and, where transfers were made, of affording a protection from undue enhancement of rents to, and of facilitating the acquisition of the occupancy right by, actual cultivators of the soil. It is recognized that the formal recognition by the Bill of the transferability of occupancy rights may tend to the purchase of such rights by money-lenders (whom it is not the wish or object of the Government to benefit at the raiyat's expense), and consequently to the rack-renting of the cultivators holding under such purchasers. From the earliest discussions of the question it has been accepted that if by any definition or legal provision the limitation of the occupancy right to actual cultivators could be secured, most, if not all, of the objections to the proposal would be removed. But the difficulties in the way of providing any efficient or practical limitation of the sort have hitherto proved insuperable, and it is therefore acknowledged that if the right of free sale as regards the occupancy tenure is to be maintained, some safeguard must be found against the dangers referred to. Accordingly the plan embodied in section 37 of the revised Bill was devised. The object of that plan was to deter money-lenders from purchasing occupancy rights by exposing them to being summarily dealt with for arrears of their own rents, while curtailing their power to deal summarily with their under-raiyats These objects it was proposed to secure by, on the one hand, enabling the superior landlord, in certain cases, to subject the purchaser of the occupancy right (who had sublet half the holding, and thereby rid himself of the responsibility of cultivation)

to the summary procedure of the putni sale law, or to some modification modifications in other portions of the Bill (such as the withdrawal, if deemed inefficient or impracticable, of the safeguards against the intrusion of money-lenders) which you may, on full deliberation, deem it advisable to make. The possibility of devising a plan whereby transfers of occupancy rights by sale (otherwise than in execution of a decree for arrears of rent) could be restricted to the cultivating classes only should be again considered. Hitherto all attempts in this direction have ended in failure more or less pronounced, much of the difficulty lying in the fact that the mahajun is frequently himself a cultivator. It has indeed been urged by the British Indian Association that it is not desirable to exclude mahajuns of this class from purchasing occupancy rights, and thereby bringing their capital to the promotion of agriculture; and if only some efficient checks could be imposed on the power of such purchasers to rack-rent their under-tenants, the Lieutenant-Governor's apprehensions on the point would be mitigated. There is, however, a large mass of evidence to show that the mahajun, who buys up occupancy rights, is one of the most exacting of landlords. If occupancy rights were to fall largely into the hands of that class, while no protection was afforded to their under-raiyats, the results would be highly undesirable. It may be added that whatever conclusion you adopt on the general question of transferability need not be regarded as in any way affecting the wisdom and desirability of declaring that occupancy holdings shall be saleable for their own arrears of rent under decrees of Court in substitution for the system of ejectment recognized by the existing law.

9. With reference to the enhancement of rent provisions (sections 39 *et seq.*), it is desirable that your remarks should fall under two heads—(*a*) the grounds of enhancement; (*b*) the extent to which enhancements may be had. While calling your attention on the first point (*a*) to the remarks made on the subject by the Select Committee, and by the Government of India in paragraph 13 of their letter, and while asking you to fully weigh these remarks, I am also to bring the following matter to your special notice. It has been objected to the first ground of enhancement in section 43, namely, the prevailing rate, that while careful enquiry has failed to discover a "prevailing rate" anywhere except in portions of Jessore, the provision in question either has been, or easily admits of being, abused by the production in evidence of collusive or fictitious rates, and thus creating a leverage for forcing up rents. On the other hand, it has been urged that this ground of enhancement is of long standing, and that, although there may not be one uniform rate for any class of land in a village, still the rents generally payable for any particular class do approximate more or less to a certain standard round which they may be regarded as oscillating under the influence of special disturbing causes. You should give a close examination to these considerations, and should state whether such abuses as those to which I have referred have reached any magnitude in your districts, and whether the abolition of the prevailing rate as a ground of enhancement would tell unfairly on zemindars. Your conclusions on the point should, if possible, be supported by practical instances of the hardships which now may be found to flow from the existence of the rule, or which would probably ensue from its abolition.

10. Then, as to the extent to which enhancement of rent may be had under the Bill as it stands, the changes proposed are of the most material importance. You will observe that the Bill provides for enhancement by suit in court, and by agreement under a registered contract out of court. In court, enhancements to the extent of 50 per cent. on the former rent may be had on the ground of the prevailing rate; to the extent of 25 per cent. on the ground of rise in prices or increase in productiveness due to fluvial action; and to an extent which shall not be "unfair or inequitable" on the ground of improvement effected by the landlord. The ground of natural increase in productiveness owing to indefinite causes has been omitted from the Bill, as general experience has shown it to be wholly unworkable in practice. The rent, if enhanced on any of the above grounds by a decree of court, is, by the Bill, made unalterable for 15 years. On the other hand, in case of

agreements for enhancement made out of court, if the term be for seven years, not more than two annas in the rupee increase can be taken, while if the term be fixed for 15 years, the rent may he enhanced to the extent of four annas in the rupee, that is to say, to the full amount which can be obtained in court on the ground of rise in prices, *which is practically the most important ground of enhancement.*

On the broad question of enhancement out of court, it will not, of course, escape your observation that enhancements by private contract have frequently been obtained out of court of such a character as to preclude the belief that the raiyats either were free agents or knew what they were doing in agreeing to them. On the other hand, it has been stated that the equalization of the limits of enhancement in and out of court tends to discourage litigation, and, as an abstract principle, any arrangement which would bring the parties together to settle such questions between themselves, without the intervention of the courts, would be a great gain. Having due regard to both aspects of the case, an expression of opinion is required whether enhancement should be allowed out of court, in cases of increased prices or fluvial action, *to the same extent* as in court, where the landlord's claim in all its bearings would be subjected to the closest examination under a judicial enquiry.

Generally, then, the Lieutenant-Governor hopes that your attention will be specially directed to the limitations on enhancement, and that you will carefully consider whether they are appropriate, or whether a more uniform proportion of increase is not desirable. The absence of a definite limit to enhancement on the ground of landlords' improvements is noteworthy, as is also the absence of any provision for deducting the increased cost of cultivation before an enhancement is decreed on the ground of a rise in prices. These are important questions (the latter especially so), and should be examined with careful scrutiny.

11. It only remains to bring prominently to notice one other point on this subject of enhancement of rent, namely, enhancement on re-letting [section 42 (1)]. You will observe that the provisions of Chapter VI place no limit on the rent which may be demanded from an on-occupancy raiyat on his first admission to the holding, while the check imposed by section 60 (9) on enhancements demandable after admission seem to be of doubtful efficacy, as it might be held that, when the initial rent is fixed above the prevailing rate, the only limit to a future enhancement of it is the 50 per cent. prescribed by the section. I am later on to call your attention to the question of non-occupancy rents as a most important portion of the Bill; but in this connection I am to point out to you that, as the Bill now stands, and putting out of sight for the moment the interaction of one class of rents upon the other, the non-occupancy raiyat's rent may be raised to a much higher figure than the rent of the occupancy raiyat can. This is, as far as the Lieutenant-Governor knows, a novel principle which it is now for the first time proposed to introduce into the land law of Bengal, and it is requested that you will very carefully consider it in all its bearings. It will also not escape your notice that by section 42 (1) this higher figure, with a still further addition of four annas in the rupee, can be made the initial rent which a settled raiyat may be called on to pay for land which he desires to cultivate. It must be remembered that, through the operation of the pre-emption clauses of the Bill (if they are retained), and through the falling in of tenancies owing to raiyat's deaths or desertions of their holdings, a very considerable quantity of *raiyati* land does yearly fall into the hands of landlords, who, under the provisions of this Bill, may deal with it in the first instance under Chapter VI, and let it to non-occupancy raiyats at rates above the prevailing occupancy rate. These lands might subsequently be let to settled raiyats of the estate or village at further enhanced rates, and so become occupancy lands, the enhanced rate payable for which would be available as evidence to raise the hitherto prevailing occupancy rate of the village. Having regard to all these points, the vast importance of the effect on the prevailing occupancy rate of section 42 (1) becomes at once apparent. The question then has to be decided whether it is requisite, in the interests of the landlords, just to the great body of occupancy raiyats, or desirable in the

general interests of the country, that the scale of occupancy rents should, over and above the grounds of enhancements specified in section 43, be also exposed to the disintegrating and enhancing effect which the provisions of section 42 (1) are calculated to produce. It will be observed that, under the Bill as it stands, there will be classes of occupancy lands at the old prevailing rates; classes of new occupancy lands at rates [framed under sections 42 (1) and 60 (9)] higher than the old prevailing rates; and classes of non-occupancy lands held at rates varying from, but mostly higher than, either of the above rates. The tendency in all these cases will be to level up rents to the highest point—a tendency which will be complicated by the restrictions on enhancement of rents of various classes of raiyats holding these lands. Upon these facts you are requested to say, with reference to the circumstances of your division, whether there is any danger of intricate and costly litigation resulting from such a state of things as the Bill seems calculated to introduce. You will observe from paragraph 12 of their letter that the Government of India have doubts as to the dangerous effect of section 42 on occupancy rates; and that His Excellency the Governor-General in Council has expressed a desire for the Lieutenant-Governor's opinion as to whether the anticipated danger is real, and if so, in what way it might best be met. The Lieutenant-Governor has no doubt the danger is real, and that it cannot be met by concentrating attention on the occupancy raiyat alone. This matter will be dealt with more fully under Chapter VI, relating to non-occupancy raiyats.
